This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

REPORT OF SUPERINTENDENT OF DOCUMENTS.

OFFICE OF SUPERINTENDENT OF DOCUMENTS,
GOVERNMENT PRINTING OFFICE,
Washington, D. C., October 1, 1895.

SIR: The provisions of the new printing law, directing that the accumulations of public documents in the several Executive Departments be turned over to the custody of a superintendent of documents, would be meaningless unless an improvement in the method of storing and arranging such accumulations was intended to be made. For various reasons, mainly, I suppose, beyond the control of the officers in charge, many thousand volumes had for many years been so stored that they were inaccessible for use, distribution, or sale, and were going to decay because of dampness, insects, etc. Some new device was a necessity, if anything was to be gained by the transfer of the accumulated documents. So far as I know, there was no precedent for handling just such a literary stock, consisting, in the first place, of a great many different kinds of books, and, in the next place, of a great many duplicate copies of many of them, all of which ought to be as readily accessible as the contents of a well-catalogued library.

After some consideration I devised a sort of combination of library "stacks" and storage "bins," of which 78 have been built, containing 2,340 bins, each of which will hold from 75 to 300 books, according to the size of the volumes, giving room for more than 300,000 documents, at a cost only about a fifth as great as that of shelving of equal capacity. These answer perfectly the purpose of classified storage for which they were designed. But they cover a great area, and to make their contents immediately and surely available a key was needed. This was provided in a library exclusively of public documents, to contain one copy of every publication of the Government of which any duplicates were in my possession. When this library has been properly classified and catalogued, its shelves will unlock the treasures of the public documents and make all their contents immediately and practically available for the uses of the officers of the Government and the public at large.

This seems a simple and easy solution of the document problem. That it is, however, not quite so simple as it seems, may perhaps be inferred from the fact that it has not sooner been adopted. As a matter of fact, it involves an enormous amount of labor, and it needs to be

skilled labor. Correct cataloguing of publications is a work requiring a high degree of skill and accuracy, and the cataloguing of public documents is the toughest problem that cataloguers have to encounter. Many have tackled it, some more successfully than others, but it is an open question whether an absolutely successful effort at a general catalogue of public documents has yet been made, even on a small scale.

In the pursuit of the plan I have outlined I soon found that a fragmentary library catalogue, covering only such documents as I happened to have duplicate copies of for sale, would not at all meet the demands of the case. The inquiries which are already coming to this office from every part of the country require, for their answer, information as to all documents of the Government, recent and ancient, and if these documents can not be furnished by this office, then the inquiry is, Where is the next most likely place to get them? If they can not be had anywhere, then, Can they be consulted and their information gleaned in the document office?

To enable this office to do the work which public officials and the libraries of the country and the general public expect and require, it should have a full set of the public documents from the beginning and have it thoroughly catalogued. To make such a collection means great and continuous vigilance in collecting and labor in cataloguing. I believe it is still possible to make a substantially complete collection, and to do it much more speedily than might at first thought seem practicable. Two or three years of active effort in this direction, with the opportunities which this office has for interchange with libraries and collectors, would work wonders, and if it could be supplemented by the use of a small appropriation for the purchase of such rare public documents as are not to be otherwise obtained, success might be predicted with a good deal of confidence. Nothing need be said as to the value of a complete and well-catalogued library of public documents, so stored that not only the library, but also all the existing duplicates, should be readily accessible. Such a collection would be one of the literary and historical treasures of the Government and of the country. Every day's delay increases the doubt and difficulty of making such a library.

This is a very brief description of what I venture to believe is really a comprehensive and effective plan for making the public documents as accessible and useful as any other class of literary publications, instead of leaving them, as they now are, a riddle and a puzzle not only to the unlettered masses of the people, but even to most trained librarians and literary workers.

No very great progress has been made with this plan, for several reasons. The bins have been built, and many thousand books have been received, cleaned, assorted, and placed in them; but the library which is to be the key to their contents has been delayed by several causes. In the first place, I was entirely unable to find anybody who

could tell me how many volumes I must provide shelf room for in order to make as complete a collection as possible of public documents. Only one recognized authority on the subject ventured an opinion, and he, when I told him I had made up my mind to provide for 10,000, predicted that I would never be able to find so many different volumes. However, that amount of shelving was provided, and it had not been up a fortnight before it was evident that it would not be sufficient. It was decided to increase the capacity of the library 50 per cent, but there has been delay in securing the additional fireproof shelving, and that has been one cause that has hindered the library organization.

Another and a more powerful cause has been the preparation for publication of the various catalogues which the law requires this office to prepare.

CATALOGUES FOR PUBLICATION.

When the new printing law was originally introduced, early in the first session of the Fifty-second Congress, it provided that the superintendent of documents should make an annual catalogue (or "comprehensive index") of public documents, beginning with the Fifty-third Congress. Had the bill then become a law the work required under this provision would have been done after the law supplying the material with which to do it had become operative, and the cataloguers could have kept abreast of the Congress and have had their work ready for issue soon after the adjournment. But the law did not pass till the third session of the Fifty-third Congress, and the provision as to when the cataloguing should begin stood then just as it had when the bill was first introduced. Thus the cataloguing started two years behind, and covered a period during which there had been no law directing Department officials or the Public Printer to furnish the material to be catalogued. Not only was the time in which to do the work thus very much limited, but the cataloguers were dependent on the courtesy of public officials for copies of the documents which had been published in the years 1893 and 1894. Such courtesy was, however, found to be bountiful and generous, and it is believed that but few of the publications of the period covered by the life of the Fifty-third Congress have been withheld.

But courtesy could not supply the lack of time. The work of cataloguing the documents published from March 4, 1893, to June 30, 1895, for which a year would not have been a day too much, was crowded into little over four months, and to accomplish it in that time the force which had been assigned to the work of making the library and its card catalogue had to be pressed into the printed catalogue service. This is the chief reason why the library work is less advanced than it was hoped it might be by this time.

Cataloguing is the worst kind of work to hurry, and if defects shall be found in the catalogue volume of the documents of the period of the Fifty-third Congress it may be set down as a certainty that they would

have been less numerous if the time in which the work was done had been more adequate to the task. For accuracy in recording minute details plenty of time must be taken, and cataloguing is wholly the recording of minute details.

The plan on which it is proposed to pursue the cataloguing of the public documents contemplates that the force employed on the catalogues which are by law required to be printed shall begin at the Fifty-third Congress and work forward, keeping pace with the future publications of Congress and the Departments, and issuing an annual volume of the "comprehensive index" promptly following the adjournment of Congress each year. At the same time it is contemplated that the library force shall begin at the Fifty-second Congress and catalogue backward, going as far as they can find anything to catalogue, and thus making the two branches of the cataloguing work connect with and supplement each other. The catalogue of the public documents printed during the period from March 4, 1893, to June 30, 1895 (being the "comprehensive index" provided for in section 62 of the act providing for the public printing and binding and the distribution of public documents, approved January 12, 1895), is at the date of this report substantially complete, but it must have thorough revision, and it may therefore be some weeks before it can be sent to the printer.

The Monthly Catalogue provided for in section 69 of the act hereinbefore referred to has been before the public since early in August, and has been well received. As the law was approved in January, and as the monthly catalogue of public documents which had been issued by private citizens for ten years past was discontinued with the close of the year 1894, it was deemed best to begin the new catalogue with the calendar year 1895. Accordingly the first number was made to contain (so far as they could be collected) the titles of the documents printed during the month of January, 1895, and the successive numbers have been issued as rapidly as possible, each number cataloguing the publications of a calendar month. The numbers for January, February, March, April, May, and June have now been printed, and it is hoped that by the 1st of December the whole number up to that time will have been published and that thereafter the catalogue may appear early in each month with a full list of the publications of the preceding month, as contemplated by the law.

The successive monthly issues have been sent to the Members of the Fifty-fourth Congress, to all the Departments, bureaus, and offices of the Government which issue public documents, to the officers of the Engineer Corps, United States Army, to the State and Territorial libraries and the libraries on the designated depository list, and to those citizens who have asked for them. Of these latter there are at this date about 600, and they represent every part of the country and several foreign countries. As the edition of the Monthly Catalogue is small and the demand for it promises to be large, it was thought

advisable not to make up a list of people to whom to send it who had not asked for it, and who might not care for it when received. Beyond the foregoing list, very few copies have been sent except to those who had asked for the publication, and who, it was therefore assumed, would surely be interested in it.

I think it reasonable to suppose, from the character of the letters received, that the Monthly Catalogue has tended to increase the sale of documents in many of the bureaus and offices. I take room to quote only a couple of these letters as samples. A Slatington manufacturer writes:

> I find it very useful, and am much pleased with the character of its get-up, well understanding the difficulties you have to meet and overcome.

A Pittsburg civil engineer writes:

> I find it invaluable, and have been enabled by its means to purchase many books and papers which I would have hesitated to ask for without sending proper compensation. Let the good work go on.

The consolidated index, to include only the Congressional documents, has not yet been issued nor any work done on it. This office was not organized at a sufficiently early day to undertake such an index of the documents of the third session of the Fifty-third Congress with full promise of success, and it was accordingly thought advisable to wait until the Fifty-fourth Congress began its work and then start at the beginning of that Congress and try to keep up with the current issues of documents from day to day.

DISTRIBUTION TO LIBRARIES.

While the making of catalogues and the creation of a complete document library seem to me to be the most important functions intrusted to this office, yet the distribution of the public documents to the public libraries of the country, where they are made available for the uses of all citizens, is of hardly less value and responsibility. The list of designated depository libraries was created under authority of sections 501 and 502 of the Revised Statutes, and nominally consists of one designated by each Representative in Congress, one named by each Senator, one specially designated by statute (the Antiquarian Society, of Worcester, Mass.), and the official libraries at each State and Territorial capital. To these were added, by the act of January 12, 1895, the libraries of each of the eight Executive Departments and of the Military and Naval academies. If all the designations were full the total would be 507, but so many of the Congressional districts have remained unsupplied through the failure of their Representatives to make a proper designation that the total has stood at about 420. The list as it stands at present is printed as an appendix to this report and numbers 419. (See Appendix D.)

Under the old law the number of copies of the Congressional documents furnished to supply this list was 420 of the Senate documents

and 470 of the House documents. Just why it should take 50 more of the House documents than of the Senate documents to supply the same list I am at a loss to understand, and whose brilliant idea it was that the volumes should be supplied in these unequal proportions I have been unable to discover, but the effect of its working during a series of years was brought to my attention when I began to receive the accumulations of documents from the Interior Department. Hundreds of boxes containing sets of the House documents for twenty years past came to hand, but the Senate documents of the same years were in nearly all cases entirely lacking. The rule of supplying 420 for the Senate and 470 for the House is still observed, but will cease when the publication of the documents of the Congresses preceding the Fifty-fourth has been completed. Under the new law the supply to this office for distribution to the depository libraries and for sale is directed to be 500 copies. Even this number will not be sufficient if all the Representatives in Congress exercise their right to name a library for their districts to receive the public documents. In view of the authorization given to this office to sell documents and the importance of preserving some stock of duplicates against future demands, it is probable that 600 would be a more suitable number to send to this office in the future, and I respectfully ask that legislation for that purpose be recommended.

It has been held that the intention of the law was that a library once designated as a depository should remain on the list until removed for suitable cause, such as failure to care for the books and make them available for public use or persistent refusal to acknowledge the receipt of the books sent. The reason for this continuance of the libraries on the list is obvious. In no other way could sets of the public documents be accumulated. If the designations were to be changed whenever a new Representative came in, many libraries would have comparatively useless fragments of the document set, and no complete collections would exist anywhere.

By the new law the superintendent of documents was directed to investigate the condition of the depository libraries and strike from the list those not college libraries which had less than 1,000 volumes other than public documents or had ceased to be maintained as public libraries. The investigation has been made by sending blank forms upon which the librarians were asked to answer questions as to the number of volumes they had other than public documents, the number of public documents, whether they were catalogued and classified, whether the documents were open to the public for reference and circulation, by what means the libraries were supported, what hours they were open, what number of duplicates of public documents they had in their possession, etc. When librarians failed to respond to repeated appeals the final step taken was a letter to the postmaster of the town where the delinquent library was situated, asking for information. In only half a dozen cases was this step necessary. As a result of persistent effort all

the other libraries now remaining on the list were heard from in some form or other, and up to this date none has been removed from the list for failure to communicate with this office. The few removals that have occurred have been from other causes, and in each case the Representative of the district in which the removed library was situated has been notified and asked to designate another library as a depository of the public documents.

In considering the matter of removing libraries from the depository list for failure to have at least a thousand books other than public documents, the exemption from the effect of this provision granted by the law to college libraries has been construed to cover school libraries of all classes. If it were not so extended, but were strictly enforced against the libraries of all educational institutions below the grade of colleges, a large number of public and high-school libraries would be excluded altogether from the receipt of the documents. In many cases this would be a hardship, for in new and small towns the public documents are often the chief if not the only source of supply of books other than school text-books for the school libraries. In a pinch public documents are better than no books, though a library altogether made up of them can not be considered exhilarating literary fare for school children. It is a pity that these school libraries, which have small facilities for caring for books and small use for those of a political or statistical character, should be put upon the same list and compelled to receive the same embarrassingly large number of documents that are sent to the great libraries in the large cities and at the chief universities. There should be a discretion lodged somewhere to send to these schools the books they want, and ask for, and can use, and not compel them to take those for which they do not ask, which they can not use, and for which they can not even provide proper shelter and care. I have, in fact, without any special authority to do so, exercised a certain discretion in this matter by making up a supplementary mailing list, on which are placed the names of certain schools which stated that the whole number of documents was a burden too great for them to bear, while certain publications of a scientific and educational nature they were desirous to have. Only the documents they have especially asked for are sent to the libraries on this list. It is not, however, a long list, but if the libraries could be carefully canvassed on this head no doubt the list would be much extended. It is evident without argument that the documents would be much more highly appreciated if only those were received which could be made useful. The profusion with which public documents have been and are furnished to those who do not want them, as well as to those who do, has obviously had much to do with the unfavorable opinion concerning them that is entertained by many people.

I am glad to be able to report that this contemptuous opinion is not generally shared by the libraries of the country. In a statistical

circular sent to all the depository libraries, this question was asked: "Is it your desire to have your library continue to receive all Government publications to which it is entitled, or do you wish to discriminate in favor of special reports? If the latter, enumerate such reports." In a great majority of cases the reply was that the library wanted all the public documents it could get, and many expressions of appreciation of the value of the documents were appended. The larger and better the library, the more sure it was to ask for all the public documents without exception.

An important change in the distribution to libraries will be made by the new law. It has not yet taken effect, but will do so in relation to the documents of the Fifty-fourth and subsequent Congresses. Section 54 provides that "all of the 'usual number' shall be printed at one time," and that "in binding documents the Public Printer shall give precedence to those that are to be distributed to libraries and to designated depositories." Heretofore only that part of the "usual number" known as the "up number," which is the number sent up to the Capitol in unbound form, has been printed when the various documents were put to press. The remaining part of the "usual number," which is known as the "reserve," has been printed at a later time, how much later depending on the condition of the work in the Government Printing Office. If that vast establishment has been pressed with orders for immediate delivery, the printing of the "reserve" has been delayed. Frequently this delay has been great, extending not only to months but to years. As the "reserve" is the source of the library supply, this matter is of great importance to that large part of the public which depends on the public libraries of the country for its knowledge of the public documents. When the "reserve" is all printed the first time the forms of the public documents are put to press, and when the first volumes of the "reserve" that are bound become available for library supply, the libraries will receive their books, always months, and frequently years, earlier than has been the case hitherto. This is a matter of the first importance. A book which is of the utmost value if it can be received promptly may be of little value or even of no value at all if it can not be had until six months or a year or two hence.

It was evident to me at once that if these new provisions of law were to be of the expected value there must be a radical change in the method of forwarding books to the libraries. Heretofore it had been the custom to hold the volumes as received from the Printing Office until enough had been received to give each library a mail sack full, which was from 26 to 28 volumes. This took on the average three months, and caused the books to be withheld from the libraries for about that time after they had been printed and bound. As soon as the distribution came into my hands, I began sending the books forward singly as fast as I received them. After this had been going on

for a few weeks, I sent to the libraries a circular of information as to the document service, in which, among other things, I asked them for an expression of opinion as to the change in the method of distribution. There was a large number of replies, only two of which expressed preference for the old system, and one of these afterwards withdrew that preference. Several selections from the letters of prominent librarians are attached to this report as Appendix B. They indicate that the changes of law and practice which will result in an earlier delivery of the public documents in the libraries of the country will be received by librarians with the liveliest satisfaction and will be of great benefit to the public.

Since the new method of distribution was put in force the depository libraries have received a new public document almost every day. Thus this office keeps in constant touch with them all, and nearly all are prompt and businesslike in returning the receipt postal card which is inclosed in every volume.

It is contemplated by the new law that the depository libraries shall receive many more public documents hereafter than had formerly been sent to them. The latest issues of the pamphlet laws, the Statutes at Large, and the bound volumes of the Congressional Record have been sent to them recently. These publications have not formerly been sent to the libraries. By section 73 of the new printing law it is provided that the Secretary of State shall cause to be printed as many volumes of the Revised Statutes and Supplement No. 1 of the same as will supply the depository libraries and certain courts, etc. It is the evident intention of the law thus to give the libraries a full series of the permanent laws by supplying the Revised Statutes to 1891 and the Statutes at Large thereafter. This would have been accomplished had the printing bill become a law during the Fifty-second Congress. As, however, the law did not pass till the Fifty-third Congress, the existing provisions of law will leave the libraries without the laws of the Fifty-second Congress. The break in the set may be supplied by supplemental legislation authorizing the supply to the libraries of either volume 27 of the Statutes at Large or Supplement No. 2 of the Revised Statutes.

Section 58 of the new law has this provision, which has not yet been acted on:

> Of all publications of the Executive Departments not intended for their especial use, but made for distribution, 500 copies shall be at once delivered to the superintendent of documents for distribution to designated depositories and State and Territorial libraries.

Under this provision no copies have yet been supplied to this office, and I presume the reason is that it presents considerable difficulties of interpretation. Shall 500 extra copies be printed for this purpose, or shall 500 copies be taken from the Department editions? If the former, considerable expense will be incurred; if the latter, the Departments

might often be embarrassed. When this clause comes into operation, under either interpretation, the libraries will receive a largely increased number of publications, mainly pamphlets, but often of great and timely interest.

CLEARING HOUSE FOR LIBRARIES.

Mr. John G. Ames, as superintendent of documents in the Interior Department, devised a plan of clearing documents between libraries that proved of general benefit. I have been asked by several librarians to continue it, and I needed no urging to agree to do so, as its advantages are obvious, and it is only through this office that such a plan could be worked. The depository libraries receive from this office only one copy of any public document; nevertheless they accumulate great numbers of duplicates. This results mainly from the favor of Members of Congress, who apparently seldom stop to inquire whether a library to which they wish to send a book is a designated depository and therefore sure to receive the same book from another source. Many of the depository libraries are also on the list of the Smithsonian Institution and various bureaus, and receive their reports first in cloth and afterwards from this office in sheep. In some cases these duplicates have been accumulating for many years, and among them are found some of the earliest publications of the Government. Many of the libraries, while having duplicates of some documents, have no copies at all of others, making breaks in their sets which they are desirous to fill. Other libraries may have duplicates of those which the first named are lacking and themselves be lacking those of which the others have a surplus. This office undertakes to receive the duplicates from those libraries which wish to be relieved of them and to supply the deficiencies of those which have broken sets. To enable this to be accomplished with ease and certainty, Mr. Ames compiled a check list of public documents on which librarians might indicate by a simple check mark the documents they lacked to complete their sets. The first edition of this check list is exhausted. I have a second and considerably enlarged edition of it in press. It will make a volume of considerably over 200 pages, packed with information relating to the public documents, and I hope will be found useful, not only by librarians, but by all who have occasion to consult public documents.

A NEW IDEA CONCERNING GRATUITOUS DISTRIBUTION.

The number of duplicates which accumulates in the libraries is so great—one library recently reporting as many as 5,000—that one can hardly become conversant with the facts without reflecting whether the system of distribution of public documents to citizens in general might not be improved. Suggestions concerning it do not properly come within my province, but one idea that has come to my notice seems to have in it at least the germ of an improved system, and I am therefore

encouraged to mention it here. It contemplates doing away with the direct gratuitous distribution of books by Members of Congress and other officers of the Government, and substituting the distribution of blank orders for books, to be filled up by the recipients with the names of the books desired, and then forwarded to one of the document rooms, where the order would be filled and the book sent to the proper address. An allotment of these blank orders might be made as readily as an allotment of books, with the advantage that if they were not used either by the Member or by the constituents to whom they were sent, then little loss would be incurred. The plan would have the advantage also of enabling the constituent to get the book he might want, instead of having sent to him some volume for which he did not care. Most constituents would probably appreciate as highly the compliment implied in the gift of an order good for any book published by the Government which they might desire as they now appreciate the gift of books which are of no possible use to them. There are citizens who would be glad to receive a volume of the Chinook texts or the Comptroller's statistical report on the national banks, but to the average citizen the compliment implied in the gift of these and similar technical volumes is dubious. The sending of orders for books instead of the books themselves might cost the sender some trouble in answering inquiries and supplying catalogues, but if a million or two were saved to the Government that fact might be accepted as an offset. The probability is that orders to twice the number of the books now printed might be sent out, and that half the present number of books would supply the demand thus created. Perhaps the plan is not practical, but it has seemed to me worth at least mentioning for the purpose of bringing it to the attention of all who may choose to consider it in connection with the great and growing cost of the Government printing and the admitted need of some improved plan of accomplishing the same end.

DISTRIBUTING THE RECORD.

One provision of the new printing law directs me to distribute sets of the Congressional Record to eight libraries in each Congressional district and Territory on the designation of the Representatives and Delegates. This was taken to begin with the third session of the Fifty-third Congress, and the designations to be made by the Members of that Congress. I have succeeded in getting designations from 201 Members, a considerable percentage of whom, however, failed to designate the full number of libraries which they were entitled to name. I very much doubt whether there are many Members who have in their districts as many as eight libraries of a kind that can make profitable use of a set of Congressional Records. If the libraries were to be found, I do not see how this law would give them sets of the Record—and fragments of it have little value for library use. Many schools and nominal libraries which never had a volume of the Record will receive

the four parts and index for the third session Fifty-third Congress—and will never get any more. The designations for the distribution of the set for the next session will be made in many instances by different Members, and of course many libraries not now named will then be named, while many that are now named will then be left out. I would respectfully recommend that if it be thought advisable to continue this distribution of eight sets of the Record to as many libraries in each district, the same rule that is now followed in relation to the designated depositories and the Naval War Records be adopted—namely, that a library once designated remain on the list until removed for cause. Only in this way can continuous sets of the Record be secured by the libraries.

UNIFORM TITLES.

A most salutary provision is that found in section 81 of the new printing law, as follows:

> Every public document of sufficient size on any one subject shall be bound separately and receive the title suggested by the subject of the volume, which shall be the chief title, and the classification of the volume shall be placed on the back at the bottom, as simply indicating its classification and not as a part of the title.

This is not, however, a provision that will execute itself, and unless it is made the specific duty of some employee of the Government to attend to its execution it may fall short of accomplishing the good in the way of simplifying the use of the public documents that is expected of it. I can not learn that it has hitherto been anybody's especial duty to furnish the inscriptions for the backs of the public documents, technically known as the "binder's titles."

I do not know that it is even anybody's specific duty to furnish the title pages for the Senate and House documents and reports. When the title page is found to read, as it does in hundreds of Congressional documents, "Index to the Executive Documents of the House of Representatives, in 39 volumes" (or whatever the number of volumes for the session may be), instead of "The Executive Documents of the House of Representatives, in 39 volumes," there is nobody to hold responsible for the blunder. An index in 39 volumes is such an evident absurdity that it might be supposed a title page proclaiming the existence of such a series would be at once condemned and its repetition forbidden, but it can be found in the documents for many years. From the Forty-fourth to the Forty-ninth Congress, inclusive, it appeared in nearly all of them.

NOTATION AND TERMINOLOGY OF THE CONGRESSIONAL SET.

The question how best to do away with the bewildering congeries of volumes, numbers, and parts that now makes the set of Congressional documents a wonder and a terror to the investigator, and what to substitute for it, is an inviting subject. The absurdities of the present notation are so patent that the neophyte is likely to think it must

be easy to substitute something less complicated and more intelligible. A study of the subject will not lessen one's idea of the absurdity of the present method, but it is likely to increase one's idea of the difficulty of providing an acceptable substitute.

Of course the present system was not devised by anybody. There was never anybody who could have devised it. Like Topsy, it "jist growed." In the infancy of the Government, when its publications were few and small and the reports of its public servants were meager, single numbers and single volumes were sufficient for all needs. As reports and transactions of all kinds became more numerous and more voluminous, the expedient of dividing documents and volumes into "parts" was naturally enough resorted to by printers and binders to overcome mechanical difficulties. The pity is that printers and binders were permitted to do this without a scholarly supervision that might have protected the English language from such violence as it has suffered at their hands. Nowhere else is a set or series of books called a "volume." Nowhere else is a separate book printed in the English tongue called a "part." The terms used in describing the publications of the Government have no place in the dictionary, and their meaning in this use is totally different from their meaning in the general usage of the people. This nomenclature and notation perhaps reach the height of their absurdity in the series known as the "Message and Documents," which, though it comprises a score of volumes, has been all called House Executive Document No. 1. This No. 1 is, however, divided into eight parts, and several of these parts are divided into volumes, which are again divided into parts. Thus volume 4 of the House Executive Documents is part 2 of Document No. 1, and it is also volume 2 of part 2, and it is also part 2 of part 2 of volume 2. Its full designation is part 2 of part 2 of volume 2 of part 2 of No. 1, and volume 4. The same book is at the same time three parts, two volumes, and one number. Volume 14, House Executive Documents, goes a step farther, having seven designations, namely, part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, and volume 14. Of course all these designations are never put into practical use. There is probably not a man living who could tell off hand what is the subject-matter of part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, volume 14, of the House Executive Documents of the Fifty-first Congress, second session. One might as well try to commit to memory the lettering on a Chinese tea chest as charge one's mind with such a rigmarole.

In no other literary nomenclature in the English language is it found necessary to give one book more than two designations—the series and the volume. In the Congressional document designations the good English words "series" and "set," which mean a consecutive collection of volumes, have been discarded, and the word "volume," which means only a single book, and can not be made to mean anything else, has been used to mean "set" and "series." This would be confusing

enough, but the confusion is increased by the fact that at the same time the word volume is also used in its correct meaning, and simultaneously the word "part," which in other literary terminology signifies a portion of a volume, is used to mean a whole volume or distinct book.

If each separate book were to be called a volume, and each set of books were to be called a series, and each so-called part were to be a part of a book and not a whole one, then the people in general would understand the public documents much better than they now can. Then if each book were to appear in only one edition, bearing always the same title on its back and having always the same kind of binding, the mystery and difficulty of the public documents would substantially disappear. So long as there is a Department edition, and a Bureau edition, and a Message and Documents edition, and an Executive Documents edition, all of the same book, yet all, in outward appearance, totally different, it will be impossible for anybody to understand the public documents without giving to the study of their peculiarities more time and thought than the average citizen can afford.

The improvement of having the same book always bear the same title on its back is provided for by section 81 of the printing law, but the improvement of making only such use of the terms "number," "series," "volume," and "part" as will accord with the general usage, and therefore be intelligible to all, is difficult, because of the extreme diversity in the size of the documents. If they were all small, so that several were required to make a volume, or if they were all large, so that each would fill one or more volumes, then it would be easy to devise a logical and consistent plan of naming and numbering; but as many of the documents are very small and many are very large, and the two kinds must be brought under one system, the problem is difficult, if not impossible, of solution. It would be as absurd to call a second sheet of a report or resolution "volume 2" as it now is to call a distinct volume having a thousand or more pages "part 2." I have read the suggestions heretofore made for new methods of naming and numbering the Congressional documents, but it does not seem to me that they meet all the difficulties.

There is ground for a hope that many of these difficulties will disappear under the operation of section 81, which not only requires that the same book shall always have the same title, but also abolishes the distinction between "Executive" and "Miscellaneous" documents, and leaves to each branch of Congress only two sets, to be called, respectively, "Documents" and "Reports." After the operation of this important section has been tested and observed, it will be easier to judge what further reformation, if any, may be needed to make the method of publication of the Congressional documents more coherent and more intelligible to the general public.

CATALOGUING OF PUBLIC DOCUMENTS IN GENERAL LIBRARIES.

I have been moved to talk of this subject, the discussion of which is not strictly within the purview of my official duties, by the communications I have received relating to it from the librarians of depository libraries. I have not canvassed the libraries as to the need of document catalogues, but many of them have written to me concerning it. The peculiarities of the public documents make it difficult to catalogue them, and it is apparent that a collection of documents uncatalogued is about as unwieldy and unusable a sort of literature as a library could well have in its possession. To search for anything in a set of documents without the aid of a catalogue is a hopeless task, except for the few experts who, by years of familiarity with this class of books and by exceptional gifts of memory, have come to know their contents as a blind man may come to know a road over which he travels often. To the blind man it is as easy to travel by night as by day, but people who have eyes must have a lantern. So the great mass of people must have a catalogue if they are to get any good out of the public documents.

Among the questions I have asked of the depository libraries are these: "Are the public documents in your library catalogued?" "Are they classified?" Of the 322 libraries which had answered these questions at the date of this report, 153 claimed that their public documents were catalogued, but it is a moral certainty that with two-thirds of them cataloguing means something quite different from what it means to the trained librarian. Writing down the names or numbers of the documents in a book is not cataloguing, and gives little or no help in finding the contents of the volumes. Many replied that their books were catalogued, but not classified. Of course the best catalogue in the world would be of little use to a library that was not classified on some plan or other. Classification comes before cataloguing, and when a librarian says his public documents are catalogued but not classified, the only conclusion to be drawn is that he does not know what cataloguing is in the modern sense. When a librarian who says without qualification that his public documents are catalogued writes by the same mail, as one did to me, "I have not the means of knowing how many volumes we have, either of Government or otherwise; they are classified after a fashion," I can not believe that his cataloguing is of a kind to be serviceable to those who use his library.

It is not very difficult to tell, from the character of the library reporting, how much weight to give to the report that its public documents are catalogued. Many of the oldest and best endowed libraries in the country, in which one would suppose everything would be thoroughly catalogued as a matter of course, report that their public documents are not catalogued, while many small and struggling libraries, which are not able to maintain any sort of cataloguing staff, report their doc-

uments all catalogued. It is my opinion that, at the most liberal estimate, there can not be more than 50 of the 419 depository libraries which have the public documents in their possession so well and intelligibly catalogued that they can readily find whatever they wish to find in them. How many libraries there may be not on the depository list which have their public documents equally well catalogued I have no means of knowing, but I think there can not be many, for most of the large libraries of the country are on the depository list.

Many librarians, who are more modest because better informed, report to me that their public documents are "crudely" catalogued or "partly" catalogued. Others, more modest still, confess their inability to grapple with the work. The president of a normal school writes:

This is a school. It has a small library for the use of students. We do not see any value to us in the volumes we receive from you, and yet I have not felt at liberty to stop their coming, as somebody wiser than I may make them useful in the future. The volumes are all cared for, but not labeled or catalogued. I hope you will not conclude from what I write that I do not think these documents very valuable. The trouble I have is to catalogue and label them in a way to utilize them.

A State librarian writes:

The books have never been catalogued, so it is impossible for me to give the number.

The librarian of an Ohio college says:

As with other librarians, the matter of how best to catalogue and classify these documents has been a matter of perplexity. We would hail with delight any help in this.

An excellent free public library in California reports:

As to the matter of cataloguing public documents, to do justice would cost more than our annual appropriations.

From a long-established public library in Michigan comes this testimony:

If only some uniform system of cataloguing the contents of these books could be devised, both simple and comprehensive, what a working factor they would become immediately!

There have been many similar expressions in my large correspondence with the libraries, but I have been more fortunate than is often the case when a subject of general complaint is the topic. I have received not only the complaints but the cure for them. It came from Mr. M. D. Bisbee, the librarian of Dartmouth College, who said in the briefest possible form of words at the bottom of a letter:

I hope to see the day when the Government will send complete catalogue cards with each publication.

To my mind, this brief suggestion promises more than anything else that has been proposed in the line of making the public documents accessible, intelligible, and useful to the public. If catalogue cards for each volume were to be inclosed in the volume itself when it was mailed, it would at once on its arrival become available for the use of the library

and the community in which the library was situated. If the library had no card catalogue it would be encouraged and instructed to make one, and if it never acquired any other cards it would by merely saving those received with the documents soon accumulate a catalogue of that part of its library at least. There would be few libraries that would not have pride and care enough to arrange in alphabetical order the cards that were received, and that would be all the treatment they would need to make them as available in a school library in a small village as they could be in the richest library in a great city. By this means also a uniform and recognized method and standard of cataloguing public documents might be established, to the great advantage of all libraries.

In no other way, I believe, could the public documents be made so immediately and so completely available for the use and instruction of the people. The cost of it would be comparatively small. The cataloguing is required to be done now, and the only additional cost would be that of printing the cards, while it would save the cost of cataloguing public documents in the libraries where it is now done. A library without a catalogue is like a ship without a rudder. To equip the rudderless literary craft of the country would be a great and good work. I know of no other equally salutary that can be done at so little cost. It could be reduced to a minimum by printing the entries in sheets, on thin paper, and leaving the libraries to paste them on cards.

It is also an idea that is capable of much expansion to good advantage. The Department of Agriculture is now selling sets of catalogue cards for certain series of its publications. The same course might be followed by this office in cataloguing the public documents of past years for its document library. Instead of making at first a general catalogue it might take up some series, as the publications of the Treasury or the Fish Commission or the Abridgment of the Message and Documents, and first complete that, and when completed offer for sale to libraries and collectors printed sets of its catalogue cards for that particular series, to be followed by other series until the whole work was done. In this way the library work proposed to be done in this office could be made available for the whole country, and if catalogue cards were also sent out with each new current volume of documents in time the old catalogues and the new would meet, and the libraries of the country would be supplied not only with the public documents of the Government, but also with the key to them, without which their value is sadly limited and circumscribed.

HOW A LARGE SAVING MIGHT BE MADE WITHOUT INJURY TO ANY INTEREST.

The new printing law makes a large economy by directing that but little more than half of the reserve volumes shall hereafter be bound. The remaining part of the reserve number, which is intended to supply the needs of Members of Congress for volumes or sets in special

binding, is to remain unbound until the orders of the Members for the special kinds of binding desired shall have been received by the Public Printer. Formerly these volumes were all bound in costly full sheep, and when the Congressional order called for something else the volume was unbound and bound over again—a most wasteful method. This has now been done away with, and the great cost of binding the reserve has been cut in two in the middle. But this is not all the advantage or saving that may be made in dealing with the reserve documents. I feel privileged to speak with some earnestness about this matter, from the fact that of the 582 copies of the reserve number of each of the Congressional documents that are directed to be bound in full sheep, 500 are for the use of the depository libraries and will pass through this office to reach them. It is my opinion that these libraries would be better served by binding the reserve in cloth at a small cost than in sheepskin at a large cost.

I have not directly canvassed the libraries on the subject of binding, but I have received many requests from them that they might have the cloth editions of certain documents instead of the sheep. The subject of bindings is one that is much discussed in the American Library Association, and though the views of the members are by no means unanimous, yet there is a strong majority opposed to sheep bindings, on grounds of appearance, durability, and cost. It is not possible to give absolute demonstration as to the durability of cloth bindings, because the first cloth-bound book is barely 70 years old, and the general use of cloth bindings comes much nearer than that to our own times. But the fact that cloth is much more used than any other binding material is a fact that ought to be convincing as to its utility. I have no doubt the prevailing opinion of librarians and publishers is expressed in a series of articles on binding recently published in the organ of the American book trade, in which it was said:

> Cloth or canvas will prove more lasting than most other materials, with the exception possibly of vellum or the better grades of levant morocco.

In the same series of articles, which is fortified by reference to 96 publications that were consulted in preparing it, this is said of sheep bindings:

> Sheepskin is probably employed more extensively in binding than any other leather, but every book lover abhors it when he sees it in its undisguised form. Sheep, besides soiling easily, is not strong, lacks solidity and durability, and is reduced to a powder (sometimes occasioning explosions) by the action of heat and gas. [Publishers' Weekly, New York, March 23, 1895.]

It may be admitted that for law books, that must have much handling, sheepskin is preferable, and for some medical books the same excuse may be given; but for statistical and scientific works, that remain mostly on the shelves and are consulted only occasionally, the weight of evidence is that cloth is more durable than sheep. On the score of propriety and fitness and appearance there is no argument whatever

to be made in favor of sheep. The Government is the only great publisher that ever thinks of putting scientific, statistical, and historical works into sheep bindings. The Government practice in this respect unfavorably differentiates its publications from all others. By their leather bindings the public documents are made to seem dull, heavy, and forbidding. They seem to be all law books, and in consequence their vast variety of scientific information fails of the full measure of appreciation which is its due.

Cloth binding does not necessarily mean the coarse and ugly black cloth that was for many years used almost exclusively on the public documents. Such cloth is less used than formerly, and many of the cloth bindings now turned out from the Government Printing Office are equal in beauty as well as durability to the best productions of the leading publishers. Such works are the new Yearbook of the Department of Agriculture, the latest issue of the Abridgment, the Catalogue of the Surgeon-General's Library, several of the volumes of the Eleventh Census, and many others. Neither does cloth binding mean that the books must be lettered with Dutch metal, which in a few years will turn black and disappear. The Government binders can use gold leaf and good cloth as well as other binders. I would not recommend cloth bindings on public documents for distribution to libraries if they were to be of the worst pattern that the Government Printing Office has ever turned out, but if they were to be of the best Government Printing Office standard I am confident that a great majority of the libraries would prefer them to the sheep-bound volumes with which they are now supplied. The minority, who might possibly not like the change, would not be in a position to complain, because they receive the books without cost, and librarians can not, any more than other people, look a gift horse in the mouth.

The great consideration in the premises, however, is the cost. As given to me by the Printing Office experts, the cost of binding per volume is from 10 to 30 cents for cloth, with a few exceptional instances where the cost runs up to 50 cents. For sheep, the lowest cost is 75 cents, and from that up to $1.15 for octavos, while for all quartos the cost is $1.50. The recent Congressional sets are bound in a variety of sizes, there being two kinds of octavos and two kinds of quartos. I have estimated that the increased cost of binding in sheep rather than in cloth can not average less than 75 cents a volume. The Congressional set, at least for the long sessions, now approaches very nearly 200 volumes, and probably will soon exceed that number. The number of copies of each of these documents directed to be bound in sheep is 582, or a total for the session of 116,400 volumes. To save 75 cents on each of these volumes would be a total saving of $87,300. If such a sum can be saved annually without injury to any interest involved it would seem a desirable thing to do. This I fully believe to be the case in relation to the binding of the reserve, and if I had the power I

would not have a moment's hesitation in directing that the reserve volumes of the Congressional documents be hereafter bound only in cloth.

Any doubter who wishes an object lesson in the decay of sheep bindings can be supplied with numerous examples at this office.

Much, also, might be said as to the greater promptness with which the reserve could be turned out in cloth. A binder can put up six or seven times as many cloth books in a day as he can of sheep-bound books. Thus, in respect to an early delivery, which is of the utmost importance to them, the libraries which are to be supplied from the reserve would be greatly benefited by a change from sheep to cloth.

There is a temptation to go on and inquire why there should be any reserve at all. When the first cloth edition is in the bindery, why should not the 15 copies for the Senate library, and the 15 copies for the House library, and the 50 copies for the foreign exchanges, and the 2 copies for the Library of Congress, and the 500 copies for the depository libraries, making up the 582 copies which compose the sheep-bound reserve, be bound up at once in the cloth, instead of being delayed for future binding in the leather edition, which, after all, is only the same book in another shape? But perhaps this and numerous other queries which the study of the public documents suggests may most profitably be postponed for the present.

MISCELLANEOUS.

Formerly the Journals of the Senate and the House were supplied in numbers sufficient for all the depository libraries. Under the new law but 144 copies of the Journals for the third session of the Fifty-third Congress were supplied to me, and the law directed that of these 3 should go to libraries in each State. I sent one copy to each of the State and Territorial libraries, and usually the two others to the two largest libraries in the State. In a few instances, where special request was made by historical libraries, this designation was changed. Very few complaints at the loss of the Journals were received from the depository libraries.

The numbering and binding and shelving of the Congressional documents are much confused by the differences in size. As the numbers of the two sizes of documents are irregularly interspersed, consecutive binding is thus made impossible. It does not seem an impossibility to devise means by which all the documents might be printed in a uniform size. It would be a fine thing for the symmetry and regularity and coherence of the set of public documents if this could be accomplished.

It would seem to be almost a necessity that a Government catalogue should record the reports of the United States Supreme Court and the United States courts of appeals, but they are private publications, and no provision is made for supplying them to this office for cataloguing

purposes. As the Government receives several hundred copies for the use of sundry officials, it is respectfully recommended that provision be made by law for supplying this office with a set thereof for its document library and with the current volumes for record in the monthly and annual catalogues.

PERSONAL.

I deem myself fortunate in having been able to secure the services as assistants and associates of such trained experts as Miss Adelaide R. Hasse, librarian, and Mr. John H. Hickcox, Miss Edith E. Clarke, and Mr. William S. Burns, cataloguers. They have all given to the Government more than a perfunctory service, and have shown a commendable zeal and professional pride in endeavoring to make the work of this new office equal to all demands upon it and to all expectations that had been formed concerning it. In fact, all the members of my staff have shown themselves industrious and intelligent workers, and my thanks are due to them all.

Mr. John G. Ames, of the Department of the Interior, has been most obliging and helpful to me, and I feel that a public expression of my thanks is fully his due. I have had to make heavy drafts also on the courtesy of other recognized document experts, and I am happy to be able to say that such drafts have always been honored in full. To the gentlemen who are the heads of departments in the Printing Office I am under especial obligations.

But my warmest thanks and acknowledgments are due to you for the constant aid and encouragement you have given my efforts to organize the service of conserving, cataloguing, and distributing the public documents on a basis of efficiency and economy.

F. A. CRANDALL,
Superintendent of Documents.

Hon. TH. E. BENEDICT,
Public Printer.

APPENDIX A.

Number of books received by the superintendent of documents to October 1, 1895.

From the accumulations in the Departments		134,361
From the Printing Office		21,264
Duplicates returned from libraries		2,570
Total		158,195
Distributed to libraries	21,463	
Furnished to Departments and bureaus to fill files	42	
To individuals	3	
Sold	18	
		21,526
Remaining on hand		136,669

APPENDIX B.

The following are comments of the librarians of some of the depository libraries, chiefly in relation to the earlier receipt of the public documents:

AMHERST COLLEGE.—I take the liberty of writing to express my gratification with the results of your new method of distributing the documents. It is a great advantage to have the volumes sent so much more promptly. I am much pleased with the appearance of your new Monthly Catalogue and find nothing to offer in criticism.

ATLANTA (GA.) YOUNG MEN'S LIBRARY.—The new method of mailing United States documents is highly satisfactory. Books are received in good condition and very much earlier than by the old method.

BOSTON ATHENAEUM.—I am glad to see that the congressional documents are to be delivered earlier than has been the practice under the former administration.

BROOKLYN (N. Y.) YOUNG MEN'S CHRISTIAN ASSOCIATION.—We have been much pleased with the early delivery of documents in single volumes. They reach us in better condition than they formerly did in bags.

BROWN UNIVERSITY, PROVIDENCE, R. I.—The new plan strikes me very favorably. Every volume has reached this library in perfect condition.

BUFFALO LIBRARY.—I hope you have received no two opinions on the plan of mailing single volumes from Washington instead of waiting for documents to accumulate by sackfuls. The new plan seems to me to be so vast a reform that there ought to be no question about it.

CASE LIBRARY, CLEVELAND, OHIO.—We much prefer the present method of sending out the documents as soon as ready. They reach us promptly and in good condition.

CINCINNATI PUBLIC LIBRARY.—The volumes come regularly to hand. I fully appreciate the work you are successfully accomplishing.

DARTMOUTH COLLEGE.—The books come to us in single volume packages in better condition than they did in the sacks. I consider the recent changes a great improvement.

DENVER (COLO.) PUBLIC LIBRARY.—I was at first inclined to protest at the method you have just adopted of shipping public documents. On second thought, however, I believe you are quite right.

DETROIT PUBLIC LIBRARY.—The prompt receipt of volumes is a very great advantage. The long delays in the past have done very much to disgust people who wished to get their information without waiting several years for it.

DOVER (N. H.) PUBLIC LIBRARY.—I am sure that librarians generally will find it, as I certainly do, of great advantage to receive the books promptly. I am very glad of the change.

FREDERICK (MD.) ACADEMY.—The books received by us since the new arrangement have come in better condition than those sent in sacks. We realize to a degree your efforts to help us and shall always be glad to adopt your recommendations and directions.

HARVARD UNIVERSITY.—I have had my secretary look into the matter of the receipt of public documents from you, and his report is very favorable to the present system. They come in good condition. Altogether, the present system is a great gain to us.

HOWARD MEMORIAL LIBRARY, NEW ORLEANS.—The distribution of public documents, volume by volume, is a decided improvement on the earlier method.

ILLINOIS STATE LIBRARY.—We are greatly pleased in receiving the public documents almost daily, and find it a great convenience.

ILLINOIS STATE NORMAL UNIVERSITY.—I am very glad of the improvement introduced into the management of the public documents. We value the Government publications highly.

KANSAS HISTORICAL SOCIETY, TOPEKA.—The books received from you through your new plan of mailing them in single wrappers are received in good condition. Libraries and the public have reason to be thankful to you for your interest and efficiency.

LONG ISLAND HISTORICAL SOCIETY, BROOKLYN, N. Y.—We receive the Government documents in good condition, and think the arrangement of getting the volumes soon after they are issued much more satisfactory than when they came in sacks long after date.

LOS ANGELES (CAL.) PUBLIC LIBRARY.—I take pleasure in acknowledging our appreciation of the new method of document distribution. The promptness with which we receive them is a self-evident advantage. The public show a growing appreciation of our documents, using them constantly. It will solve a great many difficulties, being able to put in their hands the latest report instead of one of several years previous. The documents have come to us in perfect order.

MARIETTA (OHIO) COLLEGE.—The books received in single wrappers are in very satisfactory condition. I promise my hearty cooperation in the matter of making all Government publications of the largest service to the public possible.

MINERS' UNION, VIRGINIA CITY, NEV.—Your new manner of sending by registered mail, singly, copies of all Government publications meets the hearty approval of our board of library directors, as well as my own, for more reasons than one, the principal reason being that we get each publication as fast as printed, and again, the work of cataloguing goes on in the regular routine of business, without involving the rush incidental to the old style of a "sack of books" at a time.

MINNESOTA HISTORICAL SOCIETY, ST. PAUL.—The present method of sending documents singly is far superior to the old.

MISSOURI UNIVERSITY, COLUMBIA, MO.—I like your new plan. We want the books and like the service.

NEW YORK MERCANTILE LIBRARY.—I desire to express my appreciation of the change you have inaugurated in the mode and manner of distributing the documents of the National Government. The receipt of the books so frequently and at so much earlier date than formerly is of very great value. I am much pleased with the change you have made, and take pleasure in commending your action.

NORTH DAKOTA STATE LIBRARY.—The volumes reach us in much better condition than when they were sent in sacks. We seldom received a sack of books but one or more volumes had some broken corners, but have never received one in this condition that was sent in a single wrapper.

OGDEN COLLEGE, BOWLING GREEN, KY.—The books mailed to us in single wrappers have all arrived in excellent condition. We can not say the same of the books that have been sent us heretofore in sack lots, for not unfrequently some of them were more or less injured in transit.

ORCHARD LAKE (MICH.) MILITARY ACADEMY.—You are entitled to both thanks and congratulations for the great improvement you are working in the matter of mailing Government publications to the libraries throughout the country. Your system has my most hearty approval.

OTIS LIBRARY, NORWICH, CONN.—The single volumes of Congressional publications which you are sending in pursuance of a new plan have reached this library in uniformly good condition. The result at which you aim—promptness in distribution—is most important.

PENNSYLVANIA STATE LIBRARY.—I think your plan is a preferable one, as we are thereby enabled to receive the documents earlier, and this in itself is worth the additional trouble placed upon librarians.

PEORIA (ILL.) PUBLIC LIBRARY.—We like your plan of single-volume mailing better than in sacks, and the books are delivered in uniformly better condition.

PHILADELPHIA MERCANTILE LIBRARY.—I am sure the prompt sending of the books will be regarded as a great improvement on the old method.

PIERRE UNIVERSITY, EAST PIERRE, S. DAK.—All books coming under the new plan of transfer have come in good condition in single wrappers, and the intention to secure early delivery is appreciated. I am very glad that your work has been undertaken.

POLYTECHNIC INSTITUTE AND AGRICULTURAL AND MECHANICAL COLLEGE, AUBURN, ALA.—The present system is admirable; first, on account of receiving publications near date of issue; second, because of the excellent condition in which they arrive. The Government documents are much appreciated here, being reference books in many of the departments.

PORTLAND (ME.) PUBLIC LIBRARY.—Under the new system of delivery the Government publications have, thus far, reached us in good condition.

PORTLAND (OREG.) LIBRARY ASSOCIATION.—The documents, as received singly, have come to us in perfect condition. I am delighted with the prospect of an improved document service, and wish you all success with your plans.

PRATT INSTITUTE, BROOKLYN, N. Y.—I can not tell you how much we appreciate the new system of distributing documents. It makes me feel as if there had been a revolution in Washington.

RUTGERS COLLEGE, NEW BRUNSWICK, N. J.—The receipt of the volumes singly has already been of benefit to this library, and the condition of the volumes is much better than formerly.

ST. JOSEPH (MO.) FREE PUBLIC LIBRARY.—The books, under the plan of mailing single volumes, are arriving in good order and condition. I think all librarians recognize the effort you are making to organize the document service and avoid delays, and I for one, both as librarian and in my official position as secretary of the American Library Association, will be glad to cooperate with you in every way possible.

ST. LOUIS PUBLIC LIBRARY.—The prompt receipt of single volumes is certainly more satisfactory than the old method of waiting till a sackful was on hand. The books, thus far, have reached us in perfect condition. Librarians, of all people, should be patient in this matter, for they ought to realize what a stupendous task you have undertaken.

SAN DIEGO (CAL.) PUBLIC LIBRARY.—We are glad to have public documents coming every day. The delay hitherto has subtracted from their usefulness.

SAN FRANCISCO FREE PUBLIC LIBRARY.—Regarding the present method of distributing public documents, as compared with the former system, it does not seem to me there could be any diversity of opinion. Our books are received promptly and in good condition. Furthermore, we have received, under the new régime, certain publications we never before had been able to get. I, for one, take great pleasure in expressing my appreciation of the new law and the manner in which it is being executed.

SOUTH DAKOTA STATE LIBRARY.—The books received from you for the library of this State have been in good condition, and I think that this mode of distributing the documents is better than the former one.

STOCKTON (KANS.) ACADEMY LIBRARY.—The present plan suits me much better than the old one. The sooner we can get the books after they are printed the better.

TEXAS STATE LIBRARY.—I take pleasure in complimenting you on the changes effected by you in the method of distributing Government publications. To have the volumes coming frequently in single wrappers is far preferable to the old way of sending them infrequently in large numbers.

UNIVERSITY OF MINNESOTA, MINNEAPOLIS.—The books mailed in single wrappers come to us in good order. It is a great advantage to receive them so, and I hope there will be no reason for going back to the old way.

UNIVERSITY OF WYOMING, LARAMIE, WYO.—I highly approve and commend the present method of sending out the Government documents one by one, for the reason that it makes it easier for the librarian in the work; the books come much sooner and are hence much more valuable, and it is the very best method of keeping in touch with the publications of the Departments at Washington.

UTICA (N. Y.) PUBLIC LIBRARY.—The way in which the public documents are being sent out at present is far more satisfactory to us than formerly.

WESLEYAN UNIVERSITY, BLOOMINGTON, ILL.—Concerning the delivery of single volumes, I wish to say that the books reach us in perfect condition, and that we are glad to receive them at the earlier date.

YALE UNIVERSITY.—The Government publications in separate wrappers have reached us uniformly in good condition, and with, of course, a great gain in promptness. Now that the printed description is added to the return cards, I do not see what more is to be desired.

The Lyceum Library at Houston is the oldest library in the State of Texas. It was founded while Texas was still an independent republic. The secretary of this venerable library association, Mr. H. W. Nelson, has sent in some original observations concerning the public documents, which have the approval of Mr. William H. Clute, the vice-president of the same venerable library foundation. They are submitted here in the hope that they may excite interest and possibly surprise, but it is hardly to be supposed that all the recommendations made will be adopted by Congress at once:

We take the liberty to respectfully suggest our ideas relative to the distribution, value, and care of public documents. There is no doubt in our minds that the distribution of public documents heretofore has been too promiscuous among persons who did not appreciate their true value. For

instance, we find some valuable public documents in second-hand book stores for sale, thus abusing the generosity of the Government. It has been said that some Members of Congress have in the past disposed of their quota of public documents otherwise than in the manner intended by the Government. Abuses have existed, without a doubt. In order to remedy this defect in distribution we would respectfully suggest that in the future no one but public depositories receive public documents. Others desiring the same should be permitted to purchase the desired publications from the United States Government at actual cost.

For the Government to approximately ascertain the number of any given report or document desired by the public, the superintendent of public documents might issue advance catalogues of the contemplated publications and mail the same to the post-offices throughout the Union with instructions to postmasters to post the same in conspicuous places. The public would then have ample opportunity to apply for any desired documents before the same were published. Under this plan the Government could estimate the exact number necessary to fill the demand.

As to the use or value of documents, we would say that we consider that all documents issued by the Government are of great and especial value, and more particularly those which treat of the agricultural interests and of the scientific departments of the Government and other institutions. But their usefulness might be greatly extended for the benefit of the American people if their scope of information was extended to embrace other topics than those now chiefly dwelt upon, e. g., business methods at home and abroad, the science of government as obtaining among foreign nations, and the ethics of religion and philosophy. Consular reports might include the practical workings and benefits of our missions abroad, concerning which they have heretofore been silent; also, should embrace the political history of American and European nations, together with the causes leading to the rise, growth, and decline of political parties. Also there should be at least one volume devoted to the literature of the country. Also a digest of important news, with expressions of most important newspapers of various political complexions and for different sections of the country.

As to the care of public documents, it would be well, in order that the people might understand and appreciate their value more fully, if the Government would employ some competent person, of literary ability and patriotic zeal, to travel and make an annual tour of inspection of the various public depositories, and see to it that proper care was taken of the documents, seeing that they were accessible to the public, assisting the librarian with suggestions relative to their usefulness, and calling the attention of the public by delivering addresses on their practical and specific value. Then the people would be better educated to receive and appreciate the generosity of the Government; and, in conclusion, we will say that, in our opinion, the distribution of public documents should be extended and their scope of subjects enlarged, and let it be the purpose of the Government to make the public documents as complete a cyclopedia of facts for the public as possible.

APPENDIX C.

In compliance with the law an earnest effort has been made to collect statistical information concerning the depository libraries. Up to the 1st of October 329 of them had furnished statistical reports more or less complete. Of these 43 are State libraries, 154 are libraries of colleges and schools, 58 are privately endowed or incorporated libraries, and 74 are public libraries maintained by taxation. The State libraries have 214,342 public documents, the school libraries have 378,774, the endowed libraries 164,461, and the public libraries 242,132, making altogether 999,709 public documents deposited in the 329 libraries thus far heard from. The 90 remaining depository libraries have undoubtedly enough to carry the total up to a million and a quarter. How many public documents may be preserved in the libraries which are not depositories I have no means of knowing, but as all American libraries have public documents to a greater or less number, and as the whole number of libraries in the country having above 1,000 volumes each was found by the Bureau of Education in 1891 to be 3,084, or eight times as many libraries that are not depositories as libraries that are depositories, the conclusion must be that the number of public documents in the libraries of the country is several millions.

The distribution of the documents by States and Territories in the 329 depository libraries that have been heard from is as follows:

State.	Number of depositories.	Number of documents.	State.	Number of depositories.	Number of documents.
Alabama	4	8,623	Nebraska	6	17,026
Arizona	1	2,000	Nevada	3	6,784
Arkansas	3	4,223	New Hampshire	5	24,968
California	8	26,642	New Jersey	7	25,829
Colorado	4	15,472	New York	26	83,966
Connecticut	7	16,498	North Carolina	6	25,000
Delaware	2	3,000	North Dakota	4	3,940
Florida	5	6,381	Ohio	17	50,130
Georgia	9	22,991	Oregon	3	14,500
Idaho	3	3,127	Pennsylvania	22	61,383
Illinois	14	38,132	Rhode Island	3	24,060
Indiana	13	29,484	South Carolina	7	43,750
Iowa	11	38,108	South Dakota	5	4,282
Kansas	5	16,675	Tennessee	5	18,535
Kentucky	6	16,118	Texas	3	9,809
Louisiana	6	13,297	Utah	2	2,950
Maine	6	25,274	Vermont	4	20,900
Maryland	7	24,000	Virginia	4	20,181
Massachusetts	15	61,676	Washington	6	6,615
Michigan	13	40,313	West Virginia	5	7,700
Minnesota	10	20,629	Wisconsin	10	35,766
Mississippi	4	7,781	Wyoming	3	3,773
Missouri	12	38,381			
Montana	5	9,051	Total	329	999,709

APPENDIX D.

The list of designated depositories has been somewhat changed since it was transferred from the Interior Department early in July last. Several libraries have been dropped for various reasons (usually their own request) and several have been added on the designation of Members of Congress. The list stood as follows October 1:

Depository.	Location.
Department of State Library	Washington, D. C.
Treasury Department Library	Do.
War Department Library	Do.
Department of Justice Library	Do.
Post-Office Department Library	Do.
Navy Department Library	Do.
Department of the Interior Library	Do.
Department of Agriculture Library	Do.
Library United States Military Academy	West Point, N. Y.
Library United States Naval Academy	Annapolis, Md.

District.	Depository.	Location.
	ALABAMA.	
	Alabama State Library	Montgomery.
	Senatorial:	
	Howard College Library	East Lake.
	Spring Hill College Library	Mobile.
1		
2	State Board of Health Library	Montgomery.
3	Agricultural and Mechanical College	Auburn.
4		
5	Wetumpka Academy Public Library	Wetumpka.
6	University of Alabama Library	University.
7		
8		
9	Birmingham Public Library	Birmingham.
	ARIZONA.	
	The Territorial Library	Phœnix.
	The Free Public Library	Tucson

APPENDIX D—Continued.

District.	Depository.	Location.
	ARKANSAS.	
	Arkansas State Library	Little Rock.
	Senatorial:	
	Arkansas Cumberland College Library	Clarksville.
	Marquand Public Library	Little Rock.
1	The Woman's Library Association	Helena.
2	Public School Library Association	Fort Smith.
2	Branch Normal College	Pine Bluff.
3		
4		
5	Arkansas Industrial University	Fayetteville.
6		
	CALIFORNIA.	
	California State Library	Sacramento.
	Senatorial:	
	Free Public Library	Do.
	Free Public Library	San Francisco.
1		
2	Free Public Library	Stockton.
3	University of California Library	Berkeley.
4	Mechanics' Institute Library	San Francisco.
5	Leland Stanford Junior University Library	Stanford University.
6	The Public Library	Los Angeles.
7	Public Library	San Diego.
	COLORADO.	
	Colorado State Library	Denver.
	Senatorial:	
	University of Colorado Library	Boulder.
	Colorado College Library	Colorado Springs.
1	Public Library	Denver.
2	McClelland Public Library	Pueblo.
	CONNECTICUT.	
	Connecticut State Library	Hartford.
	Senatorial:	
	The Otis Library	Norwich.
	Silas Bronson Library	Waterbury.
1	Trinity College Library	Hartford.
2	Yale College Library	New Haven.
3	Public Library of New London	New London.
4	Public Library and Reading Room	Bridgeport.
	DELAWARE.	
	Delaware State Library	Dover.
	Senatorial:	
	The Institute Library	Wilmington.
	At large:	
	New Castle Library Company	New Castle.
	FLORIDA.	
	Florida State Library	Tallahassee.
	Senatorial:	
	John B. Stetson University Library	De Land.
	Public Library of Santa Rosa Academy	Milton.
1	Library of Seminary West of Suwanee River	Tallahassee.
2	Conference College Library	Leesburg.
	GEORGIA.	
	Georgia State Library	Atlanta.
	Senatorial:	
	Northern Georgia Agricultural College Library	Dahlonega.
	Emory College Library	Oxford.
1	Georgia Historical Society Library	Savannah.
2		
3		
4	The Library Association	Newnan.
5	Young Men's Library Association	Atlanta.
6	The Public Library	Macon.
7	Young Men's Library Association	Rome.
8	University of Georgia Library	Athens.
9	The College Library	Gainesville.
10	Young Men's Library Association	Augusta.
11		

APPENDIX D—Continued.

District.	Depository.	Location.
	IDAHO.	
	Idaho State Library	Boise City.
	Senatorial:	
	Blackfoot District School Library	Blackfoot.
	Public School Library	Lewiston.
	At large:	
	Idaho State University Library	Moscow.
	ILLINOIS.	
	Illinois State Library	Springfield.
	Senatorial:	
	Northwestern University Library	Evanston.
	Illinois State Normal University Library	Normal.
1	Cook County Normal School Library	Englewood.
2	Public Library	Chicago
3	Newberry Library	Do.
4	Chicago Historical Society Library	Do.
5	Gail Borden Public Library	Elgin.
6	Seminary Library	Mount Carroll.
7	Matson Public Library	Princeton.
8	Public Library	Joliet.
9		
10	Public Library	Peoria.
11	Monmouth College Library	Monmouth.
12	Library Association	Carrollton.
13	Illinois State Historical Library	Springfield.
14	Illinois Wesleyan University Library	Bloomington.
15	Library University of Illinois	Champaign.
16	Public Library	Olney.
17		
18	Belleville Public Library	Belleville.
19	Supreme Court Library	Mount Vernon
20	Southern Illinois Normal University Library	Carbondale.
21		
22		
	INDIANA.	
	Indiana State Library	Indianapolis.
	Senatorial:	
	Indiana University Library	Bloomington.
	Library of De Pauw University	Greencastle.
1	Willard Library	Evansville.
2	Library of Vincennes University	Vincennes.
3	Borden Institute Library	Borden.
4	Hanover College Library	Hanover.
5	Franklin College Library	Franklin.
6	Public Library	Muncie.
7	Butler University Library	Irvington.
8	Wabash College Library	Crawfordsville
9	Public Library	La Fayette.
10	Northern Indiana Normal School Library	Valparaiso.
11	Free Library of the Public Schools	Huntington.
12		
13	Lemonnier Library of Notre Dame du Lac	Notre Dame.
	IOWA.	
	Iowa State Library	Des Moines.
	Senatorial:	
	Young Men's Library Association	Dubuque.
	Wesleyan University Library	Mount Pleasant.
1	Jefferson County Library Association	Fairfield.
2	Library Association	Davenport.
3	Public Library	Cedar Falls.
4	Upper Iowa University Library	Fayette.
5	State University of Iowa Library	Iowa City.
6	Iowa College Library	Grinnell.
7	Public Library	Des Moines.
8		
9	Free Public Library	Council Bluffs.
10	Public Library Association	Boone.
11	Sioux City Public Library	Sioux City.
	KANSAS.	
	Kansas State Library	Topeka.
	Senatorial:	
	Kansas State University Library	Lawrence.
	Kansas State Historical Society Library	Topeka.

APPENDIX D—Continued.

District.	Depository.	Location.
	KANSAS—continued.	
	At large:	
	Paola Free Library	Paola.
1		
2	City Library	Lawrence.
3	Oswego Library Association	Oswego.
4		
5	Kansas State Agricultural College Library	Manhattan.
6	Stockton Academy Library	Stockton.
7	Free Library	Newton.
	KENTUCKY.	
	Kentucky State Library	Frankfort.
	Senatorial:	
	Georgetown College Library	Georgetown.
	Polytechnic Society of Kentucky Library	Louisville.
1		
2	Uniontown College Library	Uniontown.
3	Ogden College Library	Bowling Green.
4		
5		
6		
7	Kentucky University Library	Lexington.
8	Center College of Kentucky Library	Danville.
9		
10		
11		
	LOUISIANA.	
	Louisiana State Library	New Orleans.

SECOND ANNUAL REPORT

OF THE

SUPERINTENDENT OF DOCUMENTS

Petitioners who want less instead of more—Present laws force upon libraries dear editions they do not want, and deny cheap editions they do want—How simplicity and economy may replace confusion and waste—Argument for document reform—Pending reform bill—Lively letters from leading librariana.

OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
GOVERNMENT PRINTING OFFICE,
Washington, D. C., July 1, 1896.

SIR: My first annual report, dated October 1, 1895, was only nominally an "annual report," as the office had at its date been in existence but six months, and in active operation hardly more than three months. The present report covers the operations of the office for its first full fiscal year, namely, from July 1, 1895, to June 30, 1896.

During that period this office has received a total of 486,871 public documents of all kinds, of which 252,602 volumes were accumulations from various Government Departments, 143,048 were new work from the Government Printing Office, 31,321 were duplicates returned from public and college libraries, and 60,000 (estimated) were copies received from the Printing Office and the various Government publishing bureaus to be catalogued. Of the documents received, 189,481 were distributed as follows: To depository libraries, 105,170 volumes; to libraries other than depositories, 65,823; specific works distributed according to law on the order of Members of Congress, 13,580; supplied to Government Departments and bureaus to complete official files, etc., 951; sold, 3,581 copies. The remaining copies, 297,390 in number, have been preserved in this office, where they are assorted, classified, and made available for use. It seems to me a moderate estimate to say that the value of the public documents thus reclaimed from the vaults and lofts of Departments and libraries, where they were entirely useless, is half a million dollars. Their first cost was certainly much more than that.

From these rescued documents a document library of about 15,000 distinct publications has been created, "accessioned," shelf listed, etc., so that it is immediately available for reference, not only in our own work, but for the convenience of all who choose to use it.

The depository libraries, which numbered 420 October 1, 1895, now number 445. A new list of libraries, to receive the fractional remainders of Congressional quotas under the provisions of section 68 of the printing law, has been created by Congressional designation, and now numbers 253. To libraries of this class 9,359 volumes have already been sent, and this has been accomplished under the new law without printing an additional book by utilizing books which formerly belonged to nobody and went to waste. Many more books are in sight for speedy sending to this class of libraries. An additional list of libraries, numbering at this time 623, has been created to receive the publications of the United States Geological Survey, under section 79 of the printing law and joint resolution 19 of the Fifty-fourth Congress. To this class of libraries 54,749 publications have already been sent, and many more are to be sent at an early day. Thus, instead of the 420 libraries which were on the list when I reported to you last year, we have now 1,321 libraries to which we send regular supplies, and we have had exchanges with many which are not regularly on our lists.

I have also had added to the mailing branch of my work a list of addresses for the Compilation of Messages and Papers of the Presidents, which, when the Congressional designations are all in, will make a subscription list of 21,000 names for a work which is now expected to fill at least seven volumes. Only those who have handled such a list under similar circumstances can form an idea of the amount of work and attention to detail it involves.

During the year the following works have been produced for publication: Eighteen Monthly Catalogues, aggregating 701 pages; Check List of Public Documents, 222 pages; First Annual Report and Tables, 36 pages; First Draft of a Proposed Bill to reduce the cost, increase the value, and simplify the methods of publication of the public documents furnished to designated depository libraries, 17 pages; Document Catalogue (or "comprehensive index"), 638 pages—an aggregate of 1,614 printed pages, of which 1,561 pages are catalogue work, while enough additional work has been done in preparing "copy" for the second Document Catalogue and the first Document Index (or "consolidated index") to make the first year's cataloguing fully equal to 2,000 printed pages.

One of the interesting incidents of the year is the establishment of a class for the study of public documents in the department of library science of the Armour Institute, Chicago. I was gratified to be able to comply with the request of the director for sets of the publications of this office to be used as text-books in this difficult study.

The official correspondence of the office has been almost overwhelming in its voluminousness. I have not been able to spare the clerical

assistance necessary to keep a count of the letters written, but I estimate the number at not less than 20,000, and, of course, an equal number were received. For long periods they have averaged more than 100 per day on each side of the count. They came from everywhere and treated upon almost everything conceivable relating in any way to the public documents. Indeed, this office seems already to be generally regarded as a universal bureau of information on this subject. Numerous public officials receiving letters of inquiry relating to documents not within their immediate purview have referred them to me, thus increasing the already great number of queries pouring in. I am far from objecting to this. I assume that one of the purposes in establishing this office was to create an information bureau for documents, and that function it very willingly undertakes to fulfill. In his Forum article on the Government as a great publisher Mr. Spofford said that the lack of adequate catalogues of public documents was measurably offset by the existence of "living indexes" in Washington. This office is fortunate in the possession of one of these living indexes, and is doing something also to provide the catalogues which are so sadly needed.

The sales of documents have recently averaged over 1,000 a month, and this class of our work involves a vast amount of labor in looking up old and obscure documents to which correspondents can not give intelligible references, answering inquiries for documents which we are unable to supply, and supplying price lists to correspondents from whom we get no orders. Work of this sort does not show in the monthly and annual reports, but I see no way to escape doing it. If we could supply all the documents that are asked for, and if all our correspondents who ask for quotations should buy the documents quoted to them, the sales would be more nearly 5,000 than 1,000 documents a month.

This is a brief outline of the more important branches of the work of this office during the past year, but if I were to stop here I feel that I should not be fully discharging my duty to the public, to the great library interest of the country, and to Congress. There is an urgent desire that Congress, which alone has the power, should alleviate the conditions which beset those who wish to consult and study the public documents, and I have no doubt there is an equally earnest desire in Congress to meet the wishes of the people as expressed through the libraries which are their literary representatives. What is needed is the modernizing of methods of publication that have been adhered to long after they have been outgrown and have become extremely wasteful and harmful. To make this change will be a reform and an economy in time as well as in money. Detailed information as to the defects of the old methods and suggestions as to applying the new I endeavor to supply in the following pages, and as the question involved is the momentous one of the education of the people in the workings of the Government, and as it also involves a yearly expenditure of the public

money amounting to several millions, it would really seem that the discussion ought to command an attentive hearing from a large number of enlightened citizens, and most especially from the legislators in whose hands alone the disposition of the matter rests.

The fact that many recent productions of the Government presses are superb triumphs of the typographic art is another and a strong reason why the plans of publication should be so modified as to accord with the mechanical excellence of the volumes.

GOVERNMENT'S BOUNTY TO LIBRARIES

It is a well-recognized fact that the Congress of the United States has done more for science than has been done by any other Government. It has also done more in supplying the scientific and other publications of the Government to public and educational libraries in which they may be made available for popular use and preserved to carry down to coming generations the history of our times. I received some months ago, through the Smithsonian Institution, a letter from an English scholar who said he had just learned with surprise that there were in the United States 500 libraries of such excellence that the Government, as a recognition of their merit, supplied them gratuitously with sets of the public documents. He thought this was something remarkable, both on the part of the libraries and of the Government, and he asked to have a list of the libraries which were thus distinguished as superior to all others in our country. I was compelled to inform him that the designation of libraries as depositories of the public documents was based on geographical as well as meritorious considerations, and that, while it was true that most of our famous and scientifically conducted libraries are on the depository list, yet the whole list could not be put forward as the best the country has to offer. It is, however, a rule to which there are few exceptions that the depository libraries are the best in the regions where they are situated, and the present method of designating them places the detailed official records of the Government's action before the people in almost every considerable community in every State and Territory. It needs no argument to demonstrate that this is one of the most proper and commendable things that can be done in a free popular government. It is so good and desirable a thing that it ought to be done in the best and most effective way.

The public documents ought to be so published as to make them easily accessible and intelligible to librarians and the public, and they ought to be delivered to the depository libraries at the earliest possible moment after their publication. As all who are interested in public documents know, this would be exactly contrary to the present practice. The Congressional edition of the public documents, which under existing laws must be supplied to the designated depositories, is published on plans more violently at variance with the customary publishing methods of the present day, and more refractory to all accepted

rules of library classification, than any other publications of our times. This edition gathers into one numerical series hundreds of volumes on the most diversified subjects; it binds together incongruous treatises; it puts four different sizes into the same series; it gives all these diverse publications a uniform binding which is of great cost and little value and disliked by all librarians, and it causes a delay in publication which lessens the value of all the documents and quite destroys the value of many. On this latter point it is perhaps sufficient to say that among the sheep-bound documents sent to the depositories during the past summer was one containing the receipts and expenditures of the Government for the fiscal year 1889. When the depositories received it it was more than seven years old, and many others almost equally moss-grown have been sent out. There was an incessant and eager demand on all active libraries during the recent political campaign for the latest publications relating to the Government finances, and sending them documents seven years old was giving a stone when bread was asked for.

The Congressional document edition into which nearly all the Government publications are violently and injuriously jumbled deprives the Government's bounty to science and to the libraries of half its value. The reasons for establishing this edition may have been sufficient half a century ago, and, indeed, so long as the public documents were few in number and their subjects mostly the routine affairs of government, it mattered but little on what plan or absence of plan they were issued. Now, however, the conditions have changed, and the methods should change to accord with them. Libraries have become very numerous and are daily springing up in new places, and the use of them by the people, and especially by young people and students, is continually and rapidly increasing, while no feature of the new era of library growth is more marked than the enlarged interest in public documents. The libraries are doing all that lies in their power to satisfy the growing demand for the information that is to be found only in the public documents, but their task is made extremely difficult by the faulty methods of publication, especially of the Congressional set. How distressing these methods are to librarians and their clients is probably only faintly appreciated by the Senators and Representatives, from whom alone relief can come. Senators and Representatives are not, like librarians, dependent on their own efforts for a knowledge of the contents of the public documents. The Senate and the House have each a document expert who has become a living index by long years of familiarity with all the ins and outs of every Government publication. How highly Congress values these document experts may be inferred from the fact that of all the hundreds of thousands of people in the public service only these two are mentioned by name in an appropriation bill, thus making it a certainty that no gyration of politics shall deprive Senators and Representatives of their invaluable services.

If the depository libraries could have the services of such experts as are at the beck and call of Senators and Representatives, then the libraries perhaps might not be so eager as they now unquestionably are for improvement in the methods of publication of the public documents. As a rule, however, libraries are poor, and the public documents in them must be studied and handled by people who are heavily burdened with other exacting duties. Even the richest libraries feel poor, because their field is illimitable, and there are always many good things remaining undone that they might do if they had more money. Such a library as the great Boston Public, which gives the whole time of an expert to the public documents, feels it a burden to be compelled to do so, because it is only made necessary by the faulty methods of their publication. The large and the small libraries unite in asking that the Government's bounty to them be enlarged and enriched by the adoption of publishing methods which shall make the public documents as tractable to modern library treatment as any other class of publications. In view of the fact that what they ask would not cause fresh outlay, but would be an economy, can their request be called unreasonable?

During the past summer a young man connected with the proposed exposition to be held at Omaha called to see if a copy of a certain Congressional document relating to the expenses of a previous exposition could be procured. I asked him if he did not know that in the town where he lived (not Omaha) there was a designated depository of public documents, to which all such documents as the one he wanted to see were sent. Yes, he replied, he knew it, and he had no doubt the desired book was there, and the librarian offered to help him find it, but when he looked at the mountains of documents stacked up without arrangement, he concluded that the quickest and cheapest way to get that book was to come to Washington for it, a journey of a thousand miles each way. He came, he got his book at once, and he was well satisfied. This is not told to condemn the depository which had its public documents stacked instead of shelved, but to suggest that possibly there may be a better way to distribute the documents than to send the same kinds and quantities to all the libraries on the list, large and small. The great libraries wish to have a complete set of the documents, and they have facilities for caring for them. Many, and perhaps a majority, of those on the depository list find the whole set of documents a burden too great for their facilities, and would be much better pleased and better served could they select from the official catalogues such as they need and have room to shelve. Such a plan of distribution, giving the libraries what they want and no more, would require an amount of account keeping with the hundreds of libraries on the list for which no present provision has been made, but which will probably come along in due season as one of the necessary steps in perfecting the methods for placing the public documents where they will be readily accessible to every citizen of the country.

THE PENDING DOCUMENT BILL

Believing that it was quite practicable by legislation to improve the methods of printing and binding, without injury to any interest and with benefit to all concerned, I drafted a measure which I called "First draft of a proposed bill to reduce the cost, increase the value, and simplify the methods of publication of the public documents furnished to designated depository libraries." This was printed in a pamphlet with several pages of explanatory comment, and copies were sent to the Senators and Representatives of the Fifty-fourth Congress, to all the publishing bureaus of the Government, to all the depository libraries, and to about 1,000 citizens who had shown an interest in the public documents. All of these were invited to make suggestions for the improvement of the bill. My reasons for adopting the unusual plan of distributing the proposed bill before asking for its introduction in Congress were two, namely:

1. Because I did not feel confident that I could sit down at a desk and express in a measure of proposed legislation the views of all the librarians of the country, many of whom had given the subject in hand years of consideration and had brought to bear upon it the highest grade of expert knowledge.

2. I had not quite sufficient assurance to ask the Printing Committee to adopt the measure on my unsupported recommendation. I wanted to have the support of the recognized authorities in library science, and had I not received it I should never have offered the bill to the committee.

The response from the librarians of the country, and also from the recognized document experts in Washington, was prompt and most gratifying. It was, however, disappointing in one respect. I had expected many suggestions for the further development and improvement of the bill. Of these I received hardly any—only two, in fact, and both of minor importance. Substantially the librarians accepted the bill as first drafted, and their desire to secure its passage was even more earnest and cordial than I had anticipated. I was therefore able to offer the bill to Hon. George D. Perkins, chairman of the House Printing Committee, with the backing of the united library interest of the country, and also with that of the Public Printer, the foreman of printing, the veteran superintendent of the Senate document room, and other recognized document experts, while not a word of dissent had come from any of the two hundred or more Government publishing bureaus. Such unanimity of support perhaps never before was given a printing bill. The Printing Committee in the House had previously considered and favorably reported a printing-reform bill, but recognizing the fact that the new bill was not antagonistic to the former one, but comprehended all that was in that, and added other features of value, the new bill was accepted, introduced, and printed as House bill 8237, "To improve the printing and

binding methods of the public documents." It passed the House May 7, 1896, with several amendments, all of them merely verbal except the one substituting half morocco for cloth in the binding of the documents to be supplied to the depositories, to the Senate, House, and Congressional libraries, and to the foreign exchanges of the Smithsonian Institution. The first draft of the bill provided for cloth binding in all the cases where full sheep is now required by law. It was in this form that the librarians saw it and approved it. All their praises were based on the supposition that cloth bindings were to replace the sheep now used in binding the volumes supplied to the depositories. Not one librarian asked to have the sheep binding retained, while most of them expressed satisfaction that cloth was to replace it.

The claims for economy to result from the passage of the bill were based mainly on the substitution of cloth for sheepskin in binding. The committee was induced to provide for half morocco, instead of cloth or sheep, by the representations of the Bookbinders' Union. The delegates from the union urged that whatever tended to popularize and familiarize good and durable bindings was for the benefit of their trade, while the multiplication of cheap bindings was injurious to the trade. For this stated reason they opposed the change from sheep to cloth. In this I think they were mistaken, because I believe cloth is a better and more durable and handsomer binding than sheep, as well as cheaper by more than half. When a change from sheep to half morocco was suggested to the delegates from the Bookbinders' Union, they accepted the proposal with satisfaction. My preference was for cloth, and I have not changed it; yet I was gratified when the committee consented to meet the wishes of the binders and provide for half morocco. The reasons were several. I believed that the librarians, while satisfied with cloth, would be even better satisfied with half morocco. I believed that it would be as cheap and possibly a little cheaper than sheep, and I hoped that by handling it in "case" fashion, as cloth bindings are handled, it might be more expeditious than sheep and that the change might aid in bringing up the enormous arrears of the "reserve" and ending the delays in publication which now rob the library supply of half its value. But, most of all, I feared that the bookbinders might induce some friendly Member of the House to interpose an objection, and at the then late stage of the session a single objection might have proved fatal to the bill. It seemed to be more desirable to pass the bill, even with the substitution of half morocco for cloth in binding, than to let the million and a quarter of bound books which would be the next year's output of the Government Printing Office be issued in the old ways.

The bill went to the Senate May 9, only a month before the end of a session crowded with important business. Appropriation bills were still pending and conference committees still at work. It was hardly to be expected that the document bill should be reached, and it was

not reached. It is now pending, and there is apparently good ground for a hope that it may be taken up early in the second session of the present Congress and its passage secured.

After the bill reached the Senate the first spark of opposition to it, except that of the bookbinders, appeared, and, like the bookbinders, the objectors in this case were heartily in favor of all parts of the bill except one particular section. The objection came from the Director of the Geological Survey and the Director of the Bureau of Ethnology, and was made to section 11, which, in their opinion, gives the Public Printer too arbitrary control over the size of page in which documents shall be printed. They ask to have existing series exempted from this provision. So far as I know, everybody is willing that this section should be amended as the two Directors desire.

While the bill was pending in the House, the Printing Committee asked the opinion upon it of the Librarian of Congress. Mr. Spofford replied in writing, as follows:

WASHINGTON, D. C., *April 25, 1896.*

DEAR SIR: Having carefully examined bill No. 8237, proposing radical changes in the methods of printing, designating, and binding public documents, permit me to say that the measure is a long step in the right direction, i. e., of simplifying the entire system. That system (or rather want of system) has long been the terror of librarians and the despair of all trying to consult the documents. So intricate has been the numbering, arrangement, and indexing, and so continual the change in methods, that no one, except an expert giving his whole time to the business, could possibly keep up with them or successfully find or interpret them to others.

This bill is in the main carefully adapted to the essential end of establishing a uniform and intelligible method, applied to the preparation, printing, arranging, and binding of all documents. Section 2 may perhaps call for a clearer definition, and some other points as to binding might be modified before passage, but the bill will doubtless be thoroughly digested in committee.

Very respectfully,

A. R. SPOFFORD, *Librarian of Congress.*

Hon. GEORGE D. PERKINS,
Chairman of Committee on Printing.

The opinion of the Public Printer was also asked by the committee, and a favorable letter was received from that official, who, more than any other, would be affected by the passage of the bill.

Several of the more important and detailed letters on the same subject received by me are printed in full in the following pages, as well as brief excerpts from several others. I received letters in advocacy of the bill from thirty different States in the Union, and hundreds more were sent to Senators and Representatives. Among the letters received were several from Members of Congress. One Senator wrote: "I have read the bill, and am in entire accord with its general features. It seems to me that there is urgent need of exactly the legislation that you propose." Another Senator wrote: "I am heartily in favor of the bill, and shall do all I can to secure its passage in the Senate." A Representative wrote: "I have

read the matter with interest, and am pleased with it. The importance of it, it seems to me, will be apparent to every Member who may give the subject the least attention." Another Representative wrote: "I have read with great interest and profit your statement in regard to the publication of public documents. You will be a benefactor to mankind if you will bring order out of this fearful chaos. There is nothing so puzzling to the average mortal as how to get hold of important public documents when needed. I shall be happy to do anything to lead to the revision of this system."

A recent happening gives a fresh reason for advocating the abolition of the so-called "Message and Documents" set, as provided in the pending bill. A correspondent asked one of the Executive Departments in Washington to verify or contradict certain figures which had been given to him as purporting to be taken from the Message and Documents of 1867–68, pages 27 and 28. The Department made heroic efforts to do so, rummaging its own files and sending to the Capitol and elsewhere for assistance. But the reference was very defective, as it might be to either one of half a dozen volumes in either one of two years, and the figures could not be found. The correspondence dragged on for a month, becoming quite heated in spots. Finally a clerk brought the letters to this office to see if anything could be found to throw light on the subject. As the figures were evidently from a report of the Treasury Department, and as that report never appears in the Message and Documents, it was obvious that a false trail had been followed, but a reference to the *Abridgment* of Message and Documents, in which the Treasury report always appears, turned up the lost figures at the first trial. It is a patent absurdity that an "abridgment" should contain important matter not contained in the volumes abridged, and it is not surprising that even public officials should be misled by it, and that waste of time and temper should result. Presumably such misunderstandings have been numerous during the many years that the useless and confusing Message and Documents series has been published. What chance has the unskilled citizen in trying to make use of documents thus queerly compiled?

PROVISIONS OF THE BILL

The pending bill (H. R. 8237) is too long to be quoted in full in this report, but a brief statement of its purpose and principal provisions seems necessary to an understanding of the argument in its favor. First it will be well to give an idea of the character of the existing methods which it is desired to reform. I will use for illustration only a single instance among many equally flagrant. The case chosen is that of the report of the Commissioner of Indian Affairs for the fiscal year 1894—the latest year for which any of the annual reports have appeared in all their editions. Like most of the annual

reports, it is found in four distinct editions, bearing no outward resemblance to each other, though the contents in all four cases are just the same. These editions are as follows:

[First—Bureau edition.]

Title page: "Annual report of the Commissioner of Indian Affairs. 1894. Washington: Government Printing Office. 1895."
Back title: "Report of the Commissioner of Indian Affairs. 1894."

[Second—Department edition.]

Title page: "Annual report of the Secretary of the Interior for the fiscal year ending June 30, 1894. In five volumes. Volume II. Washington: Government Printing Office. 1894."
Back title: "Report of the Secretary of the Interior. Vol. 2. 1894."

[Third—Message and Documents edition.]

Title-page: "Report of the Secretary of the Interior; being part of the message and documents communicated to the two Houses of Congress at the beginning of the third session of the Fifty-third Congress. In five volumes. Volume II. Washington: Government Printing Office. 1894."
Back title: "Message and documents Interior Dep't Vol. 2 1894-5"

[Fourth—Sheep-bound Congressional reserve edition.]

First title-page: "The Executive Documents of the House of Representatives for the third session of the Fifty-third Congress. 1894-95. In thirty-five volumes. Washington: Government Printing Office. 1895."

This is followed by a general index to the 35 volumes of executive documents, filling 18 pages, and then by the—

Second title-page: "53d Congress, 3d session, House of Representatives, Ex. Doc. 1, Part 5. Report of the Secretary of the Interior; being part of the message and documents communicated to the two Houses of Congress at the beginning of the third session of the Fifty-third Congress. In five volumes. Volume II. Washington: Government Printing Office. 1894."
Back titles: "House Executive Documents, 3d sess., 53d Cong., 1894-95. Vol. 15. Report of the Secretary of the Interior. Vol. 2—1894. Indian Affairs."

It will be noticed that of these four editions of the same book only one, the first, makes any mention on its title-page of the subject-matter of the volume. The title-pages of the second, third, and fourth editions are entirely devoted to a secondary matter, namely, showing to *what series the book belongs*, instead of *what is in it*. The theory, apparently, is that if the reader knows that the book is a part of the report of the Secretary of the Interior, or belongs to the Message and Documents set, or is one of the House executive documents, he will not care anything about knowing what subject it treats of. This cardinal fault of making the series the important matter and the contents secondary runs all through the methods of publication of the public documents. I should like to give other illustrations of it, but the fear of being tedious restrains me. Instances more flagrant than the one

cited might be found. Nobody now alive is responsible for these methods. They were begun generations ago, and have been copied ever since. They have the sacredness of immemorial precedent in their favor, and nobody will take the responsibility of changing them without positive legislative authority.

The purpose of the pending bill is to discontinue in all cases the editions which answer to the second, third, and fourth of the foregoing instances. The first edition is held to be complete, correct, and sufficient. The theory of the measure is that the other editions serve no useful purpose whatever; that by adding unnecessary series, volumes, and parts to the titles of books they cause needless confusion, making the public documents a byword and a reproach among the people, and that the money spent in producing them is worse than wasted, because it is used in doing harm instead of good. The bill provides that there shall be *one original edition* of each book *and no more*, but it does not preclude reprints nor otherwise restrict any proper freedom of publication. In the case of the Indian report, for instance, there is nothing to prevent the addition of a line to the title-page to show that it is one of the volumes of the report of the Secretary of the Interior.

Of the four editions in which many annual reports are printed, as shown in the report of the Commissioner of Indian Affairs, the first, second, and third editions are bound in cloth and appear promptly for the use of Congress, the Department, and the Bureau. But the depository libraries have no claim upon any part of these editions. For them the fourth edition, the sheep-bound "reserve," is provided, to be supplied whenever the pressure of other work at the Government Printing Office will permit. As the demands upon the office are constantly increasing, the difficulty of keeping this reserve anywhere nearly up to date continually grows greater. Sometimes special effort is made to give the libraries some particular book at about the same time that it goes to Congress, but as a rule the libraries get their books anywhere from one to seven years after Congress has had them, and usually long after their current interest has quite evaporated and they have passed into the dry-as-dust stage of their existence. Should the pending bill become law, the 500 copies of the public documents which are donated to the depository libraries would be printed and bound with the first (and only) edition of each book, and the belated "reserve" would become only an unpleasant reminiscence.

Other provisions of the bill are that the publications of the several Departments and commissions shall be bound in distinctive colors, so that their origin may be recognizable at sight; that the octavo size shall be used, except in unusual cases; that volumes shall be volumes and not parts; that series shall be series and not volumes; that gold leaf instead of base metal shall be used in lettering documents; that better cloth shall be used for binding than has sometimes heretofore

been used; that sheep bindings for the library supply of public documents shall be abolished; that the back titles shall show the actual subject-matter of the books; that the bound volumes of Congressional documents and reports shall be paged consecutively through the volumes. These and other provisions of similar import are intended to facilitate the use of the public documents among the people by making them easy of access and consultation, instead of being, as now, a terror to librarians and an enigma to everybody.

It needs only to add that the bill does not call for a cent of appropriation nor cut off a single book now printed.

At the annual conference of the American Library Association, held in Cleveland September 1–4, 1896, the largest conference ever held by this national association, over five hundred librarians from twenty-eight States being present, the subject of public documents was one of those reported on by a standing committee, and resolutions manifesting gratitude for the passage through the House of the bill "To improve the printing and binding methods of the public documents," and expressing the hope that it may also be passed by the Senate, were unanimously adopted.

FURTHER VARIATIONS

The mistake should not be made of supposing that when one has learned the four editions in which the reports of the Commissioner of Indian Affairs and some other bureau officers appear all has been learned. The further variations are many, and so diverse that they correspond to nothing else I can think of except what are known in the animal and vegetable kingdoms as "sports."

Neither the State Department nor any of its bureaus makes an annual report,[1] but it sends to the President one or more volumes of diplomatic correspondence, which he sends to Congress with his annual message. The fact of this correspondence being so sent theoretically compels its appearance in the Message and Documents set, and it should therefore be printed in three editions, corresponding to the second, third, and fourth, as shown in the foregoing transcript, of the four editions of the report of the Commissioner of Indian Affairs. As a matter of fact, however, though it is the document most intimately associated with the President's message, being bound in the same volume, it does not appear in the third or Message and Documents edition. It has never had the same title page as the volumes of the Message and Documents set, though for many years "Message and Documents" was a part of the binder's title on its back. For several years past

[1] This was true when it was written, and it had been true for many years, but, as if to show that nothing is fixed and certain about the public documents, the Secretary of State this year made an extended report to the President, and it was sent in with the message at the opening of the second session of the Fifty-fourth Congress.

even this binder's title has been dropped. I have not been able to find one since the Forty-seventh Congress. The annual "Foreign Relations" volume has, therefore, at present, no outward sign to connect it with the Message and Documents series of volumes, though it is printed in numbers and distributed in ways to imply that it is supposed still to be one of them. Those copies which are for distribution by Members of Congress are bound in black cloth, and those which are for distribution by the Department of State are bound in red cloth, but the title pages and back titles in both these cases are identical.

The report of the Secretary of the Treasury is not sent to the President, but directly to Congress, and consequently it does not appear in the Message and Documents series, and has but two editions, corresponding to the second and fourth in the foregoing series. Several of the bureaus of the Treasury Department publish extensive annual reports in one or more volumes, but they are not made parts of the Secretary's report, and consequently do not appear in the second or departmental edition. Their two editions correspond to the first and fourth in the Indian Affairs series as already shown. Those reports of Treasury bureaus which are too small to appear separately are bound up with the Secretary's report as appendixes. The reports of the Comptroller of the Currency, Commissioner of Internal Revenue, and Director of the Mint, somewhat abridged, are thus bound, and also appear in separate volumes. The report of the Comptroller of the Currency is not made to the Secretary, but to Congress, and is printed in two editions, answering to the first and fourth of the foregoing.

The annual reports of two of the bureaus of the War Department, the Chief of Engineers and the Chief of Ordnance, though printed in separate volumes, are parts of the report of the Secretary, and that report is sent to the President to be by him transmitted to Congress. Consequently these bureau reports, filling seven of the eight volumes of the Secretary's report, appear in all four of the editions heretofore illustrated, while volume 1, containing the report of the Secretary himself, appears only in the second, third, and fourth editions. The title-page of the departmental edition of this report informs the reader that it is in three volumes. This result is arrived at by calling the six volumes of the Engineer report one volume in six parts.

The report of the Postmaster-General and the reports of the bureaus of his Department come within the compass of a single volume, and therefore they are printed only in the departmental, Message and Documents, and Congressional editions.

The annual report of the Attorney-General is separately printed in only one cloth edition, for the use of the Department and Congress, but as it is a small document, it is usually bound up in the Congressional edition (fourth of the foregoing series) in a volume with so many other documents that its identity is lost.

The Navy Department issues but one volume of annual reports, which appears in editions of the second, third, and fourth classes, as hereinbefore defined.

In the Department of the Interior the reports of the bureaus form parts of the report of the Secretary. Those which are small are bound up in the same volume with the personal report of the Secretary or with each other, but those of the Commissioner of Indian Affairs, the Commissioner of Education, and the Director of the Geological Survey are so bulky that they require separate volumes—the Commissioner of Indian Affairs one, the Commissioner of Education two, and the Director of the Geological Survey four. Thus the report of the Secretary of the Interior is made to consist of nine volumes, though on the title-pages of each of the volumes in the editions of the second and third classes and on the second title-page of the edition of the fourth class it is stated that the report is in five volumes, the Geological and Educational reports being each called one volume. Those bureau reports which are bound in separate volumes are found in all four of the editions, while the smaller ones, of which several are bound together, are found only in the second, third, and fourth editions.

In the Department of Agriculture the bureau reports, except that of the Weather Bureau, are bound with the report of the Secretary, and consequently escape one of the four editions. The Secretary's report, the report of the Chief of the Weather Bureau, and the Yearbook are sent to Congress with the President's message and are made Congressional documents. They are consequently found in editions corresponding to the second, third, and fourth in the foregoing schedule.[1]

Though the set known as "Message and Documents" (usually about twenty volumes) does not contain the report of the Secretary of the Treasury, the Comptroller of the Currency, the Commissioner of Internal Revenue, or the Director of the Mint, yet all these appear, with selections from the Message and Documents series, in a separate cloth-covered volume known as the "Abridgment" of the Message and Documents.

This detailed statement of the methods of publication of the annual reports of the eight Executive Departments will supply information which I have found to be much needed in official and library circles as well as among the people generally. Similar statements as to minor publications would be equally useful, but space for them is not at my disposal.

[1] This is the normal and to-be-expected course of this report; but as a matter of fact for the two years last past (1894–95) the Secretary of Agriculture has had the 3,000 copies to which he is entitled printed in the Message and Documents edition, and has had no cloth edition with his own title page. This is believed to be the only instance in which an official who might have had two editions has been content with one.

These illustrations are drawn from the reports for the fiscal year 1894, and are subject to such modification as has been effected by the printing law of January 12, 1895. The distinction between "executive" and "miscellaneous" documents has been abolished both in Senate and House, and the present titles are "Senate documents" and "House documents." This change does not reduce the number of editions of the same books, nor perceptibly simplify the methods of publication. Only the "usual number" is now printed of the reports of the Chief of Engineers of the Army, the Commissioner of Patents, the Commissioner of Internal Revenue, the Chief Signal Officer, and the Chief of Ordnance.

In the foregoing statement no consideration is given to the pamphlet issues of the Secretaries' individual reports or to the "separates" (or authors' editions) of parts of the various annual reports, which are in pamphlet form and very numerous, but of varying numbers in different years.

CONDITION OF THE CONGRESSIONAL RESERVE

The libraries which are depositories of public documents receive their supply from the sheep-bound edition known as the "Congressional reserve" (Fourth ed., see p. 11). This reserve is not issued when the books are new and are supplied in cloth bindings for the use of Congress. The 500 copies of each book of which it is composed are reserved to be issued in sheepskin bindings whenever a slack time comes in the Government Printing Office. Whenever nothing else is pressing for publication, a volume of the reserve is bound up for the libraries. Slack times are very rare in the Government Printing Office, for the demands upon the office, and the output in response to those demands, constantly increase—recently at the rate of almost a thousand tons of paper a year. As a consequence of this fact, there is not, nor can there be, any regularity in the issue of the reserve. No matter how long ago an annual report or a special publication may have been issued in cloth for the use of Congress, it is impossible to form any idea when it may be available in sheep for the libraries, and when it does appear the last volume of a set may come first, or the document may come in several volumes when one is expected, or it may be bound in a huge volume with incongruous documents, so that classification is made impossible. The libraries have had no representative at the Printing Office to say which document they would like to have first, and in the absence of information on that point the Printing Office construction has been that as all must be issued at some time it made no difference which volume was issued first. There has therefore been no rule whatever about the matter, and either mere chance or considerations of mechanical convenience alone have entirely controlled the official supply of public documents to the public libraries and the institutions of learning of the country. And always the

reserve document appears with at least one added document number and one added volume number and a series title foreign to the subject-matter of the book, none of which are to be found in or on the cloth edition supplied for the use of Congress. These additions so disguise the publication that it is often almost unrecognizable.

Several of the best libraries in the country have repeatedly asked me for books which had already been supplied to them, and for which they had receipted, but the contents of which they had failed to discover under the misleading numbers and titles with which they were loaded down in the "reserve" edition. The smaller libraries are in a constant fog about the public documents, seldom being able to form any clear idea of the contents of the books in their sheep-bound form. As many of them as can do so get the more intelligible cloth copies by application to their Representatives in Congress or to the bureaus by which they are published, and then they make no use at all of the sheep-bound volumes, and let them go to waste, or return them as duplicates and keep the cloth. The wastefulness and utter inefficiency of such a no-system are too obvious to need a word of comment. But, bad as they are, the wastefulness and the confusing methods of publication are not the worst feature of the "reserve" plan. Worse than these is the delay in receiving the documents that it imposes upon those libraries which are unable to secure advance copies from the cloth editions. I am confident that few if any Members of Congress can have an adequate idea of the extent of this delay. If it had been generally known, it would seem that a remedy for it must long since have been provided. No remedy which appeared to be adequate has, however, been proposed until the introduction of House bill No. 8237 of the present Congress, which has passed the House and is now pending in the Senate.

During the present administration of the Government Printing Office the reserve has been brought ninety volumes nearer up to date than the present Public Printer found it. But it would appear that no amount of energy and vigor of administration can make the series really current while the present hampering conditions imposed by law remain unreformed. At the date of this report, July 1, 1896, 243 distinct volumes of public documents, nearly all of which were long ago supplied for the use of Congress, are due to the depository libraries. Of these, 124 are documents of the Fifty-second and Fifty-third Congresses and 119 are of the Fifty-fourth Congress. At this date not a single document of any kind appertaining to the Fifty-fourth Congress has been supplied to the depository libraries in the sheep set. They have not had a Congressional Directory since the first session of the Fifty-third Congress, nor a Consular Report since that for August, 1892, which they received in February, 1895. If the libraries could get the Congressional Directory every session and the Consular Reports every month, as Members of Congress get them, even

in paper covers, they would be grateful for the bounty of Congress in supplying them, but it is hard indeed for a librarian to feel grateful for such a document when five or six years old, even though it may have been delayed for the purpose of needlessly laying out a large amount of money in binding it in sheep.

The libraries of our day are not mere repositories for the collection of material to be used by the historians of future generations. They have active and eager constituencies, who demand the latest issues of the Government press as well as of other presses, and the library which can not meet such demands is humiliated and depressed by the knowledge that it is unable to discharge its duty to the community in which it is situated. Of twenty-two volumes of House reports for the second session of the Fifty-second, the three sessions of the Fifty-third, and the first session of the Fifty-fourth Congresses, but two volumes have been delivered to the libraries. They have not received the annual report on the Mineral Resources of the country for the years 1891 and 1892, though they have received it for the year 1893. Though twelve Special Consular Reports have been issued, the last one that has appeared in the "reserve" and has been sent to the libraries is the sixth, which was issued in the paper edition in 1891. Three volumes of Naval War Records are out in cloth and only one in sheep. Though the cloth edition of the Official Records of the Union and Confederate Armies has been issued up to volume 48, part 1, making all together 101 volumes, besides an atlas in 3 volumes, the libraries are still lacking the 3 atlas volumes and 6 volumes of the text, including parts 2 and 3 of volume 42, which appeared in cloth in 1893, the 3 parts of volume 47, and part 1 of volume 48. Details of this delay resulting from the "reserve" system might be extended to tedious length, but surely enough has been said to demonstrate that the plan is not now working well for the libraries, if it ever did, which I think very doubtful. It is not too broad a statement to say that the sheep-bound reserve set of Congressional documents as at present issued is almost worthless for library purposes. To serve such purposes it needs to be limited to those strictly Congressional documents which can not intelligently be made up into volumes until the close of the session, and for which, consequently, a "reserve" is necessary. With this limitation imposed, most of the difficulties of the public documents will disappear.

No blame attaches to any individual for the delays and the confusion of the sheep-bound set. They are entirely the fault of an outgrown system which has cumbered the ground for more than a generation.

SHEEPSKIN BINDINGS

There is no reason to doubt that in providing that the library supply of public documents should be put up in costly sheepskin bindings

instead of the cheaper cloth which is used for the Congressional editions of the same books Congress intended to benefit the libraries and to give them the public records in the most permanent and substantial form. At the time this action was first taken it may have answered the purpose intended, but at the present time this has certainly ceased to be true. Whether it is because the modern quick methods of tanning destroy the life of the leather, as the Public Printer and many others believe, or because the too strong acids used in cleaning finger marks and the like off the leather after the binding has been completed produce a like effect, as practical binders have assured me, or for some other reason not known, certain it is that the sheepskin bindings now in use are not durable, and librarians are practically unanimous in preferring cloth to sheep, even at the same price. As, however, sheep costs more than twice as much as cloth, and is so much slower in working as to cause great delay in the issue of books, there seems to be no ground whatever for an argument in favor of the continuance of the sheep bindings.

The worst lots of sheep-bound books that I have received have come from the Harris Institute at Woonsocket, R. I., and from the Public Library at Kansas City, Mo. Both lots were in an extreme state of dilapidation, but most of the Woonsocket books were nearly thirty years old, while some of those from Kansas City had not been out of the bindery more than five or six years—a startling instance of speedy disintegration. I wrote to the librarians in both of the cities named for information as to the conditions to which these crumbling sheep bindings had been subjected. Both promptly replied, and their statements showed that the books had suffered only ordinary library conditions, and that other sheep bindings in their libraries had deteriorated in the same way. They agreed that they knew of no reason for this decay except the warmth and dryness of the air in the libraries. The Woonsocket librarian added: "I prefer very much to have public documents bound in cloth, and have ceased to have any books rebound in sheep." The Kansas City librarian said: "I never buy leather-bound books for the library if I can get the same edition in cloth; it is so much more durable."

BINDING THE "UP-NUMBER"

The great desirability of bringing the "reserve" up to date is only one of the reasons, though a most important one, for adopting a style of binding less slow in production than the full sheep now in use. Another very important reason is the hope that by adopting bindings that can be turned out four or five times as rapidly as sheep the arrears of work may be so overtaken that the 600 copies of everything now sent up to the Capitol in unbound form may be bound. These 600 copies amount to many thousand volumes for each session. The

"reserve" for the first session of the Fifty-fourth Congress amounts to 119 volumes, of which 77 are distinct volumes that might have been bound before being sent out for use if the law had so provided and the facilities for the work had been sufficient. Six hundred times 77 is 46,200, and this is the number of volumes furnished unbound at a single session, which, it might reasonably be hoped, could, in a few years, all be bound before being used if kinds of binding more quickly done were substituted for the tedious sheepskin now so much in use in the Government work and so little in use anywhere else. Taking one Congress with another, the number of unbound volumes of documents sent to the Capitol falls little short of 100,000 for each Congress, and there is a constant increase. There is, as everybody knows, an enormous waste in this unbound work. A few copies are saved out to be bound in special bindings to the order of Members of Congress, and some are preserved in the document rooms, but an enormous quantity is sold to junk dealers to get rid of it, while the waste in other ways is too well known to call for comment here. If these volumes were bound, they would in all probability be much better cared for, and a great waste would be prevented. Another consideration which may not appeal to everybody, but which is really of considerable moment, is that by binding the "up-number" the conspicuous shabbiness of having the Capitol overflowing with unbound, unfinished, half-made-up public documents would be done away with. The present custom offends the eye and the judgment of many a good citizen.

DOCUMENT LIBRARY

The work of making a complete library of the public documents of the United States in this office has been steadily prosecuted during the year, and though no money has been provided for buying rare documents and the librarian has had almost no trained assistance, considerable progress has been made. The following table shows the present contents of the document library:

CONDITION OF DOCUMENT LIBRARY

Class.	Number of—	
	Books.	Maps.
Agriculture, Department of	1,012	831
American Historical Association	8	
American State Papers	38	
Civil Service Commission	64	
Congressional documents (sheep set)	3,251	
Congressional Annals, Debates, Globe, and Record	322	
District of Columbia	81	
Fish Commission	142	
Government Printing Office	30	

CONDITION OF DOCUMENT LIBRARY—Continued

Class.	Number of—	
	Books.	Maps.
Interior Department	1,673	343
Interstate Commerce Commission	68	.....
Justice, Department of	95	.....
Labor, Department of	35	.....
Library of Congress	30	.....
Memorial addresses, eulogies, etc	102	.....
Message and documents	461	.....
National Academy of Sciences	20	.....
National Home for Disabled Volunteer Soldiers	11	.....
Navy Department	709	.....
Post-Office Department	116	32
Reports of Congressional committees, commissions, etc	204	.....
Smithsonian Institution and National Museum	617	.....
State Department and Bureau of American Republics	929	.....
Treasury Department	1,454	217
United States Board on Geographic Names	6	.....
War Department	1,506	181
	12,984	1,705
	1,795	.....
Total number of different documents collected	14,779	.....

Fugitive publications, such as circulars, bulletins, orders, pamphlets, etc., are carefully collected, preserved, and bound. The number of volumes which have been added to the library by binding is 536. All the books in the library have been entered on the accession ledgers, and for all except the sheep-bound Congressional set shelf lists have been completed.

Probably no one will question that this is already an important collection, but Miss A. R. Hasse, the librarian by whose industry and intelligence it has been made, is of the opinion that it represents hardly one-third of the total number of documents which has been printed from 1789 to the present time. She bases her estimate on the lack of completeness of the various series in the library as they now stand, and she includes in it all the varying editions of each book.

Might not some aid well be given by Congress to the effort to complete this exclusively document library? Has such an effort been made before? Can it be made at any later time with equal prospect of success? Has any other office so good an opportunity to do this thing which is so well worth the doing? This office has an extensive clearing-house business with the libraries of the country, they sending in their duplicate documents and receiving in exchange such documents as they may need to complete their sets, so far as I am able to supply them. Up to the 1st of July I had received from the libraries

in this way more than 30,000 volumes, and had sent to them a great number. Hardly a consignment was received in which something was not found that was needed in the document library of the office, and these receipts also enabled me to be of service to many Government Departments, bureaus, and offices in filling gaps in their files, sometimes of their own publications. I have furnished almost 1,000 volumes to various Government offices for this and like purposes, and in many cases the documents so secured have been of very great value.

As one instance among many of the "finds" which this system brings in, I may mention that the librarian of Fairmount College, Wichita, Kans., lately sent me a perfect copy of the Census of 1800. It is complete in 74 folio pages.

Having the advantage of this clearing-house system to start with, a small appropriation might accomplish much toward completing the document library. I will not attempt to suggest any amount, but this is a matter in which a little money judiciously used will go a long way. But of course with the lapse of every year the chance of complete success becomes less.[1]

In the organization of this office the supervision of the librarian extends also to the many thousands of duplicates of many of the volumes of which single copies only are represented in the foregoing library table. The number of these duplicates, and the sources from which they were received, with the number distributed throughout the country during the year, are shown in an appendix.

---

[1] Since this report went to the printer an important English work has come to hand, The Theory of National and International Bibliography, by Mr. Frank Campbell, of the library of the British Museum. It has many references to the work of this office, and many of the opinions advanced in it bear upon and corroborate the arguments of this report. I would gladly quote freely from it did space permit, but I must content myself with the following brief passage: "We come now to a most important part of the subject, viz., the need for national libraries of official documents. This is a need which has been imperfectly recognized in most countries. In America they are awaking to the fact of its necessity. The theory of the subject is simple. Official documents form a division of literature wholly distinct in itself, requiring a separate treatment in every way. As a division, it consists mostly of periodical literature, and increases rapidly in bulk, wherefore it requires a roomy building capable of expansion. Official documents are very heavy; therefore the building should not be more than two stories high, and there should be extensive room for the reading public on the ground floor, so that a mass of volumes can be consulted direct by the readers themselves. Such a building should be adjacent as part of a national general library on account of the fraction of official literature which belongs equally to a general library. These are the main points to remember. But, as said before, it is no use librarians attempting to catalogue official documents, unless they are published with a view to subsequent necessities of cataloguing. This necessitates, therefore, that the Government Printer shall be a Government Printer-Librarian; that is, the librarian must be represented on his staff. This need is being recognized in America in the creation of the office of the 'Superintendent of Documents.' Let it be hoped that the same example may be followed in every civilized country."

DOCUMENT CATALOGUE

At the date of my first annual report, October 1, 1895, I thought and said that the first issue of the Document Catalogue (or "comprehensive index"), to cover the period from March 4, 1893, to June 30, 1895, was "substantially complete," needing only a few weeks' time for revision before sending it to the printer. This revision proved to be a much more serious matter than had been anticipated. It was a case of "haste makes waste." Anxiety to push the work led me to impress inexperienced persons into the service, and the result was that a good deal more time was spent in revising their work than they had spent in doing it. It was not till June 16, 1896, that the copy was finally sent to the printer. The period covered is twenty-eight months, and the Catalogue fills 638 double-column imperial octavo pages. At the same rate a book of about 275 pages would be required each year to catalogue the public documents with the same minuteness that has been practiced in the first issue of the Document Catalogue. As a matter of fact, however, the second Catalogue, the one for the first session of the Fifty-fourth Congress, covering a period of only twelve months, will, on the same plan, considerably exceed this average. This is because of the great number of documents and reports issued by the first session of the Fifty-fourth Congress, the number being greater than for the whole of the Fifty-third Congress.

The Document Catalogue of the Fifty-third Congress is preserved as a card catalogue in this office, additional to the printed volume. When the Catalogue for the Fifty-fourth Congress shall have been printed, the cards for that will be combined with those for the Fifty-third Congress, making a consolidated catalogue on cards of the two Congresses together. All catalogues for any Congress whatever, past or future, which shall be hereafter prepared in this office, will be so combined. A consolidated card catalogue will thus be preserved in this office, from which, at any time, a combined catalogue covering as many Congresses as have singly been issued can be printed in one volume with but slight revision. It is of course clear that this is possible only by adhering strictly to the general plan on which the catalogue has been begun. As all indexers know, a catalogue on a different plan, even though it were an equally good plan, could not be consolidated with this one. Detailed rules, and a cataloguing staff, small but well-trained, have now, thanks to civil-service examinations, been acquired by this office. This system and this training, which a little time and experience are required to obtain, will expedite future cataloguing work.

The first impression, probably, that will come to most people who look through the first number of the annual Document Catalogue will be surprise at the vast diversity of the subjects touched upon in the public documents. There are few themes of human interest that are

not in some way brought under notice in this Catalogue. Maps and charts as well as books have been included, and as the Government of the United States is said to be the largest map publisher in the world, it is not clear on what grounds they have been omitted by former cataloguers of Government publications. Effort has been made also to include circulars, orders, bulletins, and similar fugitive publications, which often contain matter of public moment that, in the absence of catalogues, it is extremely difficult to trace. If anything of this kind has been omitted, it is because I have been unable to procure it. There has not been in all quarters as keen an appreciation as could be desired of the fact that the value of a catalogue of public documents (as of a catalogue of any kind) depends on its completeness. If it omits a percentage of the publications which it professes to show, its value is obviously to just that extent impaired. The law providing for the supply of documents to me for cataloguing is not so detailed and comprehensive as it might profitably be made, a matter as to which something is said elsewhere in this report.

While I feel great confidence that this Catalogue is a step in advance of any previous effort in the same direction, I can not presume that everything has been done in this first number that might be done or should be done to make the best practicable catalogue of public documents. Several improvements in details have already suggested themselves to the compilers of the work, and I hope to be able to incorporate many more in the next Catalogue as the result of friendly criticism from librarians, legislators, collectors, and students, who may make practical use of the first number. Such criticism is earnestly invited and will be gratefully received.

As an instance of the effect which the confusing duplication of editions may have on the cataloguing of public documents, I mention a single case, the only one of its exact kind that I have yet discovered, though I am not free from fear that there may be others like it. The Bureau of Statistics of the Treasury Department prepared a work called Wool and Manufactures of Wool, at Home and Abroad, which was listed for publication as House Miscellaneous Document No. 94 of the second session of the Fifty-second Congress and was printed in a cloth edition in 1894. Dr. Ames, in making his Comprehensive Index for the Fifty-first and Fifty-second Congresses, could not wait for the sheep-bound reserve editions of all the documents actually to appear, but was driven (as he explains in his preface) to carry them into his index from advance schedules furnished by the Government Printing Office. As the cloth edition of the statistical work on wool did not fall into his hands, he indexed the sheep edition from the Printing Office lists. The Fifty-second Congress ended March 3, 1893, but the sheep edition indexed by Dr. Ames has not yet made its appearance. The cataloguers in this office had the cloth edition, but under the rule not to duplicate Dr. Ames's work they

omitted it. The net result is that the sheep edition, which has never been published, has been catalogued, while the cloth edition, which was published more than two years ago, has not. This is the sort of thing by which cataloguers will be in danger of being tripped up so long as Congress permits the present archaic methods of publication of the public documents to continue.

DOCUMENT INDEX

The index to Congressional documents alone, called in the statute the "consolidated index," is at the date of this report engrossing the attention of the cataloguing staff of the office. The plan followed is that of making a single index, all in one alphabet and printed in a separate volume, to replace the six indexes which have heretofore been printed, one each in the Senate executive documents, Senate miscellaneous documents, Senate reports, House executive documents, House miscellaneous documents, and House reports. This work begins with the first session of the Fifty-fourth Congress, not running back to the Fifty-third like the Document Catalogue. I am convinced that this new form of index will be accepted as a decided improvement upon the former six-index plan, but when the Document Catalogue, which started two and a half years behind, has been brought up to date, the Document Index will be superfluous, as the Catalogue covers the same ground. To be sure, it covers it in a diferent way, but it is a way likely to be even more satisfactory than that adopted for the Document Index.

MONTHLY CATALOGUE

Section 69 of the printing law approved January 12, 1895, makes the following provision for a monthly catalogue of public documents:

SEC. 69. A catalogue of Government publications shall be prepared by the Superintendent of Documents on the first day of each month, which shall show the documents printed during the preceding month, where obtainable, and the price thereof. Two thousand copies of such catalogue shall be printed in pamphlet form for distribution.

The production of this catalogue was the first publishing work undertaken by this office. As it seemed advisable to carry it back to January, 1895, it started about six months behind date. By December, 1895, the arrears had been caught up, and from that time the Monthly Catalogue has been regularly issued. It can not appear on the first day of the month like a monthly literary magazine. It was decided that in order to prevent misunderstandings the Catalogue must bear the date of the month in which the documents catalogued in it were printed. It is, of course, impossible to complete the catalogue till after the end of that month, and usually not till several

days after. The time required for printing must be added, so that usually the mailing of each issue is delayed till the latter part of the month succeeding that in which the documents catalogued were printed. These conditions of its publication have caused some people who receive the Monthly Catalogue and are eager for its coming to suppose that it has been irregular and unduly late in its issue. This is not the case. It has been issued regularly and at the earliest date practicable ever since the arrears of work on it were caught up.

In my first annual report I mentioned the favor with which the Monthly Catalogue had been received. That favor has been continued, and the expressions of it which have been received in numerous letters have been most gratifying and encouraging. I will spare space to quote but few of them:

Messrs. R. Z. Jiminez & Co., engineers and contractors, No. 44 Broad street, New York, say: "We beg you to put our name on your list for your Monthly Catalogue. There is valuable information in it which we can not find anywhere else."

Mr. G. A. d'Hemecourt, civil engineer, San Diego, Cal., says: "Permit me at this very late day to thank you most sincerely for the Monthly Catalogue of United States Public Documents, all the numbers of which I have so far received through your kindness. As I look back now and realize the immense amount of valuable information I have been able to gather through the instrumentality of the Monthly Catalogue, I am unable to understand how it has ever been possible for me to get along without some such publication."

Col. A. Mackenzie, Acting Chief of Engineers of the Army, writes: "Receipt is acknowledged of your letter relative to distribution of your Monthly Catalogue, and while it is regretted that you feel obliged to strike off your list the officers of the Corps of Engineers as a body, it is hoped that their names may be restored should Congress authorize any increase above the limit now prescribed. The Catalogue has been instrumental in placing in the hands of our officers valuable papers, the existence of which would not have been ascertained except through such a medium."

The popularity of the Monthly Catalogue has brought embarrassment. The small edition for which the law provides is no longer sufficient to supply the mailing list. The plan pursued in making this list has been to add to it the address of every citizen who asked for the Catalogue, but no others. The only exceptions to this rule are Members of Congress, the publishing bureaus of the Government, and the depository libraries. It has been assumed that anybody who would take the trouble to write and ask for the Catalogue would be likely to have good use for it. If another rule be adopted, and all be refused who can not be supplied from the 2,000 copies now provided by law, I shall not know how to discriminate—whom to supply and whom to reject. The requests for single copies and for the regular monthly

supply of the Catalogue do not diminish in number. The flow of requests is constant, with an evident tendency to increase. No day passes without the receipt of several such requests, coming from all sorts and conditions of men in every part of the country. It is possible that an increase of the edition from 2,000 to 3,000 might enable me to supply all proper requests for the Monthly Catalogue for a year to come, but it could not do more than that (if so much), and next year it would be necessary to ask for another increase. Would it not be better to provide for a little larger growth and a little longer time by giving permission to print as many copies each month as may legitimately be called for, the total not at any time to exceed 10,000? This would probably be all the action that would be needed for several years to come.

The alternative to this is to make a charge for the Catalogue, and this seems inadvisable, as the Catalogue is the key to all the publications; and to limit the supply of Catalogues would certainly be to limit the sale and the use of public documents generally, while the evident and understood purpose of Congress in providing catalogues of the public documents was to extend the popular knowledge and use of them by making them better known and more easily found and understood. Most private publishers give away their catalogues, and find that doing so is the best advertisement for their publications. It is not likely that in such a matter the Government will adopt a policy which is less liberal than that of private tradesmen.

The cost of additional copies of the Monthly Catalogue will not be large. The average size of the eighteen numbers which had been printed up to June 30 was a fraction less than 39 pages 12mo., and this average is not likely soon to be exceeded. At the usual price fixed by the Public Printer for public documents the additional Catalogues of an increased edition would cost less than 2 cents each.

SALES OF DOCUMENTS

In round numbers, about 3,600 documents were sold during the first year of the existence of this office, at an average price of about 25 cents per document.

This, in my opinion, is not more than one-fourth the average price of books of similar size and mechanical quality in the private book trade. As required by law, the sales have been made at cost, "said cost to be estimated by the Public Printer and based upon printing from stereotype plates." Under this rule all octavo pamphlets not exceeding 100 pages and having no plates have been sold for 5 cents, and at this nominal rate the latest results of the researches of the numerous scientists in the employ of the Government have usually been supplied to the farmers, stockmen, dairymen, apiarists, engineers, lumbermen, and students and collectors of the country. From this

lowest price there is an ascending scale, which reaches the top in some of the elaborately illustrated surveys and explorations at $10 per volume.

In supplying the people with works of recognized authority at these low prices, the Government of the United States is doing for its people in the direction of popularizing and applying the results of scientific investigation that which I believe no other Government has ever done, and the utility of which in promoting the education and welfare and prosperity of the people can not be measured. There is one merit about the method of distributing public documents by sale that can not be claimed for the method of free distribution. The book which is sold always goes to somebody who wants it and is likely to make good use of it. A percentage (generally supposed to be a somewhat large percentage) of those given away falls into indifferent hands and is wasted.

Low though the prices are, they are sufficient to divide the real user of Government books from the merely curious and from the greedy claimant. The man who calls for $1,000 worth of books on a single postal card has no use for a price list, no matter how low the prices may be placed. I have received many letters and postals conveying such demands as these: "Send me the Congressional Record from 1871 to 1896, inclusive." "Send Congressional Record and Globe from the beginning." "Send all the scientific publications of the Agricultural Department and the Smithsonian Institution." Evidently the idea of these claimants was that as the books were supposed to be free it was as easy to ask for a carload as to ask for those that were really desired. I have had very few protests from citizens who objected to the Government selling public documents, but I have had many congratulations from citizens who expressed pleasure that they were able to get the documents without placing themselves under obligation to anybody, and especially that there was one place where they might get all the different kinds of Government publications. The number of citizens in any Congressional district who are personally acquainted with the Representative and feel free to ask him for favors in the way of documents, or feel that such asking would be likely to produce any result, is comparatively few, and the number of those who feel at liberty to ask like favors of the heads of Executive Departments or Bureaus is even less, but all feel at liberty to buy, and the opportunity to do so at the low Government prices is valued, and bids fair in the near future to be availed of extensively.

The eagerness to secure the public documents of the United States—especially the scientific documents—is by no means confined to our own country. Not only have orders been received and filled during the year from apparently almost every nook and corner of the United States, but also from Canada, Mexico, England, Germany, Bulgaria, Italy, Holland, Australia, British India, and the Friendly Islands.

Though the Government makes no provision for advertising its books in the ways usually followed by private publishers, yet they are extensively advertised, as is proved by the prompt receipt of mail orders from very remote points following the issue of interesting treatises. The issue of a monthly list of its publications by the Department of Agriculture furnishes some of this advertising, and some is furnished by the Monthly Catalogue of all Government publications issued from this office, but more comes from the great liberality of the agricultural and scientific press of the country in freely and fully announcing the scientific issues of the Government Printing Office.

The sales of public documents by this office show a continual increase, indicating that they may in time grow to large proportions. By months, for the fiscal year 1896, the numbers sold were as follows: July, 4; August, 4; September, 10; October, 68; November, 52; December, 52; January, 238; February, 295; March, 601; April, 648; May, 903; June, 706.[1]

The sales were frequently limited by inability to supply the books that were desired. Hundreds of remittances were returned for this reason, causing expense for clerk hire and stationery without any resulting good. The demand may in time reach such a settled stage that it will be possible to indicate to Congress the probable demand for certain documents and recommend the issue of supplies in corresponding number.

The sales trade of this office has been built up out of nothing—that is, the sales have been mainly of books not sold before. The provision in the printing law that officials having books for sale who wish to be relieved of the same may turn them over to this office has not been availed of by any official except the Public Printer, and the books turned over by him had nearly all been published years ago and had ceased to be in active demand.

CORNERING THE DOCUMENT MARKET

The limitation which the printing law puts upon the number of documents the Departments may print is doubtless intended to promote economy, but a hard and fast rule, permitting no discretion anywhere, is likely to produce unexpected and injurious results. Such results from this law were experienced when a new edition of the Army Regulations was issued last fall. The official edition published under the terms of the law was not sufficient to supply even those in Government service who were compelled to have the Regulations because their conduct is governed by them. Dealers in documents were well aware of the condition, and they ordered special editions from the

[1] The increase has continued even more rapidly during the present fiscal year, the sales for the first six months aggregating 6,431 in number and $1,610.11 in value.

Public Printer and then combined to put up the price. In this way hundreds of Government employees were compelled to pay $3 each for copies of the Regulations which the Government required them to be familiar with, though the cost of production of the book and the Government price for it was but 50 cents. This was all done in strict conformity to law, a fact which seems to show that the law needs a little more flexibility in this particular. In the end the Public Printer was compelled to exercise a good deal of discretion in order to relieve the situation; but it would seem that a natural remedy for such situations ought to be found in the law without resort to forced interpretations. It would not seem to be impossible to place authority somewhere to provide extra editions in case of extra demand, such editions to be sold at the usual Government price, thus supplying the people in interest without subjecting the Government to undue expense.

The Army Regulations is by no means the only Government book that has been cornered and made the subject of extortion. This case is especially mentioned because it occurred under the new printing law, and as a direct consequence of the provisions of that law.

PROPOSED AMENDMENTS TO THE PRINTING LAW OF 1895

That the new printing law has not always in its relations to this office worked as its projectors anticipated is due, in some part, to the fact that its passage was delayed for several years after its introduction, and some of the phraseology which had in the meantime become obsolete remained unchanged. One such provision relates to supplying the depository libraries with the statutes of the United States. This provision has not been carried out, but if it were carried out in full it would leave the libraries without the laws passed by the Fifty-second Congress. The desirability of a brief amendment to cure this defect is obvious.

A more important amendment is needed to bring the official archives and the official catalogues into harmony. There is one provision (section 58) for supplying material to the Senate and House libraries and document rooms for preservation, and another provision (section 62) for supplying material to the Superintendent of Documents for cataloguing. Under these provisions a considerable amount of the printing done at the public cost and preserved according to law in the public archives does not reach the Superintendent of Documents and is not catalogued. The two provisions do not match. One collection is preserved and another is catalogued. The official catalogues thus fail to be the guide to the public records of the Government which they were intended to be, and a considerable part of those records will remain uncatalogued, and therefore inaccessible and comparatively useless. This is a most serious defect, especially from a historical

point of view, but it may easily be remedied by a brief amendment to section 58, adding the office of the Superintendent of Documents to the short list of those to which copies of all printing not of a confidential nature shall be sent for preservation.

Another provision which has not produced the expected result of supplying to the depository libraries a full set of Government publications is the last clause of section 58, in which it is provided that "of all publications of the Executive Departments not intended for their especial use, but made for distribution, 500 copies shall be at once delivered to the Superintendent of Documents for distribution to designated depositories," etc. The absence of any statement as to who shall make this delivery, or whether the 500 copies shall come out of the Department quota, or shall be printed in addition, or who shall decide whether any particular book is intended for the especial use of the Department or for public information and distribution, makes this clause so ambiguous that for a long time no action whatever was taken under it. Finally the Public Printer concluded that it was another of the numerous instances in which an extreme discretion had been imposed upon him, and he has since printed an additional 500 of many documents and furnished them to me for distribution to the libraries.

The best results can hardly be expected from imposing such an extensive discretion upon a single official. It amounts to requiring the Public Printer to read all the public documents which are not in the Congressional numbered set, and to determine from the internal evidence whether they are for a special official use only or for the information of the public. This is manifestly impracticable and unreasonable. Even if the Public Printer were to employ a corps of literary experts to read the documents for this purpose, the result would not be conclusive, for the reason that many documents which on their face appear to be entirely for official use are in active popular demand. Such are the Postal Laws and Regulations, the Pension Laws and Regulations, the Army Regulations and some of the Army manuals, the Navy Regulations, the Consular Regulations, and many others. I would suggest that this ambiguity might be removed, to the relief of the Public Printer and the benefit of the libraries, by a brief amendment requiring that each public official who makes a requisition for printing shall state in the requisition whether any part of the edition of the publication ordered is to be for the information of the public or whether it is all to be exclusively for official use. If it is in any part for public information, then the Public Printer might be explicitly authorized to print 500 additional copies for distribution to the depository and State and Territorial libraries. I respectfully recommend such an amendment as clearly needed to carry out the understood purpose of the printing bill.

Two important series which it was evidently supposed would reach

the depository libraries under section 58, but which have not thus far been supplied for that purpose, are the Decisions of the Interior Department in land cases and in pension cases. The libraries have had 19 volumes of the Land Decisions and there have been 22 volumes published. They have had all the volumes of the Pension Decisions thus far published, seven in number, and under existing provisions they will receive two more, when their right will expire by limitation. Even should section 58 be amended as herein recommended, action will be necessary to give the libraries volumes 20 to 22 of the Land Decisions.

I noticed with gratification the repeal of the provision in the printing law that each Representative in Congress should send eight sets of his allotment of the Congressional Record to libraries through this office. The reasons why the provision, as it stood, was of little value to the libraries were given in my first annual report.

MISSING SETS OF THE CONGRESSIONAL RECORD

Before the passage of the printing law of 1895 the sole dependence of the public libraries and colleges of the country for files of the Congressional Record was the individual bounty of Senators and Representatives. Usually, no doubt, this worked reasonably well, especially for those libraries whose librarians were prompt and vigilant in keeping their friends in Congress reminded of their needs at the opening of every session, when the Record mailing lists were being made up. But in two recent instances this source of supply seems to have given out almost altogether. These instances are the second session of the Fifty-second Congress (December 5, 1892–March 3, 1893) and the second session of the Fifty-third Congress (December 4, 1893–August 28, 1894). For some reason, not very clearly apparent, the public and college libraries which have these two series of the Record—absurdly known as volumes 24 and 26, though volume 24 is really in four volumes and volume 26 is in eleven volumes—are the exception rather than the rule. During the recent political campaign, when there was something like a raid on every public library for the Congressional Record, many unenterprising librarians waked up to the fact that their files were deplorably deficient, and applications for the missing volumes poured in by the score, but I was unable to supply the demand for the two volumes spoken of. They are apparently out of print, and unless a reprint shall be ordered there will be lamentable breaks in numerous library files. One hundred sets of volume 24 and 200 sets of volume 26 would not be too many.

Under the new law the depository libraries are supplied with bound copies of the Record through this office. Their supply is thus made sure, and for the first session of the Fifty-fourth Congress it was very prompt—more so, I am assured, than ever before. There are, however,

thousands of libraries that need the Record for which no permanent supply has been provided. My advice to them is to be early in applying to their Senators and Representatives, instead of waiting till the mailing lists are all made up, and then thinking themselves badly used because they can not get a supply. The popular idea is that a Member of Congress can have as many books as he wants, and that if he doesn't supply all that are asked for he is withholding them out of mere meanness. Librarians, at least, ought to know better. They ought to know that each Senator or Representative has an equal and limited allowance, and can supply no more, and that the earliest worthy applicants for his gifts are most likely to be successful.

A PUZZLE UNPUZZLED

During the first session of the present Congress many Members were puzzled by receiving requests for long lists of books of such a diversified character that nobody but a second-hand bookseller would seem to have use for them, and with such absence of dates and in many cases under such defective titles that it would have been impossible to identify and supply the books had an effort been made to do so. No doubt many Members will recognize the source of their puzzlement in the list given in the following circular, which was issued and distributed during the recent session:

[A literal copy.]

JOURNEYMEN BOOKBINDERS' SOCIETY OF THE DISTRICT OF COLUMBIA,
LOCAL UNION NO. 4, I. B. OF B.

To the officers and members of Local Union No. ——:

We desire to direct the attention of your Union to a list of publications issued by the Government, for the benefit of the citizens of the United States, any of which you are entitled to upon application to your Representative in Congress.

Report of the U. S. Commissioner of Labor.
" " Education.
" " the Census.
" " Immigration.
" " Navigation.
" Secretary of Agriculture.
" " the Treasury.
" " " Navy.
" " " Interior.
" " War.
" U. S. Fish Commission.
" " National Museum.
" Weather Bureau.
" Ordinance Committees.
" Bureau of Animal Industry.
" Military Engineering.
" the Land Office.
" " Naval Academy.
" " Geological Survey.
" " Comptroller of Currency.

Report on Transportation.
" Indian Affairs.
Treatise on Chemistry by A. C. Atwater.
Report of Coast Surveys.
" Steamboat Inspection.
" Smithsonian Institute.
" Coast and Geodetic Survey.
" Fish and Fisheries.
" Supervising Architect.
" Director of the Mint.
" Surgeon-General (U. S. A.).
" Civil Service Commission.
" Interstate Commerce Commission.
" the Attorney-General.

President's Messages—52d—53d—54th Congress.
Foreign Relations.
Introduction of Reindeer in Alaska.
Housing of Working People (by Carrol D. Wright).
Diseases of the Horse.

All of the above bound documents are interesting and also very instructive.

By exercising your privilege in procuring them you will not only provide yourselves with valuable information, but you will also benefit our trade by creating a greater demand for the number of publications now provided for by Congress.

Very respectfully,

[Names of members of committee omitted.]

Com. on Distribution of Govt. Publications.

102 Mass. Ave., N. W., Washington, D. C.

To comment upon this would be to paint the lily; but it seems a natural enough outgrowth of the system of profuse free distribution of public documents which has prevailed for a generation.

F. A. CRANDALL,
Superintendent of Documents.

Hon. THOS. E. BENEDICT,
Public Printer.

LETTERS ON THE PENDING BILL

OPINIONS OF LIBRARIANS AND OTHERS AS TO NEEDED IMPROVEMENT IN METHODS OF PUBLICATION OF PUBLIC DOCUMENTS

GRAY, JOHN H., Professor of Political and Social Science:

NORTHWESTERN UNIVERSITY,
Evanston, Ill., March 25, 1896.

DEAR SIR: I have read with the greatest interest, satisfaction, and approval the "First draft of a proposed bill to reduce the cost, etc., of the public documents," etc.

I am not a librarian, but as professor of political and social science I must depend very largely on the public documents. Both as a student and as an instructor in Harvard University, where probably as much use is made of public documents as anywhere in the country, I had an excellent training in the scientific use of such material. Yet I must confess that to this day it is with the utmost difficulty that I can find everything of that sort which I want to use. As for teaching undergraduates to use the public documents, which contain much matter suited to their use, the whole system of issuing public documents makes it impossible. Truly only a well-trained man can make use of our public documents to-day. If Members of Congress could know how many times students, and even people not connected with the university, appeal to me for references to material for the study of some topic on which our Government has published valuable material, and if they could know how often I am unable to give specific enough reference, or when I give the reference how many times the person asking the aid is unable to find the material, they would rush your bill through. This difficulty nearly always arises when the material sought has been published at different times through a series of years. What you say about delays in "the reserve" is only too sadly true. Success to the bill. I will write some letters in its behalf to Members of Congress.

Respectfully, yours,

JOHN H. GRAY.

LARNED, J. N., Librarian Buffalo Library, ex-President American Library Association:

BUFFALO, N. Y., *March 25, 1896.*

MY DEAR MR. CRANDALL: I have been carefully over your proposed bill to reform by systematizing the publication of public documents, and I heartily indorse every one of its provisions. You have unquestionably cut the hard knot of the whole tangle in taking (if you succeed) the annual reports of executive officers, commissions, etc., out of the Congressional reserve and in stopping the sheep binding of the reserve. I suppose that every librarian who has to do with the documents has prayed for both these changes, without understanding the whole importance of them. I for one was not aware how much the waiting of the annual reports to receive numbers and places in the Congressional set had to do with the delay in their distribution, nor how much the sheep binding of the reserve clogged the whole business. But I have been as ready as John Randolph to kick a sheep every time I had to handle a Congressional document ten years old; and I have to break the Congressional set entirely up in order to maintain my library classification.

From every point of view your proposals are sound, and the library interest of the country is sure to support them warmly. I shall ask our board of managers, at its meeting next week, to adopt resolutions urging the measure, and I will also write personally to Messrs. Daniels and Mahany. If there is anything else that I can do, please let me know.

Very truly, yours, J. N. LARNED.

MASSACHUSETTS Library Club:

DEAR SIR: The Massachusetts Library Club, an organization representing 135 librarians in Massachusetts and Rhode Island, at a meeting held in Bridgewater, Mass., on April 8, took into favorable consideration the bill recently drafted by Mr. F. A. Crandall, Superintendent of Documents, for the better publication of the public documents of the United States, and empowered the executive committee of the club to take action in the matter.

The executive committee having carefully considered this "first draft of a proposed bill to reduce the cost, increase the value, and simplify the methods of publication of the public documents furnished to designated depository libraries," believes the proposed bill to be excellent, both in its aim and in the methods proposed for attaining that aim.

Our public documents, once neglected, are now eagerly studied in colleges and in schools and constantly consulted in libraries. Yet their great value has only begun to be appreciated by the public. They are necessarily voluminous and for convenience of readers must in general be housed in libraries. Being voluminous, they are difficult to consult, and readers need the help of persons who have become familiar with the series.

We believe that this bill if enacted will decrease the cost of the documents and enable them to be distributed to a greater number of centers of population, thus becoming accessible to a greater number of people, and that it will so simplify and distinguish the documents that every set distributed will be much more easily and cheaply made available for full use than is now the case.

In behalf of the education of the people in political affairs and their information in their particular interests by the freer use of these documents in colleges, schools, libraries, and homes we invite your attention to this bill and respectfully urge its speedy enactment into law.

WILLIAM H. TILLINGHAST, *Secretary.*

MOLDENKE, RICHARD G. G., Consulting Engineer:

PITTSBURG, *March 26, 1896.*

DEAR SIR: I have just written to our Senator and Representative favoring your proposed bill, a draft of which you sent me. I would add that as it stands it meets the situation exactly. There are more men of affairs and in business than Congress thinks who are very anxious to see the full value of the Government publications brought out, but this will not be realized before uniformity is introduced, and, in addition, until every publication, small or large, can be bought at a reasonable figure at any time.

This is the case with the English Government. I remember having to do with a lot of sanitary questions in New York which required some authoritative knowledge of the London slums. We had no difficulty in obtaining the full reports of the Parliament commission, and that at a nominal price, too; so I hope you will succeed soon in bringing our own Government publications on a like basis.

Yours, respectfully,

RICHARD G. G. MOLDENKE.

PUTNAM, HERBERT, Librarian Boston Public Library:

BOSTON, *April 23, 1896.*

DEAR SIR: I am glad of the opportunity to express my hearty approval of the plan to better the methods of printing, binding, and distributing public documents. Your inability to furnish to us volume 3, Senate reports, Fifty-second, second, as stated in your communication of April 10, is of itself an indication of the necessity for some change in methods. The report in question was issued, I believe, over a year ago in cloth, was discussed in the press, and is commonly quoted in documents since published, but as the library did not receive a copy at the time of publication and the "reserve" copy will probably not be issued for months, the information contained in the report is in effect inaccessible to our readers until it will have ceased to be of live interest.

Under the present methods, where the same report may appear in such various forms, the labor of tracing material is so great that to insure against omissions there will be necessary, in a library like this, the constant service of an attendant who shall do nothing else but trace the publications and apply for such as do not come in ordinary course. Your scheme to bind the reports and series in different colors, with a uniform lettering, seems to me excellent. It would greatly reduce this primary labor of identifying material and would similarly reduce the labors of the searcher. Section 11 of the proposed bill would also seem to me a great improvement, the quarto form being inconvenient to handle and involving in many cases a wasteful expenditure of shelf room.

In behalf of this library I beg to assure you of our very heartiest appreciation of this effort of yours to induce simplicity in place of the present confusion and complexity. If there appear any way by which we can exert an influence in favor of the proposed bill, we shall be glad to do so. At present I see nothing that can be done by this institution individually save to urge attention to it on the part of our local representatives in Congress, and I have written to them accordingly in its behalf.

Very truly, yours, HERBERT PUTNAM, *Librarian.*

RHEES, WILLIAM J., forty years in charge of Smithsonian documents:

SMITHSONIAN INSTITUTION,
Washington, March 21, 1896.

DEAR SIR: I have read and studied with care your "draft of a bill to reduce cost, increase value, and simplify methods of publication of the public documents," and I do not hesitate to say that in detail as well as in whole it meets my hearty approval. I have had charge of the publications of this institution for forty years, and had long experience with public documents, and think I am qualified to judge pretty well of the merits of your bill.

Yours, respectfully, WM. J. RHEES.

UTLEY, H. M., Librarian Detroit Public Library, ex-President American Library Association:

OFFICE OF PUBLIC LIBRARY.
Detroit, March 24, 1896.

DEAR SIR: I have read with much interest your draft of a proposed bill to simplify the methods of publication of the public documents furnished to depository libraries, and the accompanying comments. I most heartily indorse the scheme set forth in the bill, which it appears to me is sufficiently explicit and comprehensive to accomplish a much-needed reform. The confusion and needless expense of the present system are set forth by you in very moderate terms. The facts would justify putting them in even stronger light.

The sheep-bound "documents," so far as they duplicate the cloth-bound publications of the several Departments, are so much useless lumber. In this library they are given shelf room, because we can spare it at present, and because they fit in with the set sent us as a depository library. They are not of the slightest practical use, for the reason that it would require even more intellectual acuteness than that of the proverbial Philadelphia lawyer to find any given thing in them. Through the kind attention of some Member of Congress we have been able to acquire the cloth-bound volumes from the Departments and Bureaus, and shall make an effort to continue to do so. These volumes we classify and arrange in such way as to make their contents available to the public. If the time ever comes when it is necessary to clear some of our shelves to make room for more important things, these sheep-bound duplicate "documents" will undoubtedly be relegated to the catacombs.

I most heartily indorse your views on the subject of binding. Cloth is much better than sheepskin for a book which is to stand on the shelf of a library from one generation to another and is not subjected to the strain of constant daily use. The leather is rotted by the action of light, heat, and vitiated air; the cloth is only destroyed by wear. Cloth is preferable for a book of that class, wholly aside from the question of first cost. The scheme of indicating by the color of the binding the Department from which a volume issues is an admirable one. The practical uses of this designation by colors no one can appreciate better than a librarian. The idea is in vogue in almost all large libraries of indicating by colors various things which require to be easily and quickly distinguished from each other. A system need not be long in use before every library attendant knows at a glance the character and place of any book, card, reading slip, or other article thus distinguished. There is very much, from the point of view of a librarian, in giving a distinctive appearance to each set or series and preserving this resemblance throughout. I would emphasize this feature of your proposed bill.

The need of reform in the matter of public documents has been for a long time obvious to us who work in libraries. I am heartily glad that you have taken hold of the subject, and I am more than pleased at the eminently practical character of your suggestions.

You are at liberty to make such use of this letter as you think proper. If the bill shall come before Congress in substantially its present shape, I shall certainly urge upon the Members of Congress whose districts include this city its active support. Please advise me if, in your opinion, there is any special way in which I can be of assistance in forwarding the measure.

Very respectfully, yours, HENRY M. UTLEY.

AMES, Dr. JOHN G., for many years Superintendent of Documents, Department of the Interior:

"I have looked over your proposed bill very carefully. It seems to me to cover the subject very satisfactorily. It is more comprehensive and more minute in its provisions than the bill reported in the House relative to the same general subject, and for these reasons is, I think, a more satisfactory bill. Your proposition to bind all these documents in cloth I certainly should have no objection to. The binding of them in half morocco, as suggested in my bill, I thought would better satisfy the libraries and would be no more expensive than full sheep; but if the libraries themselves are satisfied with cloth, so much the better. This would secure a very great saving and would be much more likely to insure prompt binding. I have no doubt whatever but that the library fraternity as a whole will indorse the provisions of this bill and will bring their influence to bear to have them adopted."

AMHERST College Library, Amherst, Mass.; W. I. Fletcher, librarian, ex-President American Library Association:

"I can't tell you how glad I am (and I'm sure all librarians will feel the same) that you have taken this bull by the horns so energetically. Really the public document skies seem to be clearing."

ARKANSAS Cumberland College, Clarksville; J. A. Laughlin, chairman of faculty:

"I am satisfied that the proposed changes or some similar ones will greatly increase the value of the Government publications to the general public. Many of the Government publications furnish indispensable sources of original information (information not to be found elsewhere), but it takes an expert to find it."

BEACH, LANSING H., Captain of Engineers:

"If you can systematize the Government publications in the manner proposed, you will accomplish a great work and make yourself a public benefactor."

BOWDOIN College Library, Brunswick, Me.; George T. Little, librarian:

"I wish to thank you for taking the start in this needed reform and to express my willingness to aid in any way I can. The librarians generally will surely take up the matter."

BROWN University Library, Providence, R. I.; H. L. Koopman, librarian:

"I need hardly say that I am deeply interested in your plan of rectifying the publications of the United States Government and that I am heartily in favor of it."

BUTTE (Mont.) Free Public Library; John F. Davies, librarian:

"I am obliged to you for a copy of your proposed bill, and am pleased to see that it includes some very desirable improvements in the manner of printing and handling documents."

CAMBRIA Free Library, Johnstown, Pa.; W. D. Turner, librarian:

"I take great pleasure in giving my unqualified approval to the plan suggested, and I think it is high time something were done to get some practical use from the many volumes of public documents scattered regularly throughout the land."

CARNEGIE Free Library, Allegheny, Pa.; W. M. Stevenson, librarian:

"Your proposed bill is admirable and meets my unqualified approval. The man who succeeds in disentangling for librarians the public documents deserves immortality."

CARNEGIE Library, Pittsburg; E. H. Anderson, librarian:

"It seems to me that you have hit the nail on the head with wonderful precision and force. Every librarian knows what an exasperating muddle there is in the Government publications as now issued. And it is exactly as you say; we can not make them nearly so useful to the people as would be possible if they were issued in a common-sense and systematic way, such as your bill provides for."

CHICAGO Historical Society; Charles Evans, librarian:

"Years of experience with the hit-or-miss methods formerly prevailing have led me to admire the efficiency and business methods now in use for the proper distribution of public documents."

COLORADO Agricultural College, Fort Collins; D. W. Working, secretary:

"*Resolved*, That we, the faculty of the State Agricultural College of Colorado, do most respectfully urge upon the United States Senators and Representatives from Colorado that they exert their influence to secure the adoption by Congress of the proposed bill."

COLORADO College Library, Colorado Springs; Herman G. A. Brauer, librarian:

"I have worked very hard upon those documents and can appreciate to the full both your criticism on the present system and methods and the value of the reform you propose. The annual meeting of our board of directors takes place shortly and I shall bring the matter before them. We shall do all we can to impress our Senators and Representatives with the crying need of such a reform."

COLUMBUS (Ohio) Public Library; John J. Pugh, assistant librarian:

"I can not too strongly indorse your views and commend you for the efforts you are putting forth to bring about a change in the present system."

CORNELL University Library, Ithaca, N. Y.; George Wm. Harris, librarian:

"Your plan of taking the annual reports out of the so-called Congressional set is an admirable suggestion, and will do more than anything else to simplify the arrangement and consultation of public documents. I heartily approve your suggestions for binding colors and binders' titles, and the substitution of cloth for sheep will be a great boon to libraries, as well as a great economy for the Government."

COUNCIL BLUFFS (Iowa) Public Library; D. C. Bloomer, president:

"Instead of all 'sheep-bound,' it would certainly be a great improvement if they could be bound in cloth, especially if the books from each Department could all bear a uniform color. The proposed bill would, if enacted into a law, prove a great and beneficial advance over the present plan of printing and binding public documents."

ENOCH PRATT Free Library, Baltimore; Bernard C. Steiner, librarian:

"I have read your draft bill with considerable care, and consider it admirable. You may count on the earnest support of this library."

FAIRMOUNT College, Wichita, Kans.; Paul Roulet, librarian:

"I certainly hope that it will become a law. I would especially commend the plan providing for furnishing libraries as early as possible with the publications, especially those of a scientific nature. I fully believe in good cloth binding in preference to sheep or leather. My observation has been that the warm, dry climate of Missouri and Kansas soon softens the leather. By the proposed system these publications can be more satisfactorily classified."

GROSVENOR Public Library, Buffalo, N. Y.; E. P. Van Duzee, manager:

"We have suffered as much from the old method as any public library well could. It is really mortifying to be obliged to tell our patrons that we have not the Government reports two years after they have been on the shelves of many private libraries and newspaper offices in this city."

HARVARD College Library, Cambridge, Mass.; W. H. Tillinghast, assistant librarian:

"I may say that I regard the simplicity and directness of expression in the bill as a very great merit. I am sure I write of more than myself when I add that the interest in libraries and their work, and the understanding of their ambitions, needs, and difficulties, which are so evident in your communications upon the work of your office, are gratefully appreciated by those who work in libraries or for libraries."

HOWARD MEMORIAL Library, New Orleans; William Beer, librarian:

"I heartily agree with the changes suggested. The public documents, as issued at present to the depositories, are in forms complicated by duplications under the different names, and are needlessly delayed in order to receive leather bindings."

ILLINOIS State Normal University, Normal: Ange. V. Milner, librarian:

"Every point is valuable. The prospect of public documents while they are 'up-to-date' literature is most satisfactory."

IOWA State University, Iowa City; J. W. Rich, librarian:

"I have taken the earliest opportunity to read your 'First draft of a proposed bill,' etc., on subject of public documents, and I hasten to say that it seems to be an 'X-ray'—making light out of darkness. An apparently impenetrable fog envelops the public-document world, but the suggested 'bill,' or something similar, will certainly turn light on to dispel a portion of the mist at least. This library endeavors to keep its collection of public documents complete and to make the contents as useful as possible, but the 'possibilities' for usefulness are very limited as things now are."

JOHNS HOPKINS University, Baltimore; John Martin Vincent, librarian deparment of history and economics:

"Having had much sad experience in attempting to guide students of history through the mazes of our Government publications, I shall be glad of the day when these reports shall be printed and bound in some sort of subject classification. A reform is becoming more and more necessary every year. Your plan seems to cover all essential points, and would, as it stands, work such a vast improvement that I do not offer any criticisms."

KING, P. S., & Son, Parliamentary booksellers, Westminster, London, Eng.:

"We have had sent us the Annual Report of the Public Printer for the year ending June 30, 1895, and have read it with considerable interest, particularly your report on pages 15 to 29, and that part of it relating to the cataloguing and titles of the United States public documents. Perhaps you are familiar with the system adopted by the British House of Commons and House of Lords, in which a reference number is printed on each document in the various series issued by each House, and an index to each House printed every year. We do not pretend to say that this system is by any means perfect, but it is simplicity itself compared with the chaos you have to deal with."

KINGSBURY, D. L. "The United States Government Publications." (In Minnesota Historical Society's Collections, v. 8, pt. 2):

"The great difficulty in properly cataloguing the documents bound in sheep is the method which has prevailed of designating the volumes, according to the 'binder's titles,' as belonging to the first, second, or, at times, the third session of a certain Congress, in addition to the designation as reports of a Department, or a branch or bureau of a Department, volume 1 or 2, part 1 or 2, and the year. The man is not yet born that can master these 'binder's titles'; and it frequently occurs that, after getting the title deciphered beyond a question of doubt, and the book placed accordingly, we find later that it has been placed with the wrong series. These volumes bound in sheep comprise the greater number of the Government publications on our shelves. Fortunately, the information more frequently in demand is found in the reports of the various Departments, bound in cloth, under their proper and simpler titles only. It is to these sets that reference is usually made, as a matter of convenience and with a great saving of time. It would have been better, and would have simplified the cataloguing, if none but the cloth-bound volumes had been placed on the shelves."

MICHIGAN Military Academy, Orchard Lake; Col. J. Sumner Rogers, superintendent:

"I have read the bill very carefully, and can not see why such a measure should be opposed from any source; it will accomplish just what is proposed. The bill should become a law by all means."

MINNEAPOLIS (Minn.) Public Library; Dr. J. K. Hosmer, librarian:

"Like my profession in general, I have had no so trying task to deal with in the direction of properly classifying, arranging, and putting into available form classes of books as has been offered by the public documents. As public librarian in a vigorous, growing city, where the Government publications are in constant use, I feel sure that the adoption of your suggestions will be a great help."

MINNESOTA Historical Society, St. Paul; Warren Upham, librarian:

"The council of this society, in their meeting April 13, passed a resolution of hearty approval, with recommendation that the Minnesota Senators and Representatives in Congress shall give their attention and favorable action toward securing the enactment of this bill as a law. As librarians, the three of this library most sincerely wish you all speed and full success in your efforts for the more prompt and better classified distribution of these valuable Government publications to the large public libraries."

MOUNT UNION College, Alliance, Ohio; Tamerlane P. Marsh, president:

"Last evening the faculty of Mount Union College, by a unanimous vote, expressed their hearty approval of your proposed bill to increase the value and simplify the methods of publication of public documents."

NEW BEDFORD (Mass.) Free Public Library; B. W. Pennock, librarian:

"Made up as the volumes now are, it is quite impossible to classify them according to subject, as we do other books. Besides, only a person skilled in the handling of the volumes can find the treatment of a desired subject. If you succeed with the bill, you will gain the everlasting gratitude of the library fraternity and those of the public who use the documents."

NEW HAMPSHIRE State Library, Concord; Arthur H. Chase, librarian:

"I have carefully read the proposed bill, and it seems to me that it will very greatly improve the system."

NICHOLSON, Col. JOHN P., Gettysburg Park Commissioner:

"It has given me a great deal of pleasure and satisfaction to read your draft of a bill. The classification as proposed by you will not only result in the greatest advantages to the public, but to those also who have occasion to use the official publications almost daily."

NORFOLK (Va.) Public Library; William Henry Sargent, librarian:

"I fully sympathize with the undertaking and approve of the method. Allow me to ask a question about a matter of equal if not greater importance. Is anything being done in the way of pushing an appropriation for a general index to the public documents? That is the only thing which can give real value to the immense mass of interesting and useful information now securely hidden behind those leather backs."

OBERLIN College Library, Oberlin, Ohio; Azariah S. Root, librarian:

"It is true, as you suggest, that there is now much duplication. No progressive librarian can wait for the finance report of 1894 to arrive in the depository sets one year and two months late. I have already sent to my Congressman and secured the 1895 finance report. And so it goes. Your plan would largely stop all this, as one copy would be all most libraries require. I heartily approve sections 4, 5, and 6, as well as all the rest of the bill."

OHIO State Library; Joseph P. Smith, librarian:

"We want complete sets of Government publications, but not duplicates, nor the same publications in both cloth and leather binding. We have not shelf room for both. We prefer cloth-bound volumes so far as they can be obtained. We

find them more desirable, because they wear better. For some reason, due either to hasty tanning or to some fault in the atmosphere here, the leather-bound volumes soon 'peel off,' leaving dirty red marks upon everything with which they come in contact. We earnestly hope that the bill now before Congress relative to classification, binding, and lettering of Government publications may become a law. In our judgment the proposed plans would greatly increase their usefulness and enable the people to appreciate these documents at their true value."

OKLAHOMA University; Norman, Okla.; D. B. Boyd, president:

"I support it on the ground that anything is better than what we have at present."

OSTERHOUT Free Library, Wilkesbarre, Pa.; Hannah P. James, librarian:

"Your most admirable and efficient bill was duly received and carefully read, and seems to me to be a clear way out of the labyrinth of public documents. It is easily seen how the cumbrous and stupid system of the present day has grown, but in these latter days of classification there no longer exists any excuse for it. I well remember laboring over 2,000 or 3,000 public documents of all kinds several years ago, and how narrowly I escaped becoming insane or having nervous prostration from the effects of it; and ever since, though I insist upon the proper cataloguing and analyzing of the bugbears, and tell librarians they will never die with a clear conscience unless they do, yet my heart always aches for them all the same. With your common-sense arrangements applied, public documents will be placed on a footing with other books, and their treasures brought to light."

OTIS Library, Norwich, Conn.; Jonathan Trumbull, librarian:

"The leading feature of this bill will make it easy to do just what I am trying to do in our library, though I find it nearly impossible to do it; that is, to place Government publications which are devoted to certain subjects in the different classes to which they belong. The substitution of good cloth binding for inferior sheep would, I believe, meet the approval of all librarians. For our own library I get as many public documents (especially annual reports, etc.) as possible in cloth, and send back the sheep-bound volumes as duplicates. Not the least, but perhaps the most, important feature of your bill is the provision whereby libraries will receive public documents promptly. Much of the matter that comes to us is sadly out of date; so much so that its usefulness is always impaired and sometimes actually destroyed for that reason."

PEABODY Institute Library, Baltimore; John Parker, assistant librarian:

"My feeling in regard to this document business is intense, for to me was given the task of cataloguing the set of our documents for publication, and I can truly say I never had such a troublesome piece of work in all my experience of library cataloguing."

PEORIA (Ill.) Public Library; E. S. Willcox, librarian:

"It is hardly necessary to say that such a bill must meet the hearty approval of everybody at all interested in library work. I desire to thank you very sincerely for what you are doing in the matter."

PIERRE University, East Pierre, S. Dak.; W. M. Blackburn, D. D., president:

"I have been a quite close student of certain Government publications, especially those on geology, irrigation, and ethnology, and I can testify to the very convictions which you express. Therefore count me among the volunteers who will try to secure the attention of Representatives and Senators to this proposed bill."

PORTSMOUTH Public Library, Portsmouth, Ohio; Miss N. A. Newton, librarian:

"No one can better see the necessity for such a bill than the librarian whose shelf space is limited, and who has for years been annoyed by the difference in size and shape of books which should be shelved together."

ST. JOHN'S College, Fordham, N. Y.; Joseph Zwinge, librarian:

"I am perfectly in accord with you in your endeavors of introducing some system in the printing, binding, etc., of these documents. It is a much-needed reform, as the present want of system has caused a great deal of annoyance to librarians."

SALEM Public Library, Salem, Mass.; Gardner M. Jones, librarian:

"Your first draft of a proposed bill seems to be the right thing, and I hope you may succeed in your efforts to bring about more sensible methods of publication."

SAN FRANCISCO Free Public Library; George T. Clark, librarian:

"There can be no question as to the need of reform, and this bill seems calculated to effect it."

SCHWAB, Prof. JOHN C., Yale University, New Haven, Conn.:

"It will be a great gain to the students of the country, whose trustees the libraries are, to obtain promptly the valuable publications of the Government."

SCRANTON (Pa.) Public Library; Henry J. Carr, librarian:

"I take pleasure in expressing hearty approval of the plan. Your suggestions evince a keen and thorough comprehension of the situation, and in my opinion constitute a very moderate statement of the whole subject and of the defects which need remedy."

SEYMOUR Library, Auburn, N. Y.; Martha A. Bullard, librarian:

"Your idea seems to solve the question very completely. If your proposed change in colors, lettering, and classification obtains, I am sure it will be of the greatest service to all librarians, and of help to those persons desirous of consulting public documents."

UNIVERSITY OF CALIFORNIA Library; J. C. Rowell, librarian:

"The changes proposed will be gratefully accepted by all librarians and all those who have occasion to use or refer to public documents. The plan would result in an immense saving to the United States Government in avoiding useless expenditure in printing and cost of mailing, and to hundreds of libraries in cataloguing and storing of useless duplicates."

UNIVERSITY OF MINNESOTA Library, Minneapolis; William N. Folwell, librarian:

"I wish you godspeed in so good a work, and I suggest that so soon as possible the bill be perfected and presented to Congress."

UNIVERSITY OF MISSISSIPPI, University; Robert B. Fulton, chancellor:

"We have in the library of this institution a large number of Government publications, and in them is a vast amount of political, historical, and scientific material that would be of use to those who frequent the library if only the average person knew how to find what he wanted in the confusion of titles and volumes. I sincerely hope that the changes suggested by you will at once be authorized by law, and that through them there will be afforded the opportunity to bring order out of chaos."

UNIVERSITY OF VIRGINIA, Charlottesville; F. W. Page, librarian:

"It seems to me that you have 'hit the nail on the head.' Your bill, if adopted, will save librarians a world of trouble, and facilitate the handling of the public documents by readers, and I hope you will press it."

VIRGINIA Normal and Collegiate Institute, Petersburg; J. H. Johnston, president:

"I drop this line to assure you of my hearty sympathy in the movement, and I hope that you will not drop the matter because of any apparent indifference on the part of those most concerned. The evils enumerated are such as should receive attention on the part of our lawmakers."

WHITELEY, JAMES GUSTAVUS, The Vineyard, Waverley, Baltimore:

"It has given me great pleasure to observe that a bill will be brought before Congress to regulate the printing and binding of public documents. I assure you that your efforts toward reforming the present system will be gratefully appreciated by every one who has to use Government documents."

WISCONSIN State Historical Society, Madison; R. G. Thwaites, librarian:

"I have examined with care your proposed bill to increase the value and simplify the methods of publication of United States public documents. It is a subject which librarians have had much in mind for years past, and this proposed solution of the vexed problem appears to me one which all members of the profession should cordially indorse."

POSTSCRIPT

Since the foregoing report was prepared for the press, the first number of the Document Catalogue ("comprehensive index") provided for by the printing law of January 12, 1895, has been received from the Public Printer and distributed to Senators and Representatives, to depository libraries, to Government Departments, bureaus, commissions, and offices from which public documents are issued, and to a few others. Hardly had the mailing of the book begun when gratifying words of commendation of its plan and execution began to come in. Some few of these expressions of opinion, coming from those best qualified to judge of the merits of such a work, are herewith reproduced, the importance of the series of publications of which this is the first seeming to justify the presentation to Congress and to the public of the judgments passed upon it by those who will use it, and from whom, therefore, the most practical and critical opinions should be expected.

The uniformly favorable comments thus far received were not unexpected, because the compilers were confident that, both in plan and in execution, the work would merit them, but they are nevertheless deeply gratifying, and the most sincere and grateful acknowledgments are tendered to those whose kindness led them to transmit to the undersigned expressions of their approval.

F. A. CRANDALL,
Superintendent of Documents.

DECEMBER 28, 1896.

EXCERPTS RELATING TO THE DOCUMENT CATALOGUE OF THE FIFTY-THIRD CONGRESS, MARCH 4, 1893-JUNE 30, 1895

AHERN, MARY E., editor Public Libraries, Chicago:

"It seems to me a vast improvement over anything that has yet been attempted in this line."

AMERICAN LIBRARY ASSOCIATION, action of Executive Board:

COLUMBUS, OHIO, *December 16, 1896.*

MR. F. A. CRANDALL,
Superintendent of Documents, Washington, D. C.:

At a meeting of the executive board of the American Library Association, held at Philadelphia, December 3, 1896, a resolution was unanimously passed approving of the catalogue of the public documents of the Fifty-third Congress, and hoping that Congress would grant such aid as you find necessary to continue the catalogue in the same form for all public documents, both past and future.

RUTHERFORD P. HAYES,
Secretary American Library Association.

BEER, WILLIAM, librarian Howard Memorial Library, New Orleans:

"I must congratulate you on its excellence. It is far and away the best thing of the kind in paper, print, and general execution."

CAMPBELL, FRANK, in charge of public documents in the library of the British Museum, London, England, author of The Theory of National and International Bibliography:

"A glance shows it to be of a very high order—indeed, it is the nearest approach to the ideal periodical catalogue of official documents on a large scale that I know of, and it is a great encouragement to me, as one who has long taken a deep interest in the subject, to feel that you are dealing with the subject so radically and so seriously in America. I only wish I could say the same of other countries."

CARR, HENRY J., librarian Public Library, Scranton, Pa., vice-president American Library Association:

"If one's 'ears burn' only when pleasant things are said and written about them, I fancy yours must be in a steady glow nowadays. I hear or read naught but commendations of the new Document Catalogue, in which I agree quite fully."

COLE, GEORGE WATSON, Treasurer American Library Association:

"The volume reflects great credit upon all who have had a hand in its preparation, and is a beginning of better things. No other Government can show anything to compare with it in excellence. May the good work go on, both forward and backward, until all the United States public documents are in as good form as we now have those of the Fifty-third Congress."

CUTTER, CHARLES A., librarian Forbes Library, Northampton, Mass., ex-president American Library Association, author of Rules for a Dictionary Catalogue:

"It is an admirable volume, which you have a right to be proud of."

DOTY, DUANE, civil engineer, Pullman Company, Pullman, Ill.:

"Your catalogue of public documents printed from 1893 to 1895 reached my table to-day. Its magnitude and comprehensiveness take my breath away. Any man who turns the leaves of this book can not but be deeply impressed with the truth that ours is a wonderful country and that we constitute a wonderful nation. To the student of to-day the catalogue-maker and the index-maker are really the greatest benefactors he knows. A catalogue of all the pamphlets and books printed by the Government up to this time would place at the disposal of investigators a mine of inexhaustible literary and scientific wealth. If you could be instrumental in having such a work prepared you would have the gratitude of all men of brains for all time."

DU VAL, RICHARD JOHNSON, United States Naval Academy Library:

"The simplicity and directness of plan and arrangement appeal to me strongly, and I like the way it has been carried out; there being no necessity for that troublesome page of introductory explanation which one has to carefully consult in many instances in a new or strange catalogue. The cross references at the ends of subjects, etc., seem to be extremely full and carefully prepared. All in all, the volume deserves unqualified praise."

ENGINEERING NEWS, New York, December 24, 1896:

"As the first issue of a work brought out with a newly organized staff, and in the absence of any previous systematic index of departmental documents, Mr. Crandall has done an excellent work. It is an extremely valuable record of Government publications, and, so far as we have attempted to use it, the arrangement is very satisfactory for the purpose intended."

ESPY, JOHN, lawyer, St. Paul, Minn.:

"It is certainly a very great improvement over the Comprehensive Index."

EVENING POST, New York (Washington correspondence):

"The best catalogue and the one issued with most promptness of any the Government has put out of late is that of Superintendent Crandall, who has charge of the public documents."

HAINES, HELEN E., managing editor Library Journal, New York:

"Let me congratulate you most heartily on the admirable 'Document Catalogue.' It certainly marks a new era in the history of Government publications."

HALL, EDWARD W., librarian Colby University, Waterville, Me.:

"I see nothing to be improved in it."

HORNADAY, WILLIAM T., director New York Zoological Society:

"It is a great success. It is sensibly arranged, delightfully complete, it is beautifully clear as to typography, it responds quickly to inquiry, it is not too bulky, its back is so elastic it lies open without a fight. For thus making the publications of the Government thoroughly available to everyone who needs to draw aid, comfort, and advice from them, we, the people, owe our thanks, first, to Congress for 'the enacting clause;' second, to the President for his good judgment in selecting the very best man for the work, and third, to you for so handsomely surpassing the expectations of your friends and the public. I must say this volume is a complete surprise to me, for until referring to a dozen subjects in which I am interested I had not realized the extent of our Government literature (yes, even after my eight years at the Smithsonian) or how thoroughly useful so complete a catalogue could be. In the practical work of the New York Zoological Society it will aid us greatly and constantly."

JOHNSON, A. B., chief clerk Light-House Board:

"The cursory examination I have given fails to show that you have omitted any of the many light-house titles published within the time you cover. My own little work is mentioned fully as often as it ought to be, and is so mentioned that I begin to think that it may be useful to others in ways that had not occurred to me before."

JONES, GARDNER M., librarian Public Library, Salem, Mass.:

"I have examined it and find it admirable."

KELSO, TESSA L., of Charles Scribner's Sons, publishers, New York:

"The appearance of the book is very pleasing—binding, type, and size—and the form of the catalogue makes it very easy to use. I have shown the catalogue to several of the people of this office, and you could not fail to be gratified at the warm expressions of praise for this evidence of the good work your office is doing."

KINGSBURY, DAVID L., assistant librarian Minnesota Historical Society, St. Paul, author of "The United States Government Publications":

"I have not had time to examine the 'Document Catalogue' except in a cursory manner, but enough to convince me that it is as near perfect as a catalogue can be, and I can not at this time, and possibly may never, suggest anything that would add to its value. It certainly fills a long-felt want, and is so near my idea of a catalogue that I can not criticise it."

LARNED, J. N., librarian Buffalo Library, Buffalo, N. Y., ex-president American Library Association, author of History for Ready Reference:

"I have been examining the 'Catalogue of Public Documents of the Fifty-third Congress' with a good deal of care, in a number of the most important subjects, and it seems to me to be very satisfactory indeed. If we had such catalogues (and indexes) covering even the last twenty or thirty years, how constantly they would help us, and what a new value they would give to the public documents! I congratulate you on having got the work so well inaugurated. There can be no question about going on with it hereafter, and every fresh proof you produce of the importance of the office you are organizing is going, of course, to make it easier for you to get what is needed for perfecting it. You have identified yourself with a great reform in a way that ought to be very gratifying to you."

MARKS, A. J., M. D., Toledo, Ohio:

"I have been trying to find something about your Document Catalogue to criticize, but up to date have made a dismal failure. In size, type, and make-up it is an ideal catalogue, in my estimation. It is much more convenient than a subject catalogue with an index, and the size is just right. I hope all future issues will be uniform with this."

MURRAY, N., librarian Johns Hopkins University, Baltimore:

"The acquisition of this volume is very welcome, because it enables the intelligent use of the otherwise almost unavailable Government publications. I congratulate you upon the careful and intelligent inauguration of an undertaking so important."

NATION, The, New York, December 10, 1896:

"The country was very fortunate in the appointment of Mr. Crandall to the new office of Superintendent of Documents in the Government Printing Office. He organized his bureau skillfully, he has conducted it usefully, and he has drafted an act which will very much increase the chance of the country receiving from public documents a return of service somewhat commensurate with their great cost. But perhaps nothing that he has done is so important in its consequences as his commencing in the right form the 'comprehensive index' to the documents which Congress ordered to be issued at the close of each regular session. There are so many ways in which it ought not to be made, and in which it was very likely to be made, and the chances were so great that, from the inertia prevalent in public offices, it would, when once started wrong, have gone on wrong forever, causing us a fresh regret and a fresh sensation of disgust with every new volume, that his choice of the dictionary form, and of this particular style of dictionary, might well have been mentioned on our late holiday as one of the fit causes of thanksgiving. Mr. Crandall's decision was made not by chance, but as the result of inquiry and a conviction which shows clearly in his preface. The entries are under author and subject, occasionally under title. Special attention appears to have been paid to making the needful cross-references. Mr. Crandall prefers to call this a Catalogue rather than a 'comprehensive index,' as it was termed in the act ordering its publication, because it *is* a Catalogue—that is, a list of papers, not a collection of references to parts of papers. But it is an analytical catalogue—that is, each separate paper in collections like the Proceedings of the National Museum, the Bulletins of the Geological Survey, the report of the Smithsonian Institution, is duly entered. It certainly will gain favor, for it is a most creditable piece of work."

PLUMMER, MARY W., librarian Pratt Institute, Brooklyn, N. Y.:

"Let us congratulate you, too, on the Catalogue. It seems to mark the issue of order out of chaos."

PUBLIC LIBRARIES, Chicago, January, 1897:

"In accordance with the provisions of the act of January, 1895, relating to public documents, F. A. Crandall, Superintendent of Documents, now issues a 'Catalogue of Public Documents of the Fifty-third Congress and of all Departments of the Government of the United States for the Period from March 4, 1893, to June 30, 1895.' This is a continuation of the record begun in the Comprehensive Index of Dr. Ames, but is radically different in arrangement. It is a dictionary catalogue—one alphabetical arrangement of authors, titles, and subjects. Each entry is complete in itself, giving the number of the document, the session to which it belongs, and the volume. The side columns and puzzling arrangement of other document catalogues are avoided, and it is quickly and easily consulted. It is

to be followed by annual supplements on the same plan, and the series will prove invaluable to students and librarians by making accessible the mass of literature that has been concealed until recently in Government documents. It is hoped that librarians who have hitherto considered such documents useless will now shelve and arrange them by Congress and session or in some way making it possible to find the contents of each volume from the Catalogue reference."

PUBLISHERS' WEEKLY, New York, December 5, 1896.

"It may be remembered that the act relating to public documents, which went into effect January 12, 1895, contained the following provision: 'The Superintendent of Documents shall, at the close of each regular session of Congress, prepare and publish a comprehensive index of public documents, beginning with the Fifty-third Congress.' The 'comprehensive index' there provided for has now been issued by F. A. Crandall, Superintendent of Documents, in a large octavo volume of some 600 pages, under the title, 'Catalogue of the Public Documents of the Fifty-third Congress and of all Departments of the Government'—a proper enough change, for the term 'index,' as applied to a work of this sort, is clearly a misnomer. With every report and issue of a Department or institution there is concise and lucid reference to its source. The rule of common sense seems to have dominated the work.

"Many of the excellent features of the Catalogue were adopted by Dr. Ames in his 'comprehensive index' of 1893, but the present work is simpler in its construction and more easily understood than was its predecessor. Typographically the Catalogue is admirable. The type, while plainly differentiated for headings, authors, and titles, is not bewildering in its variety.

"Even the most faithful believer in the total depravity of Government publications must realize on turning the pages of this catalogue that an astonishing mass of varied and important information is concealed within the unattractive 'pub. docs.' There seems to be no subject, from astronomy to zoology, and no country, from Alaska to New Zealand, that has not its special monograph. The only appendix to the work is a four-page list of 'governmental authors,' recording the Departments, bureaus, divisions, surveys, etc., of the Government that are represented in the Catalogue, and showing to which of the Executive Departments or establishments they are subordinate.

"The new 'Catalogue of Public Documents' is not only excellent from the technical point of view, but it is one of the highest public usefulness. Booksellers especially should find it of value in looking up data on special subjects for inquiring customers, or in adding to their own stock of publications dealing with matters of specific interest, for there is much material in the Government issues that is not elsewhere obtainable. Indeed, the trade at large, the generality of readers, and students unversed in scientific research, as well as the fraternity of librarians, bibliographers, and skilled investigators, are indebted to Mr. Crandall and to Miss Clarke, his chief assistant, for a simple and practical key to the great Government storehouse of valuable and little-known information."

SEWALL, W. F., librarian Wilmington (Del.) Institute Free Library:

"I am glad that at last we have a catalogue of Government documents that one can find something in."

STEVENSON, WILLIAM M., librarian Carnegie Free Library, Allegheny, Pa.:

"I wish to express my high admiration of the Document Catalogue. I consider it the best thing of its kind that has so far appeared, and I only regret that we have no such catalogue covering the publications of former years. I have tested the catalogue in a number of ways and have found that it answered all questions satisfactorily."

TIMES, New York (Washington correspondence):

"To the reader of this paragraph who is not interested in Government publications or in catalogues, which are not often fascinating things, it will be useless for the writer to use enthusiastic language to praise Mr. Crandall's work. It is a finely made book of 638 pages."

TRUE, Dr. A. C., Director Office of Experiment Stations, Department of Agriculture:

"A fine piece of work and a very valuable publication."

WALCOTT, C. D., Director United States Geological Survey:

"A beautiful and valuable publication. I congratulate you upon the thorough work that you have done in its preparation."

WIRT, Dr. W. D., United States Geological Survey:

"It will be a constant companion to aid my labors; it is the most valuable book included in its period."

APPENDIX

DESIGNATED DEPOSITORIES OF PUBLIC DOCUMENTS

Since the date of the first annual report the following depositories have been dropped from the list:

Location.	Name of library.
Fordham, N. Y	St. John's College Library.
Fort Worth, Tex	Chamber of Commerce Library.
Macon, Ga	Public Library.
Mexico, Mo	Missouri Military Academy Library.
Mount Carroll, Ill	Seminary Library.
Port Huron, Mich	Ladies' Library Association.

During the same period the following depositories have been added to the list:

Location.	Name of library.
Albuquerque, N. Mex	Library of University of New Mexico.
Asheville, N. C	Public Library.
Beatrice, Nebr	Free Public Library.
Bucyrus, Ohio	Bucyrus Memorial Library.
Chicago, Ill	John Crerar Library.
Cleveland, Ohio	Western Reserve Historical Society.
Eau Claire, Wis	Eau Claire Public Library.
Elizabeth, N. J	Public Library and Reading Room.
Fort Wayne, Ind	Public Library.
Galesburg, Ill	Galesburg Public Library.
Galveston, Tex	Library of St. Mary's University.
Hudson, Mass	Public Library.
Lambertville, N. J	Stryker Library.
Memphis, Tenn	Cossitt Library.
Merrill, Wis	T. B. Scott Free Library.
Mount Vernon, Iowa	Cornell College Library.
New York City, N. Y	University of the City of New York.
Norfolk, Va	Norfolk Public Library.
Norristown, Pa	William McCann Library.
Orangeburg, S. C	Claflin Colored Normal Industrial, Agricultural, and Mechanical College.
Poes, N. C	Buies Creek Academy.
Port Huron, Mich	City Library.
Rockhill, S. C	Winthrop Normal and Industrial College Library.
Rockford, Ill	Public Library.
Ruston, La	Library of the Industrial Institute and College of Louisiana.
Salt Lake City, Utah	Sheldon Jackson College Library.
Santa Rosa, Cal	Santa Rosa Free Library.
South Omaha, Nebr	South Omaha Public Library.
Tabor, Iowa	Tabor College Library.
Wahpeton, N. Dak	Red River Valley University.
West Point, Miss	West Point Public Library.
Wheeler, Ala	Alexander Campbell Free Library.

The total number, which last year was 420, is now 446.

DOCUMENTS RECEIVED AND DISTRIBUTED

Documents have been received and distributed to July 1, 1896, as follows:

Received from—	
Government Printing Office, for distribution to libraries	143,043
Departments	154,554
Exchanges from libraries	31,289
House folding room	25
Senate document room	665
House document room	394
United States Geological Survey	68,890
Agricultural Department, consignment for sale	20,498
Government Printing Office, for sale	6,873
Books returned	31
Senate folding room	609
Total number of documents received	426,871
Distributed to—	
Designated depositories and State and Territorial libraries	105,170
Miscellaneous libraries	1,715
Departments, bureaus, etc., for official use	289
Congressional Record designations	8,475
Official Register designations	1,165
Library of Congress	1
Geological designated list, 1895	54,749
Senate folding room	548
House folding room	40
Individuals, exchanges	262
"Remainder" designations	9,359
Messages and Papers of the Presidents designations	3,940
Government Printing Office	60
Agricultural Department, returns	100
Executive Mansion	8
Senate library	6
House library	4
U. S. S. *Machias*	2
Replace copies lost in the mails	2
Sample copy	1
Individuals	9
Sales	3,581
Total number of documents distributed	189,481
Total number of documents received	426,871
Total number of documents on hand July 1, 1896	237,390

The Supt. of Documents.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., July 1, 1898.

SIR: The following report of the Document Division of your office for the fiscal year ended June 30, 1898, is respectfully submitted:

Documents received and distributed.

On hand July 1, 1897	331,734
Received July 1, 1897–June 30, 1898	639,298
	971,032
Distributed July 1, 1897–June 30, 1898	558,993
On hand July 1, 1898	412,039

Receipts in detail.

From the Government Printing Office	486,243
From Departments	115,794
From libraries and individuals	37,261
	639,298

Distribution.

To designated depositories, State and Territorial libraries	154,081
To geological depositories	30,056
To remainder depositories	26,579
To Senate and House Journal depositories	371
To Library of Congress	153
To official use	1,035
To miscellaneous libraries	45,385
To miscellaneous libraries (Globe distribution)	6,613
To foreign legations	141,558
To miscellaneous	212
To persons and institutions designated by Senators, Representatives, and Delegates in Congress:	
Official Register	1,203
Messages and Papers of the Presidents	130,384
To cash sales	21,363
	558,993

This statement shows an increase of 54 and 75 per cent, respectively, in the receipt and distribution of documents as compared with last year, which is very gratifying in view of the fact that there was no corresponding increase in the number of employees.

REORGANIZATION OF THE OFFICE.

With your approval the office was organized into six sections soon after I assumed charge in November, 1897. An experienced clerk was placed at the head of each to give direction to the work in the respective sections, under my general supervision. The result has been very satisfactory indeed, and the efficiency of the office has been very largely increased, as the following statement, by sections, will indicate:

BOOKKEEPING AND CORRESPONDENCE.

The bookkeeping and correspondence relating to sales has been performed by one clerk. The general correspondence of the office is conducted by the chief of section and the superintendent. For the seven months ended June 30, 1898, 25,670 letters and cards were received and 32,106 were sent, not including books, pamphlets, and bags of mail.

Of the letters received 5,747 contained remittances for documents. Such letters are kept in files separate from the general correspondence. When opened by the receiving clerk they are given a serial number and entered in a book which shows the number, date of letter, and amount and kind of remittance, with blank spaces to enter amount returned if the order or any part can not be filled. The bookkeeper enters them by number, name, and address of writer, amount and kind of remittance, number of books sold, and amount returned, if any. Before disposing of the letters, which are filed by numbers, they are carded, with name, address of writer, and number, and the cards are filed alphabetically. The documents sold are also carded by titles, date of sale, and price. Every day at 4 o'clock the books of the receiving clerk and of the bookkeeper and the document cards are compared and must balance.

SALES.

Twenty-one thousand three hundred and sixty-three documents were sold, for which $4,537.27 were received. This shows an increase over last year of 20 and 12 per cent respectively.

Of the documents sold 83 per cent were publications of the Department of Agriculture. The amount received for these documents, however, was but 46 per cent of the total sales. This was due to the fact that most of the publications of that Department are issued in pamphlet form and sold at from 5 to 15 cents each.

The Secretary of the Department of Agriculture, in his report for the fiscal year ended June 30, 1897, recommended that the law of January 12, 1895, be so amended as to provide for the setting aside of the moneys received for the publications of that Department, subject to the joint order of the Secretary and the superintendent of documents, for the reprint of the same for sale. Such an amendment would prove of great benefit to the public, no doubt, because it would enable this office at least to order the reprint of such publications of that Department as may be in great demand. More than one-third of the orders received from people who are willing to pay for these documents can not be executed because the editions become so soon exhausted.

At the request of the Department of State, Congress transferred the sale of the laws of the United States from that Department to the superintendent of documents. This will, no doubt, add very considerably to the cash receipts and work of the office.

CATALOGUE SECTION

There were issued 12 monthly catalogues, 2 document indexes, and 1 document catalogue (comprehensive index), aggregating 1,651 pages, showing an increase of 20 per cent as compared with last year. The number of documents received for

cataloguing purposes was 10,012; the number of cards written was 48,323; no statistics have been kept heretofore respecting these items.

One of the most important functions of the office is the preparation of the several catalogues of Government publications as required by law. The commendations of those having occasion to use them, from all sections of the country, testify to the accurate and satisfactory manner in which the work has been performed.

The work of preparing the monthly catalogue and consolidated index of Congressional documents is kept up to date, but the work on the document catalogue (comprehensive index) is very much in arrears. This arrearage is largely due to the fact that the documents required to be catalogued by the act of January 12, 1895, antedated the establishment of the office nearly two years.

The law requires the publication of three kinds of catalogues:

First. A comprehensive index at the close of each regular session of all public documents, beginning with the Fifty-third Congress.

Second. A consolidated index of Congressional documents in one volume.

Third. A catalogue on the first of each month, which shall show the documents printed the preceding month, where obtainable, and the price thereof.

It is to the first-named that I wish to invite attention. Very many objections may be urged against its publication each regular session. Some of the more serious I will point out briefly. As an illustration: The catalogue for the second session of the Fifty-fourth Congress will contain entries of documents not bearing a Congressional number from July 1, 1896, to June 30, 1897, but of Congressional documents from the first Monday in December, 1896, to March 4, 1897. Then followed a special session of the Firty-fifth Congress, beginning March 15 and ending July 24, 1897. No provision is made in terms for cataloguing documents of special sessions. The documents of this special session can not be entered in the catalogue for the second session of the Fifty-fourth Congress, but must necessarily be entered in the catalogue for the first regular session of the Fifth-fifth Congress, which assembled the first Monday in December, 1897, and terminated July 8, 1898. It will thus be seen that the latter catalogue will lap at both ends with catalogues preceding and following, which will probably be perplexing to those not familiar with the subject.

Again, thousands of bills are introduced and reports made at the first regular session of a Congress that are not disposed of, if at all, until the last session. Full entries must necessarily be made in the catalogues for each session, and the searcher for information must examine both in order to ascertain what was done, with the chance of being misled by only examining one. The work is thus duplicated, and reference is made more difficult. Many more objections might be urged, but these are deemed sufficient for the purpose.

I therefore recommend that Congress be asked to amend the law of January 12, 1895, so as to authorize the superintendent of documents to prepare and publish a catalogue of public documents biennially, which shall show all documents printed not bearing a Congressional number during the two years ending June 30 in each odd-numbered year, and all Congressional documents for each Congress, beginning with the Fifty-fifth.

This would reduce the number of catalogues one-half. The one volume for a Congress would not exceed 80 per cent of the size of the two volumes, one for each session; 50 per cent would be saved in binding, 10 to 20 per cent in composition, and 10 to 20 per cent in the labor of preparing them.

LIBRARY.

The "document library" is probably the largest of its character in the world.

The act that created the office did not authorize in terms or by implication the establishment of a document library. Indeed, the author of the bill himself informed

me that it was never contemplated. And it would seem, from the fact that almost complete sets of public documents are in the Library of Congress and the libraries of the Senate and House, that a purely document library was unnecessary, especially as it could not be opened to the public.

The act provided, however, for the sending of two copies of each document printed, not of a confidential character, to the superintendent of documents, to enable him to prepare a catalogue of all Government publications.

Under this provision it was seen that the office was sure to accumulate, if retained, a complete set of public documents beginning with the Fifty-third Congress. As stated by my predecessor, the demands made upon the office for information by people all over the world concerning matters supposed to have been treated of in Government publications thrust upon it a function which, if assumed (and it was assumed), would give it the additional character of an "information bureau."

Information could not be furnished without the documents, hence the desirability of securing as complete a set of public documents back of the Fifty-third Congress as possible. The work was intrusted to Miss Adelaide R. Hasse, one of the foremost librarians of the country, who was in charge of the arrangement and classification of the vast number of documents turned over to the office by Departments and returned by libraries throughout the country under the clearing-house system. From these miscellaneous receipts and by special requests to libraries, which were liberally responded to, the library was built up from nothing in January, 1895, to 16,841 books and 2,389 maps June 30, 1897. This library, therefore, as long as it shall endure, will remain a monument to her zeal and industry.

I have continued the work of my predecessor in responding to all proper requests for information. Letters come from every part of this country, Europe, Asia, and Africa asking for information which could not or would not be furnished by anybody else. The library therefore enables this office to serve a most useful purpose.

The books, maps, and pamphlets in the library now number 23,247. These figures, however, fail to indicate the historical treasures in the collection, and it may be proper for me to indicate a few of the most rare and valuable, some of which antedate the adoption of the Constitution. Among them are the following:

Force's American archives, 9 volumes, complete so far as published.

Sparks's Diplomatic correspondence of the Revolution, 12 volumes, complete.

Wharton's Diplomatic correspondence of the American Revolution, 6 volumes, complete.

Diplomatic correspondence of the Revolution, issued by the State Department, 1837, 3 volumes, complete.

Journals of the Continental Congress, 4 volumes, complete.

Secret journals of the Continental Congress, 4 volumes, complete.

Elliott's Debates on the adoption of the Constitution, 5 volumes, complete.

Congressional proceedings and debates, 1789–1898, complete.

Congressional documents (sheep-bound set) beginning with the Fifteenth Congress, consisting of more than 3,600 volumes, complete with the exception of 8 volumes, 3 of which are believed never to have been issued.

Executive journals of the Senate, 1789–1828.

Five volumes of Folwell's edition of the Journals of the Continental Congress, printed in Philadelphia, 1800–1801.

Wait's State papers, first edition, 6 volumes, complete.

Wait's State papers, second edition, 10 volumes, complete.

Nine volumes of Wait's State papers, third edition, in 12 volumes.

Northeastern boundary arbitration, Washington, 1827, printed but not published.

Roll of honor, containing the names of the Union soldiers buried in national cemeteries, complete except 1 volume.

Proposed revision of laws, 1873.

Reports of Commissioner of General Land Office, 1866, 1867, in French.

Case of United States to be laid before tribunal of arbitration at Geneva, in Spanish.

Insect life, 7 volumes and index, complete.

Bulletins 1–8 of Bureau of Rolls and Library of Department of State, complete.

Perry's Expedition to China Seas and Japan, 1852–54, 3 volumes, complete.

Register of Military Academy, 1818–98, complete.

The following table shows the number of books, etc., in the library, the Government authors, and the acquisitions October 20, 1897–June 30, 1898:

	Number of books and maps in the library, June 30, 1898.		Increase since Oct. 20, 1897.

MAIL SECTION.

Every document distributed or sold is wrapped, labeled, and mailed from this section. All documents received from the Government Printing Office are received into this section and held for distribution as provided by law. The statement of documents received and distributed will show that the number of documents handled aggregated more than 1,000,000, a very large increase as compared with the year previous.

MESSAGES AND PAPERS OF THE PRESIDENTS.

In no branch of the office have there been greater results from the change in business methods than in the one charged with the distribution of this publication. During the seven months ended June 30, 1898, an average force of 3 employees sent

out 95,000 volumes, as compared with 35,000 volumes sent out the preceding five months, during which 9 persons were employed. Besides the work of sending out the 95,000 volumes, the entire card system was changed, new cards were written, and the mailing list printed

On July 1, 1897, there were 16,852 names on the mailing list. On June 30, 1898, the list contained 27,383 names. Since the latter date the force employed on this work has been reduced to 1. as against 9 a year ago, notwithstanding the work has been quadrupled.

One hundred and ninety-one thousand six hundred and seventy-four volumes have been sent out since the first volume was mailed in May, 1896. Two-thirds of this number, or 130,384, were distributed during the present fiscal year.

The compilation entitled Messages and Papers of the Presidents is distributed to persons and institutions designated by Senators, Representatives, and Delegates in Congress. Three editions have been authorized, aggregating 36,000 sets. The first two editions, of 21,000 sets, were subject to designation by members of the Fifty-fourth Congress; the third edition, of 15,000 sets, by members of the Fifty-fifth Congress. Each set will contain 9 volumes and an index. It is expected that the distribution will be finished by the 4th of March, 1899.

The value of the card system in the distribution of documents has been fully tested and demonstrated in the sending of these documents. Two thousand duplications have been prevented, a saving of four and two-fifths sets to each member on an average, and of 20,000 volumes of books which cost the Government about $1 each to publish.

STOCK SECTION.

The clerk in charge of this section has supervision over all documents the "distribution of which is not specifically provided for by law." Such documents numbered on July 30, 1898, 358,000 in round numbers.

This clerk prepared, at great labor, an excellent card system of all the documents in his section. His cards show at all times the number of copies of each document on hand, whether bound in paper, cloth, or sheep, and where located by giving the number of the book stack and bin. The work involved in keeping these cards up to date is enormous, as each document sold or distributed from the stock or received into stock must be checked off or on, as the case may be. These cards must be consulted before any order for documents can be filled, to ascertain whether or not they are in stock.

DESIGNATED DEPOSITORIES.

The names of 1,897 libraries are on the mailing lists as depositories. Depositories are divided into three classes, as follows:

Designated depositories, State and Territorial libraries	472
Geological depositories	772
Remainder depositories	653

Those in the first class receive substantially all free publications of the Government. Those in the second class receive the scientific publications known as bulletins, monographs, and atlases of the Geological Survey. Those in the third class receive fractional remainders after the allotment of Congressional quotas.

Each Senator, Representative, and Delegate in Congress is entitled to name one of the first class, two of the second, and an indefinite number of the third, except that the superintendent of documents is required to see that remainder documents are equally apportioned among members as nearly as possible.

The first and third classes of depositories may be changed at the pleasure of the member to whom charged. It is proper, perhaps, to say that this privilege is rarely exercised in the case of designated depositories.

The superintendent of documents is charged with the supervision of libraries

known as designated depositories to the extent of ascertaining whether they are eligible for designation under the law, or whether those already designated possess proper qualifications for retention. The law requires him to "thoroughly investigate the condition" of depository libraries, and "whenever he shall ascertain that the number of books in any such library, other than college libraries, is below one thousand, other than Government publications, or it has ceased to be maintained as a public library, he shall strike the same from the list, and the Senator, Representative, or Delegate shall designate another depository that shall meet the conditions herein required."

Under the authority of the law just referred to, I sent to each designated depository a circular letter with twelve interrogatories, calculated, if answered fully, to give all the information necessary to enable me to fix the status of such libraries. It is quite evident, however, from the replies received that nothing short of a personal inspection will enable the superintendent of documents to determine the condition of at least 20 per cent of the libraries now listed.

The number of books in a library, other than Government publications, is not a sure indication that it is or is not a suitable depository. It seems to me that it would be much more desirable to place the valuable publications of the Government in libraries that will properly care for them and bring them to the attention of the public, irrespective of the number of books in their possession, than to send them to those that will store them in the garret or cellar.

Recently bulletin notices of "publications of the United States Government sent to designated depositories" have been substituted in place of invoices. A large number of letters have been received from librarians approving of the plan, and stating that it has caused a great increase of inquiries for public documents.

The long delay in the delivery of Congressional documents is the source of great annoyance to librarians. They all appreciate the fact that they are specially favored in having their libraries selected as depositories, but they feel that the documents they are entitled to receive under the law should be sent before they have become "ancient history," when the public has lost interest in them largely.

I assured the American Library Association, at its annual meeting at Lakewood in July, that both the Public Printer and the superintendent of documents were in sympathy with its desire for improving the service in this respect especially, and would do all in their power in that direction.

A special effort has been made by this office to complete the sets of public documents in the designated depository libraries. A complete list of all documents available for such a purpose was prepared, printed, and sent to them in May, 1898, with request that the list be returned with a check indicating the documents needed. One hundred and one lists have been returned, and 75 libraries have been supplied with upwards of 50,000 volumes of documents up to this date (October 15, 1898).

The designated depositories on the list June 30, 1898, are classified as follows:

Public libraries	206
College libraries	83
University libraries	61
School libraries	31
Institute libraries	16
Theological libraries	6
Academy libraries	5
Y. M. C. A. libraries	3
Seminary libraries	2
State and Territorial libraries	48
Special designations by law	11
Total	472

The following summary is given, by States, of the information obtained in response to the circular letter above referred to. It shows the number of designated depositories in each State, the number of documents, and the number of books other than public documents in such depositories.

State or Territory.	Depositories.	Public documents.	Other publications.
Alabama	10	18,603	64,220
Arizona	2	3,070	4,150
Arkansas	8	16,140	19,920
California	10	45,430	486,570
Colorado	5	24,570	79,330
Connecticut	7	40,400	329,000
Delaware	4	25,190	29,000
District of Columbia	8	65,500	169,500
Florida	5	11,200	8,800
Georgia	13	33,920	108,750
Idaho	4	5,200	15,700
Illinois	25	91,670	1,670,040
Indiana	17	51,485	260,000
Iowa	14	50,400	177,680
Kansas	10	29,450	152,180
Kentucky	9	32,020	70,560
Louisiana	9	27,890	99,050
Maine	7	30,820	221,870
Maryland	10	41,650	511,130
Massachusetts	17	75,630	2,004,160
Michigan	15	51,460	524,550
Minnesota	10	31,335	236,530
Mississippi	7	10,710	40,510
Missouri	16	59,890	403,040
Montana	4	11,050	24,800
Nebraska	8	18,725	94,135
Nevada	3	4,775	10,790
New Hampshire	5	21,300	187,000
New Jersey	11	30,760	282,500
New Mexico	2	2,900	5,980
New York	35	147,630	2,390,370
North Carolina	11	29,250	63,030
North Dakota	4	19,040	8,550
Ohio	24	90,975	794,970
Oklahoma	2	900	900
Oregon	5	18,640	48,500
Pennsylvania	31	112,290	1,220,020
Rhode Island	5	30,700	176,000
South Carolina	10	39,900	93,050
South Dakota	5	10,000	18,330
Tennessee	10	26,400	83,900
Texas	9	15,770	42,950
Utah	4	2,530	9,350
Vermont	4	20,600	117,000
Virginia	10	26,500	159,300
Washington	5	21,300	28,700
West Virginia	7	15,500	38,200
Wisconsin	13	35,990	382,575
Wyoming	4	4,200	4,800
Total	.....	1,631,253	13,971,890

A most remarkable showing is made in regard to the number of books in these 472 libraries, as compared with the statistics relating to books in Public, Society, and School Libraries in the United States, prepared by the Commissioner of Education in 1896. These statistics gave the number of such libraries containing 1,000 volumes and over as 4,026, and the number of volumes as 33,051,872. It will thus be seen that the designated depository libraries contain almost one-half as many volumes as were reported in such libraries.

Thirty or forty depositories have reported from 500 to 2,000 fewer public documents on hand in 1898 than they reported in 1895. I have begun an investigation into the matter, with a view to ascertain whether the discrepancy is due to lack of interest, or whether the documents have been improperly disposed of. It may, perhaps, be proper for me to quote the law with reference to documents supplied to libraries by the Government.

Section 506, Revised Statutes of the United States, reads as follows:

"All such books and documents, when received at the proper offices, libraries, and other depositories, as provided by law, shall be kept there and not removed from such places."

MISCELLANEOUS LIBRARIES.

A large number of documents have been sent to and received from miscellaneous libraries under the "clearing-house system." That is to say, libraries having documents in duplicate send their surplus to this office for redistribution to others that are lacking. A list of such libraries is appended, showing the number of documents sent to and received from each.

DISTRIBUTION OF OLD CONGRESSIONAL GLOBES.

Under the provisions of an act of Congress, approved June 20, 1876, a lot of bound and unbound Globes, aggregating many thousands of volumes, with plates, etc., were purchased at an expense of $100,000. Congress refused to appropriate money to bind and complete sets, and they have been stored in the public warehouses ever since, occupying much valuable space. Under the authority of the Joint Committee on Printing, you directed me to dispose of such as were available to libraries desiring them, and to turn over those unfit for any other purpose to be sold as waste paper. Under this authority, I beg to report that I have distributed 6,613 volumes to libraries, and have disposed of 13,000 volumes as waste paper.

I was able to send out a few almost complete sets, bound and unbound. There is still on hand a large number of sets of from 40 to 50 volumes each which it is expected will be distributed very soon, especially as the libraries are beginning to understand that this is probably the last opportunity they will ever have to obtain any of these valuable documents free.

DOCUMENT REFORM.

For upwards of sixty years public documents have been distributed free to both libraries and individuals by the Government. The distribution to libraries, designated as depositories, has broadened from a few Congressional documents in the beginning to include almost everything published. Bills for the public printing have grown from about $46,000 in 1833 to nearly $2,000,000 in 1897, with a corresponding increase in the number of volumes of documents printed.

During the past forty years documents have been printed in such large editions and distributed with such liberal prodigality as to cheapen them in the estimation of the people at large. They were distributed broadcast without regard, in many cases, to the wishes of the recipients, and as a consequence were not only not appreciated, but were regarded with contempt. Instances have recently come to my

knowledge where retiring members of Congress shipped out by the carload the documents that had accumulated to their credit. Dozens of copies of the same document were sent to one library, where they were only an encumbrance, and after years of storage in garrets or cellars they found their way to this office in their "original wrapping" for redistribution.

Librarians, as a rule, however, have always appreciated the value of the publications of the Government. Most of them want one copy of everything they can get; they want that copy as soon after it is printed as possible; they want documents in complete sets, but they do not want them dumped upon them, as is often done, without regard to whether they have previously been supplied or not. The scientist, the student, the professional man, and the historian all recognize the value of public documents. They are the ones who consult public documents in the libraries or purchase them, if necessary, rather than ask for them as a gratuity.

But this wasteful publication and haphazard distribution of documents did not proceed without protest and serious effort upon the part of men in and out of Congress to correct the evils that were patent to anybody who cared to look into the subject. Dr. John G. Ames, superintendent of documents, Interior Department, did more, perhaps, to bring about "document reform" than any other one man. In almost every annual report submitted by him for twenty years, attention was called to the necessity for new legislation with reference to the printing, binding, and distribution of public documents.

In 1882 Congress took up the subject and, by resolution, appointed Dr. John G. Ames, A. R. Spofford, librarian of Congress, and Spencer F. Baird, secretary of the Smithsonian Institution, to "compile the laws and regulations * * * in force governing the printing and distribution of public documents, * * * to report what reductions should be made in the number of such documents, * * * and submit the draft of a bill to provide for the printing and distribution of documents."

These eminent gentlemen, no doubt the best qualified of any three men in the United States for the duties assigned them, made a very elaborate report to Congress at the second session of the Forty-seventh Congress (House mis. doc. 12, Forty-seventh Congress, second session). They stated that they were—

"deeply impressed with the number of documents printed by authority of Congress, aggregating for the Forty-sixth Congress 2,324,254. * * * [They were] no less deeply impressed with the lack of system and economy in the distribution of these documents. The one reform most essential to secure the object for which it was supposed public documents are issued is the decrease of the number of agencies by which they are distributed. Under the practice now prevailing, nearly all documents, whatever may be their cost and value, are distributed by from two to four agencies, each in ignorance of what the others are doing, so that * * * to no small extent documents are sent in duplicate and triplicate."

They recommended the establishment of a single agency, because—

"it would very greatly subserve the public convenience, as it would soon come to be recognized as the source from which information in regard to any and all documents could be readily secured."

No action was taken upon this report, and the bill and resolutions drawn by the committee died by the expiration of Congress. Dr. Ames, however, persisted in his efforts, and, aided by the librarians of the country, finally secured the passage, in an amended form, of the bill drawn by him, known as the act of January 12, 1895.

While this act was a long stride in the right direction, it did not go far enough to reach some of the chief causes for complaint. First: The "one reform most necessary," as pointed out by the report of the committee quoted above, was the decrease in the number of agencies by which public documents are distributed. The act of January 12, 1895, says that the superintendent of documents "shall have general supervision of the distribution of all public documents"; but it goes on and actually

increases the number of agencies by which they are distributed, each independent and "in ignorance of what the others are doing." Second: The multiplicity of editions of the most important publications of the Government, in different styles of binding, with varying title-pages and back-titles, is continued, "so that one may possess three or four copies of the same work without discovering from their outward appearance that they are all the same document." Third: Probably the most serious cause of complaint from librarians is the delay in the binding of documents "reserved" for that purpose, for distribution to State and Territorial libraries and designated depositories.

Section 54, paragraph 7, of the act of January 12, 1895, provides that—

"The remainder of said documents and reports shall be reserved by the Public Printer in unstitched form, and shall be held subject to be bound in the number provided by law, upon orders from the Vice-President, Senators, Representatives, Delegates, Secretary of the Senate, and Clerk of the House, in such binding as they shall select, except full morocco or calf; and when not called for and delivered within two years after printing shall be delivered in unbound form to the superintendent of documents for distribution."

It is safe to say that not to exceed 15 per cent of the documents reserved for binding under this paragraph will ever be called for by those entitled to have them bound. Five hundred copies of each document of which the "usual number" is printed are reserved for the purpose indicated. Unbound documents can not be disposed of either by free distribution to libraries or by sale to individuals, so that if the law is allowed to remain unchanged, there is not a warehouse in the city large enough to store the accumulation of a few years.

I beg to suggest, therefore, that the law be amended so as to authorize the Public Printer to bind in cloth such documents as are not called for within two years after printing, and deliver them to the superintendent of documents for distribution to public, school, or college libraries.

Several bills have been introduced in Congress to amend the law of January 12, 1895, and two or three are now pending. There are some good features in each, and I trust some legislation may be had very soon that will remedy the difficulties pointed out.

Very respectfully,

L. C. FERRELL,
Superintendent.

Hon. F. W. PALMER,
Public Printer.

From the
U. S. Government.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., November 1, 1899.

SIR: I have the honor to submit herewith a report of the number of public documents received, distributed, and sold during the fiscal year ended June 30, 1899.

Documents received from—		
Government Printing Office	423,675	
Agriculture, Department of	192,779	
Interior, Department of	4,934	
Labor, Department of	5	
Navy, Department of	3,985	
State, Department of	2,104	
Treasury, Department of	16,943	
War, Department of	2,218	
Fish Commission	13,145	
Geological Survey	13,800	
Miscellaneous offices	198	
Libraries and exchanges	25,410	
Total		699,196
Documents distributed to—		
Designated depositories, State and Territorial libraries	153,254	
Geological depositories	24,923	
Remainder depositories	32,014	
Miscellaneous libraries to complete sets	196,983	
Official use	6,535	
Foreign legations	78,809	
Individual designations by Senators, Representatives, and Delegates in Congress	97,558	
Monthly catalogues, to libraries	22,577	
Miscellaneous, catalogues, indexes, price lists, etc	75,075	
Documents sold:		
Periodicals, on subscription	2,719	
Sales, as per itemized statement	24,089	
Total		714,536

Documents on hand July 1, 1898	412,039	
Documents received, July 1, 1898–June 30, 1899	699,196	
Total		1,111,235
Documents sold, July 1, 1898–June 30, 1899	26,808	
Documents distributed, July 1, 1898–June 30, 1899	687,728	
Total		714,536
Documents on hand July 1, 1899		396,699

The above statement shows that 1,413,732 documents were handled in and out during the fiscal year, a number equal to the first three years' business of the office, as the following comparison by fiscal years indicates:

Fiscal year.	Received.	Distributed.	Sold.	Amount of sales.
1895	486,871	185,900	3,581	$889.09
1896				
1897	413,194	308,238	17,638	4,016.15
1898	639,298	537,630	21,363	4,537.27
1899	699,196	687,727	26,808	7,556.11

MISCELLANEOUS DISTRIBUTION TO COMPLETE SETS.

The number of documents distributed to miscellaneous libraries to complete sets was larger in the aggregate (196,983) than the entire number furnished libraries for that purpose since the inauguration of the work by Dr. John G. Ames, of the Interior Department, some fifteen or twenty years ago. Any document that is available for distribution gratis is promptly supplied to any public library upon application, for the purpose of completing a set.

While this work is not a duty imposed by law, the practice has been so long continued and has served such a useful purpose that it has come to be considered as one of the important functions of the office. The labor involved in packing, registering, and mailing this vast number of books was very great, but it was not permitted to interfere with the current business, which was also extremely heavy.

The value of these documents to the libraries can not be overestimated, as most of them have been out of print so long that they are practically unobtainable elsewhere. An incomplete set of books of any kind is of little use, as a reference to it usually discloses the fact that the volume wanted is missing.

The question is frequently asked as to the source from which documents available for gratuitous distribution to public libraries, other than those distributed to designated depositories under the law, have been obtained. The larger number have been received from the Executive Departments under the provisions of the act of January 12, 1895, which directs that documents therein not required for official use shall be delivered to the superintendent of documents for distribution. Documents have been accumulating in the Departments for a century, and several hundred thousand volumes have been turned over to this office and are being disposed of by sale or distribution to libraries. Large numbers of documents are also received from libraries that have them in duplicate. Twenty-five thousand four hundred and ten volumes were received from this source during the fiscal year. Many more would have been received, but I was compelled to decline them for the present, owing to lack of room.

Much has been said concerning the duplication of documents to libraries. My experience leads me to the conclusion that a great deal of good has resulted therefrom indirectly. It is a well-known fact that the true librarian never destroys any-

thing in the way of printed matter. Thus it has happened that documents sent in duplicate to public libraries in the older States have been carefully preserved for generations, frequently at great inconvenience for lack of space. These libraries gladly availed themselves of the offer of the Government, through Dr. Ames in the first place, and later through this office, to receive the accumulations of duplicates and redistribute them to new libraries in the Western States, where they never could have been obtained otherwise.

MESSAGES AND PAPERS OF THE PRESIDENTS.

I am pleased to report that the distribution of the compilation of the Messages and Papers of the Presidents, 1789–1897, by James D. Richardson, has been substantially completed. The work was published in three editions, aggregating 36,000 sets of 10 volumes each. The first and second editions were distributed by members of the Fifty-fourth Congress, and the third edition upon orders of members of the Fifty-fifth Congress. The utmost care has been exercised in the distribution to insure prompt delivery to the person for whom intended. I am now sending out postal notices to all designees, which state that the distribution is finished, giving the name of the Senator, Representative, or Delegate on whose order the books were sent, and asking for prompt notice of failure to receive any volume or volumes of the set, so that they may be traced. Great credit is due the Post-Office Department for the promptness and accuracy with which more than 300,000 volumes of the work have been delivered, not a single case of loss having been reported that could not be traced.

SALES.

The number of documents sold, and the receipts therefrom, show an increase of 25 and 65 per cent, respectively. The average price of each document sold was about 28 cents, as against 21 cents last year. Seventy per cent of the documents sold, and 28½ per cent of the amount of sales, was on account of publications of the Department of Agriculture.

Orders aggregating several thousand dollars could not be filled because the supply of documents desired was exhausted.

It is hoped that Congress will authorize the superintendent of documents to make requisition upon the Public Printer for the reprint of documents that may be in demand by the public, upon certificate that a certain number of copies have been subscribed and paid for.

Two price lists have been published, one in October, 1898, and one May 1, 1899. The latter is the most complete price list of documents for sale that has ever been issued, and it has increased the sale of documents very materially.

PUBLICATIONS.

The documents published by this office during the fiscal year aggregate 1,872 pages, and consist of 1 document catalogue (comprehensive index); 12 monthly catalogues of public documents, 2 price lists, 1 "Reports of Explorations Printed in the Documents of the United States," by Adelaide R. Hasse, and 1 bibliography of United States documents relating to interoceanic communication across Nicaragua, Isthmus of Panama, etc. Thirteen thousand documents were received for cataloguing purposes and 49,000 cards were written.

The document catalogue (comprehensive index) of Fifty-fourth Congress, second session, is in press, and the document index of the Fifty-fifth Congress, third session, will go to press in a short time.

For some time I have had in contemplation an improvement of the monthly catalogue of public documents by making the index cumulative. This will be done as soon as the business of the office will warrant it.

In my last annual report I spoke of the desirability of publishing the document

catalogue biennially instead of for each session of Congress, as now required by law. A bill will be presented to Congress in December next that will provide, among other things, for this change. It is intended, if the bill shall pass, that the first issue shall include all the documents of the Fifty-fifth Congress, and those of the departmental series published from July 1, 1897–June 30, 1899. If this plan shall be adopted, much duplication of matter will be avoided, and consequently a great deal of labor will be saved both in the preparation and publication of the catalogues.

CHECK LIST OF PUBLIC DOCUMENTS.

Considerable progress has been made in the preparation of a new check list of public documents, so that it now seems probable that it can be finished and published next year.

It is my intention to make the check list much more systematic and comprehensive than any heretofore attempted. With this object in view many prominent librarians were consulted prior to beginning the work, and I beg to tender to them my acknowledgments for the many valuable suggestions made.

The following is a brief outline of the plan adopted for the work:

The documents are grouped under four headings, as follows:

1. Papers of the Revolutionary period.
2. Proceedings and Debates in Congress.
3. The Congressional series.
4. The Departmental series.

In the first group will be included many valuable papers not public documents, but which have been either purchased or adopted by the Government as official.

Group 2 will contain a list of the proceedings and debates in Congress from the First to the Fifty-fifth Congress, inclusive, arranged by Congresses and sessions instead of by volume numbers, for the reason that the volumes composing the set are not uniform on account of a difference in the pagination of the daily edition and those bound at the end of the session for distribution to libraries.

The third group will contain a list, as nearly complete as possible, of the Congressional documents from the First to the Fifty-fifth Congress, inclusive. The scheme devised by Dr. John G. Ames, of serial numbers for the documents of the Fifteenth to the Fifty-third Congress, has been adopted and continued. It having been found impracticable to classify the unnumbered documents of the first fourteen Congresses by serial numbers, they will be introduced immediately preceding the documents of the Fifteenth Congress under "zero numbers."

Group 4 will contain a list of the documents known as the "Departmental" series, many of which also appear in the Congressional series. The latter will be indicated so that duplication under different titles may be easily ascertained.

A new classification has been devised by this office for the Departmental series which I think will meet all requirements. By the use of this classification reference to the Departmental series is made easy and may be applied as serial numbers are to Congressional documents. A few notes, with sample page, are given herewith which probably sufficiently explain the scheme to enable librarians to adopt the classification if desirable:

Using the abbreviations for the departments (i. e., A=Agriculture; T=Treasury; W=War, etc.), and the figures *preceding* the decimal point to represent the bureau, office, etc. (i. e., A1.=Agriculture, Secretary; A2.=Agriculture, animal industry; A3.=Agriculture, botany, etc.); the figures after the decimal to represent the series (i. e., A2. 1:=Agriculture, animal industry, annual reports); the figures after the colon to be the book number, date, etc. (the latter not to be used in the tables, but to be left to be supplied by the person classifying the works). This classification is also the fruit of most trying experience and can be, I feel sure, recommended to all as the most satisfactory method which it seems possible to devise.

DEPARTMENTAL SERIES.

A — AGRICULTURE.

A1. — *Secretary.*

A1. 1: Annual reports:

1838	1843	1848	1853	1858
1839	1844	1849	1854	1859
1840	1845	1850	1855	1860
1841	1846	1851	1856	1861
1842	1847	1852	1857	etc.

A1. 2: General publications:

Agricultural grasses in the United States.
Contagious diseases of domesticated animals.
Diseases of cattle.
Diseases of swine and other animals.
Hog cholera.

A1. 3: Bulletins:

(None issued)

A1. 4: Circulars:

No. 1	No. 3	No. 5	No. 7	No. 9
No. 2	No. 4	No. 6	No. 8	No. 10

A1. 5: Yearbook:

1894	1896	1898
1895	1897	

A2. — *Animal Industry.*

A2. 1: Annual reports:

1st 1884	3d 1886	6th–7th 1891	
2d 1885	4th–5th 1887	8th–9th 1893	

A2. 2: General publications:

A2. 3: Bulletins:

No. 1	No. 3	No. 5	No. 7	No. 9	No. 11	No. 13
No. 2	No. 4	No. 6	No. 8	No. 10	No. 12	No. 14

A2. 4: Circulars:

No. 1
No. 2 etc.

A2. 5: Orders:

No. 1	No. 6	No. 11	No. 16	
No. 2	No. 7	No. 12	No. 17	
No. 3	No. 8	No. 13	No. 18	
No. 4	No. 9	No. 14	No. 19	
No. 5	No. 10	No. 15	No. 20	etc.

In the above classification the following combinations are arbitrary:

Figure 1 preceding the decimal point always stands for secretary or chief executive officer of a department or office, the other numbers, indefinitely, to be applied to the various bureaus, divisions, or offices.

The figures following the decimal point and preceding the colon always stand for the following:

1 Annual reports.
2 General publications.
3 Bulletins.
4 Circulars.

The rest of the numbers, indefinitely, to be applied to other series which bear distinctive titles or numbers; but all unnumbered miscellaneous publications are to be

classed under "general publications" of the bureau or office from which they emanate, or if this fact can not be ascertained, under "general publications" of the Department.

The foregoing tables are purely suppositional, but will give an idea of the proposed arrangement.

Another new and important feature of the check list will be the cyclopedic index. In the check list, edition of 1895, the few titles given of Congressional documents appear in the tables; these will be omitted and in lieu thereof the titles of all Congressional documents will appear in the cyclopedic index in alphabetical order under subject, title, and authors when important, except such documents as relate merely to private claims and a few minor matters of no historical interest. This method will undoubtedly open up for convenient reference a vast amount of valuable historical matter that has heretofore been hidden away and almost inaccessible for lack of proper indexes.

PROPOSED AMENDMENTS TO THE ACT OF JANUARY 12, 1895, PROVIDING FOR THE PUBLIC PRINTING AND BINDING, AND THE DISTRIBUTION OF PUBLIC DOCUMENTS.

The committee appointed by you soon after the adjournment of the Fifty-fifth Congress, consisting of the foreman of printing, the chief clerk of the Government Printing Office, and the superintendent of documents, for the purpose of reporting what amendments, if any, should be made to the act of January 12, 1895, relating to the public printing and binding and the distribution of public documents, have substantially agreed to recommend certain amendments which will be presented to Congress at its next session.

I shall not attempt to analyze these amendments further than to say that it is expected, if the bill shall pass, that it will result in the prompt delivery of public documents to the designated depositories; that the binding of documents will be uniform, will give better service, will conform more closely to the literature of the day, and will present a more attractive appearance generally; that every copy of a document will bear the same title and have the same title-page, thus doing away with the confusion that now exists where a document may be issued under three or four different titles.

BINDING DOCUMENTS RESERVED FOR DISTRIBUTION TO DEPOSITORIES.

It will be very gratifying news to librarians to learn that the present Public Printer has inaugurated a plan for the binding of the documents "reserved" for binding and distribution to designated depository libraries that promises to solve the problem that has troubled them from time immemorial. That is, a special section has been established for binding these documents, and it is hoped that it will be made permanent. Up to date of making this report 4 volumes of the documents of the Fifty-fifth Congress, first session, 20 of the Fifty-fifth, second session, and 4 of the Fifty-fifth, third session, have been received from the Printing Office and distributed to the depositories. This is unprecedented in the history of that office. The determination of the Public Printer is that the work of binding the "reserve" shall be brought up to date, so far as the preparation of the matter will permit.

DESIGNATED DEPOSITORY LIBRARIES.

Appended to my report will be found a complete list of the three classes of depository libraries. There are 478 libraries on the list of designated depositories, an increase of 6 during the year. There are still 22 vacancies, which may seem very strange when the value of the privilege is considered. For the information of those concerned in making designations, etc., I quote the following from the Revised Statutes of the United States:

"SEC. 501. The copies of journals, books, and public documents which are or may be authorized to be distributed to incorporated bodies, institutions, and associations

within the States and Territories, shall be distributed to such bodies as shall be designated to the Secretary of the Interior (superintendent of documents) by each of the Senators from the several States, respectively, and by the Representatives in Congress from each Congressional district, and by the Delegate from each Territory. The distribution shall be made in such manner that the quantity distributed to each Congressional district and Territory shall be equal; except that whenever the number of copies of any publication is insufficient to supply therewith one institution, upon the designation of each member of the Senate and House of Representatives the copies at the disposal of the Secretary (superintendent of documents) may be distributed to such incorporated colleges, public libraries, athenæums, literary and scientific institutions, boards of trade, or public associations as he may select.

"SEC. 502. The selection of an institution to receive documents ordered to be published or procured a the first session of any Congress shall control the documents of the entire Congress, unless another designation be made before any distribution has taken place under the selection first made. Where the work is printed by order of both the Senate and House of Representatives, the duplicates may be sent to different institutions, if so desired, by the member whose right it is to direct the distribution, and the public documents to be distributed by the Secretary of the Interior (superintendent of documents) shall be sent to the institutions already designated, unless he shall be satisfied that any such institution is no longer a suitable depository of the same. * * *

"SEC. 506. All such books and documents when received at the proper offices, libraries, and other depositories, as provided by law, shall be kept there and not removed from such places."

(Act of Jan. 12, 1895, 28 Statutes at Large, 601.)

"SEC. 70. The superintendent of documents shall thoroughly investigate the condition of all libraries that are now designated depositories, and whenever he shall ascertain that the number of books in any such library, other than college libraries, is below one thousand other than Government publications, or it has ceased to be maintained as a public library, he shall strike the same from the list, and the Senator, Representative, or Delegate shall designate another depository that shall meet the conditions herein required.

"SEC. 74. * * *; and all Government publications delivered to designated depositories or other libraries shall be for public use without charge."

A great deal of confusion has arisen from time to time on account of the redistricting of States for Congressional purposes. Two and even three depositories are sometimes thrown into the same district and new districts are left without any. The result is, when the Representative of the new district exercises his right to designate a depository, one of the old depositories must be dropped, and it often happens that the library thus deposed is much more worthy than the substitute. Probably the only remedy would be to allow a number of depositories to each State and Territory equal to its Congressional delegation, with the privilege to each member to designate only when a vacancy occurred in his district, provided there was no other depository therein. It certainly seems to me that if a library is worthy of being a depository for public documents the designation should be made permanent. Under the present law a depository is liable to be dropped any time and left with an incomplete set of documents in its files.

GEOLOGICAL DEPOSITORIES.

The distribution to geological depositories is authorized by section 79 of the act of January 12, 1895, and an amendment thereto, which read as follows:

"SEC. 79. * * * . And there shall be distributed of monographs, bulletins, and reports of the United States Geological Survey now in the possession of the said Survey, being publications prior to the year 1894, one copy of every such publication to every public library which shall be designated to the superintendent of docu-

ments, as follows: Two public libraries to be designated by each of the Senators from the States, respectively, two public libraries by the Representative in Congress from each Congressional district, and two public libraries by the Delegate from each Territory; such public libraries to be additional to those to which said publications are distributed under existing law."

(Joint resolution approved February 26, 1896, 29 Statutes at Large, 465.)

"That the provisions of section 79 of 'An act providing for the public printing and binding and the distribution of public documents,' approved January 12, 1895, * * * shall be extended to the monographs, bulletins, and reports of the Geological Survey which were published during the year 1894, and to those which have been published since that year, and to those which may be published in the future." * * *

There are 122 vacancies in this list. By consulting the appended list of such depositories members of Congress may readily ascertain whether their districts or States are represented. These depositories when named are permanent, and some confusion has been caused by throwing three or four depositories in the same district when a State has been redistricted for Congressional purposes. A new district may be left without representation, and yet the State quota may be full.

REMAINDER DEPOSITORIES.

The following extract from the act of January 12, 1895, is the authority under which documents known as "remainders" are distributed. The superintendent of documents has endeavored to obtain designations from each district in order to make an equal distribution of these documents, but has only partially succeeded. Nearly 700 libraries are now on the list, however, as against 262 two years ago. These will be continued until dropped and others substituted by the members whose right it is to direct the distribution.

"SEC. 68. Whenever in the division among Senators, Representatives, and Delegates, of documents printed for the use of Congress there shall be an apportionment to each or either House in round numbers, the Public Printer shall not deliver the full number so accredited at the respective folding rooms, but only the largest multiple of the number constituting the full membership of each or either House, including the Secretary and Sergeant-at-Arms of the Senate, and Clerk and Doorkeeper of the House, which shall be contained in the round numbers thus accredited to each or either House, so that the number delivered shall divide evenly without remainder among the members of the House to which they are delivered; and the remainder of all documents thus resulting shall be turned over to the superintendent of documents, to be distributed by him, first, to public and school libraries for the purpose of completing broken sets; second, to public and school libraries that have not been supplied with any portion of such sets, and, lastly, by sale to other persons; said libraries to be named to him by Senators, Representatives, and Delegates in Congress; and in this distribution the superintendent of documents shall see that, as far as practicable, an equal allowance is made to each Senator, Representative, and Delegate."

REFERENCE LIBRARY.

There is now a total of 30,698 books and maps in the reference library of this office. During the year 6,534 books and 914 maps were added. Under the heading "Books" are included bulletins, periodicals, orders, circulars, separates, and miscellaneous pamphlets from departments and offices, but bills, slip laws, committee reports, and other unbound Congressional documents, of which many thousands are received, are not included. Publications in these classes are not noted as additions to the library until collected in permanent form in bound volumes.

The statistics of increase of the library do not accurately represent the publishing output of the Government for one fiscal year. Despite constant calls upon depart-

ments and bureaus for missing publications (almost always answered with promptness and courtesy) some few have doubtless escaped, though probably none of much importance. On the other hand, many documents of earlier years have been rescued and added to the library.

There have been a great many applications during the year upon the part of the public for permission to use our library, but on account of interruption to the work of the office and for lack of proper facilities I was compelled to refuse it, except in a few exceptional cases. Librarians who have called to inspect the library and take note of our classification of public documents have been shown every courtesy and afforded such assistance as our limited means would admit of. It is quite likely that such demands will be made on the library in the future by the officials of the Government that some provision will necessarily have to made for those who desire to use it in reference work.

The following table shows the total number of books and maps, and the total number of publications of each department, bureau, and office, and the accessions during the year:

Department, bureau, or office.	Books and maps in library June 30, 1899.		Increase since June 30, 1898.

JAN 29 1931

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., October 1, 1900.

SIR: I have the honor to submit herewith a report of the receipt, distribution, and sale of public documents for the fiscal year 1900, with such recommendations as are deemed essential to the improvement of the service. A list is appended of all libraries that receive documents regularly from this office as depositories of public documents.

Report of documents received and distributed during the fiscal year ended June 30, 1900.

Received from:		
Government Printing Office	551,883	
Geological Survey	23,500	
Agriculture, Department of	23,253	
Interior, Department of	2,031	
Treasury, Department of	22,767	
State, Department of	5,036

Documents sold July 1, 1899, to June 30, 1900	27,903	
Documents distributed July 1, 1899, to June 30, 1900	678,692	
Total		706,595
Documents on hand July 1, 1900		364,818

SALES.

There were sold during the fiscal year 27,903 documents. The total amount received was $9,978.61, of which $953.65 was returned to the remitters because the office was unable to supply the documents ordered. The net receipts were therefore $8,902.21, being an increase over the previous year of $1,346.11. The average price per document was 31.9 cents as against 31.3 cents in 1899.

The public demand for public documents has been stimulated largely by the distribution of price lists. This office has issued the third edition of a price list of all public documents now available for sale. The Department of Agriculture issues and distributes a monthly list of its publications, which has a circulation of about 60,000 copies. Under the provisions of section 61 of the printing act, all of the priced publications of the Department of Agriculture are turned over to this office for sale, and these include substantially everything issued by that Department except Farmers' Bulletins.

The monthly list, as stated, is placed in the hands of 60,000 people, and all applications for priced documents are referred to this office. The number of such documents supplied for sale averages 200 copies of each edition, and it is not unusual for me to receive in two or three days a sufficient number of orders to exhaust the supply. The Department recently issued Entomology Bulletin 25, new series, on the Mosquito; price 5 cents. The supply was exhausted in a day or two, and orders for it are coming in at the rate of 10 to 20 a day. The consequent correspondence, return of money, etc., is a greater expense than it would be to reprint the document.

But the constant demand for documents that are out of print is not confined to the publications of the Department of Agriculture. There should, in my judgment, be authority lodged somewhere to order the reprint of documents when the public demand is large enough to justify it, if the plates have not been destroyed. My experience in this respect led to the insertion of a clause in the bill now pending before Congress (S. 3181) to amend the printing act, to authorize the Superintendent of Documents to make requisition upon the Public Printer for the reprint of documents in certain cases.

Authority to reprint would obviate the supposed necessity of limiting the sale of documents to individuals. The printing act prohibits the sale of more than one copy of any document to the same person. This restriction is the cause of much annoyance and vexatious delays to business men throughout the country, while it

really affords no protection to the Government against anyone who may choose to take the trouble to evade it.

Until recently it was almost impossible for the public to obtain public documents, as they were distributed by way of favor to a few people. The demand was limited because no catalogues were issued and the people did not know what was being published. Now catalogues and price lists are printed at great expense to the Government, and are circulated all over the country, so that the people have become greatly interested in and are eager to buy documents. Sound business principles would suggest that means be afforded this office for supplying any document the people want and are willing to pay for, without restrictions of any kind.

EXCHANGES WITH LIBRARIES.

On account of the numerous independent agencies by which documents are distributed, large numbers of duplicates accumulate in some of the libraries of the country, while others are able to obtain documents only in a fragmentary way, if at all. The requisitions of the latter for documents to fill up gaps in their files led the Superintendent of Documents to ask that duplicates not needed be sent him for redistribution, frank labels and mail bags being supplied to the libraries for the purpose.

The superintendent of documents, Department of the Interior (Dr. John G. Ames), in his report for 1894–95 estimated the number of volumes received from all sources since he undertook "this clearing-house service in the interest of the libraries" at 225,000, of which 24,500 were Congressional Globes and Records.

I do not find any statistics concerning the redistribution to libraries prior to the establishment of this office. The record since then shows as follows:

Documents received from and redistributed to libraries.

Year.	Received.	Redistributed.
	Volumes.	*Volumes.*
1895	2,590	.....
1896	31,321	65,823
1897	17,848	7,414
1898	32,261	51,998
1899	25,410	196,983
1900	29,805	92,717
	139,215	414,935
Previously received by Dr. Ames	225,000	.....
Total	364,215	414,935

It thus appears that nearly half a million volumes of documents have been rescued from ultimate destruction and placed in the files of libraries that can use them to advantage.

This exchange system does not mean that a library may establish a credit account by returning documents against which it may draw in the future. If such was ever the practice, it has been discontinued. Under the present rule all libraries, so far as their need for documents is concerned, are placed on an equal footing, and their requisitions are honored from the available exchange surplus without regard to the number of duplicates they may have individually returned. It appears to me that this is the just and practical method. Any other plan would involve a large amount of bookkeeping, and no library could obtain surplus documents unless it had a credit account.

The demand for surplus documents to fill up deficiencies in sets now comes largely from libraries not regular depositories, as the depositories have substantially

filled up the gaps in their files of public documents, at least so far as this office can aid them, and their needs require.

I find that there is a constantly increasing inquiry for the public documents from public institutions, school and college libraries, especially for such as relate to scientific matters. This demand must sooner or later result in a more economic and systematic distribution of the documents printed for the personal use of heads of departments and bureaus, and members of Congress.

In order to properly dispose of our surplus stock, I have from time to time made up lists of documents available for distribution, so that librarians might make a selection. A number of these lists have been supplied to each member of Congress, so as to insure an equal distribution to the Congressional districts. This plan has produced very satisfactory results and will be enlarged upon in the future.

DOCUMENTS RESERVED FOR BINDING UPON ORDERS FROM THE VICE-PRESIDENT, SENATORS, AND REPRESENTATIVES.

The discussion of the proper disposal of surplus documents leads to the consideration of the question: What shall be done with the documents reserved for binding upon orders from the Vice-President, Senators, and Representatives?

Section 54 of the printing act approved January 12, 1895, provides that 500 copies of each document and report shall be reserved in unstitched form for binding upon orders from members and officers of the Senate and House; that if not called for and delivered within two years after printing, shall be delivered in unbound form to the Superintendent of Documents for distribution.

According to a statement made to me by the foreman of the folding room, Government Printing Office, but 97 copies of the documents of the Fifty-fourth Congress were called for by those entitled to have them bound. There remain, then, 403 copies of each document of that Congress to be turned over to this office in unbound form for distribution, making in the aggregate 85,000 volumes of books. These are all stored in the warehouse, at great expense to the Government, without any prospect of this office being able to dispose of them in their present form.

I can see but one solution of the problem, and that is for Congress to authorize the Public Printer to bind the entire surplus arising from this source in good cloth binding so that the documents may be distributed to school, college, and public libraries. This suggestion is embodied in the bill now before Congress, heretofore referred to.

DESIGNATED DEPOSITORIES.

The term "designated depositories" is given to institutions named by Senators, Representatives, and Delegates in Congress, under sections 501 and 502, Revised Statutes of the United States. Each Senator, Representative, and Delegate is entitled under the provisions of those sections to name one library in his State, District, or Territory, respectively, as a depository of public documents. At first the distribution to these depositories consisted solely of Congressional documents. The law has been amended from time to time, however, so that now substantially all publications of the Government are distributed to them.

In addition to the depositories designated by members of Congress, there are a number designated by law, with equal privileges. These are the libraries of each State and Territory, the libraries of the eight Executive Departments, the libraries of the Military Academy at West Point and Naval Academy at Annapolis, respectively, the American Antiquarian Society, Worcester, Mass., and the library of the secretary of the Territory of Alaska. Total authorized depositories, 510. While the depository list is subject to expansion by increased representation in the House after a census, provision is made for the printing and binding of but 500 copies of each document.

Heretofore there has been no difficulty, because of the large number of members who failed to make designations. So many new designations have been made recently, however, that I shall soon be compelled to decline to make additions to the list because of lack of documents.

The Public Printer should be authorized to print and bind as many copies of each document as may be required for distribution to depository libraries, the exact number to be certified to him at the beginning of each Congress.

In another part of this report may be found a list of all depository libraries on the books of this office, by States, alphabetically arranged, and showing the Congressional district to which each is charged.

As the law now stands, a member of Congress may change the depository charged to him each session of Congress if he chooses to do so. Fortunately this is seldom done, as most members recognize the fact that broken sets of books are of little value, and that a library once named as a depository ought to remain so permanently. A change in the law that will insure permanency is, however, desirable.

Librarians have not been slow to recognize improved methods in the Printing Office, which have already resulted in the gain of one year in the distribution of Congressional documents. This very satisfactory condition has been brought about by the establishment of a new section in the bindery for binding Congressional documents "reserved" for binding and distribution to designated depositories. It is my expectation that substantially all the documents of the Fifty-fifth Congress will be distributed before the Fifty-sixth Congress shall meet at its second session, and that considerable progress will have been made in the binding and distribution of the documents of the first session of the Fifty-sixth Congress.

The distribution to the depositories during the year was much larger than ever before, amounting to 217,562 books and pamphlets, of which 110,000 were sheep-bound volumes. This is an average of 443 books to each depository.

GEOLOGICAL DEPOSITORIES.

These depositories are entitled to receive all the scientific publications of the Geological Survey, except the annual reports. Designations are made under the provisions of section 79 of the printing act approved January 12, 1895. Two designations may be made by each Senator, Representative, and Delegate in Congress. A list of these depositories, showing the Congressional district to which charged, may be found in another part of this report.

REMAINDER DEPOSITORIES.

The distribution of documents to this class of depositories is authorized by section 68 of the printing act approved January 12, 1895. No more than three libraries may be designated by any Senator, Representative, or Delegate in Congress to receive "remainders." A list of libraries now on the list of remainder depositories, showing the Congressional district to which charged, may be found in another part of this report.

There was an average distribution during the fiscal year of thirty-five books and pamphlets to each of these depositories.

MONTHLY CATALOGUE.

The law authorizes the printing of but 2,000 copies of the Monthly Catalogue. These are distributed as follows: Five hundred copies to members and officers of Congress; 500 copies to designated depositories, as required by law; 200 copies to heads of Departments and other officials of the Government, and the remainder to miscellaneous libraries and public institutions.

The pressure for the catalogue upon the part of individuals has been very great, and many were anxious to pay any reasonable subscription for it. To satisfy this

demand, in a measure, I have prepared and had printed a complete price list of all documents available for sale, which is supplied free to anybody. But this is not satisfactory to the large business and scientific interests of the country who desire to keep posted on current publications. I therefore hope that Congress will authorize the publication of a subscription edition of the Monthly Catalogue, to be sold at 60 cents a year.

REFERENCE LIBRARY.

The following table shows the number of books and maps in the library June 30, 1900, the number of publications of each Government author, and the number of accessions during the year.

The growth of the library has been phenomenal, as the following table shows:

Accessions to reference library; 1895–1900.

1895–96	14,799
1897	19,438
1898	23,247
1899	30,698
1900	37,168

The great mass of scientific and historical treasures locked up in these documents for lack of proper indexes will, it is hoped, soon be opened up to the people by means of the new check list, which is being pushed to completion as rapidly as possible.

There is a growing need for a national library of official public documents, and there is no better foundation upon which to build such a library than the library of this office. There is not much doubt but that the State and municipal and foreign governments would render every assistance in their power to make the collection of official documents complete.

This office would undertake the collection of the official documents of State, municipal, and foreign governments if authorized by Congress to do so. If such authority were given, however, it would be necessary also to afford proper facilities for the use of the same by the public. Sufficient space could probably be arranged for either in the new Printing Office building or in the proposed Hall of Records.

No doubt Congress will soon see the necessity of providing means for opening up to the public the great document library we now have. At present there is barely room for the clerical force, and I have been compelled to refuse all applications to use it.

PUBLICATIONS.

The following documents were published during the year:

One Consolidated Index (Fifty-fifth Congress, third session), 1 price list of all documents available for sale by this office, and 11 numbers of the Monthly Catalogue of Public Documents.

Forty-eight thousand cards were written in the preparation of documents published and to be published hereafter.

In my last annual report I spoke of improving the Monthly Catalogue by making the index cumulative. The change was made at the beginning of the present calendar year with the February number. The June and December numbers will, therefore, contain complete indexes to the five preceding numbers. The cumulation will be for a period of six months only, as I find that it is not practicable to cover the whole year without a break. It is my present intention to consolidate the index for the whole year in the December number.

PROPOSED AMENDMENT TO THE PRINTING ACT.

A bill was introduced in the Senate at its last session to amend the act of January 12, 1895, relating to the public printing, binding, and the distribution of public documents. The Committee on Printing reported the bill back with the recommendation that it pass.

It is hoped that prompt and favorable action will be taken at the next session of Congress, as a change in the present law is essential to economy in printing, binding, and the prompt distribution of documents.

The librarians of the country are substantially unanimous in their approval of the proposed amendments, especially in so far as they relate to changes in methods of binding and titles of public documents.

NEW CHECK LIST.

Cards have been written for the Congressional set of documents, and are now being compared and arranged for printing. This part of the check list, with index to same, will probably be published in separate form for temporary use, as there will be considerable delay in finishing the list and index of the departmental service.

Very respectfully,

L. C. FERRELL, *Superintendent.*

Hon. F. W. PALMER, *Public Printer.*

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., November 1, 1901.

SIR: I have the honor to transmit herewith a report in detail of documents sold by this office July 1, 1900, to June 30, 1901, with price of same, as required by law. As compared with the previous year there was an increase of 5,682 in documents sold and of $180.48 in receipts. About two-thirds of the documents sold were publications of the Department of Agriculture.

AMENDMENT TO LAW GOVERNING SALE OF DOCUMENTS SUGGESTED.

The printing act of 1895 confers upon this office the right to sell any document in its custody the disposition of which is not otherwise specifically directed by law. Under this provision a few copies of substantially every document printed are available for sale. If a document is of more than ordinary interest, however, the supply is never adequate to the demand and much annoyance and disappointment ensues to those who desire it. The correspondence incident to explaining why a document can not be supplied, and the return of remittances, is very burdensome.

This leads me to suggest that the public would be much better served if the Public Printer were authorized to print, upon the requisition of this office, extra editions of documents whenever required for sale. There has been some opposition to this proposition, however, on the theory that it would place the Government in the position of competing with the regular private book trade. In my judgment there is no reason whatever for apprehension upon that ground. I have never heard of a private firm undertaking to reprint a Government publication for gain with but one exception. In fact, Government literature is almost purely of a statistical and scientific nature and can not be handled with profit by the book trade.

Section 42 of the printing act approved January 12, 1895, provides that not to exceed 250 copies of any one document may be ordered if the price of the same is deposited with the Public Printer before the document is put to press. It was thought that this provision would enable the public and such dealers as desired to handle public documents to obtain extra copies of any document desired. But the requirement that the price be deposited before the document is printed renders it impossible for anyone not possessed with information as to when the desired publication is to be printed to take advantage of it. A transaction occurred recently which caused much adverse criticism, yet it was strictly in accord with the provisions of section 42. The editor of the report of a Government commission knowing, by virtue of his position, when the document would go to press, and also knowing that no copies would be printed for free distribution, except to a limited number of libraries, ordered an extra number of copies, which he offered to sell at a price greatly in excess of their cost to him. While there was legally nothing wrong about it, it should be impossible for such a transaction to take place.

If section 42 were abolished and, as a substitute therefor, the Superintendent of Documents should be authorized to order extra copies of documents when needed for sale, everybody would stand on an equal footing. The provision in section 61 of the printing act limiting the sale of more than one copy of a document to the same person should also be abolished. Any person may easily supply

fictitious names and addresses if more than one copy is desired. Many reputable dealers have regular customers for the Revised Statutes, Statutes at Large, and other standard publications, and it is not right, in my opinion, to require them to furnish names and addresses. This law is especially annoying to foreigners, owing to the delay which must ensue incident to correspondence on the subject.

The Department of Agriculture, very soon after the passage of the printing act, took advantage of the provision in section 61 which authorizes any office charged with the sale of documents to turn the same over to the Superintendent of Documents. The Department supplies to this office from 100 to 500 copies of each of its sales publications. The printing of these documents is, of course, paid for out of the appropriation allotted to the Department for printing, while the money received from sales is turned into the Treasury Department as a miscellaneous receipt. From 1,500 to 3,000 copies of almost every bulletin printed by the Department could be sold if they were available. The Department is naturally averse to printing extra editions of bulletins for sale unless its appropriation could be reimbursed from the proceeds. I think the law should be amended so as to permit this to be done.

SALE AND DISTRIBUTION OF THE LAWS OF THE UNITED STATES.

This office is now charged, by special act, with the sale of the laws of the United States. The act making the transfer from the State Department to this office reads as follows:

"Hereafter the Secretary of State shall cause to be delivered to the Superintendent of Documents the Revised Statutes, supplements thereto, session laws, and Statutes at Large, to supply deficiencies, and to be sold by him under the provisions of section 61 of the act approved January 12, 1895, entitled 'An act providing for the public printing and binding and distribution of public documents.'"

The increase of the Army and Navy incident to the Spanish war, the acquisition of Porto Rico, Hawaii, and the Philippines has caused an unprecedented demand for the Revised Statutes, Statutes at Large, and session laws, for official use. Just how far this office is authorized to go in supplying such requisitions I am unable to determine, either by reference to the law under which the same were sold by the Secretary of State or by the act quoted. The laws are the most expensive publications issued by the Government, and the gratuitous distribution of the same should be specifically provided for.

DISPOSITION OF SURPLUS COPIES OF OFFICIAL REGISTER, OR "BLUE BOOK."

The distribution of the Official Register, or "Blue Book," as it is generally known, is specifically provided for by law, and all copies remaining after such distribution are required to be held for sale by the Superintendent of Documents. This requirement has come to be a great embarrassment on account of the small demand. The total sales of the last, or 1899, edition have been 61 copies of volume 1 and 23 copies of volume 2. This leaves more than 300 copies of each volume to be stored until authority can be obtained from Congress to dispose of them. The same may be said of the 1895 and 1897 editions. The 1901 edition will be printed very soon, whereupon the demand for the 1899 edition will entirely cease. The Superintendent of Documents should be authorized to distribute all unsold copies after two years to libraries, and in the meantime should have authority to supply committees in Congress and heads of departments for official use.

DOCUMENTS RECEIVED AND DISTRIBUTED.

There were received from all sources 750,495 documents. Of these 579,510 came from the Government Printing office and 34,453 were received from libraries. The remainder were turned over by the several Executive Departments and offices of the Government.

There were 689,812 documents distributed and sold. Of the documents distributed 257,945 were sent to designated depository libraries. This is equal to 527 documents to each library. Thirty-eight thousand seven hundred and forty-one publications of the Geological Survey were supplied to school, college, and public libraries under the provisions of section 79 of the printing act approved January 12, 1895; 8,692 were supplied to "remainder" depositories, and 178,253 documents were supplied to miscellaneous libraries to complete sets under the clearing-house system.

Prior to the establishment of this office in 1895 about 45,000 documents were distributed to designated depositories annually. From the foregoing statement it appears that there has been an increase in such distribution of more than 500 per cent. To many libraries the receipt of 527 documents, more than half of which are large bound volumes, is embarrassing. A few depositories have already been dropped at their own request, having no available room for documents, while others have asked permission to select such as they find most useful. I have not yet found it practicable to comply with such requests because of the great increase in labor and bookkeeping involved. It is only a question of time, however, until something must be done that will enable librarians to select documents most useful to their patrons.

PUBLIC DOCUMENTS LIBRARY.

There are now in the Public Documents Library 38,982 books, including pamphlets, and 5,934 maps. The increase during the year was 6,965 books and 907 maps.

The library continues to advance steadily toward completion. Notwithstanding the provision of the law requiring a double sending to this office of copies of all Government publications, constant vigilance is required to secure everything. It is no uncommon occurrence to see mention in the newspapers of documents which have not been received, or to hear of such in some other way. All documents thus heard of are pursued and secured. This, of course, does not apply to any of the numerous regular series. Those almost invariably come in without the necessity of making special search for them. But there is a vast variety of special and sporadic publications, mostly small, but often of importance, issued by some of the very numerous bureaus, commissions, divisions, committees, etc. Whether such publications are large or small, important or unimportant, every effort is made to secure them, for it is the duty of this office to collect and catalogue all public documents, not to attempt to pass upon their relative value. It is quite safe to say that from the establishment of the office, six and a half years ago, practically everything that can be of value to libraries or students or public men, of the present or the future, has been secured and preserved.

Beyond this, encouraging progress in gathering the documents of earlier periods has also been made. Indeed, considering the fact that there is no appropriation for supplying anything by purchase, and that consequently not a cent has ever been expended in buying documents to complete the library sets, the progress made in this direction is really remarkable.

Among the more important sets which have been nearly or quite completed may be mentioned those of the Department of Agriculture, of which the library has every bound volume, while the missing bulletins and circulars are very few and of little note; Smithsonian Institution, complete, including all the rare early reports and all the series, except volume 5, miscellaneous collections; Geological Survey, complete, including all the series and the rare first report, some maps probably excepted; Patent Office report and Official Gazette, complete, and specifications and drawings nearly so; Consular Reports, Monthly, Special, Miscellaneous, and Advance Sheets, all complete; Reports of the Secretary of the Treasury, complete, some of the early years being reprints; Bureau of Ethnology, complete; American Historical Association,

complete; Intercontinental Railway Commission, complete; International American Conference, complete; international expositions and international congress, complete sets of all that have been printed; Congressional proceedings, Annals, Register, Globe, and Record, all complete, 375 volumes; Message and Documents, complete, 449 volumes; abridgment of the same, complete, 51 volumes; explorations and surveys, full sets of all the important ones, except Wilkes's; Rebellion Record, complete, 128 volumes; Army Regulations, 16 editions, beginning with 1825; the Army Registers number 102, every year being represented back to 1813; Registers of the Military Academy, complete from 1818, partly reprints. Of the laws, there are full sets of Statutes at Large, Revised Statutes, and numerous early prints, including the original print for the first session of the First Congress and many others of earlier Congresses, a set of the Bioren edition, many Folwell prints, and so on. Of the 42 issues of the Official Register, in 53 volumes, the library has 50; Foreign Relations, complete; Commercial Relations, complete. The set of Congressional Directories begins at the Twenty-seventh Congress, 1841, and is substantially complete from that date. The set of House Manuals begins at 1856, the set of Senate Manuals at 1862. Of the portrait edition of the memorial addresses commemorating Members of Congress, Presidents, and a few others who have died in office, there are 149 volumes, including those in memory of Adams (John Quincy), Anthony, Beck, Benton, Burnside, Calhoun, Cass, Clay, Clayton, Davis (Henry Winter), Douglas, Garfield, Hill (B. H.), Jackson, Johnson, Lincoln, Logan, Marshall, Randall, Stevens (Thaddeus), Sumner, Taylor (Zachary), and Webster. Many of the incomplete sets lack very little of completion.

Of the sixty-four Journals of the Senate and House, printed during the first fourteen Congresses, the library has the original prints of forty-six, including all six of those printed in folio during the first Congress. It has also the Gales & Seaton reprints of the Senate Journals of the first thirteen Congresses, printed 1820, in 5 volumes, and of the House Journals for the same period, printed 1826, in 9 volumes; also the Executive Journals of the Senate, 1789–1829, in 3 volumes.

Of collected and reprinted State Papers, the library has Gales & Seaton's edition, complete in 38 volumes, 1832–1861; Duff Green's edition, in 5 volumes, 1835; Wait's first edition, Boston, 1815, 6 volumes; second edition, 1817, 10 volumes, and third edition, 1819, complete except 3 volumes.

Of historical documents covering earlier periods, the library has Force's American Archives, 9 volumes, covering the years 1774–1776, printed 1837–1853; the Journals of the Continental Congress, 1774–1788; Way & Gideon's reprint, 1823, in 4 volumes; also an incomplete set of Folwell's reprint, 1800–1801; the Secret Journals of the Continental Congress, printed by Wait, Boston, 1821, 4 volumes; Sparks's Diplomatic Correspondence of the Revolution, 12 volumes; Wharton's Diplomatic Correspondence of the Revolution, 3 volumes; Diplomatic Correspondence, 1783–1789, issued by the State Department, 1837; Elliot's Debates on the Adoption of the Federal Constitution, 5 volumes.

Also a set of Margry's French Discoveries and Colonies in Southern and Western North America, 1614–1754, 6 volumes, printed in the French language in Paris, 1876–1886. This is probably the only United States public document ever printed in a foreign language and in a foreign country without a word on its title-page to show that our Government had any connection with it. It consists of documents of the earlier French explorers in America, edited by Pierre Margry, and before unprinted. It is one of the "sources" of American history and one of the most important. It was printed under the direction of the Joint Committee on Library.

The "sheep set," that is, the serially numbered set of Congressional documents bound in full sheep, is now complete from the beginning of the Fifteenth Congress to date. When the printing and binding of the documents of the Fifty-sixth Congress has been finished the numbers of this set will run from 1 to 4220. No volumes

have been found for two or three of the numbers, but there is good reason for believing that they have never been issued in this form. The set in this library contains everything that has been printed in the numbered Congressional sets of documents and reports from December 1, 1817, to date, and all the Senate and House Journals in addition.

Grateful acknowledgments are due to the Library of Congress and to various Government offices and officers for aid in completing sets.

The most important wants of the library are: The Madison Papers, 3 volumes, 1840; Jefferson's Works, 9 volumes, 1853-54; Schoolcraft's History of the Indian Tribes of the United States, 6 volumes, 4°, 1851-1857.

PUBLICATIONS.

The following publications were issued by this office during the fiscal year:

	Pages.
Thirteen Monthly Catalogues	1,155
Document catalogue of the Fifty-fourth Congress, second session	418
Schedule of volumes of documents and reports of the Fifty-sixth Congress, first session	9
Index to Senate document 270, Fifty-sixth Congress, first session	81
Sixth annual report of Superintendent of Documents, 1900	58
Tables of public documents	12
Price-list of public documents for sale (supplement to third edition)	20
Total	1,753

The monthly catalogue has been greatly improved by an index made cumulative January to June, and July to November, with a consolidated index to the twelve catalogues in the December number.

At the date of this report there is in the hands of the printer copy for the Document Catalogue (Comprehensive Index), Fifty-fifth Congress, first, second, and third sessions, the Document Index, Fifty-sixth Congress, first session, and Part II of the new checklist, which relates to the documents of the Fifteenth to the Fifty-second Congress. Copy for the Document Index, Fifty-sixth Congress, second session, is substantially finished, but is held awaiting necessary information from officials charged with the compilation of some of the volumes.

Under the provisions of section 62 of the printing act, the Superintendent of Documents is required to index such single volumes of documents as the Joint Committee on Printing shall direct. The committee has exercised this authority in but a single instance. This was in the case of House Doc. No. 270, Fifty-sixth Congress, first session, a three-volume report on food furnished to troops in Cuba and Porto Rico.

DESIGNATED DEPOSITORY LIBRARIES.

Under the provisions of sections 501 and 502 of the Revised Statutes, each Senator, Representative, and Delegate in Congress is authorized to name one school, college, or public library to receive such documents as the law provides shall be distributed to such depositories. Prior to 1895 the distribution to libraries designated in accordance with the foregoing sections was limited to the Congressional numbered sheep-bound documents. The printing act of 1895, in section 58, provides that any document not bearing a Congressional number shall be supplied to the Superintendent of Documents for distribution to depositories, unless the same shall be of a confidential character or printed solely for official use. So that now substantially every document printed is distributed to designated depositories, State and Territorial libraries.

To enable the Superintendent of Documents to make this distribution the Public Printer is required to supply him with 500 copies of each document and report. The Fifty-eighth Congress will consist of 90 Senators, 386 Representatives, and 4 Delegates, a total of 480 members, each of whom will be entitled to name a depository of public documents. The libraries of all the States and Territories, the Executive Departments, the Military School at West Point, the Naval School at Annapolis, and one institution in Massachusetts, are depositories under the general law. These number 60, or a total of 540. It is evident that 540 libraries can not be supplied under existing law. The law should, therefore, be amended so as to authorize the Superintendent of Documents to make requisition upon the Public Printer, at the beginning of each Congress, for the number of documents required to supply designated depository libraries. This would be a more economical arrangement than to provide for the delivery of a fixed number of documents whether needed or not.

By an act approved March 3, 1887, the Secretary of the Interior is directed to supply the bulletins, monographs, and atlases prepared and published by the Geological Survey to two libraries in each Congressional district and to four libraries at large in each State and Territory, the same to be designated to him by the Senators, Representatives, and Delegates of the several States, districts, and Territories, respectively. The distribution authorized by this act will hereafter be made by this office according to an arrangement approved by the Secretary of the Interior and the Public Printer. The Superintendent of Documents is charged with a similar distribution under the provisions of section 79 of an act approved January 12, 1895, known as the printing act. This acquisition increases the number of libraries to be supplied with documents by this office to about 2,700. A list of the same is appended.

DISTRIBUTION OF THE UNITED STATES PUBLIC DOCUMENTS—HOW SOME OF THE DUPLICATION OCCURS, WITH SUGGESTIONS AS TO HOW THE SAME MAY BE PREVENTED.

There is unquestionably much wasteful duplication in the distribution of the publications of the United States Government. Duplication may occur in either of several ways. A librarian or individual may apply to two or more independent agencies which distribute the same document and may receive a copy from each. Or two or more independent agencies may, as a compliment, send the same document to an individual or library unsolicited. The result is the same.

In my opinion the chief cause of duplication is the system of printing two or more editions of a document, each with a different back title, and in at least two styles of binding.

The annual report of a bureau, for instance, is issued by the head of the bureau that compiles it; the Department to which the bureau is subordinate issues it as a part of the departmental report; the departmental report is submitted to Congress and, in pursuance of a general law, is printed in two editions, one with and the other without Congressional numbers. The four editions are printed from the same plates, except that different title-pages are made for each.

Here we have an example of a document printed in four editions, one by the bureau, one by the Department, and two by Congress. The title-pages or back titles on at least three of these editions of the same book differ so materially that an examination of the text would probably be necessary to establish their identity.

The chief desire of every librarian and of every person who has occasion to use the public documents is, that each and every copy of a document shall have the same title-page and back title. The following example alone is sufficient to show that a change in the system is desirable and, I may say, necessary. The annual report of the War Department for the fiscal year ended June 30, 1900, is published in 3 volumes; volume 1 is in 13 parts; parts 11 and 12 of volume 1 are each in 4 volumes; volume 2 is in 8 parts, and volume 3 is in 1 part, the whole report consisting of 28

books of about 1,000 pages each. The report of the Lieutenant-General of the Army is in 7 parts—being parts 3 to 9, inclusive, of the departmental report, volume 1. The indorsement on the back of part 1 of the report issued by the Lieutenant-General reads as follows: Annual report | of the | Lieutenant-General | Commanding | the Army | in seven parts | part 1. The indorsement on the back of the same report, War Department edition, reads as follows: Report | of the | War Department | vol. 1 | 1900 | part 3 | Lieutenant-General | Commanding the Army.

It would probably puzzle most people to identify the two books as being the same from a reading of the back titles. One would have to know that volume 1 of the War Department report was in 13 parts; that the report of the Lieutenant-General formed parts 3 to 9 of that volume, consequently that part 1, report of the Lieutenant-General, is identical with volume 1, part 3, departmental report.

No more interesting or valuable matter can be found in any of the public documents issued during the year than is contained in the seven volumes of reports compiled by the Lieutenant-General Commanding the Army, but the difficulty in cataloguing them properly will probably deter all but the most persistent searcher from access to their treasures.

The following very apt illustration of the absurd system of numbering documents is given in the reports of my predecessor:

"Nowhere else is a set or series of books called a 'volume.' Nowhere else is a separate book printed in the English tongue called a 'part.' The terms used in describing the publications of the Government have no place in the dictionary, and their meaning in this use is totally different from their meaning in the general usage of the people. This nomenclature and notation perhaps reach the height of their absurdity in the series known as the 'Message and Documents,' which, though it comprises a score of volumes, has been all called House Executive Document No. 1. This No. 1 is, however, divided into eight parts, and several of these parts are divided into volumes, which are again divided into parts. Thus volume 4 of the House Executive Documents is part 2 of Document No. 1, and it is also volume 2 of part 2, and it is also part 2 of part 2 of volume 2. Its full designation is part 2 of part 2 of volume 2 of part 2 of No. 1, and volume 4. The same book is at the same time three parts, two volumes, and one number. Volume 14, House Executive Documents, goes a step farther, having seven designations, namely, part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, and volume 14. Of course all of these designations are never put into practical use. There is probably not a man living who could tell offhand what is the subject-matter of part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, volume 14, of the House Executive Documents of the Fifty-first Congress, second session. One might as well try to commit to memory the lettering of a Chinese tea chest as charge one's mind with such a rigmarole.

"How distressing these methods are to librarians and their clients is probably only faintly appreciated by the Senators and Representatives from whom alone relief can come. Senators and Representatives are not, like librarians, dependent on their own efforts for a knowledge of the contents of the public documents. The Senate and the House have each a document expert who has become a living index by long years of familiarity of all the ins and outs of every Government publication. How highly Congress values these document experts may be inferred from the fact that of all the hundreds of thousands of people in the public service only these two are mentioned by name in an appropriation bill, thus making it a certainty that no gyration of politics shall deprive Senators and Representatives of their invaluable services."

Mr. A. R. Spofford, long the Librarian of Congress, says:

"The system (or rather want of system) has long been the terror of librarians and the despair of all trying to consult the documents. So intricate has been the numbering, arrangement, and indexing, and so continual the change in methods, that

no one except an expert giving his whole time to the business could possibly keep up with them or successfully find or interpret them to others."

The manner in which the bureau and departmental reports are distributed is quite as inconsistent and wasteful as the varying title-pages and back titles are puzzling and inharmonious. About 300 offices compile and publish the annual reports and miscellaneous documents of the United States Government. Each of these author offices is to a limited extent an independent agency for the distribution of its own publications, with absolutely no check system by which to prevent duplication with other agencies through which the same document is distributed.

It is quite possible, for instance, for a library to obtain as many as nine copies of one document without any of the many agencies through which it is distributed being aware of the fact. The operation would be substantially as follows: First, one copy from the bureau; second, one copy from the department to which the bureau is subordinate; third, fourth, and fifth, one copy from the Representative, and one from the two Senators representing the State; sixth, seventh, eighth, duplicating the latter operation by requesting the document, specifying its document number instead of its title; and ninth, one copy from the Superintendent of Documents. This illustrates a possible abuse of the present system of distributing documents.

Remedial legislation which will abolish such a system as I have described would result in three very important reforms in the printing and binding and distribution of documents:

First. The annual reports and other Executive publications will be excluded from the Congressional numbered series of documents; and every copy of a document will bear the same inscription on the back and the same title-page.

Second. The issue of but one edition of a document, uniform as to back title, title-page, and binding, will enable the Public Printer to deliver any document as soon as printed for distribution to those entitled to it.

Third. Duplication will be greatly reduced, both to individuals and to libraries.

Having given the subject a great deal of consideration during the past four years, I am satisfied that the only practical reform is to abolish the practice of printing the annual reports and miscellaneous publications of the Executive Departments and offices as numbered Congressional documents.

A prominent and skilled librarian said to me a short time ago:

"I am almost compelled to keep up two sets of public documents so far as I can get them. The sheep-bound Congressional set I keep because our library is a designated depository, but I never refer to it if we have the cloth-bound edition. Suppose we have a call for a certain volume or a number of volumes of reports of the Geological Survey, Education, Smithsonian, Ethnology, and the like—I can put my hand on the cloth-bound set in a moment. If we have only the sheep-bound set, I must look over several hundred books and pick them out here and there where they come in regular series."

This explains why members of Congress are continually importuned by librarians for documents that will necessarily be duplicated to them later on in another edition.

CONSOLIDATION OF DOCUMENT DISTRIBUTING AGENCIES RECOMMENDED.

The chief of the document division, Department of the Interior, in his report for the fiscal year 1891, speaking of the distribution of the reports of the Tenth Census, says:

"The further the distribution of this important series of documents proceeds the larger is the number of duplicate orders given, showing more conclusively each month the importance of having the distribution, especially of all valuable and costly publications of the Government, made through one office, by which, through a proper system of registration, all duplications can be prevented.

"The system of registration adopted in the distribution of documents is such that it is possible almost in a single moment to ascertain whether any individual or library

in the country has received any one of the 26 volumes forming the series, so that it is possible to prevent all duplication in their distribution. The number of volumes thus saved for distribution to parties who would not otherwise have received them is little if anything less than 50,000."

This office has practically completed the distribution of the Messages and Papers of the Presidents, a very valuable serial publication in ten volumes. Of the 34,000 designations made by members of Congress about 3,000 names were duplicated, but duplicate distribution was prevented in every instance except when specially directed by the member after his attention had been called to the matter. The result was the saving of 30,000 volumes for distribution to persons who would otherwise not have been supplied.

This series of documents was considered so valuable that numerous attempts were made by individuals to obtain more than one set. It would have been impossible to frustrate them had the distribution been in the hands of two or more offices. If one office can so satisfactorily handle a serial publication, why not, as far as practicable, place the distribution of all the public documents under the supervision of one office? I would suggest the consolidation of all the document-distributing agencies of the Government, except the folding rooms of the two Houses of Congress, under one head. Such a consolidation need not interfere with the distribution by the heads of the Executive Departments and other offices of their own publications just as freely as now, except that duplication would be prevented. Consolidation would result in economy in many directions, and much valuable space now occupied in the overcrowded department buildings would become available for office use.

Documents intended for distribution by the departments and offices could be stored in a central warehouse and placed to the credit of the proper officials, just as documents are placed to the credit of members of Congress in the folding rooms of the two Houses.

It was no doubt the intention of Congress to give supervisory authority over the distribution of all public documents to the Superintendent of Documents, as the language of section 61 of the printing act approved January 12, 1895, indicates. It reads as follows:

"He shall have general supervision of the distribution of all public documents, and to his custody shall be committed all documents subject to distribution, excepting those printed for the special official use of the Executive Departments, and those printed for the use of the two Houses of Congress, which shall be delivered to the folding rooms of said Houses and distributed or delivered ready for distribution to members and Delegates upon their order by the superintendents of the folding rooms of the Senate and House of Representatives."

The exception in this section removes from the supervisory charge of the Superintendent of Documents the documents printed for the special official use of the departments, and the documents authorized to be distributed by Senators, Representatives, and Delegates in Congress. But section 92 of the same act provides as follows:

"Government publications printed for or received by the Executive Departments, whether for official use or for distribution, shall be distributed by a competent person detailed to such duty in each Department by the head thereof. He shall keep an account in detail of all publications received and distributed by him. He shall prevent duplication, and make a detailed report to the head of the Department, who shall transmit the same annually to Congress."

These two sections of the law, taking into consideration the provisions of section 73 of the same act, which authorizes the printing of large editions of documents for distribution by bureaus and departments, are not harmonious. So much doubt existed in the mind of my predecessor—the first Superintendent of Documents appointed under the act—that he never assumed or attempted to assume supervision of the distribution of documents other than those actually committed to his charge. I

have felt that it was a matter rather for Congress to straighten out, hence have never claimed jurisdiction beyond what the law clearly indicated should be assumed by the head of this office.

It will be seen by a reading of section 92, previously quoted, that Congress intended to prevent duplication. The object is defeated, however, because there are so many channels through which the same document may be obtained.

Recently I sent 1,500 circular letters to librarians asking for statistics concerning public documents. One of the questions asked was, "You are requested to state your views on the desirability of consolidating under one head all the document-distributing agencies of the Government." The replies (more than 1,000) were substantially unanimous in favor of the proposition.

UNBOUND DOCUMENTS.

The question as to what shall be done with surplus unbound documents is a problem that has confronted this office for two or three years. Five hundred copies of every document and report printed by Congress are reserved for binding upon orders of Senators, Representatives, and Delegates in Congress. All copies not called for within two years after printing are required to be delivered to the Superintendent of Documents for sale or distribution. The law provides that these documents shall be delivered by the Public Printer in unstitched form. There are now upward of 250,000 volumes of unstitched documents stored in the warehouse subject to the order of this office. Some months ago I selected and had delivered about 10,000 volumes, consisting of Smithsonian reports, ethnology, geology, American Historical Association, Commissioner of Education reports, Records of the Union and Confederate Navies, etc., which are among the most valuable documents printed by the Government. I gave general notice that these documents would be sent gratuitously to any library that would agree to bind them. Not one hundred volumes of books have been taken upon this condition. The reason is that few libraries are provided with funds for binding books of any kind.

If Congress does not see proper to provide for the binding of these surplus unstitched documents, it will be necessary, in order to make room in the warehouse, to dispose of most of them as waste paper. It seems to me almost wicked to do this, as there are hundreds of school and public libraries in the country that would be glad to get them if they were suitably bound. The expense of binding these books would probably not exceed 15 cents a volume.

Another large edition of documents is issued and delivered to the Senate and House document rooms in unbound form, on the theory that they are required for immediate use of Senators and Representatives for legislative purposes. Six hundred copies of every document and report printed upon the order of Congress are so delivered. Probably not one-half of them are delivered during a session of Congress, consequently very few can be of any service to members as aids to legislation. Many of these documents are serials, such as the Naval War Records, Rebellion Records, and the like. Others are of a scientific nature, such as monographs, bulletins, and reports of the Geological Survey, the American Ephemeris and Nautical Almanac, reports of the Smithsonian Institution, Bureau of Ethnology, the American Historical Association, etc. None of these are of any use for legislative purposes, and, in my judgment, should never be sent out of the Government Printing Office in unbound form. The grand total of documents of the Fifty-sixth Congress that have been, or will be, delivered to the document rooms of the two Houses in unbound form is 225,000 volumes. Probably 100,000 volumes will be stored in the Capitol for a time and will then be disposed of as waste paper.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Hon. F. W. PALMER,
Public Printer.

LIST OF LIBRARIES DESIGNATED AS DEPOSITORIES OF PUBLIC DOCUMENTS.

"Designated" depositories are libraries and institutions designated by Senators, Representatives, and Delegates under the provisions of sections 501 and 502, Revised Statutes.

"Geological" depositories are libraries designated by Senators, Representatives, and Delegates to receive the scientific publications of the Geological Survey, under the provisions of an act approved March 3, 1887, Supplement Revised Statutes, volume 1, page 575, and section 79 of an act approved January 12, 1895, Supplement Revised Statutes, volume 2, Nos. 1–5, page 375.

"Remainder" depositories are libraries designated by Senators, Representatives, and Delegates under the provisions of section 68 of an act approved January 12, 1895, Supplement Revised Statutes, volume 2, Nos. 1–5, page 352.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., July 1, 1902.

SIR: I have the honor to submit herewith in compliance with the requirements of section 61 of an act approved January 12, 1895, providing for the public printing, binding, and distribution of documents, a report in detail of documents sold by this office, July 1, 1901, to June 30, 1902, inclusive.

I also submit for your information and consideration a report on the work of the public-documents office, with suggestions concerning the laws relating to the sale and distribution of documents.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Hon. F. W. PALMER, *Public Printer.*

Monthly catalogue distribution		30, 050	
Departments, for official use		13, 049	
Foreign legations		217, 904	
Persons and institutions designated by Senators and Representatives to receive documents to their credit:			
Messages and Papers of the Presidents	2, 803		
Flags of Maritime Nations	54		
Official Register	1, 128		
		3, 985	
Exchanges with members of Congress		1, 599	
Sales		35, 211	
			821, 337

The foregoing statement shows the enormous number of 1,645,519 documents handled during the year, counting those received and distributed. There remained in stock on the 1st of July, 1902, 426,894 documents.

SALES.

It will be observed from the detailed statement appended that 35,211 documents were sold for $10,946.21. Last year 33,585 documents were sold for $9,062.09.

PUBLICATIONS.

During the fiscal year this office prepared and published the following documents:

	Pages.
Twelve monthly catalogues, May, 1901, to April, 1902	643
Document Catalogue (Comprehensive Index), Fifty-fifth Congress, 1897–1899	1,069
Document Index (Consolidated Index):	
Fifty-sixth Congress, first session	379
Fifty-sixth Congress, second session	236
Tables of and annotated index to the Congressional series of public documents, Fifteenth to the Fifty-second Congress, inclusive	769
Annual Report Superintendent of Documents, 1901	113
List of documents and reports, and references to proceedings in Congress relating to the construction of the new navy	18
Index to proceedings in the court of inquiry in the case of Admiral Schley	51
Lists of documents available for sale	31
Schedule of volumes, Fifty-sixth Congress, second session	8
Total	3,317

CATALOGUING.

There were received in the catalogue section of the office during the year 50,218 documents, bills, resolutions, etc. Of these, 15,665 documents were catalogued. About four cards were written for each document catalogued, the actual number being 63,282. Of the 3,317 pages of printed matter prepared in the office, 2,327 pages was the work of the catalogue section.

An average of eleven cataloguers were employed during the year, no reduction being made on account of sickness and leaves granted. Four of the eleven were engaged three months reading proof. The trained librarian will appreciate and understand that an extraordinary amount of work has been accomplished by this small force.

The cataloguing of public documents is regarded by many cataloguers as the most difficult problem with which they have to deal. That it is so is indicated by the fact that about 85 per cent of the candidates for positions in this office have failed to pass successfully the required civil-service examinations. It is to be hoped that library schools will give the subject of public documents cataloguing more attention in the future, as there will always be a demand for experts in that branch of the profession.

CORRESPONDENCE.

The correspondence of the office was heavy, as usual. Twelve thousand six hundred and sixty letters containing remittances for documents, and 44,395 letters, mostly inquiring concerning documents, were received during the year. More than 100,000 letters and circulars were sent out. The documents office is known very generally as an "information bureau," and its correspondence will probably continue to increase.

LIBRARY.

The accessions during the year were 5,803 text publications and 804 maps, making the present total 44,785 books (including pamphlets) and 6,738 maps, the total number of pieces being 51,523.

Nine hundred volumes have been bound during the year to insure their preservation. Much more binding of paper-covered and worn-out publications remains to be done to put the library in sound and permanent condition.

Several sets entire have been added during the year, among them the records of the Second Alabama Claims Commission, 1882–1885, 153 volumes; Jefferson's Works, 1853–54, 9 volumes; The Madison Papers, 1840, 3 volumes; Consular Reports, special issue, 1888–89, 63 numbers out of 65; Correspondence of the American Revolution, Letters to Washington, 1853, 4 volumes; Works of John Adams, 1856, 10 volumes; general orders and general court-martial orders of the War Department, 1861–1893, 45 volumes; Documentary History of the Constitution, Congressional edition, 3 volumes; Executive Journals of the Senate, 1869–1891, 17 volumes.

The library has also the Executive Journals, 1789–1829, 3 volumes, but lacks the 16 volumes printed in 1867, which contain the executive proceedings for the forty years 1829–1869, and would be glad to obtain them by donation or exchange.

Among the sets fully completed and substantially bound during the year are the Smithsonian Contributions to Knowledge, 30 volumes; Smithsonian Miscellaneous Collections, 42 volumes; Official Register (Blue Book), beginning 1816, 56 volumes; bulletins of Hayden's Survey of the Territories and of the Entomological Commission, in both cases all the editions as well as all the numbers; Wait's State Papers, 3 editions, 28 volumes; Land Laws, compilations, 1810 to date, 18 volumes; Indian Treaties, 3 volumes, folio of separate prints, beginning in 1825, and 4 compiled volumes, the earliest printed in 1826; Interstate Commerce Commission reports, 8 volumes.

The set of Navy Registers has been greatly extended. An official list, issued by the Department, 1891, showed that 97 Registers had been issued to that time, including one for that year. The issues since that date number 21, making a total of 118. Of these the library has 114, lacking only those of February 14, 1814, the first official issue, January 1, 1817, January 1, 1818, and the year 1850. In addition to the 114 listed Registers, the library has a reprint of one for the year 1800, compiled by Chief Clerk C. W. Goldsborough; also a reprint of one first published in the Gentleman's Annual Pocket Remembrancer, Philadelphia, 1806; also one published as a document of the Fourteenth Congress, first session, by order of the Senate passed December 11, 1815; also in American State Papers, first volume on Naval Affairs, Registers under date of 1806; February 3, 1812; and three under as many different dates in 1814.

Of the two series of Court of Claims Reports, 54 volumes in all, only volume 5, second series, is wanting.

Other volumes of some note that have been secured during the year are Navy Regulations, 1818, being the earliest print in this series, and a Tour through the Indian Country, by Jedidiah Morse (father of F. S. B. Morse), 1820.

Though the sheep-bound set of Congressional Documents, Fifteenth to Fifty-sixth Congress, 1817–1901, 4,220 volumes, is complete so far as volumes go, about 30 of the volumes are defective, one or more of the documents, of which they should be composed being missing. It has been ascertained that the missing documents had been printed by finding them in corresponding volumes in other libraries. It has been found also that these same volumes often lack other documents which are found in the volumes in the public documents library. So slipshod was the work done by printers and binders with whom the Government contracted before the Government Printing Office was established in 1861, that it is probable no wholly complete set of the sheep-bound documents of any Congressional session was ever issued by them. The only way to get a complete set is to make one, and that is what the public documents library hopes to do. A list has been made of all defects in the sheep-bound

volumes on its shelves, and it is hoped that by exchange of volumes, or taking documents from one volume to be placed in another, a set absolutely complete and correct may in time be created.

NEW CHECK LIST.

Part II of the new checklist, being a list of and annotated index to the Congressional series of documents from the Fifteenth to the Fifty-second Congress, both inclusive, was published during the year. It is a work that is greatly appreciated by all who have occasion to consult the public documents. Several hundred letters have been received from librarians expressing their gratification and commending the work in the highest terms.

Part III will probably be published next year. It is a work of great magnitude, more than 60,000 cards having already been written in its preparation. It will list and index all the annual reports and miscellaneous publications of the Executive Departments, bureaus, and offices of the Government which have been issued in what is known as the departmental series.

AMENDMENTS TO THE PRINTING LAWS.

An important amendment to the printing laws is now pending in the House, having passed the Senate on March 6, 1902. The purpose of the bill is to enable the Superintendent of Documents to deliver the annual reports and miscellaneous publications of the Executive Departments and offices of the Government to State and Territorial libraries and designated depositories as soon as printed. It is well known to librarians, also to Senators and Representatives in Congress, that there is a delay of from one to two years in the delivery of documents included in what is known as the sheep-bound Congressional series to libraries entitled to them under the general law. The delay is not due to neglect upon the part of the Government Printing Office, but is due solely to a defect in the printing laws. Everybody will agree that the scientific, statistical, and other valuable publications of the Government should be placed in the libraries of the country for the use of the people as soon as possible after they have been printed. How to do this without disturbing the well-established methods of printing and binding has occupied the attention of this office for several years. I believe a practical solution of the problem is offered in the pending bill. It reads as follows:

"SECTION 1. That whenever any report, serial, periodical or miscellaneous publication of an Executive Department, bureau, board, commission or office of the Government shall be ordered printed upon the requisition of the head thereof, or upon the order of Congress or either House thereof, the Public Printer shall print six hundred copies in addition to the number named in the requisition or order of Congress, unless previously ordered, to be known as the 'library edition,' for distribution by the Superintendent of Documents to State and Territorial libraries and designated depositories: *Provided*, That this act shall not apply to confidential matter, blank forms, or circular letters.

"SEC. 2. That Congressional numbers shall not be printed upon any of the documents or reports provided for distribution to State and Territorial libraries and designated depositories under the provisions of section one of this act.

"SEC. 3. That in binding the library edition the best grades of cloth shall be used, and the Public Printer shall, as far as practicable, assign a distinctive color to the binding of the publications of each department and office, and when a color has been assigned the same shall not be changed; and to insure prompt delivery the Public Printer shall give precedence in binding to documents intended for distribution to libraries and depositories.

"SEC. 4. That whenever any printing shall be done upon the order of Congress or either House thereof, or upon the requisition of the head of an Executive Department, bureau, board, commission, office, or Congressional committee, except matter marked confidential, blank forms, and circular letters, two copies shall be sent, as soon as printed, by the Public Printer, if printed at the Government Printing Office or any branch thereof, or by the head of the office upon whose order the same was printed if printed elsewhere, to the Superintendent of Documents for entry in the Monthly Catalogue; and whenever the injunction of secrecy has been removed from any document printed as confidential two copies of the same shall be sent by the proper official to the Superintendent of Documents.

"SEC. 5. That beginning with the first session of the Fifty-eighth Congress the Public Printer shall deliver to the Superintendent of Documents for distribution to State and Territorial libraries and designated depositories, bound, of House documents and reports and of Senate documents and reports, except those included in the library edition, each six hundred copies.

"SEC. 6. That all laws in conflict with the provisions of this act are hereby repealed."

The main feature of the bill is the creation of a "library edition," which includes only the annual reports and miscellaneous publications of the executive branch of the Government. This library edition will be printed with the first order to print, whether made by the author office or by Congress. It does not include Senate or House reports, or documents originating in the Senate or House of Representatives. These will go to libraries in the same style and binding as they do now. To make the matter clear, if this bill shall be passed, the "usual number" of annual reports and miscellaneous publications of the Executive Departments and other offices will hereafter be 1,182 copies, instead of 1,682, the decrease being the 500 copies provided for depositories, which will then go to such institutions in the "library edition."

The "up number" of annual reports and miscellaneous publications of the Executive Departments, printed for the immediate use of Congress, and the "reserve" of such documents, for binding upon the orders of Senators, Representatives, and Delegates in Congress entitled to them, will be printed and numbered precisely as they are under the present law.

The existing law affected by section 1 is the last clause of section 58, and section 54, paragraphs 1, 4, and 5, of the printing act approved January 12, 1895. All the miscellaneous publications of the Executive Departments and other offices of the Government which are now distributed to depositories under the provisions of section 58 of the printing act, and all annual reports and other publications of the same offices which are included in the sheep-bound Congressional series of documents and distributed to depositories under the provisions of section 54, paragraphs 1, 4 and 5, of the printing act, are embraced in the "library edition" provided for in section 1 of the bill.

Section 2 simply provides that Congressional numbers shall not be assigned to or printed upon any of the documents included in the "library edition." The result of this change may be better understood by the following illustration, taking the finance report of the Treasury Department as an example. The back title of this report in the "library edition" will read—

ANNUAL REPORT

of the

SECRETARY OF THE TREASURY

1901

FINANCE

instead of being loaded down with a title like this—which appears on the back of the sheep-bound Congressional edition—

HOUSE DOCUMENTS

Vol. 46

No. 7

ANNUAL REPORT

of the

SECRETARY OF THE TREASURY

FINANCE

56TH CONGRESS

2d session

1900–1901

Section 3 provides for binding the "library edition" in the best grade of cloth, and for the assignment of a distinctive color to the publications of each Department. All Congressional numbered documents are supplied to depositories under the present law in sheep binding. Very few librarians like the sheep binding, even if it were equal in every respect to cloth, which it is not. The following extract from the letter of a prominent librarian is but one of many complaints concerning sheep-bound books. He says:

"We have in our library hundreds of volumes bound in sheep which has deteriorated in strength so that the sheep is not now as strong as wood-pulp paper. These volumes must be rebound at great cost. We have discarded all materials for binding except turkey morocco and canvas. If the latter can be made neat it is the best substitute for the imperfectly, or rather improperly, tanned leather now so common. Allow me to hope that the very neat sheep binding of the public documents may be changed soon to as neat, stronger, and more durable canvas."

I have seen a reference to a report by a British commission in which sheep binding is condemned as utterly bad. The report of the Commissioner of Education, 1892–93, contains an article by D. V. R. Johnson, New York State reference librarian, on "Elements of library binding," in which he declares that sheepskin should be avoided when possible, as it is thoroughly unreliable. In libraries where bituminous coal is used sheep binding is soon reduced to a powder by the action of heat and gas. As the larger number of libraries to be served desire cloth binding, and as it is much more attractive and lasting, possessing the additional advantage of cheapness, I do not imagine there will be any serious objection to its adoption.

Provision is also made in section 3 for binding the publications of each Department in a distinctive color. This will make the documents more attractive, and will, when librarians become familiar with the colors, greatly expedite reference to them.

Section 4 is intended to strengthen the present law, which requires two copies of each document printed to be sent to the superintendent of documents for entry in the official catalogue. Many documents printed by boards, commissions, and by committees of Congress have been denied the superintendent of documents for one reason or another. For instance, the proceedings of the court of inquiry in the case of Admiral Schley were refused this office, when at the same time they were being given out daily to the press and were otherwise distributed by members of the commission. A copy could not be obtained until Congress ordered the proceedings printed as a document. The official catalogues should be absolutely accurate, but they can not be made so without the cooperation of every official charged with the preparation and printing of documents. Documents supplied to this office for cata-

loguing serve another useful purpose. When catalogued they are filed in the public documents library, which contains probably the nearest complete set of Government publications in existence.

Section 5 provides for an increase in the number of depositories to accommodate the increased representation in the House in the Fifty-eighth Congress.

This bill does not in any way change the law affecting the printing or distribution of documents printed for the use of Senators and Representatives, the libraries of the Senate and House, the Library of Congress, or the Departments. If passed, the documents included in the "library edition" will be supplied to depository libraries from six months to two years earlier than they can possibly be delivered under the present law. The great advantage this will be to depositories will appear by estimating the number of volumes that will be delivered in cloth theretofore supplied in sheep binding. The documents and reports of the Fifty-sixth Congress make 332 sheep-bound volumes. Under the operation of this bill 258 of these would have been delivered as soon as printed, in cloth binding. An economical feature will be the saving of about $100,000 annually, being the difference in the cost of binding.

Two bills prepared by this office were passed at the last session of Congress and were approved by the President. One provides for the distribution of the American Ephemeris and Nautical Almanac to depositories in cloth binding hereafter, and discontinues the Congressional series of the same. The result is an argument for the passage of Senate bill 4261 heretofore referred to, as the editions of that document for 1903, 1904, and 1905 have already been forwarded to designated depositories, while the old Congressional edition for 1902 has not been received from the Printing Office. The other bill provides for binding in cloth the documents uncalled for, reserved for binding upon orders of Senators, Representatives, and Delegates in Congress.

DESIGNATED DEPOSITORIES.

Very few changes have been made in the depositories of public documents during the fiscal year, so that the list usually printed is omitted from this report. There are now about 2,899 general and special depositories which receive documents regularly through this office.

GOVERNMENT PRINTING OFFICE

NINTH ANNUAL REPORT

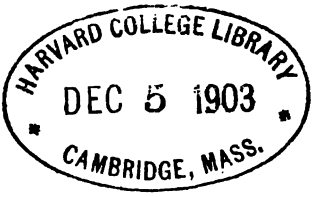
OF THE

SUPERINTENDENT OF DOCUMENTS

For the Fiscal Year Ended June 30, 1903

WASHINGTON
GOVERNMENT PRINTING OFFICE
1903

IV 4823



From the
U. S. Government

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., October 21, 1903.

SIR: I have the honor to submit herewith, as required by law, a report in detail of documents sold by this office during the fiscal year ended June 30, 1903.

For your information I also submit a report on the work of the office during the fiscal year, with such suggestions as appear to me to be in the interest of the service.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Hon. F. W. PALMER, *Public Printer.*

Documents received and distributed during the fiscal year ended June 30, 1903.

RECEIVED.

From the Government Printing Office		680,010
From the Executive Departments, Bureaus, etc		100,065
From libraries		118,139
Exchanges with Senators and Representatives		1,985
		900,199

DISTRIBUTED.

To libraries:		
Designated depositories	235,068	
Geological depositories	51,422	
Remainder depositories	16,063	
Miscellaneous libraries	149,959	
		452,512
Catalogues		47,311
To persons and institutions designated by Senators and Representatives from documents to their credit:		
Messages and Papers of the Presidents	1,353	
Official Register (Blue Book)	146	
Flags of maritime nations	13	
		1,512
To Departments, for official use		2,824
Exchanges with Senators and Representatives		2,284
Waste paper		38,041
To Government Printing Office for binding		40,647
To foreign legations		141,157
Sales		41,086
		767,374

Documents on hand July 1, 1902	426,894
Documents received July 1, 1902–June 30, 1903	900,199
	1,327,093
Documents distributed during the fiscal year	767,374
Documents on hand June 30, 1903	559,719
Increase during the fiscal year	132,825

AMENDMENTS TO THE PRINTING LAWS.

No change in the printing law has been made since my last report. The Senate bill, printed in full therein, with explanations, passed the Senate and was favorably reported in the House, but it was too late for action to be taken by that body. The American Library Association, which includes in its membership substantially all librarians of depositories of United States public documents, approved this bill and will doubtless urge its passage by the Fifty-eighth Congress.

There is a real necessity for a law authorizing the Superintendent of Documents to order printed extra editions of documents required for sale, especially of the popular and cheap bulletins published by the Department of Agriculture. Last year one-tenth of all the money received by this office was returned to the remitters because the documents could not be supplied. A bill was reported favorably by the House Committee on Printing in the Fifty-seventh Congress authorizing the Public Printer to print and deliver to the Superintendent of Documents for sale 1,000 extra copies of each bulletin issued by the Department of Agriculture.

I have compiled from the sales record the following statement of sales, selecting about ten documents, which indicates the demand for such publications:

	Copies.
Yearbooks	3,358
Special Report on Diseases of the Horse	1,300
Special Report on Diseases of Cattle	1,004
Botany Bulletin No. 16	3,577
Entomology Bulletin No. 1 (new series)	2,135
Chemical Bulletin No. 46	1,636
Experiment Station Bulletin No. 28	1,330
Forestry Bulletin No. 10	1,809
Forestry Bulletin No. 24	1,066

Two or three times as many of these bulletins could have been sold, but they could not be supplied to me by the Department of Agriculture. While no statistics relating to the subject have been kept, I estimate that only about 40 per cent of the applications for publications relating to agriculture could be supplied. The demand for the two books, Special Report on Diseases of the Horse and Diseases of Cattle, has been extraordinary. To partially meet this demand, I was able to obtain about 1,000 copies of the former and about 800 of the latter by making exchanges of other documents with members of Congress and book dealers.

PUBLICATIONS OF THE PUBLIC DOCUMENTS OFFICE.

The publications of this office issued during the fiscal year were 12 Monthly Catalogues, with cumulative index, 656 pages; 1 Document Index (Consolidated Index), Fifty-seventh Congress, First session, 450 pages; 1 annual report, 40 pages; price list of documents for sale, 127 pages; total, 1,273 pages.

There is now in press the Document Catalogue (Comprehensive Index), Fifty-sixth Congress, 1899–1901, about 1,200 pages, the Document Index, Fifty-seventh Congress, second session, about 250 pages, and Tables of and Index to the Publications of the Department of Agriculture, 1862 to 1902, about 700 pages.

The latter is the first of a series of departmental lists which will be issued from time to time. When completed the lists will be consolidated and will form the check list of departmental publications.

CATALOGUE SECTION.

All the publications of the office in the foregoing list, except three which aggregate 867 pages, were prepared in the Catalogue Section. During the fiscal year there were received in this branch of the office 29,572 items. Seventy-five thousand seven hundred and eighty-nine cards were written in the preparation of copy for catalogues.

PRINTED CARDS.

It has finally been decided by this office to furnish printed catalogue cards for the Government publications to the depositories of public documents.

The much-discussed question of the form of heading for the cards was brought up at a meeting of Washington Departmental librarians, and a committee was appointed to lay the matter before the American Library Association at its recent meeting at Niagara Falls. This was done by means of a printed circular giving all the points for and against inversion under the distinctive word. The circular was read before the catalogue section of the association, and upon a vote being taken, the majority favored the inverted form of entry, e. g.:

U. S. Education, Bureau of

Not

U. S. Bureau of Education.

Cards will be sent inclosed with the documents to depository libraries as far as possible. No cards will be furnished for series entries, annual reports, reports on private bills, references, or analyticals, except the analyticals from the Congressional reserve. All documents and all reports not, on private bills, over 15 pages will be brought out in the Congressional reserve. The corporate author card will be the only entry furnished, but as many duplicates will be sent as are necessary, the other entries to be indicated and filled in as headings above the corporate entry by each library as it chooses, e. g.:

U. S. *Animal Industry, Bureau of.*
Squab raising; by William E. Rice. Wash., 1903.

32 pp., 11 il. 8°.
(U. S. Agriculture, Dept. of. Farmers' bulletin 177.)

Pigeons
Series=U. S. Agriculture, Department of. Farmers' bulletin
Rice, William E.=another author

3

In this case, although the series entry is indicated, no card will be furnished for it.

It is expected that the first installment of cards will be distributed in January, 1904.

PUBLIC DOCUMENTS LIBRARY, 1903.

The accessions for the fiscal year ended June 30, 1903, were 6,706 text publications and 716 maps, a total of 7,422. The aggregate of additions to the library from its foundation in 1895 is now 51,491 books and other printed publications and 7,454 maps, a total of 58,945 items. During the two years last passed some thousands of these items have been collected in bound volumes, and their permanent preservation in proper sequence thus secured.

The work of binding has gone on rather slowly, the total number of rebound volumes received from the binders to the present time being 1,885. This number is the result of once going through the library from A (agriculture) to Z (first fourteen Congresses), excluding the "sheep set" of numbered Congressional documents. In this latter set, which now numbers over 4,400 volumes, only about 200 volumes require immediate rebinding; but during the two years of going through the departmental sets to make up volumes for binding, additional volumes of periodicals and other numbered series have accumulated and now await binding to the number of several hundred volumes. After these arrearages have been cleared up, the binding of 300 or 400 volumes a year will keep the library in good condition in this particular.

In another important particular, that of shelf room, the library has long since outgrown its facilities, and its work has been of late carried on under great and growing embarrassments.

The growth of the library continues to include not only the current publications of the Government (which as fast as received are all carefully arranged in series and so labeled and catalogued as to be instantly available for reference), but also documents of historical value of earlier periods.

The Congressional Directories in the library now number 158, beginning in 1822 with the Seventeenth Congress, second session. The Court of Claims Reports, long incomplete for lack of a single early volume, are now complete in two series and 55 volumes. The set of annual reports of the Librarian of Congress is complete, in the pamphlet prints as well as in the Congressional documents, the first date being 1866. Of the printed catalogues of the Library of Congress there are 41, the earliest date being 1827, the latest 1880. The sets of Registers of the Interior and Justice Departments are known to be complete, and those of the State, Treasury, and War Departments are presumed to be very nearly so. The set of Land Laws begins with the earliest compilation, Joseph Gales, jr.'s, edition of 1810, containing an important historical introduction attributed to Albert Gallatin. The set includes both the Elliot and the De Krafft prints of the revised edition of 1817; Matthew St. Clair Clarke's edition of 1828, with the second volume thereto printed by Duff Green in 1836; Gales & Seaton's 2-volume edition, 1838; Kopp's 2-volume edition, 1875 and 1882, and the nine volumes issued by the Public Lands Commission, 1880 to 1884. The documents library has original prints of all the censuses except the First and Third. Its set of the Annual Registers of the Naval Academy begins with 1858 and includes all those printed at Newport while the academy temporarily sojourned there during the civil war. The completion of many other important sets in the public documents library has been noted in former reports of this office.

Gen. William Hickey (he had been brigadier-general of the District militia) was born in Washington August 12, 1800, and died in Bladensburg, Md., January 5, 1866, thus ending a service of forty-two consecutive years in the office of the Secretary of the Senate, the last ten as chief clerk. In an editorial eulogy paid to him and his works in the National Intelligencer of January 6, 1866, his "The Constitution of the United States of America, with an alphabetical analysis, etc.," is called "a faultless manual," which is about the limit to which praise could go. This manual must

have been highly popular with the Congresses before the war, for they ordered large editions of it and ordered it often. Not to mention small lots, there were 12,000 copies, February, 1847; 2,000 copies, April, 1848; 10,000, September, 1850; 10,000, January, 1853; and 38,625, February, 1854. These were very large editions for the small Congresses and small constituencies of half a century ago. They should have made General Hickey's "faultless manual" a plentiful book even in our day. It is, on the contrary, very rare. This seems to be the only conclusion to be drawn from the fact that among all the millions of the United States public documents, old and new, that have passed through the documents office no copy of Hickey's Constitution has been found. The public documents library acquired a copy during the past year by solicitation. It has a special value in this library because of its long and minute chapter on public documents. On this subject General Hickey was perhaps the leading authority of his day. He had the tastes and instincts of a librarian, and better than any other man deserves the title "founder of the Senate library." He was the chief compiler of Gales & Seaton's American State Papers, 38 volumes folio. An attempt to trace General Hickey's career in the Blue Book was not wholly successful, because he appears to have begun before there was a Blue Book. He is in the first issue (1816) and in all the later issues till his death.

The documents library has never until the present year been so fortunate as to secure even a single one of the 13 volumes (in 15 books and numbered as volumes 4 to 16) in which in 1887 the Executive Journals of the United States Senate for the forty years 1829 to 1869 were printed. The edition ordered was only 100 sets, and the compilers were paid $10,000, or $100 for each set of 15 books, so that each copy of each book cost $6.67 for compilation alone. The Secretary of the Senate of that day, in the exercise of a judicious discretion, had 125 sets printed instead of the 100 that had been ordered. The Senate provided by resolution for placing 107 sets, and ordered the remaining 18 sets to be held pending further order, but it is understood that all were distributed years ago. Each Senator of that day (there were but 78 Senators in the Fiftieth Congress) got one set only, and Representatives got none at all. The sources of distribution to unofficial citizens were thus closed, and the only sets put within reach of the public were two that were allotted to the Library of Congress. It was therefore somewhat surprising that in March, 1903, the receipts of the documents office should contain 8 copies of volume 5 of the Executive Journals. How 8 copies of the same volume could be lost out of such a very limited edition is a question to which no answer thus far appears.

Wait's State Papers was reported in the second edition of the Public Document Check List, 1895, as made up of three editions, the first in 6 volumes, the second in 10 volumes, and the third in 12 volumes. This notation, without verification, had been accepted as correct, but when, in June, 1903, volumes 7 and 8 of the first edition were found in a library-exchange shipment, an examination became necessary, and it was then discovered that calling the first edition 6 volumes was an obvious error which even a superficial examination of the books should have sufficed to prevent. Wait is now complete in this library in three editions and 30 volumes.

Accessions for fiscal year ended June 30, 1903.

The number of text publications in the Library is now 51,491, and of maps, 7,454, an aggregate of 58,945 items.

DESIGNATED DEPOSITORIES—STATE AND TERRITORIAL LIBRARIES.

Almost from the beginning of the Government and until 1857 all incorporated historical associations, colleges, and universities were supplied regularly with public documents, and were virtually depositories. The regular distribution was made under the direction of the Secretary of State.

By a joint resolution approved January 28, 1857, the distribution of documents was placed in charge of the Secretary of the Interior, and that official was authorized to designate public libraries, colleges, and other institutions to receive the public documents. This latter provision was repealed, however, by a joint resolution approved March 20, 1858, which authorized Senators, Representatives, and Delegates in Congress to designate depositories of public documents to the Secretary of the Interior. The several acts relating to the distribution of documents to depositories have been incorporated in the Revised Statutes as sections 501 and 502, and these sections have been modified to some extent by the printing act approved January 12, 1895, which, among other changes, provides that the distribution of documents to depositories shall be made by the Superintendent of Documents.

Each Senator, Representative, and Delegate in Congress is entitled to name one depository of the United States public documents. Any library designated, other than college libraries, is required to possess 1,000 or more books other than Government publications. The libraries of the several States and Territories, of eight of the Executive Departments, of the Naval Academy at Annapolis, of the

Military Academy at West Point, and the library of the American Antiquarian Society, Worcester, Mass., are depositories designated by law. The latter institution was designated by resolution of Congress, December 1, 1814.

There are at present 492 State and Territorial libraries and designated depositories on the mailing list. A list of these depositories follows, which shows when and by whom designated.

While designations were first authorized to be made by members of Congress by the resolution of March 20, 1858, the library of the Georgia Historical Society, Savannah, Ga., was designated by Howell Cobb in 1857. There are five libraries on the list which were designated in 1858—the Public Library, Dover, N. H., by J. P. Hale; the Public Library, New Bedford, Mass., by Robert B. Hall; the Essex Institute, Salem, Mass., by Timothy Davis; the Herring Library, St. Lawrence University, Canton, N. Y., by F. E. Spinner; and the Oberlin College, Oberlin, Ohio, by Philemon Bliss. The Boston Public Library was designated in 1859 by Alexander H. Rice, and Yale University was designated the same year by John Woodruff.

A designated depository is charged on the books of this office to the Representative of the district in which located, if named by a Representative in the first instance, or to the successor of the Senator who designated it, as the case may be. Sometimes a depository is dropped at its own request, at the request of the Senator or Representative to whom charged, or because it is no longer a suitable depository of public documents. If a library is a suitable depository, it should not be changed, and the publication of the list showing when and by whom designated will, it is hoped, arouse the interest of librarians in Government publications, and stimulate their efforts to have the institutions which they represent continued as depositories.

For the information of Senators and Representatives I have caused a list, which is appended, to be prepared of the documents sent to designated depositories during the fiscal year 1903.

In the Fifty-eighth Congress there will be 30 Representatives from new districts under the apportionment of the Twelfth Census. Under the law each member will be entitled to name a depository, but no provision has been made for supplying the additional depositories with documents. The printing act approved January 12, 1895, provides that 500 copies of each document intended for distribution to depositories shall be supplied to the Superintendent of Documents. The number which will hereafter be required is 551, and Congress will be asked to increase to that extent the number of documents for distribution to depositories.

It may be interesting to librarians to learn that since the organization of this office, in 1895, it has distributed to the libraries of the country 2,955,721 public documents, the larger number consisting of bound volumes. Of these, 1,437,657 were sent to State and Territorial libraries and designated depositories, 330,942 to depositories of the scientific publications of the Geological Survey, 169,068 to what are known as "remainder" depositories, and 1,018,060 to miscellaneous libraries, upon special order or at the request of Senators and Representatives in Congress. The latter were very largely documents rescued from cellars and lofts where they had been stored by the libraries which had received them in duplicate.

List of State and Territorial libraries and designated depositories, showing when and by whom designated.

Congress—Continued.

57th Congress, 1st session. House reports, v. 8. Nos. 2082–2443; miscellaneous. (Serial no. 4406.)

—— —— v. 9. Nos. 2444–2750; miscellaneous. (Serial no. 4407.)

Congressional Record, proceedings and debates of 57th Congress, 1st session, also special session of Senate, v. 35 [pt. 1, Mar. 4, 1901–Jan. 27, 1902]. 1902. [3]+ 1–1008 pp. 4°

—— v. 35 [pt. 2, Jan. 27–Feb. 22, 1902]. [3] + 1009–2080 pp. 4°

—— v. 35 [pt. 3, Feb. 22–Mar. 21, 1902]. [3] + 2080–3152 pp. 4°

—— v. 35 [pt. 4, Mar. 21–Apr. 16, 1902]. [3] + 3153–4224 pp. 4°

—— v. 35 [pt. 5, Apr. 16–May 10, 1902]. [3] + 4225–5280 pp. 4°

—— v. 35 [pt. 6, May 10–June 5, 1902]. [3] + 5281–6336 pp. 4°

—— v. 35 [pt. 7, June 5–25, 1902]. [3] + 6337–7392 pp. 4°

—— v. 35 [pt. 8, June 25–July 1, 1902, with appendix]. [3] + 7393–7795 + 666 pp. 4°

—— [index to pts. 1–8, including History of bills and joint resolutions]. 735 + 584 pp. 4°

Statutes at Large, Dec. 1901–Mar. 1903, concurrent resolutions, and recent treaties, conventions, and executive proclamations; edited under direction of Secretary of State. 1903. v. 32, pt. 1, lxvii + 1–1232 + clxi pp. large 8°

—— pt. 2, 1233–2251 pp. large 8°

Statutes passed at 1st session of 57th Congress, 1901–02, and concurrent resolutions, recent treaties, and executive proclamations; edited under direction of Secretary of State. 1902. [1434] pp. large 8°

Statutes passed at 2d session of 57th Congress, 1902–03, and concurrent resolutions, recent treaties, and executive proclamations; edited under direction of Secretary of State. 1903. [966] pp. large 8°

57th Congress, 2d session, official Congressional directory; by A. J. Halford, 1st edition, corrected to Nov. 26, 1902. x + 385 pp. il. 1 pl. map, 8°

58th Congress, special session of Senate, official Congressional directory; by A. J. Halford. [2d] special edition, corrected to Mar. 12, 1903. xiv + 415 pp. il. 1 pl. map, 8°

Court of Claims. Cases decided at term of 1901–2, with abstracts of decisions of Supreme Court in appealed cases, Oct., 1901–May, 1902; reported by Charles C. Nott and Archibald Hopkins. 1902 [1903]. v. 37, cv+604 pp. 8°

Dairy Division (Animal Industry Bureau, Department of Agriculture).

Cheese making on farm; by Henry E. Alvord. 1903. 16 pp. 3 il. 8° (Farmers' bulletin 166.)

Officials, associations, and educational institutions connected with dairy interests of United States for 1903. Mar. 25, 1903. 11 pp. 8° (Animal Industry Bureau. Circular 40.)

Water content of creamery butter. [Feb. 1903.] 4 pp. 8° (Animal Industry Bureau. Circular 39.)

Documents Office (Government Printing Office). 8th annual report of superintendent of documents, 1902. 1903. 40 pp. 8°

Education Bureau (Interior Department).

Education in Nebraska [with bibliography]; by Howard W. Caldwell. 1902. 268 pp. il. 10 pl. 8° (Contributions to American educational history 32; circular of information 3, 1902; whole no. 282.)

History of higher education in Colorado; by James Edward Le Rossignol. 1903. 67 pp. 25 pl. 8° (Contributions to American educational history 34; circular of information 1, 1903; whole no. 292.)

History of higher education in Maine; by Edward W. Hall. 1903. 241 pp. 9 pl. 8° (Contributions to American educational history 36; circular of information 3, 1903; [whole no. 294].)

History of education in Texas [with bibliography]; by J. J. Lane. 1903. 334 pp. 13 por. 32 pl. 8° (Contributions to American educational history 35; circular of information 2, 1903; whole no. 293.)

Entomology Division (Department of Agriculture).

Bedbug, cimex lectularius Linn., by C. L. Marlatt; revised reprint from Bulletin 4, new series. [June 15, 1902.] 8 pp. 3 il. 8° (Circular 47, 2d series.)

Entomology Division—Continued.

Cockroaches, by C. L. Marlatt; revised reprint from Bulletin 4, new series. [June 23, 1902.] 15 pp. 5 il. 8° (Circular 51, 2d series.)

Control of codling moth; by C. B. Simpson. 1903. 24 pp. 4 il. 8° (Farmers' bulletin 171.)

Culture of mulberry silkworm; by Henrietta Aiken Kelly. 1903. 32 pp. 15 il. 8° (Bulletin 39, new series.)

Fruit-tree bark-beetle, scolytus rugulosus Ratz.; by F. H. Chittenden. [Mar. 25, 1903.] 8 pp. 5 il. 8° (Circular 29, revised edition.)

House centipede, scutigera forceps Raf., by C. L. Marlatt; from Bulletin 4, new series. [June 10, 1902.] 4 pp. 2 il. 8° (Circular 48, 2d series.)

How to control San Jose scale; by C. L. Marlatt. [Mar. 25, 1903.] 7 pp. 8° (Circular 42, 2d series, 3d edition.)

Hydrocyanic-acid gas against household insects. [May 22, 1902.] 4 pp. 8° (Circular 46, 2d series.)

Index to bulletins 1–30, new series, 1896–1901; by Nathan Banks. 1902. 64 pp. 8° (Bulletin 36, new series.)

Larger apple-tree borers. [Aug. 30, 1902.] 12 pp. 3 il. 8° (Circular 32, 2d series, revised edition.)

Lime, sulphur, and salt wash [as remedy for San Jose scale in the East]; by C. L. Marlatt. [Feb. 20, 1903.] 8 pp. 8° (Circular 52, 2d series.)

Methods of controlling [Mexican cotton-] boll weevil; by W. D. Hunter. 1903. 16 pp. 2 il. 8° (Farmers' bulletin 163.)

Proceedings of 14th annual meeting of Association of Economic Entomologists. 1902. 127 pp. 2 il. 1 pl. 8° (Bulletin 37, new series.)

Proceedings of 15th annual meeting of Association of Economic Entomologists. 1903. 124 pp. 6 il. 2 pl. 8° (Bulletin 40, new series.)

Report on codling-moth investigations in the Northwest during 1901; by C. B. Simpson. 1902. 29 pp. 1 il. 5 pl. 8° (Bulletin 35, new series.)

Scale insects and mites on citrus trees; by C. L. Marlatt. 1903. 43 pp. 34 il. 8° (Farmers' bulletin 172.)

Silkworm culture; by Henrietta Aiken Kelly. 1903. 32 pp. 16 il. 8° (Farmers' bulletin 165.)

Silver fish, lepisma saccharina Linn., by C. L. Marlatt; revised reprint from Bulletin 4, new series. [June 20, 1902.] 4 pp. 2 il. 8° (Circular 49, 2d series.)

Some miscellaneous results of work of division, 6. 1902. 110 pp. 9 il. 2 pl. 8° (Bulletin 38, new series.)

White ant, termes flavipes Koll., by C. L. Marlatt; revised reprint from Bulletin 4, new series. [June 30, 1902.] 8 pp. 4 il. 8° (Circular 50, 2d series.)

Yellow-winged locust, camnula pellucida Scudd.; by C. B. Simpson. [May 12, 1903.] 3 pp. 1 il. 8° (Circular 53.)

Experiment Stations Office (Department of Agriculture).

Agricultural experiment stations in foreign countries; by A. C. True and D. J. Crosby. 1902. 230 pp. 8° (Bulletin 112.)

Dietary studies in New York City in 1896 and 1897; by W. O. Atwater and A. P. Bryant. 1902. 83 pp. 8° (Bulletin 116.)

Digest of recent experiments on horse feeding; by C. F. Langworthy. 1903. 75 pp. 8° (Bulletin 125.)

Experiments on effect of muscular work upon digestibility of food and metabolism of nitrogen at University of Tennessee, 1899–1900; by Chas. E. Wait. 1902. 45 pp. 8° (Bulletin 117.)

Experiments on metabolism of nitrogen, sulphur, and phosphorus in human organism [in cooperation with Columbia University]; by H. C. Sherman. 1902. 47 pp. 3 il. 8° (Bulletin 121.)

Experiment Station Record, v. 13, no. 9. 1902. viii + 807–906 pp. 1 pl. 8°

—— v. 13, no. 10. 1902. viii + 907–1008 pp. 8°

—— v. 13, no. 11. 1902. xi + 1009–1112 pp. 8°

—— v. 13, no. 12. 1902. xviii + 1113–1206 pp. 8°

—— v. 14, no. 1. x + 1–100 pp. 8°

—— v. 14, no. 2. viii + 101–204 pp. 8°

Experiment Stations Office—Continued.

Experiment Station Record, v. 14, no. 3. 1902. viii + 205–308 pp. 8°

—— v. 14, no. 4. 1902. x + 309–412 pp. 8°

—— v. 14, no. 5. x + 413–516 pp. 8°

—— v. 14, no. 6. vii + 517–620 pp. 8°

—— v. 14, no. 7. ix + 621–724 pp. 8°

—— v. 14, no. 8. x + 725–828 pp. 7 il. 1 pl. 8°

—— v. 14, no. 9. xi + 829–932 pp. 8°

—— v. 14, no. 10. x + 933–1036 pp. 8°

Experiment Station Work, v. 1, including Experiment Station Work 1–20 [title-page, contents, index, etc.]. 1902. xiv + xviii pp. 8°

—— 21. 1903. 32 pp. 3 il. 8° (Farmers' bulletin 162.)

—— 22. 1903. 32 pp. 6 il. 8° (Farmers' bulletin 169.)

—— v. 2, no. 2. 1903. iv + 29–56 pp. 6 il. 8°

How to build small irrigation ditches; by C. T. Johnston and J. D. Stannard. 1902. 28 pp. 9 il. 8° (Farmers' bulletin 158.)

Irrigation from Big Thompson River; by John E. Field. 1902. 75 pp. 1 il. 4 pl. map, 8° (Bulletin 118.)

Irrigation of rice in United States; by Frank Bond and George H. Keeney. 1902. 77 pp. 10 il. 23 pl. 6 maps, 8° (Bulletin 113.)

Key to subject index of experiment station literature. Apr. 25, 1902. [3] pp. 8° (Circular 23 revised.)

List of publications of office on food and nutrition of man. Nov. 5, 1902. 9 pp. 8° ([Publication] 238 revised [7th edition].)

List of publications of office on irrigation. Oct. 15, 1902. 7 pp. 8° ([Publication] 358 revised.)

Organization lists of agricultural colleges and experiment stations in United States. Jan. 1903. 96 pp. 8° (Bulletin 122.)

Preliminary plans and estimates for drainage of Fresno district, Cal.; by C. G. Elliott. [Apr. 16, 1903.] 9 pp. 8° (Circular 50.)

Principles of horse feeding; by C. F. Langworthy. 1903. 44 pp. 8° (Farmers' bulletin 170.)

Proceedings of 15th annual convention of Association of American Agricultural Colleges and Experiment Stations, Washington, D. C., Nov. 12–14, 1901; edited by A. C. True, W. H. Beal, and H. H. Goodell. 1902. 134 pp. 9 il. 8° (Bulletin 115.)

Proceedings of 16th annual convention of Association of American Agricultural Colleges and Experiment Stations, Atlanta, Ga., Oct. 7–9, 1902; edited by A. C. True, W. H. Beal, and H. C. White. 1903. 144 pp. 2 pl. 8° (Bulletin 123.)

Proceedings of 7th annual meeting of American Association of Farmers' Institute Workers, Washington, D. C., June 24–26, 1902; edited by A. C. True, D. J. Crosby, and G. C. Creelman. 119 pp. 8° (Bulletin 120.)

Report of irrigation investigations in Utah, under direction of Elwood Mead, assisted by R. P. Teele, A. P. Stover, A. F. Doremus, J. D. Stannard, Frank Adams, and G. L. Swendsen. 1903. 330 pp. 2 il. 14 pl. 5 maps, 4° (Bulletin 124.)

Silos and silage; [by] Charles S. Plumb. Revised edition. 1903. 32 pp. 6 il. 8° (Farmers' bulletin 32.)

Statistics of land-grant colleges and agricultural experiment stations in United States, 1902. 1903. 38 pp. 8° (Bulletin 128.)

Studies on digestibility and nutritive value of bread at University of Minnesota in 1900–02; by Harry Snyder. 1903. 52 pp. 3 pl. 8° (Bulletin 126.)

What Department of Agriculture is doing for irrigation; by Elwood Mead. [Oct. 14, 1902.] 4 pp. 8° (Circular 48.)

Foreign Markets Division (Department of Agriculture).

Agricultural imports of United Kingdom, 1896–1900; by Frank H. Hitchcock. 1902. 227 pp. 8° (Bulletin 26.)

Distribution of agricultural exports of United States, 1897–1901; by Frank H. Hitchcock. 1902. 202 pp. 8° (Bulletin 29.)

Foreign Markets Division—Continued.

Our foreign trade in agricultural products, 1902. Feb. 21, 1903. 24 pp. 8° (Circular 25.)

Sources of agricultural imports of United States, 1897–1901; by Frank H. Hitchcock. 1902. 132 pp. 8° (Bulletin 28.)

Forestry Bureau (Department of Agriculture).

Conservative lumbering at Sewanee, Tenn.; by John Foley. 1903. 36 pp. 11 pl. map, large 8° (Bulletin 39.)

Eucalypts cultivated in United States [with bibliography]; by Alfred James McClatchie. 1902. 106 pp. 92 pl. large 8° (Bulletin 35.)

Forest influences. [2d edition.] 1902. 197 pp. 63 il. 8° (Bulletin 7.)

Hardy catalpa. 1902. 58 pp. 2 il. 31 pl. large 8° (Bulletin 37.)

History of lumber industry in State of New York; by William F. Fox. 1902. 59 pp. 20 pl. 8° (Bulletin 34.)

New method of turpentine orcharding. [Feb. 2, 1903.] 8 pp. 3 il. 8° (Circular 24.)

New method of turpentine orcharding; by Charles H. Herty. 1903. 43 pp. 5 il. 16 pl. large 8° (Bulletin 40.)

Redwood. 1903. 40 pp. 6 il. 13 pl. large 8° (Bulletin 38.)

Results of investigations on long-leaf pine, pinus palustris. 1893. 92 pp. 22 il. 12 pl. 4°

Timber physics, pt. 1, preliminary report; by B. E. Fernow. 1892. [viii] + 57 pp. il. 6 pl. 4° (Bulletin 6.)

Western hemlock; by Edward T. Allen. 1902. 55 pp. 5 il. 12 pl. large 8° (Bulletin 33.)

Woodlot, handbook for owners of woodlands in southern New England; by Henry Solon Graves and Richard Thornton Fisher. 1903. 89 pp. 30 il. 4 pl. large 8° (Bulletin 42.)

Working plan for forest lands near Pine Bluff, Ark.; by Frederick E. Olmsted. 1902. 48 pp. 9 il. 10 pl. large 8° (Bulletin 32.)

Geological Survey (Interior Department).

Geologic atlas of United States, Atoka folio, Ind. T. Library edition. 1902. 8 pp. 2 pl. 4 maps, large 4° (Folio 79.)

—— Camp Clarke folio, Nebr. Library edition. 1903. 4 pp. 1 il. 2 pl. 2 maps, large 4° (Folio 87.)

—— Chicago folio, Riverside, Chicago, Desplaines, and Calumet quadrangles, Ill.–Ind. [with bibliography]. Library edition. 1902. 14 pp. 14 il. 2 pl. 12 maps, large 4° (Folio 81.)

—— Ditney folio, Ind. Library edition. 1902. 8 pp. 3 il. 4 pl. 3 maps, large 4° (Folio 84.)

Navy Department. Allowance of equipment under cognizance of Bureau of Equipment and Recruiting for vessels of Navy, 1890. 80 pp. 4°

Northern and Northwestern Lakes Survey (Engineer Department, War Department). Bulletin 12b, Lake Michigan and Green Bay, to supplement information given upon charts of Great Lakes. [May 22] 1902. 70 pp. 1 tab. 4°

Patent Office (Interior Department). Rules of practice, revised Jan. 2, 1903. [17th edition.] 108 pp. 3 pl. 8°

Pension Bureau (Interior Department). Laws governing army and navy pensions, with regulations relating thereto. July, 1902. 309 pp. 8°

Plant Industry Bureau (Department of Agriculture).

Berseem, great forage and soiling crop of Nile Valley; by David G. Fairchild. Aug. 30, 1902. 20 pp. 14 pl. large 8° (Bulletin 23.)

Bluing and red rot of western yellow pine, with special reference to Black Hills forest reserve; by Hermann von Schrenk. May 5, 1903. 40 pp. 14 pl. large 8° (Bulletin 36.)

Budding the pecan; by George W. Oliver. Dec. 9, 1902. 20 pp. 8 pl. large 8° (Bulletin 30.)

Cassava; by S. M. Tracy. 1903. 32 pp. 11 il. 8° (Farmers' bulletin 167.)

Commercial grading of corn; by Carl S. Scofield. June 13, 1903. 24 pp. 4 pl. 8° (Bulletin 41.)

Cultivated forage crops of northwestern States; by A. S. Hitchcock. Dec. 13, 1902. 28 pp. 7 pl. large 8° (Bulletin 31.)

Disease of white ash caused by polyporous fraxinophilus; by Hermann von Schrenk. Feb. 28, 1903. 20 pp. 1 il. 5 pl. large 8° (Bulletin 32.)

Distribution of cotton seed in 1903. [1903.] 13 pp. 2 pl. large 8°

Effect of black rot on turnips, series of photomicrographs, accompanied by explanatory text; by Erwin F. Smith. Jan. 17, 1903. 20 pp. 14 pl. large 8° (Bulletin 29.)

Home vineyard, with special reference to northern conditions; by W. H. Ragan. 1902. 24 pp. 15 il. 8° (Farmers' bulletin 156.)

Injurious effects of premature pollination, with notes on artificial pollination and setting of fruit without pollination; by Charles P. Hartley. Oct. 4, 1902. 48 pp. 3 il. 4 pl. large 8° (Bulletin 22.)

Plant Industry Bureau—Continued.

List of American varieties of vegetables for 1901 and 1902; by W. W. Tracy, jr. Jan. 17, 1903. 402 pp. large 8° (Bulletin 21.)

List of publications of Office of Grass and Forage Plant Investigations and Division of Agrostology; by W. J. Spillman. [Sept. 26] 1902. 12 pp. 8°

Mango in Porto Rico; by G. N. Collins. Jan. 17, 1903. 38 pp. 15 pl. large 8° (Bulletin 28.)

Manufacture and preservation of unfermented grape must; by George C. Husmann. Nov. 6, 1902. 19 pp. 4 il. 1 pl. large 8° (Bulletin 24.)

Manufacture of semolina and macaroni; by Robert P. Skinner. 1902. 31 pp. 6 il. 5 pl. large 8° (Bulletin 20.)

North American species of leptochloa; by A. S. Hitchcock. Feb. 10, 1903. 24 pp. 16 il. 6 pl. large 8° (Bulletin 33.)

Pearl millet; by Carleton R. Ball. 1903. 16 pp. 3 il. 8° (Farmers' bulletin 168.)

Practical suggestions for fruit growers; by H. P. Gould. 1902. 28 pp. 8 il. 8° (Farmers' bulletin 161.)

Propagation of plants; by L. C. Corbett. 1902. 24 pp. 22 il. 8° (Farmers' bulletin 157.)

Rape as a forage crop; by A. S. Hitchcock. 1903. 16 pp. 1 il. 8° (Farmers' bulletin 164.)

Recent foreign explorations [in rice-producing countries], as bearing on agricultural development of southern States; by S. A. Knapp. Feb. 14, 1903. 44 pp. 2 il. 6 pl. large 8° (Bulletin 35.)

Silkworm food plants, cultivation and propagation; by George W. Oliver. Jan. 15, 1903. 20 pp. 13 pl. large 8° (Bulletin 34.)

Spanish almonds and their introduction into America; by David G. Fairchild. 1902. 16 pp. 8 pl. large 8° (Bulletin 26.)

Stock ranges of northwestern California, notes on grasses and forage plants and range conditions; by Joseph Burtt Davy. 81 pp. 4 il. 8 pl. 3 maps, large 8° (Bulletin 12.)

Porto Rico Agricultural Experiment Station (Experiment Stations Office, Department of Agriculture).

Agricultural experiment station of Porto Rico, its establishment, location, and purpose; by Frank D. Gardner. 1903. 15 pp. 4 pl. 8° (Bulletin 1.)

Changa, or mole cricket, scapteriscus didactylus Latr., in Porto Rico; by O. W. Barrett. 1902. 20 pp. 1 il. 8° (Bulletin 2.)

La changa, 6 grillotalpa, scapteriscus didactylus Latr., en Puerto Rico; por O. W. Barrett. 1902. 20 pp. 1 il. 8° (Boletin 2.)

Public Health and Marine Hospital Service (Treasury Department). Annual report of supervising surgeon-general of Marine-Hospital Service, 1900. [1903.] 736 pp. il. 13 pl. 8°

Public Road Inquiries Office (Department of Agriculture).

Going in debt for good roads; address by Judge Thayer, Council Bluffs, May 24, 1893. Jan. 16, 1897. 6 pp. 8° (Circular 26.)

Highway maintenance and repairs, highway taxation, comparative results of labor and money systems, contract system of maintaining roads. [Dec. 15, 1897.] 16 pp. 8° (Circular 24, revision of 16, 20, and 24.)

List of national, State, and local road associations and kindred organizations in United States. [May 1, 1902.] 14 pp. 8° (Circular 36, revised.)

Proceedings of 3d annual Good Roads Convention of Boards of Supervisors of State of New York, Albany, Jan. 28 and 29, 1902. 63 pp. 12 pl. map, 8° (Bulletin 22.)

Proceedings of Jefferson Memorial and Interstate Good Roads Convention, Charlottesville, Va., Apr. 2–4, 1902. 1902 [1903]. 60 pp. 3 il. 5 pl. 8° (Bulletin 25.)

Proceedings of North Carolina good roads convention, Raleigh, Feb. 12 and 13, 1902; by J. A. Holmes. 1903. 72 pp. 5 pl. 8° (Bulletin 24.)

Road conventions in southern States, and object-lesson roads constructed under supervision of office with cooperation of Southern Railway [and National Good Roads Association]. 1902. 89 pp. 11 pl. 8° (Bulletin 23.)

Social, commercial, and economic phases of road subject. Mar. 29, 1900. 8 pp. 8° (Circular 34.)

Publications Division (Department of Agriculture).

Index to Yearbooks of Department of Agriculture, 1894–1900; by Charles H. Greathouse. 1902. 196 pp. 8° (Bulletin 7.)

List by titles of publications of Department of Agriculture, 1840–June, 1901; by R. B. Handy and Minna A. Cannon. 1902. 216 pp. 8° (Bulletin 6.)

List of bulletins and circulars issued by Department of Agriculture and available for free distribution; corrected to Jan. 1, 1903. 28 pp. 8° ([Publication] 247, 8th edition.)

Monthly list of publications [of Department of Agriculture], Dec. 1902. 4 pp. 8° ([Publication] 452.)

—— Jan. 1903. 4 pp. 8° ([Publication] 453.)

—— Feb. 1903. 4 pp. 8° ([Publication] 456.)

—— Mar. 1903. 4 pp. 8° ([Publication] 458.)

—— Apr. 1903. 4 pp. 8° ([Publication] 461.)

—— May, 1903. 4 pp. 8° ([Publication] 462.)

Speech by James Wilson, delivered July 7, 1902, at school of agriculture, Columbus, Ohio. July 17, 1902. 6 pp. 8°

Record and Pension Office (War Department).

War of the Rebellion, compilation of official records of Union and Confederate armies, additions and corrections to series 1, v. 9, 18, 20, 23, 25–30, 33; John S. Moodey, indexer. 8°

—— to series 1, v. 34–39, 49, 51–53; John Moodey, indexer. 1902. 8°

—— to series 1, v. 40, 43, 44, 50; John S. Moodey, indexer. 1902. 8°

—— to series 1, v. 41, 42, 45–48; John S. Moodey, indexer. 1902. 8°

—— to series 2, v. 1. 8°

—— to series 2, v. 2–8. 8°

—— to series 3, v. 1–5. 8°

—— to series 4, v. 1–3. 8°

—— to atlas. 8°

—— to general index volume. 8°

Revenue-Cutter Service (Treasury Department). Report of operations of revenue steamer Nunivak on Yukon River station, 1899–1901; by J. C. Cantwell. 1902 [1903]. 325 pp. 147 pl. 8°

Soils Bureau (Department of Agriculture).

Applications for reports of Field operations [of bureau, 1899–1901, to be filled by separate reprints therefrom, with list of reports and separates]. [1903.] 2 pp. 8°

Reclamation of alkali lands in Egypt as adapted to similar work in United States; by Thos. H. Means. 1903. 48 pp. 6 il. 8 pl. 8° (Bulletin 21.) [Prepared by cooperation of Bureau of Plant Industry and Bureau of Soils.]

State Department. General index to diplomatic correspondence and foreign relations of United States, 1861–99. 1902. 945 pp. 8°

Statistics Division (Department of Agriculture). Relations of population and food products in United States, exclusive of Alaska and insular possessions, mainly as indicated by census reports, 1850–1900; by James H. Blodgett. 1903. 86 pp. 8° (Bulletin 24.)

Treasury Department. Digest of decisions of Department, customs, and Board of General Appraisers rendered during calendar years 1898–1902. 1903. 400 pp. 8°

War Department.

Appendix to army regulations, 1901, showing changes to Dec. 31, 1902. [1903.] p. 257–430, 2 il. 8°

Regulations for Army, 1901, with appendix, separately indexed, showing changes to June 30, 1902. vii + 427 pp. 8°

Weather Bureau (Department of Agriculture).

Hurricanes, especially those of Porto Rico and St. Kitts; by William H. Alexander. 1902. 79 pp. 7 il. 8° (Bulletin 32.)

Proceedings of 2d convention of Weather Bureau officials, Milwaukee, Wis., Aug. 27–29, 1901; edited by James Berry and W. F. R. Phillips. 1902. 246 pp. il. 11 pl. 28 maps, 8° (Bulletin 31.)

GOVERNMENT PRINTING OFFICE

TENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS

FISCAL YEAR ENDED JUNE 30, 1904

WASHINGTON: GOVERNMENT PRINTING OFFICE: 1904

HARVARD COLLEGE
MAY 24 1919
LIBRARY

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., October 31, 1904.

SIR: I have the honor to submit a detailed report of United States public documents sold July 1, 1903, to June 30, 1904, as required by law.

I also make a brief summary of the work of my office, and include a list of State and Territorial libraries and institutions designated as depositories of United States public documents by Senators, Representatives, and Delegates in Congress, together with a list of documents transmitted to such institutions during the fiscal year.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Hon. F. W. PALMER, *Public Printer.*

Documents received, distributed, and sold July 1, 1903, to June 30, 1904.

MOVING THE DOCUMENTS OFFICE.

Early in 1903 it was determined to move the Documents Office from the Union Building, where it had been located since its organization, into the old building formerly used as the Government Printing Office. To plan and execute the removal of nearly 1,000,000 books and pamphlets, office furniture, etc., without interruption to the current work of the office was no light task. The work was accomplished, however, without any hitch or delay to the public business, and I desire to express my thanks to the employees of the office, whose zeal and intelligent assistance rendered the result possible.

The preliminary work was begun in July, 1903, and consisted in shifting about 300,000 books and pamphlets from large bookstacks into new boxes made for the purpose. These boxes were subsequently moved and properly placed without disturbing their contents. The entire work of removal involved the handling of about 800 wagon loads.

AMENDMENTS TO THE PRINTING LAWS.

A very important resolution was passed at the last session of Congress and approved by the President March 28, 1904. It authorizes the Superintendent of Documents to order reprinted any document needed for sale, provided the approval of the head of the office in which the document originated shall be obtained.

Under the provisions of this resolution about 25,000 documents have been reprinted since July 1, 1904. The greater number of these being the small, cheap bulletins issued by the Department of Agriculture, for which there is a great demand by people engaged in agricultural pursuits.

This office prepared a bill, which was introduced in the House at the beginning of the Fifty-eighth Congress, providing for the printing and binding of a library edition of documents and reports, to be bound in half morocco, for distribution to depository libraries. The bill requires that the "library edition" shall be printed when the first edition of any document or report shall be issued, and that the same shall be promptly bound so as to be immediately available for distribution.

At the conference of the American Library Association, held at Niagara Falls in 1903, the substance of the bill heretofore referred to was approved and its passage urged upon Congress.

At the writing of this report there remains but ten volumes of the documents and reports of the Fifty-seventh Congress to be distributed to depository libraries. The distribution is, therefore, several months in advance of any period in the past, and is about as close as it can ever be under the operation of the law of 1895. The use of public documents in the schools and colleges, and by the public, is increasing continually, as is evidenced in the table showing the receipts, distribution, and sale of documents over a period of years. It is, therefore, of the greatest importance that the distribution to depository libraries be made before the documents become stale. This can not be done unless the printing laws are amended.

Attention is invited to the fact that no provision has been made by Congress for printing the extra number of documents required to supply depositories authorized by sections 501 and 502 of the Revised Statutes, to be named by the 30 or more additional members of the House elected to the Fifty-eighth Congress under the apportionment of the twelfth census.

PRINTED CATALOGUE CARDS.

In order to render the public documents of more service to the people I began in February, 1904, the distribution of printed catalogue cards to depositories. It was my intention to print a card for each subject indicated, but I soon found it impracticable to do so on account of the great increase in labor involved. I am, therefore, now distributing but one card for each document, indicating the several subjects, so that librarians may copy and put on the proper headings. Some librarians complain that they can not do the work involved in copying, and have asked for the privilege of purchasing the duplicates. It is probable that some satisfactory method will soon be adopted to supply the duplicate cards needed to perfect this great work. From February to October 1, 1904, there had been distributed 315,000 printed cards.

The headings of the printed cards distributed are made to conform as nearly as possible to entries in the official catalogue prepared by this office. This form of heading was approved by a majority of the catalogue section of the American Library Association at the Niagara Falls conference, 1903, and has recently received the written approval of 150 designated depositories against 50 which favor other forms. Early in the summer a circular letter, with sample cards showing the form of heading used by the Library of Congress, the A. L. A. Publishing Board, et al., and the Office of the Superintendent of Documents, was sent to each designated depository, State and Territorial library, with request that the cards be marked with preference and returned. As stated heretofore, 200 libraries responded. One hundred and fifty favored the heading used by this office, 23 that of the A. L. A. Publishing Board, 21 that of the Library of Congress, and 6 "don't know."

This expression of approval of our work from a large majority of the librarians whom we serve is very gratifying. The approval is not only satisfactory in point of numbers, but it is especially gratifying because the indorsements come from so many librarians eminent in their profession and qualified to speak with authority with reference to the cataloguing of United States public documents.

Following (p. 14) is a copy of the circular notice, also of a series of the cards accompanying the same.

Notice.

Inclosed are samples of five entries for United States Government documents, each printed in three different styles, viz:

A. The form now followed by the Library of Congress in the printed cards for all Government publications.

B. The form adopted by the Massachusetts Library Club, the Massachusetts State Library, and the A. L. A. Publishing Board.

C. The form followed by the Superintendent of Documents in the printed cards which he sends to depositories.

Please express your order of preference by numbering the cards and return them, with the name of the library, to the Superintendent of Documents, Washington, D. C.

HERBERT PUTNAM,
Librarian of Congress.
L. C. FERRELL,
Superintendent of Documents.

PUBLICATIONS.

The following publications were issued by this office during the fiscal year:

	Pages.
Ninth Annual Report of Superintendent of Documents, 1903	64
Author Headings for United States Public Documents	39
Document Catalogue (Comprehensive Index), volume 5, Fifty-sixth Congress.	1, 105
Document Index (Consolidated Index), Fifty-seventh Congress, second session	250
Monthly catalogues, June, 1903, to May, 1904 (12 numbers)	726
Price List of Laws of United States	2
Total	2, 186

There is now in press the Document Catalogue (Comprehensive Index), Fifty-seventh Congress, and the Document Index (Consolidated Index), Fifty-eighth Congress, special, first, and second sessions, in one volume. One volume (List of Publications of the Agriculture Department, 1862–1902, with analytical index, 623 pp.) has been published since July 1.

CATALOGUE SECTION.

There were received for cataloguing during the fiscal year 16,791 documents. Thirty-eight thousand four hundred and forty-five items of Congressional mail were received, and 84,655 cards were written. Two thousand one hundred and twenty pages of the publications of the office issued during the year were prepared in the Catalogue Section.

PUBLIC DOCUMENTS LIBRARY.

In December, 1903, the Library was moved from the Union Building to larger quarters in the old Government Printing Office building with no loss and little damage. The immediate pressure for shelf room to accommodate the constantly incoming flood of new publications has been somewhat relieved by using packing boxes set on edge as substitutes for shelves. Such a subterfuge can, of course, be of only temporary service. Four thousand four hundred volumes of Congressional documents, a complete set from 1817 to 1903, are thus accommodated at present.

During the year the Library has very nearly completed the longest and largest series ever issued by the Government, namely, the bound volumes of the Specifications and Drawings of the Patent Office. The first issue is dated May 30, 1871, and the total number of volumes published up to the close of the fiscal year 1903 is 646. The books are very large, many of them containing more than 3,000 pages. They were issued for a short time weekly, then monthly; then the monthly issue was split into two volumes, and beginning with January, 1903, the issue is proceeding at the rate of three volumes a month. Of the 646 volumes thus far issued the Library has 644, the two missing issues being those for August, 1872, and May, 1880. These it would be glad to secure by exchange for other documents.

The set of Congressional Directories is approaching completion. The total number now in the Library is 170. The earliest one is for the Seventeenth Congress, first session (1821). Of the 43 Congresses which have held 93 sessions since that date, every Congress and every session but four are represented. For two of the unrepresented sessions (34th, 2d, and 37th, 1st), it does not appear that any directories were printed. The two missing sessions for which directories were printed are the 18th, 2d, and the 23d, 2d. The Library would be glad to secure copies of the directories for these sessions in exchange for other documents. Other possible gaps in the collection are of second or third editions, which may have been printed for sessions now represented only by first editions, but these, if they exist at all,

can be but very few. On the whole, the conclusion seems to be justified that hardly more than a dozen numbers are needed to make up a complete collection of Congressional Directories so far as they are known to exist. The earliest issue extant is for the Eleventh Congress (1809). It is in the Library of Congress.

This Library has often been able to supply for the use of officials and investigators public documents that had been unsuccessfully sought elsewhere. A couple of instances may be cited as typical of many.

The Industrial Commission of 1898–1902 was very desirous to find the printed reports of the evidence taken by the House Committee on Agriculture in 1892 during the consideration of certain bills by which it was proposed to restrict and tax such fictitious dealings in agricultural products as are carried on by means of "options," "futures," "puts," "calls," and the like forms of commercial gambling. The Commission had a man out for weeks searching the document collections at the Capitol and elsewhere. Finally he found in this Library what is, so far as known, the only existing copy of the several hundred pages of evidence collected and printed in 1892.

In Hon. George S. Boutwell's "Reminiscences of Sixty Years in Public Affairs," published in 1902, he says of the Joint Committee on Reconstruction (1865–1867), of which he was a member: "A record of its proceedings was kept which was printed recently by order of the Senate" (v. 2, p. 36). This statement came to the attention of a Boston author who is writing a history of the period during which the committee was in existence. As the committee was made up of very prominent men, as it framed the fourteenth amendment to the Constitution, as its proceedings had been held in confidence during the life of the committee, and as the journal of its proceedings might be expected to show the propositions tentatively submitted and the votes of the members upon them, it was evidently a document of more than usual historical interest. Early in 1904 a call was made on the great libraries of Boston and vicinity for the desired document. Search was made on the basis of Mr. Boutwell's statement of 1902 that it had been printed "recently." To the surprise of all concerned the document was not found. After much unavailing search, Mr. Boutwell was appealed to, in the hope that he might fix the date of publication more definitely than by the word "recently." He replied that he thought the committee's journal had been printed "about 1880." Further search based on the date given by Mr. Boutwell was still unavailing. Then the inquiry was extended to Washington, and was active and widespread, but not till it came to the Public Documents Library was it successful. The document was ordered printed by simple resolution of the Senate adopted February 26, 1884, and is of 49 pages only. The number of copies ordered to be printed was 6,000. This number having been issued only twenty years ago, it is most unlikely that the copy in the Documents Library is the only one in existence, yet it is certain that the document could not be found in many of the larger libraries of the country nor in the official depositories of public documents in Washington.

Both these instances, with others that could be cited, demonstrate the need of additional legislation to secure the preservation of the numerous publications of Congress and of Congressional committees which are not included in either of the numbered series of Congressional documents. For the numbered series there is ample provision. They are supplied to the principal libraries throughout the country in bound form, and are in most cases carefully preserved. According to law, the Journal of the Joint Committee on Reconstruction should have been made a numbered document. Had the law been complied with in this respect the journal would have been preserved; but for preserving the numerous and often important hearings which are printed on the order of the committees of Congress, like the "Fictitious dealing in agricultural products" mentioned on a preceding page, there is no legal provision whatever. They are not regularly supplied to any place where documents are pre-

served, not even to the libraries or document rooms of the Senate and House, nor to the Public Documents Library. Thousands upon thousands of pages of such hearings and other proceedings of and before committees are annually printed, of which probably not a quarter reach any custody where they will be preserved for future reference. The Public Documents Library collects as many of them as it can through the courtesy of the chairmen and clerks of committees, but the need is keenly felt of legal requirement to secure the supply of these public documents as fully and regularly as public documents of other classes. Twice Congress has enacted legislation intended by its promoters to secure the delivery and preservation of committee publications, but in both cases it has proved inoperative.

The following table shows the numerical strength of the Library in documents and maps at the close of the fiscal year 1904, and also its growth during that year:

Additions and totals for the year.

Government authors and publishing offices.	In Library June 30, 1904.		Increase from June 30, 1903.	
	Documents.	Maps.	Documents.	Maps.

	57,649	8,177	5,677	700
	65,826		6,377	

NOTES.—(1) The Fish Commission and the Labor Department, both formerly independent bureaus, were incorporated with the Commerce and Labor Department July 1, 1903, and their publications of later date are credited to that Department. (2) The publications of the American Historical Association, the Daughters of the American Revolution, and the Ethnology Bureau are entered as of the Smithsonian Institution. (3) The publications of the Philippine Commission are entered as of the War Department. (4) The publications attributed to the Government Printing Office were nearly all compiled in the Office of the Superintendent of Documents.

DOCUMENTS RECEIVED, DISTRIBUTED, AND SOLD, 1895–1904.

Attention is invited to the following table, which shows the enormous increase in this branch of the work of the Documents Office:

Documents.

Year.	Received.	Distributed.	Sold.	Amount.
[illegible]	486,871	185,900	3,581	$889.09
[illegible]	413,104	368,238	17,638	4,016.15
[illegible]	634,208	537,630	21,363	4,537.27
[illegible]	604,196	687,727	26,808	7,556.11
[illegible]	674,714	706,595	27,903	8,900.21
[illegible]	750,495	689,812	33,585	9,082.60

—— 121 [and amendments 1–10]; regulations to prevent spread of splenetic fever of cattle. Jan. 14 [–16], 1904. 16 p. 8°

Indian corn in Argentina, production and export; by Frank W. Bicknell. 1903. 48 p. 4 pl. 3 maps, 8° (Report 75.)

Methods and benefits of growing sugar beets. [Mar. 29, 1904.] 27 p. 8° (Circular 11.)

Progress of beet-sugar industry in United States in 1902. 1903. 221 p. 65 il. 5 pl. 8° (Report 74.)

Alaskan Fisheries, Division of (Department of Commerce and Labor). Report on salmon fisheries of Alaska, 1903; by Howard M. Kutchin. 1904. 47 p. 8° (Dept. of Commerce and Labor Doc. 12.)

Animal Industry, Bureau of (Department of Agriculture).

Animal industry of Argentina; by Frank W. Bicknell. 1903. 72 p. 16 pl. 8° (Bulletin 48.)

Available energy of timothy hay, investigations with respiration calorimeter, in cooperation with Pennsylvania State College Agricultural Experiment Station; by Henry Prentiss Armsby and J. August Fries. 1903. 77 p. 6 pl. 8° (Bulletin 51.)

Animal Industry, Bureau of—Continued.

Cold curing of cheese, report upon experiments conducted under auspices of Dairy Division in cooperation with Wisconsin Agricultural Experiment Station and New York Agricultural Experiment Station; by S. M. Babcock and H. L. Russell, assisted by U. S. Baer, and L. L. Van Slyke, G. A. Smith, and E. B. Hart. 1903. 88 p. 22 il. 4 pl. 8° (Bulletin 49.)

Digestion experiments with poultry [with bibliography]; by E. W. Brown. 1904. 112 p. 6 pl. 8° (Bulletin 56.)

Form of hog cholera not caused by hog-cholera bacillus. Oct. 1, 1903. 4 p. 8° (Circular 41.)

German meat regulations [translated by Annette M. Dye], with original text. 1903. 51 p. 8° (Bulletin 50.)

Horseshoeing; by John W. Adams. 1903. 31 p. 18 il. 8° (Farmers' Bulletin 179.)

Index-catalogue of medical and veterinary zoology, pt. 4, authors, D–Dziembowski; by Ch. Wardell Stiles and Albert Hassall. 1903. p. 325–403, 8° (Bulletin 39 [pt. 4].)

—— pt. 6, authors, F–Fynney; by Ch. Wardell Stiles and Albert Hassall. 1904. p. 437–510, 8° (Bulletin 39 [pt. 6].)

Information concerning common goats. Oct. 1, 1903. 14 p. 8° (Circular 42.)

Laws, Federal, State, and Territorial, relating to contagious and infectious diseases of animals, 1902 and 1903. 1904. 46 p. 8° (Bulletin 54.)

Marketing live stock; by Charles S. Plumb. 1903. 40 p. 8° (Farmers' bulletin 184.)

Meat on farm, butchering, curing, and keeping; by Andrew Boss. 1903. 39 p. 35 il. 8° (Farmers' bulletin 183.)

Milk fever, its simple and successful treatment. [May 18, 1904.] 13 p. 2 il. 8° (Circular 45.)

Reports on bovine tuberculosis and public health [with bibliography]; by D. E. Salmon. 1904. 63 p. 8° (Bulletin 53.)

Scab in sheep; by D. E. Salmon and Ch. Wardell Stiles. 1903. 48 p. 17 il. 8° (Farmers' bulletin 159.)

Squab raising; by William E. Rice. 1903. 32 p. 11 il. 8° (Farmers' bulletin 177.)

Takosis, contagious disease of goats, preliminary report on its nature, cause, and prevention [with bibliography]; by John R. Mohler and Henry J. Washburn. 1903. 44+[2] p. 5 pl. 8° (Bulletin 45.)

Astrophysical Observatory (Smithsonian Institution). 1900 solar eclipse expedition of observatory; by S. P. Langley, aided by C. G. Abbot. 1904. 26 p. 22 pl. 4° ([Smithsonian Institution publication] 1439.)

Biochemic Division (Bureau of Animal Industry, Department of Agriculture). Immunization from hog cholera. Feb. 12, 1904. 3 p. 8° (Animal Industry, Bureau of. Circular 43.)

Biological Survey, Division of (Department of Agriculture).

Bird Day in schools. [July 2, 1896, reprint 1904.] 5 p. 8° (Circular 17.)

Circular [requesting cooperation in collection of data on migration of night-hawk, cat-bird, king-bird, red-eyed vireo, and redstart]. Jan. 26, 1904. 1 p. 8° (Circular 41.)

Directory of State officials and organizations concerned with protection of birds and game, 1903. Sept. 8, 1903. 12 p. 8° (Circular 40.)

Game laws for 1903, summary of provisions relating to seasons, shipment, sale, and licenses; by T. S. Palmer, Henry Oldys, and R. W. Williams, jr. 1903. 56 p. 5 il. 8° (Farmers' bulletin 180.)

Importation of game birds and eggs for propagation; by T. S. Palmer and Henry Oldys. 1904. 30 p. 1 il. 8° (Farmers' bulletin 197.)

Index generum mammalium, list of genera and families of mammals [with bibliography]; by T. S. Palmer. Jan. 23, 1904. 984 p. 8° (North American fauna 23.)

Regulations for protection of game in Alaska [1903]. Aug. 22, 1903. 6 p. 8° (Circular 39.)

—— 1904. June 4, 1904. 6 p. 8° (Circular 42.)

Cavalry and Field Artillery, School of Application for (Adjutant-General, Army, War Department). Army horse in accident and disease [with bibliography]; by Alexander Plummer and Richard H. Power. 1903. 91 p. 12°

Census Office (Interior Department).

12th census of United States, 1900, special reports, employees and wages; by Davis R. Dewey. 1903. cxv+1228 p. 4°

—— statistical atlas; Henry Gannett, geographer. 1903. 91 p. 59 pl. 84 p. of pl. 64 maps, 4°

Chemistry, Bureau of (Department of Agriculture).

Adulterated drugs and chemicals: Inferior drugs and insidious methods of deception, Rose geranium oil and its substitutes, Phenacetin, methods of analysis and commercial status; by Lyman F. Kebler. 1904. 47 p. 8° (Bulletin 80.)

Food definitions and standards; prepared by committee on food standards, Association of Official Agricultural Chemists. [1903.] 10 p. 8°

Foods and food control, 1, legislation during year ended July 1, 1903; by W. D. Bigelow. 1904. 157 p. 8° (Bulletin 83, pt. 1.)

—— 6, digest and index of food legislation to July 1, 1902; by W. D. Bigelow. 1904. v+463-503 p. 8° (Bulletin 69, pt. 6.)

Influence of environment upon composition of sugar beet [during] 1902, including study of irrigation sections; by Harvey W. Wiley. 1903. 50 p. 5 il. 8° (Bulletin 78.)

Insecticide studies: Pyrethrum powders containing poisonous metals, Compilation of analyses of insecticides and fungicides, State laws governing composition and sale of insecticides; by J. K. Haywood. 1903. 63 p. 8° (Bulletin 76.)

Olive oil and its substitutes; by L. M. Tolman and L. S. Munson. 1903. 64 p. 2 pl. 8° (Bulletin 77.)

Paris green spraying experiments; by J. K. Haywood. 1904. 32 p. 2 pl. 8° (Bulletin 82.)

Proceedings of 20th annual convention of Association of Official Agricultural Chemists, Washington, D. C., Nov. 19-21, 1903; edited by Harvey W. Wiley. 1904. 252 p. 8° (Bulletin 81.)

Publications of bureau. Aug. 1, 1903. 7 p. 8°

Standards of purity for food products. Nov. 20, 1903. 13 p. 8° (Agriculture, Dept. of. Circular 10.)

Summary of pure-food laws of foreign countries affecting American exports. [1903.] 2 p. 8°

Coast and Geodetic Survey (Commerce and Labor Department).

Report on geodetic operations in United States to 14th conference of International Geodetic Association [Copenhagen, Denmark, Aug. 4- , 1903]; by O. H. Tittmann. 1903. 28 p. map, 4°

United States coast pilot, Atlantic Coast, pts. 1, 2, St. Croix River to Cape Ann. 2d edition. 1903. 243+xii+[i] p. 3 maps, large 8°

—— Atlantic Coast; pt. 3, Cape Ann to Point Judith. 2d edition. 1903. 199+ix p. 1 pl. 2 maps, large 8°

—— Pacific Coast, California, Oregon, and Washington. 1903 [1904]. 215+ix p. 6 maps, large 8°

Comptroller of the Treasury (Treasury Department). Decisions, v. 9, 1903, containing decisions by Robert J. Tracewell and Leander P. Mitchell. 1903. xiii+919 p. 8°

Congress.

54th Congress, 2d session. House documents, v. 76. No. 355; Document catalogue, 1896. (Serial no. 3552.)

55th Congress, 2d session. House documents, v. 87. No. 586; Document index. (Serial no. 3716.)

56th Congress, 1st session. Senate documents, v. 7, pt. 2. No. 60; History of United States capitol, v. 2. (Serial no. 3849, pt. 2.)

—— —— v. 47. No. 138; Atlas of Philippine Islands. (Serial no. 3885, v. 4.)

Congressional record, proceedings and debates of 57th Congress, 2d session, v. 36 [pt. 1; Dec. 1, 1902–Jan. 22, 1903]. 1903. [3] + 1–1088 p. 4°

—— v. 36 [pt. 2; Jan. 22–Feb. 14, 1903]. 1903. [3] + 1089–2176 p. il. 4°

—— v. 36 [pt. 3; Feb. 14–Mar. 4, 1903, with appendix]. 1903. [3] + 2177–3078 + 210 p. il. 4°

—— v. 36 [index to pts. 1–3, including History of bills and joint resolutions]. 1903. 268 + 146 p. 4°

Congressional record, proceedings and debates of 58th Congress, 1st session [Nov. 9–Dec. 7, 1903]; also special session of Senate [Mar. 5–19, 1903; with appendix and index, including History of bills and joint resolutions]. 1903 [1904]. v. 37, [1] + 552 + 207 + 192 p. 4°

58th Congress, extraordinary session, official Congressional directory; by A. J. Halford. Special edition, corrections to Nov. 5, 1903. xix + 417 p. il. 1 pl. map, 8°

58th Congress, 2d session, official Congressional directory; by A. J. Halford. 2d edition, corrections to Jan. 21, 1904. xix + 447 p. il. 1 pl. map, 8°

—— 3d edition, corrections to Apr. 1, 1904. 1904. xix + 447 p. il. 1 pl. map, 8°

Copyright Office (Library of Congress).

Copyright in Canada and Newfoundland, rules and forms for copyright registration in Canada, with copyright laws of Canada, Newfoundland, New Brunswick, Nova Scotia, and Prince Edward Island; by Thorvald Solberg. 1903. 126 p. 8° (Bulletin 6.)

Copyright in England, instructions for registration for copyright protection within British dominions, 2d edition; added, Digest of English copyright law by Sir James Stephen, Copyright acts from 1875 to date [and List of all copyright enactments, 1709–1902, with notations of modifications, amendments, repeals, etc.]; from official documents: by Thorvald Solberg. 1902. 101 p. 8° (Bulletin 5.) [1st edition was issued as Bulletin 4, pt. 2.]

Court of Claims. Cases decided at term of 1902–3, with abstracts of decisions of Supreme Court in appealed cases, Oct. 1902–May, 1903; reported by Charles C. Nott and Archibald Hopkins. 1903. v. 38, xxi + 789 p. 8°

Dairy Division (Bureau of Animal Industry, Department of Agriculture).

Fat testing of cream by Babcock method; by Ed. H. Webster. 1904. 29 p. 1 il. 2 pl. 8° (Animal Industry, Bureau of. Bulletin 58.)

International Dairy Federation and international dairy congresses [and expositions]. Apr. 15, 1904. 14 p. 8° (Animal Industry, Bureau of. Circular 46.)

Milk supply of 200 cities and towns; by Henry E. Alvord and R. A. Pearson. 1903. 210 p. 8° (Animal Industry, Bureau of. Bulletin 46.)

Officials, associations, and educational institutions connected with dairy interests of United States for 1904. Mar. 11, 1904. 12 p. 8° (Animal Industry, Bureau of. Circular 44.)

Statistics of dairy, from Census, 1900, and other sources, with explanatory notes; by Henry E. Alvord. 1903 [1904]. 88 p. 3 pl. 6 maps. 8° (Animal Industry, Bureau of. Bulletin 55.)

Documents, Superintendent of (Government Printing Office).

9th annual report of superintendent of documents, 1903. 1903. 64 p. 8°

Author headings for United States public documents. 1903. l. 3–21. 8°

Catalogue of public documents of 56th Congress and of other departments of Government, 1899–1901. 1903. [v. 5] 1105 p. large 8°

[Printed catalogue cards for United States public documents, sets 1–46.]

—— sets 47–108.

—— sets 109–181.

Entomology, Division of (Department of Agriculture).

Brief account of principal insect enemies of sugar beet; by E. H. Chittenden. 1903. 71 p. 65 il. 8° (Bulletin 43.)

Catalogue of exhibit of economic entomology at Louisiana Purchase Exposition, St. Louis, Mo. 1904; by E. S. G. Titus and F. C. Pratt. 1904. 155 p. 8° (Bulletin 47.)

Codling moth [with bibliography]; by C. B. Simpson. 1903. 105 p. 19 il. 15 pl. map, 8° (Bulletin 41.)

Cotton boll-worm, account of insect, with results of experiments in 1903; by A. L. Quaintance. 1904. 24 p. 7 il. 8° (Farmers' bulletin 191.)

Important insecticides, directions for their preparation and use; by C. L. Marlatt. Revised edition. Aug. 1903. 46 p. 6 il. 8° (Farmers' bulletin 127 [revision of 19].)

Information concerning Mexican cotton boll weevil; by W. D. Hunter. 1904. 31 p. 8 il. 8° (Farmers' bulletin 189.)

Insects injurious in cranberry culture; by John B. Smith. 1903. 32 p. 12 il. 8° (Farmers' bulletin 178.)

Lime, sulphur, and salt wash [as remedy for San Jose scale in the East]; by C. L. Marlatt. [Mar. 18, 1904.] 8 p. 8° (Circular 52, 2d edition.)

Peach-tree borer, sannina exitiosa Say; by C. L. Marlatt. [Oct. 19, 1903.] 6 p. 1 il. 8° (Circular 54.)

Pear-tree psylla, psylla pyricola Foerst. [May 1, 1895.] 8 p. 6 il. 8° (Circular 7, 2d series.)

Powder-post injury to seasoned wood products; by A. D. Hopkins. [Nov. 20, 1903.] 5 p. 1 il. 8° (Circular 55.)

Proceedings of 16th annual meeting of Association of Economic Entomologists. 1904. 113 p. 1 il. 2 pl. 8° (Bulletin 46.)

Some insects attacking stems of growing wheat, rye, barley, and oats, with methods of prevention and suppression; by F. M. Webster. 1903. 62 p. 15 il. 8°. (Bulletin 42.)

Some miscellaneous results of work of division, 7. 1904. 99 p. 19 il. 1 pl. 8° (Bulletin 44.)

Squash-vine borer, melittia satyriniformis Hbn.; by F. H. Chittenden. [Nov. 19, 1903.] 6 p. 2 il. 8° (Circular 38, revised edition.)

Striped cucumber beetle, diabrotica vittata Fab.; by F. H. Chittenden. [June 9, 1903.] 6 p. 2 il. 8° (Circular 31, revised edition.)

Use of hydrocyanic acid gas for fumigating greenhouses and cold frames. [Oct. 2, 1903.] 10 p. 3 il. 8° (Circular 37, revised edition.)

Usefulness of American toad; by A. H. Kirkland. 1904. 16 p. 8° (Farmers' bulletin 196.)

Experiment Stations, Office of (Department of Agriculture).

Acquirement of water rights in Arkansas Valley in Colorado; by J. S. Greene. 1903. 83 p. 1 il. map, 8° (Bulletin 140.)

American system of agricultural education; by A. C. True and Dick J. Crosby. 1904. 21 p. 8 pl. 8° ([Publication] 706.)

Barnyard manure; by W. H. Beal. 1904. 32 p. 4 il. 8° (Farmers' bulletin 192, revision of 21.)

Constitution of Association of American Agricultural Colleges and Experiment Stations, as amended at 17th annual convention of association, Washington, D. C., Nov. 17–19, 1903. [Dec. 10, 1903.] 4 p. 8° (Circular 56.)

Experiment Station, Office of—Continued.

Dietary studies in Boston and Springfield, Mass., Philadelphia, Pa., and Chicago, Ill., by Lydia Southard, Ellen H. Richards, Susannah Usher, Bertha M. Terrill, and Amelia Shapleigh; edited by R. D. Milner. 1903. 103 p. 8° (Bulletin 129.)

Drainage of farm lands; by C. G. Elliott. 1904. 40 p. 19 il. 8° (Farmers' bulletin 187.)

Egyptian irrigation, study of irrigation methods and administration in Egypt; by Clarence T. Johnston. 1903. 100 p. 9 il. 18 pl. 7 maps, 8° (Bulletin 130.)

Experiments on losses in cooking meat, 1900–03; by H. S. Grindley and Timothy Mojonnier. 1904. 95 p. 8° (Bulletin 141.)

Experiments on metabolism of matter and energy in human body, 1900–02; by W. O. Atwater and F. G. Benedict, with A. P. Bryant, R. D. Milner, and Paul Murrill. 1903. 357 p. 14 il. 1 pl. 8° (Bulletin 136.)

Experiment station record, v. 14, no. 11; July, 1903. x+1037–1140 p. 8°

—— v. 14, no. 12; Aug. 1903. 1903. xviii+1141–1249 p. 8°

—— v. 15, no. 1; Sept. 1903. 1903. x+1–104 p. 4 il. 1 pl. 8°

—— v. 15, no. 2; Oct. 1903. 1903. viii+105–208 p. 8°

—— v. 15, no. 3; Nov. 1903. 1903. x+209–316 p. 3 il. 8°

—— v. 15, no. 4; Dec. 1903. 1903. x+317–420 p. 8°

—— v. 15, no. 5; Jan. 1904. 1904. viii+421–532 p. 8°

—— v. 15, no. 6; Feb. 1904. 1904. ix+533–632 p. 8°

—— v. 15, no. 7; Mar. 1904. 1904. x+633–736 p. 2 il. 1 pl. 8°

—— v. 15, no. 8; Apr. 1904. 1904. x+737–838 p. 8°

—— v. 15, no. 9; May, 1904. 1904. x+839–942 p. 8°

Experiment station work 23. 1904. 32 p. 9 il. 8° (Farmers' bulletin 186.)

—— 24. 1904. 32 p. 14 il. 8° (Farmers' bulletin 190.)

—— 25. 1904. 32 p. 9 il. 8° (Farmers' bulletin 193.)

—— v. 2, no. 3. 1904. iv+57–84 p. 9 il. 8°

—— v. 2, no. 4. 1904. iv+85–112 p. 14 il. 8°

Few good books and bulletins on nature study, school gardening, and elementary agriculture for common schools; by D. J. Crosby. [Nov. 13, 1903.] 4 p. 8° (Circular 52.)

Functions and uses of food; by C. F. Langworthy. [Oct. 6, 1903.] 10 p. 8° (Circular 46 revised.)

Further investigations among fruitarians at California Agricultural Experiment Station, 1901–02; by M. E. Jaffa. 1903. 81 p. 8° (Bulletin 132.)

Instruction in agronomy at some agricultural colleges; by A. C. True and D. J. Crosby. 1903. 85 p. 22 il. 17 pl. 8° (Bulletin 127.)

Irrigation in valley of Lost River, Idaho; by Albert Eugene Wright. [May 10, 1904.] 24 p. 8° (Circular 58.)

Legislation relating to farmers' institutes in United States and Ontario, Canada; by John Hamilton. 1903. 53 p. 8° (Bulletin 135.)

List of publications of office on food and nutrition of man. Oct. 15, 1903. 11 p. 8° ([Publication] 238 revised [8th edition].)

List of publications of office on irrigation. Nov. 15, 1903. 7 p. 8° ([Publication] 358 revised.)

List of State directors of farmers' institutes and farmers' institute lecturers of United States; by John Hamilton. 1903. 23 p. 8° (Circular 51.) [Interleaved.]

List of station publications received by office during Nov. and Dec. 1903. [Jan. 1, 1904.] 7 p. 8° ([Publication] 646.)

—— during Jan. and Feb. 1904. [Mar. 1, 1904.] 8 p. 8° ([Publication] 652.) [Bimonthly.]

—— during Mar. and Apr. 1904. [May 1, 1904.] 11 p. 8° ([Publication] 662.)

Organization lists of agricultural colleges and experiment stations in United States. Dec. 1903. 100 p. 8° (Bulletin 137.)

Experiment Station, Office of—Continued.

Plans of structures in use on irrigation canals in United States from drawings exhibited by office at Paris in 1900 and at Buffalo in 1901. 1903. 51 p. 22 il. oblong 8° (Bulletin 131.)

Poultry as food; by Helen W. Atwater. 1903. 40 p. 8° (Farmers' bulletin 182.)

Proceedings of 8th annual meeting of American Association of Farmers' Institute Workers, Toronto, Ontario, June 23-26, 1903; edited by W. H. Beal and G. C. Creelman. 1903. 119 p. 8° (Bulletin 138.)

Proceedings of 17th annual convention of Association of American Agricultural Colleges and Experiment Stations, Washington, D. C., Nov. 17-19, 1903; edited by A. C. True, W. H. Beal, and H. C. White. 1904. 196 p. 3 il. 8° (Bulletin 142.)

Relation of natural sciences to agriculture in 4-year college course. [Nov. 27, 1903.] 15 p. 8° (Circular 55.)

Report of committee on indexing agricultural literature, presented to Association of American Agricultural Colleges and Experiment Stations, Nov. 1903. [Nov. 20, 1903.] 2 p. 8° (Circular 54.)

Report of committee on rural engineering, presented to Association of American Agricultural Colleges and Experiment Stations, Nov. 1903. [Nov. 20, 1903.] 10 p. 8° (Circular 53.)

Report of irrigation investigations for 1902 under direction of Elwood Mead; containing reports by E. R. Morgan [and others]. 1903. 266 p. 16 il. 9 pl. 3 maps, 8° (Bulletin 133.)

Special and short courses in agricultural colleges; by D. J. Crosby. 1903. 59 p. 8° (Bulletin 139.)

Storage of water on Cache la Poudre and Big Thompson rivers; by C. E. Tait. 1903. 100 p. 10 il. 4 pl. map, 8° (Bulletin 134.)

Studies on digestibility and nutritive value of bread at Maine Agricultural Experiment Station, 1899-1903; by C. D. Woods and L. H. Merrill. 1904. 77 p. 8° (Bulletin 143.)

Supplemental report on drainage in Fresno district, Cal.; by G. C. [C. G.] Elliott. [Jan. 7, 1904.] 4 p. 1 il. 8° (Circular 57.)

Foreign Markets, Division of (Statistics Bureau, Department of Agriculture).

Agricultural imports of Germany, 1897-1901; by Frank H. Hitchcock. 1903. 323 p. 8° (Bulletin 30.)

Belgium's foreign trade in agricultural products for 1902. Mar. 31, 1903. 8 p. 8° (Circular 26.)

Distribution of agricultural exports of United States, 1898-1902; by Frank H. Hitchcock. 1903. 224 p. 8° (Bulletin 32.)

Foreign import tariffs on fruits and nuts, 1903; by Frank H. Hitchcock. 1903 [1904]. 69 p. 8° (Bulletin 36.)

Foreign import tariffs on grain and grain products, 1903; by Frank H. Hitchcock. 1903 [1904]. 59 p. 8° (Bulletin 37.)

Foreign import tariffs on meat and meat products, 1903; by Frank H. Hitchcock. 1903 [1904]. 64 p. 8° (Bulletin 35.)

Foreign trade in farm and forest products, 1903. Dec. 17, 1903, 20 p. 8° (Statistics, Bureau of. Circular 15.)

Foreign trade of United States in forest products, 1902; by Frank H. Hitchcock. 1903. 72 p. 8° (Bulletin 33.)

Sources of agricultural imports of United States, 1898-1902; by Frank H. Hitchcock. 1903. 150 p. 8° (Bulletin 31.)

Forestry, Bureau of (Department of Agriculture).

Cross-tie forms and rail fastenings, with special reference to treated timbers; by Hermann von Schrenk. 1904. 70 p. 71 il. 5 pl. 8° (Bulletin 50.)

Diminished flow of Rock River in Wisconsin and Illinois, and its relation to surrounding forests; by G. Frederick Schwarz. 1903. 27 p. 4 pl. 2 maps, 8° (Bulletin 44.)

Forest fires in Adirondacks in 1903; by H. M. Suter. [Feb. 27, 1904.] 15 p. map, 8° ([Circular 26.])

Forestry, Bureau of—Continued.

Forestry and lumber supply. [1903.] 14 p. 8° ([Circular 25.])

Notes on forest trees suitable for planting in United States, black cherry, prunus serotina. [1903.] 4 p. 8°

—— black walnut, juglans nigra. [1903.] 6 p. 8°

—— European larch, larix Europæa. [1903.] 4 p. 8°

—— Norway spruce, picea excelsa. [1903.] 4 p. 8°

—— white ash, fraxinus Americana. [1903.] 4 p. 8°

—— white oak, quercus alba. [1903.] 4 p. 8°

Planting of white pine in New England; by Harold B. Kempton. 1903 [1904]. 40 p. 2 il. 13 pl. 8° (Bulletin 45.)

Practical assistance to farmers, lumbermen, and others in handling forest lands. [July 1, 1903.] 5 p. 8° (Circular 21 revised.)

—— [Apr. 2, 1904.] 4 p. 8° (Circular 21, [2d] revised edition.)

Practical assistance to tree planters. [Mar. 18, 1904.] 3 p. 8° (Circular 22, 2d revision.)

Practical assistance to users of forest products. [1904.] 2 p. 8° (Circular 28.)

Primer of forestry; by Gifford Pinchot. 1903. 48 p. 33 il. 8° (Farmers' bulletin 173.) [Republication, with alterations, of pt. 1 of Forestry Division bulletin 24.]

Reclamation of flood-damaged lands in Kansas River Valley by forest planting. [Mar. 10, 1904.] 5 p. 1 il. 8° (Circular 27.)

Seasoning of timber; by Hermann von Schrenk, assisted by Reynolds Hill. 1903. 48 p. 16 il. 18 pl. large 8° (Bulletin 41.)

Suggestions to prospective forest students. [Mar. 12, 1904.] 5 p. 8° (Circular 23, revised edition.)

Working plan for forest lands in Hampton and Beaufort counties, S. C.; by Thomas H. Sherrard. 1903. 54 p. 11 il. 12 pl. map, 8° (Bulletin 43.)

Geological Survey (Department of the Interior).

Geologic atlas of United States, Alexandria folio, S. Dak. Library edition. 1903. 6 p. 8 il. 3 maps, large 4° (Folio 100.)

—— Brownsville-Connellsville folio, Pa. Library edition. 1903. 19 p. 3 il. 4 pl. 8 maps, large 4° (Folio 94.)

—— Columbia folio, Tenn. Library edition. 1903. 6+[4] p. 1 il. 3 pl. 4 maps, large 4° (Folio 95.)

—— Cranberry folio, N. C.-Tenn. Library edition. 1903. 9 p. 1 pl. 4 maps, large 4° (Folio 90.)

—— Elkland-Tioga folio, Pa. Library edition. 1903. 9 p. 4 il. 2 pl. 8 maps, large 4° (Folio 93.)

—— Gaines folio, Pa.-N. Y. Library edition. 1903. 9 p. 6 il. 2 pl. 4 maps, large 4° (Folio 92.)

—— Hartville folio, Wyo. Library edition. 1903. 6 p. 3 pl. 3 maps, large 4° (Folio 91.)

—— Indiana folio, Pa. Library edition. 1904. 7 p. 13 il. 3 pl. 3 maps, large 4° (Folio 102.)

—— Mitchell folio, S. Dak. Library edition. 1903. 7 p. 10 il. 3 maps, large 4° (Folio 99.)

—— Nampa folio, Idaho-Oreg. Library edition. 1904. 5 p. 4 il. 2 maps, large 4° (Folio 103.)

—— Olivet folio, S. Dak. Library edition. 1903. 6 p. 7 il. 3 maps, large 4° (Folio 96.)

—— Parker folio, S. Dak. Library edition. 1903. 6 p. 7 il. 3 maps, large 4° (Folio 97.)

—— Silver City folio, Idaho. Library edition. 1904. 6 p. 3 maps, large 4° (Folio 104.)

—— Tishomingo folio, Ind. T. Library edition. 1903. 8 p. 1 il. 1 pl. 3 maps, large 4° (Folio 98.)

Hawaii Agricultural Experiment Station (Office of Experiment Stations, Department of Agriculture). Insecticides for use in Hawaii; by D. L. Van Dine. 1904. 21 p. 7 il. 1 pl. 8° (Bulletin 3 [revised].)

Hydrographic Office (Equipment Bureau, Navy Department). American practical navigator, epitome of navigation and nautical astronomy, by Nathaniel Bowditch; revised in 1880 under direction of Bureau of Navigation by P. H. Cooper, revised in 1903 under direction of Bureau of Equipment by G. W. Logan. 1903. 652 p. 67 il. large 8° ([Publication] 9.)

Hygienic Laboratory (Public Health and Marine-Hospital Service, Treasury Department).

Antiseptic and germicidal properties of glycerin; by M. J. Rosenau. Sept. 1903. 30 p. 8° (Bulletin 16.)

Experimental investigation of trypanosoma Lewisi [with bibliography]; by Edward Francis. Feb. 1903. 34 p. 4 pl. 8° (Bulletin 11.)

Spotted fever, tick fever, of Rocky Mountains, new disease; by John F. Anderson. July, 1903. 50 p. 3 il. 6 pl. 2 maps, 8° (Bulletin 14.) [There are no pages 45 and 46, and plate numbered 3 should precede, rather than follow, page 48.]

Statistical study of intestinal parasites of 500 white male patients at Government Hospital for Insane, by Philip E. Garrison, Brayton H. Ransom, and Earle C. Stevenson; Parasitic roundworm, gamomermis culicis n. g., n. sp., in American mosquitoes, culex sollicitans, by Ch. Wardell Stiles; Type species of cestode genus hymenolepis, by Ch. Wardell Stiles. May, 1903. 23 p. 8° (Bulletin 13.)

Insular Affairs, Bureau of (War Department). Primer and vocabulary of Moro dialect, Magindanau; by R. S. Porter. Oct. 1903. 77 p. 8°

Interior, Department of the.

Official register, list of officers and employees in civil, military, and naval service, with list of vessels belonging to United States, July 1, 1903; by chief clerk of Department. 1903. v. 1, vii+1698 p. 4°

—— 1903 [1904]. v. 2, vii+2247 p. 4°

Labor Employment, Board of (Department of Agriculture). Instructions to applicants for appointment to position of mere unskilled laborer in Department of Agriculture at Washington, D. C. Mar. 21, 1904. 3 p. 8°

Life-Saving Service (Treasury Department). Annual report, 1903. 1904. 470 p. il. 8°

Light-House Board (Department of Commerce and Labor).

Annual report to Secretary of Commerce and Labor, Oct. 15, 1903. 1903. 104 p. 2 pl. 21 maps, 8°

—— [to Secretary of Treasury], 1903. 1903. 141 p. 20 maps, 8°

Medical Department (War Department). Index-catalogue of library of Surgeon-General's Office, United States Army, authors and subjects; 2d series, v. 8, Insane-Kysthospitalet. 1903. iii+11+894 p. large 8°

Military Information Division (Adjutant-General, War Department). Notes of military interest for 1902; compiled and arranged by E. A. Edwards, J. S. Herron, H. B. Ferguson, and R. S. Clark. Jan. 1903. 492 p. il. 7 pl. 5 maps, 8° ([Publication] 38.)

Mint, Bureau of the (Treasury Department). [31st] annual report of director, 1903. 1903. 293 p. 8°

National Academy of Sciences. Report, [calendar] year 1903. 1904. 39 p. 8°

National Museum (Smithsonian Institution).

Contributions from U. S. National Herbarium, v. 8, pt. 2, economic plants of Porto Rico; by O. F. Cook and G. N. Collins. [June 27] 1903. vi+57-269 p. 2 il. 48 pl. 8°

—— v. 8, pt. 3, study of certain Mexican and Guatemalan species of polypodium; by William R. Maxon. [June 27] 1903. v+271-280 p. 2 pl. 8°

Proceedings [with bibliography]. 1903. v. 25, xiv+1021 p. il. 32 pl. 8°

—— v. 26, xv+1058 p. il. 69 pl. 8°

Nautical Almanac Office (Naval Observatory, Bureau of Equipment, Navy Department). American ephemeris and nautical almanac for 1907. 1st edition. 1903 [1904]. viii+601 p. il. 2 maps, large 8°

Navigation, Bureau of (Navy Department). List and station of commissioned and warrant officers of Navy and Marine Corps on active list, and officers on retired list on active duty, July 1, 1903. 1903. 131 p. 8°

Plant Industry, Bureau of (Department of Agriculture).

Alfalfa seed; by Edgar Brown. 1904. 14 p. 8 il. 8° (Farmers' bulletin 194.)

Annual flowering plants; by L. C. Corbett. 1904. 48 p. 55 il. 8° (Farmers' bulletin 195.)

Apple in cold storage; by G. Harold Powell and S. H. Fulton. Dec. 3, 1903. 66 p. 6 pl. 8° (Bulletin 48.)

Beautifying home grounds; by L. C. Corbett. 1904. 24 p. 8 il. 8° (Farmers' bulletin 185.)

Bitter rot [or ripe rot] of apples [with bibliography]; by Hermann von Schrenk and Perley Spaulding. July 18, 1903. 54 p. 9 il. 9 pl. 8° (Bulletin 44.)

Broom corn; by Charles P. Hartley. 1903. 32 p. 10 il. 8° (Farmers' bulletin 174.)

Cold storage, with special reference to pear and peach; by G. Harold Powell and S. H. Fulton. Sept. 18, 1903. 28 p. 7 pl. 8° (Bulletin 40.)

Cranberry culture; by L. C. Corbett. 1903. 20 p. 12 il. 8° (Farmers' bulletin 176.)

Culture of Central American rubber tree; by O. F. Cook. Oct. 1, 1903. 86 p. 18 pl. 8° (Bulletin 49.)

Date palm and its utilization in southwestern States; by Walter T. Swingle. Apr. 28, 1904. 155 p. 10 il. 19 pl. 3 maps, 8° (Bulletin 53.)

Description of wheat varieties; by Carl S. Scofield. Aug. 18, 1903. 19 p. 7 pl. 1 tab. 8° (Bulletin 47.)

Dry rot of potatoes due to fusarium oxysporum [with bibliography]; by Erwin F. Smith and Deane B. Swingle. Feb. 16, 1904. 64 p. 2 il. 8 pl. 8° (Bulletin 55.)

Forage conditions and problems in eastern Washington, eastern Oregon, northeastern California, and northwestern Nevada; by David Griffiths. July 3, 1903. 52 p. 8 pl. map, 8° (Bulletin 38.)

Formation of spores in sporangia of rhizopus nigricans and of phycomyces nitens [with bibliography]; by Deane B. Swingle. June 27, 1903. 40 p. 6 pl. large 8° (Bulletin 37.)

Fruit trees frozen in 1904; by M. B. Waite. Mar. 30, 1904. 7 p. 8° (Bulletin 51, pt. 3.)

Home manufacture and use of unfermented grape juice; by George C. Husmann. 1903. 16 p. 8 il. 8° (Farmers' bulletin 175.)

Japanese bamboos and their introduction into America; by David G. Fairchild. July 3, 1903. 36 p. 8 pl. 8° (Bulletin 43.)

Methods for controlling and reclaiming sand dunes; by A. S. Hitchcock. Mar. 10, 1904. 36 p. 9 il. 9 pl. 8° (Bulletin 57.)

Miscellaneous papers. July 18, 1903. 82 p. 6 il. 3 pl. 8° (Bulletin 25.)

Pasture, meadow, and forage crops in Nebraska; by T. L. Lyon and A. S. Hitchcock. Apr. 29, 1904. 64 p. 8 il. 6 pl. 8° (Bulletin 59.)

Persian Gulf dates and their introduction into America; by David G. Fairchild. Dec. 19, 1903. 32 p. 4 pl. 8° (Bulletin 54.)

Physiological rôle of mineral nutrients in plants; by Oscar Loew. July 18, 1903. 70 p. 8° (Bulletin 45.) [Revision of Bulletin 18, issued in 1899 by Vegetable Physiology and Pathology Division.]

Propagation of Easter lily from seed; by George W. Oliver. June 24, 1903. 24 p. 7 pl. 8° (Bulletin 39.)

Propagation of tropical fruit trees and other plants; by George W. Oliver. Aug. 8, 1903. 28 p. 8 pl. 8° (Bulletin 46.)

Pruning; by L. C. Corbett. 1903. 39 p. 25 il. 8° (Farmers' bulletin 181.)

School garden. [Feb. 25, 1904.] 6 p. 2 il. 8°

Three new plant introductions from Japan [mitsumata, udo, and wasabi]; by David G. Fairchild. June 24, 1903. 24 p. 6 pl. 8° (Bulletin 42.)

Vitality and germination of seeds [with bibliography]; by J. W. T. Duvel. May 28, 1904. 96 p. 2 il. 8° (Bulletin 58.)

Weeds used in medicine; by Alice Henkel. 1904. 47 p. 31 il. 8° (Farmers' bulletin 188.)

Wild rice, its uses and propagation; by Edgar Brown and Carl S. Scofield. Aug. 28, 1903. 24 p. 7 pl. 8° (Bulletin 50.)

Plant Industry, Bureau of—Continued.

Wilt disease of tobacco and its control; by R. E. B. McKenney. Sept. 18, 1903. 6 p. 1 il. 8° (Bulletin. 51, pt. 1)

Wither-tip and other diseases of citrous trees and fruits caused by colletotrichum glœosporioides; by P. H. Rolfs. Mar. 3, 1904. 22 p. 1 il. 6 pl. 8° (Bulletin 52.)

Work of community demonstration farm at Terrell, Tex.; by Seaman A. Knapp. Feb. 17, 1904. 8 p. 8° (Bulletin 51, pt. 2.)

Porto Rico Agricultural Experiment Station (Office of Experiment Stations, Department of Agriculture). Condition of coffee industry in Porto Rico. [Mayaguez, Jan. 2, 1904.] 2 p. 8° (Circular 2.)

Public Health and Marine-Hospital Service (Treasury Department).

Annual report of supervising surgeon-general of Marine-Hospital Service, 1901. [1903.] 652 p. il. 17 pl. map, 8°

Annual report of surgeon-general, 1902. 1903. 487 p. il. 29 pl. 8°

Transactions of 1st annual Conference of State and Territorial Health Officers with Public Health and Marine-Hospital Service, Washington, D. C., June 3, 1903. 1903. 120 p. 8°

Public Road Inquiries, Office of (Department of Agriculture).

Available publications of office. June 1, 1903. 7 p. 8°

Proceedings of National Good Roads Convention, St. Louis, Mo., Apr. 27–29, 1903. 1903. 80 p. 8° (Bulletin 26.)

Publications of office. Aug. 1, 1903. 10 p. 8°

Railroads and wagon roads. Feb. 25, 1904. 4 p. 8° (Circular 37.)

Publications, Division of (Department of Agriculture).

List of bulletins and circulars issued by Department of Agriculture and available for free distribution; corrected to Sept. 15, 1903. 31 p. 8° ([Publication] 247, 9th edition.)

Monthly list of publications [of Department of Agriculture], June, 1903. 4 p. 8° ([Publication] 464.)

—— July, 1903. 4 p. 8° ([Publication] 467.)

—— Aug. 1903. Aug. 31, 1903. 4 p. 8° ([Publication] 469.)

—— Sept. 1903. Sept. 30, 1903. 4 p. 8° ([Publication] 472.)

—— Oct. 1903. Oct. 31, 1903. 4 p. 8° ([Publication] 473.)

—— Nov. 1903. Nov. 30, 1903. 4 p. 8° ([Publication] 477.)

—— Dec. 1903. Dec. 31, 1903. 4 p. 8° ([Publication] 478.)

—— Jan. 1904. Jan. 30, 1904. 4 p. 8° ([Publication] 479.)

—— Feb. 1904. Feb. 29, 1904. 4 p. 8° ([Publication] 482.)

—— Mar. 1904. Mar. 31, 1904. 4 p. 8° ([Publication] 485.)

—— Apr. 1904. Apr. 30, 1904. 4 p. 8° ([Publication] 487.)

—— May, 1904. May 31, 1904. 4 p. 8° ([Publication] 490.)

Organization of Department of Agriculture. 1903–04. Sept. 15, 1903. 23 p. 8° (Circular 1, revised to Sept. 1, 1903.)

Road Material Laboratory (Bureau of Chemistry, Department of Agriculture). Testing of road materials, including methods used and results obtained in laboratory, in collaboration with Office of Public-Road Inquiries; by Logan Waller Page, with Allerton S. Cushman. 1903. 77 p. 10 il. 5 pl. 8° (Chemistry, Bureau of. Bulletin 79.)

Soils, Bureau of (Department of Agriculture).

Applications for reports of Field operations [of bureau, 1899–1902, to be filled by separate reprints therefrom, with list of reports and separates]. [1903.] 4 p. 8°

Chemistry of soil as related to crop production; by Milton Whitney and F. K. Cameron. 1903. 71 p. 8° (Bulletin 22.)

Reclamation of alkali land at Fresno, Cal. [Sept. 1, 1903.] 9 p. 8° (Circular 11.)

Reclamation of salt marsh lands. Oct. 1903. 10 p. 8° (Circular 8, revised edition.)

Use of alkaline and saline waters for irrigation. [July 1, 1903.] 4 p. 8° (Circular 10.)

Work of bureau. Feb. 25, 1904. 13 p. 8° (Circular 13.)

Statistics, Bureau of (Department of Agriculture).

Milk transportation, freight rates to largest 15 cities in United States; by Edward G. Ward, jr. 1903. 60 p. 8° (Bulletin 25.)

Wages of farm labor in the United States, results of 12 statistical investigations, 1866–1902; by James H. Blodgett. 1903. 62 p. 8° (Miscellaneous series, bulletin 26.)

[**War Department.**] Historical register and dictionary of Army, Sept. 29, 1789–Mar. 2, 1903; by Francis B. Heitman. Mar. 2, 1903. 2 v. 1069+626+[1] p. large 8°

Weather Bureau (Department of Agriculture).

Climatology of California; by Alexander G. McAdie. 1903. 270 p. il. 7 pl. 12 maps, 4° (Bulletin L.)

Weather folk-lore and local weather signs; by Edward B. Garriott. 1903. 153 p. 21 maps, 8° (Bulletin 33.)

Yellow Fever Institute (Public Health and Marine-Hospital Service, Treasury Department). Report of working party no. 1, study of etiology of yellow fever; by Herman B. Parker, George E. Beyer, O. L. Pothier. Mar. 1903. 48 p. 2 il. 28 pl. 8° (Bulletin 13.)

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., September 14, 1905.

SIR: I have the honor to submit herewith a detailed report of public documents sold by this office July 1, 1904, to June 30, 1905, as required by law. For your information and consideration a brief report of the work of the documents office during the fiscal year is included; also a few suggestions, which are made with a view to the improvement of the service.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Mr. OSCAR J. RICKETTS,
Acting Public Printer.

The work of the office, in all the sections, has been heavier than ever before. While the number of documents received and distributed is somewhat less than last year, a great deal of extra work has been done by the force in the documents section in arranging, sorting, and folding documents; also in collating 166,500 printed catalogue cards distributed to depository libraries and not counted as documents in the distribution.

During the fiscal year 998,198 documents were received and 902,338 were distributed or sold, a detailed statement of the receipts, distribution, and sales being appended. There was an increase of about 45 per cent in the number of documents sold and an increase of about 35 per cent in the amount received as compared with the previous fiscal year. The increase is largely due to the passage of an act authorizing the Superintendent of Documents to order documents reprinted when needed for sale.

The publications prepared and issued by this office during the fiscal year are as follows:

	Pages.
Tenth Annual Report of the Superintendent of Documents, 1904	68
Document Index (Consolidated Index), Fifty-eighth Congress, first and second sessions, in one volume	493
Monthly catalogues, June, 1904, to May, 1905, omitting the monthly cumulative indexes	683
Price list of United States Public Documents, No. 9	156
List of Publications, Agriculture Department, 1862–1902	623
List of Documents Available for Distribution to Public, School, and College Libraries	12
List of Documents Available for Distribution to Libraries	69

The Document Catalogue (Comprehensive Index) for the Fifty-seventh Congress, and all Departments of the Government, and the Document Index (Consolidated Index), Fifty-eighth Congress, third session, will be issued about December 1, 1905.

The catalogue section received 14,517 documents, 18,404 pieces of Congressional mail, wrote 65,645 cards, and prepared, edited, and supervised the publication of the Document Index and monthly catalogues in the foregoing list. Eleven of the 45 employees of the office are in this section.

The correspondence of the office was very heavy, being considerably increased by the cash orders, which exceeded by 5,000 the receipts of the previous year.

Eight thousand four hundred and twenty-six documents and 789 maps were added to the documents library during the year. The library now contains 75,041 documents, including maps and pamphlets.

PRINTED CATALOGUE CARDS.

The experiment of supplying printed catalogue cards of documents to the designated depositories has proven a great success. Librarians have been disappointed, however, because the distribution has been limited to one card for each document. They insist that they should have a card for each subject which is indicated on the card sent, and a considerable number of libraries are willing to pay for the duplicates. It has been impossible for this office to supply the duplicates free owing to the fact that at least one additional helper would be required to collate the cards, and it can not print them expressly for sale without authority from Congress. I shall therefore prepare a bill for introduction next session, which, if adopted, will enable me to have catalogue cards printed for sale upon the same terms they are now supplied by the Library of Congress and the Department of Agriculture.

NEW LEGISLATION.

The only legislation of any consequence by the Fifty-eighth Congress affecting the laws relating to printing and binding was an act approved January 20, 1905, which discontinued the "usual number" of copies of reports on simple and concurrent resolutions and on reports on private bills. The usual number is 1,682 plus 168 copies, 1,850 in all. The number of reports of this character to be printed hereafter will be 605 plus 118, or 723 in all, a saving of 1,127 copies in each case. During the Fifty-eighth Congress there were more than 8,000 reports on bills and resolutions of the foregoing description, averaging about 1 page each. A little calculation will demonstrate the fact that there will be a considerable saving in this item of printing hereafter. The act should be amended so as to provide that a special series of numbers shall be assigned to such reports, in order that they may readily be distinguished from reports on public bills. Considerable confusion has already resulted in various ways. The "usual number" having been discontinued, they will be omitted from the bound volumes of House and Senate reports, leaving gaps in the numbers which can be accounted for only by a careful examination of the index.

DOCUMENTS FOR DESIGNATED DEPOSITORIES.

Sections 501 and 502 of the Revised Statutes authorize each Senator and each Representative to designate one institution as a depository of public documents. Section 70 of the printing act approved January 12, 1895, reqires that such depositories, excepting colleges, shall contain 1,000 or more books, excluding Government publications. There are now 90 Senators, 386 Representatives, and 4 Delegates; in all, 480. There are 60 depositories, including the State and Territorial libraries, named under the general law, making a total of 540 authorized depositories. The distribution of documents is made to such depositories by the Superintendent of

Documents under the provisions of sections 54 and 58 of the printing act approved January 12, 1895. The section first mentioned provides that 500 copies of all numbered Congressional documents, bound in full sheep, shall be delivered to the Superintendent of Documents for distribution to depositories, and the latter section provides that 500 copies of all documents not bearing a Congressional number shall be in like manner delivered and distributed to depositories. Congress should authorize the Public Printer to print and deliver 40 additional copies of each description of documents so that all authorized depositories may be supplied.

ANALYTICAL DICTIONARY CATALOGUE OF ALL GOVERNMENT PUBLICATIONS, 1789–1893, AND A TOPICAL INDEX TO THE PROCEEDINGS AND DEBATES IN CONGRESS, 1789–1905.

The documents office has collected 75,041 United States public documents, including maps. This splendid collection, in some respects the most complete of any in existence, makes it possible and practicable for me to propose the making of a catalogue and index as indicated in the caption. Numerous catalogues and indexes of Government publications have been printed covering different periods prior to 1881, each inaccurate, incomplete, and on different plans. One of these cost about $63,000, and is so incomplete and inaccurate as to be of little value. A catalogue and index prepared by this office could be compiled at the minimum cost. The work would be supervised by experts who have had ten years' experience in cataloguing Government publications, it would be uniform and accurate, and there would be no question but that it would give satisfaction. The documents office has compiled data of nearly 4,000 documents, covering the period from 1789–1817, giving title, size, number of pages, and name of library where the same may be consulted. This special work ought to be completed, even if authority is not given to do the greater.

I have given a great deal of consideration to the matter of making a general analytical dictionary catalogue of Government publications, and a topical index to the proceedings and debates in Congress. I find that more than $100,000,000 have been expended in printing documents, and that there is no catalogue of the documents published during the first century of the existence of the Government which undertakes to give an analysis of the same. It is, therefore, impossible for anybody to make a thorough study of a particular subject. A subject may be discussed in a thousand different publications, and not one reference to it can be found in the so-called catalogues. I think that such a catalogue and index as I have described should be made, and estimate that with the facilities at the command of this office the entire work can be performed within six years at a total cost per year of $27,400. The value of a work of such magnitude can not be estimated in dollars and cents.

DUPLICATION OF WORK AND DUPLICATE DISTRIBUTION.

One of the important questions asked by the Committee on Department Methods, appointed by the President June 5, 1905, requests information concerning the duplication of work. I know of no field of Government activities where duplication of work is carried on to a greater extent than in the distribution of public documents. About 35 offices in Washington distribute their own publications free to libraries and individuals. The greater number of such publications are distributed free to individuals and libraries by each Senator, Representative, and Delegate in Congress, and free to libraries by this office. So that the work is not only duplicated, but the distribution also by each of these independent agencies.

The extent of duplication to libraries can be more accurately estimated than the duplication to individuals from the fact that libraries usually preserve all documents sent them and have been returning duplicates for redistribution during the past

twenty-five years. Since the establishment of this office in 1895, 800,000 duplicate documents have been returned to it by libraries which received them in duplicate. Applications have been made for the return of several hundred thousand additional volumes, but they were declined owing to lack of storage facilities.

That the duplication to individuals has been equally large is unquestionable; doubtless it is much larger. I have statistics of the distribution of two sets of documents—the Tenth Census Reports and the Messages and Papers of the Presidents—where duplication between members of Congress was prevented to the extent of 85,000 volumes. The entire distribution of the former was made by the Department of the Interior, and this office had control of the distribution of the latter.

The waste of the public money in printing and binding is, in my opinion, not due so much to extravagance in ordering documents printed which ought not to be printed, as it is to the duplication of work and distribution and to the defects in the printing laws which require documents to be printed in so many different forms. All the annual reports printed as Congressional documents are issued in two or more forms with different back titles. The report of the Lieutenant-General of the Army for 1900 is a sample of the reports that are issued in three different forms and in at least two styles of binding. The different back titles on this document read as follows:

(1)
ANNUAL REPORT
OF THE
LIEUTENANT-GENERAL
COMMANDING
THE ARMY
IN SEVEN PARTS
PART I

(2)
REPORT
OF THE
WAR DEPARTMENT
VOL. I
1900
PART 3.
LIEUTENANT-GENERAL
COMMANDING THE ARMY.

(3)
HOUSE DOCUMENT
VOL. 4
NO. 2
REPORTS OF WAR DEPARTMENT
1900
LIEUTENANT-GENERAL
PT. I
MISCELLANEOUS
56TH CONGRESS
2D SESSION
1900-1901.

It would be difficult for even an expert to determine, without an examination of the text, that the foregoing back titles describe the same book. It is therefore scarcely necessary for me to point out the desirability of amending the printing laws so as to require the assignment of the same title and back title to all copies of the same document. The editions issued under back titles 2 and 3, of Bureau publications, and 3, of departmental publications, are very largely wasted and ought not to be printed.

A more extravagant and wasteful practice, if possible, is the custom of printing as numbered Congressional documents certain departmental publications previously issued weekly, monthly, quarterly, or at irregular periods during the year in pamphlet form. Such publications are thoroughly distributed in pamphlet form from several months to two years before they are consolidated and issued in the expensive sheep-bound Congressional series. A number of annual reports, not administrative in character, are also published as Congressional documents. Such annual reports and the pamphlet publications herein referred to make 85 of the volumes of documents of the Fifty-eighth Congress. Of these 85 volumes 157,250 copies were printed, and about 51,000 of the same will be bound in full sheep. I estimate that about $60,000 of the total cost represents the waste.

There is considerable duplication of work between this office and the several offices which sell public documents. There is not only duplication of work, but the strange anomaly is seen of two Government offices authorized by law to sell the same document at different prices. This is due to defects in the printing laws. Prior to the establishment of this office several of the Departments were authorized to sell certain publications, the prices to be fixed in various ways. In some cases a certain per cent was added to the cost. Section 61 of the printing act approved January 12, 1895, authorizes the Superintendent of Documents to sell any document in his custody not otherwise specifically disposed of by law, at the cost of printing from the plates. In estimating the cost, composition is therefore excluded. Congress evidently had in view the harmonizing of the laws relating to the sale of documents, and provided, in said section 61, that any office having documents for sale might turn the same over to the Superintendent of Documents for sale under the provisions of law governing the sale of documents by his office. But one office (the State Department) has availed itself of this suggestion, but the transfer was made by special act of Congress.

I doubt very much whether any real reform in the printing and binding of documents can be made until all document-distributing offices are consolidated under one head. The advantages of consolidation are clearly indicated herein. It is quite safe to say that no business establishment in the land would maintain 30 or 40 offices, each duplicating work and distribution of the other to a considerable extent. The money uselessly expended in maintaining so many establishments can be and ought to be saved.

STORAGE OF DOCUMENTS.

The matter of storage of public documents is a question which Congress will doubtless be called upon to consider at an early date. Notwithstanding the fact that 1,000,000 documents, in round numbers, were distributed during the fiscal year, more than 1,000,000 now remain in stock, all stored in the old Government Printing Office. Despite the efforts of the office to distribute the surplus properly to libraries and public institutions, more documents come in than go out. Not only the 1,000,000 books in stock, but the splendid public documents library of 75,000 books and maps are stored in the old Government Printing Office building, which has been condemned many times as unsafe for life or property. Senate Report 1030, Fifty-eighth Congress, second session, says:

"The danger of collapse under any excessive weight is very great and, on account of the wooden construction of the interior, the collapse would probably occur with-

out warning. We are of opinion that the building is unsafe, unhealthy, and dangerous in its present condition, and that it should not be used for heavy machinery and fixtures of a printing office. * * * In view of these facts we recommend * * * that the old Printing Office be torn down and a new building erected on the site."

I mention this matter to emphasize the necessity of making proper provision for the storage of documents and for offices for this office before such a calamity as the foregoing report foreshadows shall occur.

It is suggested that the Hall of Records, soon to be erected, can be so constructed as to be capable of storing all public documents, printed or in manuscript, and that the entire distribution and sale of documents can be made under the direction of the head of that office when the same shall be created.

Documents received, distributed, and sold July 1, 1904, to June 30, 1905.

TWELFTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS, FOR FISCAL YEAR ENDED JUNE 30, 1906

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., August 15, 1906.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1892, I have the honor to submit the twelfth annual report of the Superintendent of Documents, covering the period from July 1, 1905, to June 30, 1906.

Owing to the conditions prevailing when by your direction I assumed charge of this office, on February 8, 1906, it was necessary for me to adopt at once new methods of filing and accounting, that the future records of the office might be found accessible and accurate. The adoption of these new methods in the midst of a year accounts for this report being in two parts; the first covering the seven months and seven days of my predecessor's incumbency, the remaining four months and twenty-one days being under my jurisdiction.

A general recapitulation of the statistical matter which forms the bulk of this report is as follows:

Publications received, distributed, and sold during fiscal year ended June 30, 1906.

Publications on hand July 1, 1905	1,051,107
Publications received July 1, 1905, to June 30, 1906	1,147,909
	2,199,016
Publications distributed and sold July 1, 1905, to June 30, 1906	897,321
Publications on hand June 30, 1906	1,301,690

Cash statement for fiscal year ended June 30, 1906.

DEBIT.

Cash on hand July 1, 1905	$59.55
Cash received July 1, 1905, to June 30, 1906	17,597.50
Publications sold to Departments paid by transfer of funds	624.48
Total	18,281.53

CREDIT.

Cash remitted to Public Printer to balance account of sale of publications, July 1, 1904, to June 30, 1905	$26.43
Cash remitted to Public Printer for sale of publications from July 1, 1905, to June 30, 1906	15,871.40
Cash returned to remitters July 1, 1905, to June 30, 1906	1,729.50
Cash on hand June 30, 1906, account of unfilled orders	29.72
Deposited in Treasury by transfer of funds	624.48
Total	18,281.53

FUNCTIONS OF THE OFFICE.

There is a widespread misunderstanding relative to the functions of this office, which militates against its usefulness. Its duties are very diverse. It is the clearing house for Government publications, carrying on an enormous exchange business with libraries, educational institutions, and Members of Congress, and in this way doing something toward remedying the absurd and illogical distribution of public documents now sanctioned by law. Through this method of exchange hundreds of libraries have been supplied with publications greatly needed in their respective localities in exchange for those which were either duplicates or of no service to them.

It compiles the official catalogues of the United States Government, a task requiring a large force of experts, and one made uselessly expensive by the inconsistent demands of the printing law, which imposes duties requiring the duplication of work, thus confusing an already confused problem.

It distributes the publications supplied for State and Territorial libraries and designated depositories, now numbering 483, and also sends the publications of the Geological Survey to 1,440 libraries entitled by law to receive them.

These duties alone are sufficient to occupy the attention of a large force, but added to all this the office is constituted by law the sales office for all Government publications with but few exceptions. In this capacity it assumes the position of a retail book shop and receives daily, from all parts of this country and many foreign lands, orders for books new and old, averaging at present about $80 per day. These orders are mainly for 5 or 10 cent pamphlets on agricultural and scientific subjects, and must be promptly and carefully filled. The accounting for these small sales and keeping track of the many thousands of titles is a task appreciable only by those who have been engaged in similar work.

Nor does the list of duties stop here. The compiling of price lists and library reference lists, special tables, bibliographies, and check lists is also a feature. Hundreds of letters are received daily and a large proportion contain requests for information upon certain subjects, or how or where to obtain books relating thereto, and great care is taken and no labor spared in supplying full and accurate information.

OFFICE PUBLICATIONS.

The publications prepared and issued by this office during the fiscal year are as follows:

	Pages.
Eleventh Annual Report of the Superintendent of Documents, 1905	43
Document Catalogue (Comprehensive Index) of Fifty-seventh Congress, 1901–1903	1264
Document Index (Consolidated Index), Fifty-eighth Congress, third session	343
List of Documents Available for Distribution to Libraries, July 1, 1905	69
Monthly Catalogues, June, 1905, to May, 1906, omitting the monthly cumulative indexes	565
Rules Governing Sale of Public Documents	1

The Document Catalogue (Comprehensive Index) of the Fifty-eighth Congress, and the Document Index (Consolidated Index), Fifty-ninth Congress, first session, are prepared in part.

The catalogue and index section received 22,664 documents, 52,619 pieces of Congressional mail, wrote 96,035 cards, prepared, edited, and supervised the publication of the Document Catalogue, Document Index, and monthly catalogues in the foregoing list, and supplied indexes for several volumes of documents.

THE CATALOGUES.

Every large publisher issues catalogues. As the publisher of Government publications, this office is certainly the logical one to prepare the official catalogues. That

it is doing so to the satisfaction of those interested in public documents is evident, but that it is accomplishing this result in the most thorough and, at the same time, most economical way is a question.

A careful perusal of the sections of the printing law which state the requirements relative to cataloguing and indexing reveal the facts that a monthly priced catalogue, a yearly "comprehensive index," and a sessional "consolidated index" are desired.

That a "comprehensive index" could be made to answer all purposes as a permanent record and do away with the necessity of a "consolidated index" is now certain, and that a simple priced list, issued monthly, noting the publications printed and giving information regarding their contents and how to procure them, is all that was intended to be compiled under the title of a "monthly catalogue" is also true.

With an overworked catalogue force and the publications necessarily many months behind, it seemed advisable to employ, in the absence of legislation, such methods as would avoid duplication and at the same time provide as usable publications as possible for the aid of inquirers.

The first step in this reform was the omission of the cumulative index for the monthly catalogue, thus making it what I believe the law intended it to be—a priced list of available publications, issued as promptly as possible; not a reference work for future use, but a book list or notice for immediate information.

The time saved upon this catalogue by simplifying its form and omitting the index will be expended in bringing out the "Document Catalogue" as promptly as possible, and in making it "comprehensive" in the fullest sense of the word.

Some librarians, not realizing the distinction we had in mind between a reference catalogue and a book list, have complained, but the general opinion has been favorable to the change under the circumstances.

The lists of books shipped to depository libraries, which were also a feature of the old monthly catalogue, have been omitted, and in their stead carefully prepared invoices will be forwarded with each shipment.

I am convinced that the subject of public document cataloguing needs careful investigation and shall give it attention when possible.

LIBRARY ADDITIONS.

As soon as the arranging of stock is begun it is expected that many valuable old publications will be found to add to the library.

The additions for the year, as also the totals for each publishing department and the grand total of books and maps in the library, are shown in the following table:

Government authors and publishing offices.	In library June 30, 1906.		Increase from June 30, 1905.	
	Documents.	Maps.	Documents.	Maps.
Agriculture Department	6,192	4,984	794	401
Civil Service Commission	266	.....	33	.....
Commerce and Labor Department	2,135	223	658	87
Congress, documents prior to Fifteenth Congress (1817), volumes	644	.....	105	.....
Congress, miscellaneous publications	2,571	.....	392	.....
Congress, official records of proceedings	431	.....	17	.....
Congressional documents (sheep set), 1817–1905	4,935	.....	198	.....
District of Columbia, Board of Commissioners	598	.....	27	.....
Fish Commission	620	.....	8	.....
Geographic Names Board	23	.....	4	.....
Government Printing Office	321	.....	33	.....
Interior Department	8,355	2,050	481	124
Interstate Commerce Commission	582	.....	56	.....

Government authors and publishing offices.	In library June 30, 1906.		Increase from June 30, 1905.	
	Documents.	Maps.	Documents.	Maps.
Judiciary (United States courts)	351	.....	11	.....
Justice Department	298	.....	16	.....
Labor Department	95	.....	.....	.....
Library of Congress	753	.....	111	.....
National Academy of Sciences	80	.....	5	.....
National Home for Disabled Volunteer Soldiers	112	.....	7	.....
Navy Department	8,644	1,262	972	111
Post-Office Department	3,522	124	325	41
President of United States	565	.....	166	.....
Smithsonian Institution	2,454	.....	187	.....
State Department	4,106	5	130	.....
Treasury Department	10,856	739	609	.....
War Department	13,178	375	1,268	32
Total	72,687	9,762	6,613	796
Grand total	82,449		7,409	

In this connection I would recommend that at as early a date as possible provision be made for the housing of this valuable library in a fireproof building.

This would, of course, necessitate the removal also of the entire catalogue and sales forces to the same building, as our most pressing need is that the library be more accessible to these employees. Under the new stock system close connection between the library and the sales section will be even more necessary, for much information which is now obtainable from the stock bins will then have to be secured in the library.

It should be here repeated that this collection, the most complete in the world of United States Government publications, has never cost the Government one cent; that it is in no sense an added and useless expense, but the most useful working tool this Office possesses, and that the expenditure of some $2,800 a year for its maintenance is a necessary and profitable investment.

It has been suggested that, in the interests of economy, this collection should be transferred to the Library of Congress. That those voicing this idea had no conception of the position the library holds in the working plan of the entire Office is evident. To separate the Office from its reference library would make the accomplishment of its routine work as difficult as to steer a ship to port without a rudder.

THE STOCK AND AN INVENTORY.

The vast accumulation of books, which is ever increasing, will be classified and a complete inventory made. This task seems at present almost impossible of accomplishment, but can be successfully undertaken as soon as the inventory scheme, upon which I am now at work, is sufficiently developed to apply to this mass of unassorted books.

Of the 1,301,695 books reported as on hand, not over one-sixth are arranged so as to be accessible for distribution, resulting in the loss of many sales by not being able to locate the books, though we feel reasonably certain "there are some in stock somewhere."

At present I can say but little about either the stock or the system which I feel confident will collate it. It is a self-posting inventory scheme, based on the book as the unit, and will not only present a perpetual inventory of the stock on hand,

but also give the statistics of the sales of the various publications for any stated period. The details are now being worked out and will be submitted for your approval sometime in the near future.

SALES.

In every department of the office the work has rapidly increased in the past year. The sales are steadily advancing, even though no especial effort has as yet been put forth to augment them.

It is certain that when up-to-date business methods have been inaugurated and we feel free to undertake the added business which proper advertising will surely bring, and when we complete the organization of a publicity section and endeavor systematically to place Government documents before the public, a large increase in the receipts of this office will be manifest.

CORRESPONDENCE AND INFORMATION.

It will be necessary in the near future to organize a special information division in connection with the Public Documents Library, and it will, I am sure, with the facilities afforded by the library, prove of inestimable value to those seeking information on public documents.

The daily mail is constantly increasing, bringing not only orders for publications of all kinds, but inquiries covering nearly every phase of thought. These orders are carefully considered, and every effort is made to procure the desired volume, if it is not in our stock.

As to the questions: much time is spent in reference work, and not only is the information asked for supplied, but many valuable publications on the subjects are listed and directions given as to where they may be consulted. This reference work is no small part of the functions of this office, and is destined, I feel sure, to be of larger proportions and greater utility. The desire of the office is to supply the public, not only with the public documents they desire, but also with information concerning those of which they may never have heard.

If it is not extravagant to spend several million dollars each year in manufacturing books, it would certainly not be a waste of money to invest a few thousand dollars in informing the people of what has been published. I sincerely hope some action may be taken by Congress to supply funds for advertising purposes, that attractive press notices and advertisements may be inserted in the various scientific journals and special publications.

DISTRIBUTION OF CATALOGUE CARDS.

Soon after taking charge of the affairs of this office I discontinued the sending of printed catalogue cards to the depository libraries. There being no specific law on the subject, and the libraries expressing much dissatisfaction at not receiving more than one card, it was thought best to discontinue this distribution for the time being at least.

This work is being partly accomplished by the card section of the Library of Congress, but the field of that section is so broad that it does not feel impelled to give the subject of Government publications as thorough attention as it deserves. Perhaps sometime in the future this office may be able to resume this card work.

PRICE LISTS.

As soon as the stock is in order we will resume the issue of price lists upon various popular subjects, and circulate them freely to those who may be interested. No

general price list has been issued by the office since No. 9, of April 27, 1905. The condition of the stock is such that no one can tell what it would be safe to include in a price list, as there is no way of determining how many copies of any one publication we have, and very little hope of finding them again if once lost sight of.

THE NEW CHECK LIST.

It had been confidently expected that a new and more elaborate edition of the "Check list" would have been issued before this time, but the thorough reorganization of the office, which is now in progress, has necessarily delayed work on this publication, and it is doubtful now if anything will be attempted until after the completion of the stock taking, which will continue for some months.

REORGANIZATION.

In order that this office may develop into the general distribution and sales agency of United States Government publications, which the law establishing it contemplated, it must be reorganized along the most approved business lines. The duties of each and every employee must be definitely defined and assigned and all superfluous red tape eliminated. The preparations for such a radical move are now being made, and I trust an organization of the diversified work of this office may be accomplished which will prove eminently satisfactory.

CONCLUSION.

In closing this report I wish to express my sincere thanks to the members of the office force, who have labored early and late in an endeavor to bring some kind of system out of the chaos in which unpardonable carelessness and lack of system had involved the records of this office. Whatever the good results may be of our present strenuous efforts, the bulk of the praise will be due to these faithful employees.

Through the generous cooperation and encouraging confidence which you have given me, as well as through your excellent advice, I have incurred a debt which only whole-hearted endeavor can recompense. By such endeavor I trust I may be privileged to express my appreciation.

Very respectfully,

WILLIAM L. POST,
Superintendent of Documents.

Hon. CHARLES A. STILLINGS,
Public Printer.

OFFICE OF
SUPERINTENDENT OF DOCUMENTS
WASHINGTON

JULY 1, 1907.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1895, I have the honor to submit the Thirteenth Annual Report of the Superintendent of Documents covering the fiscal year, July 1, 1906, to June 30, 1907.

Very respectfully,

WILLIAM L. POST,
Superintendent of Documents.

Hon. CHAS. A. STILLINGS,
Public Printer.

THIRTEENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1907.

Before entering upon a discussion of the many interesting features of the work of this rapidly growing division, I here present a general recapitulation of the statistical matter which forms the bulk of this report:

Publications received, distributed, and sold from July 1, 1906, to June 30, 1907.

Received from—			
Agriculture Department	281,161		
Commerce and Labor Department	7,234		
Interior Department	656,977		
Justice Department	480		
Navy Department	12,939		
Post-Office Department	576		
State Department	10,352		
Treasury Department	6,295		
War Department	14,541		
		990,555	
Government Printing Office		1,018,893	
Bureau of American Republics	5		
Civil Service Commission	1,905		
Interstate Commerce Commission	113		
Library of Congress	12,332		
Smithsonian Institution	48		
		14,403	
Senate folding room	129,409		
House folding room	29,899		
		159,308	
Miscellaneous departments and libraries	364,307		
Miscellaneous libraries	43,409		
Public document library	57,315		
		465,031	
Exchange account		2,949	
			2,651,139
Wrapping account			144,666
Total number of volumes received			2,795,805
Distributed—			
Cash sales		116,009	
Designated depository libraries	503,564		
Geological depository libraries	74,656		
		578,220	

Distributed—Continued.			
Miscellaneous libraries	64,379		
Officials and Departments	4,238		
Foreign legations (unbound)	69,865		
Catalogues, etc	52,317		
		190,799

OFFICE PUBLICATIONS.

The publications prepared and issued by this office during the fiscal year are as follows:

	Pages.
Twelfth Annual Report of Superintendent of Documents, 1906	95
Bulletin 7; List of annual and serial public documents that should be regularly supplied to designated depository libraries	39
Monthly catalogues, June, 1906–May, 1907	434
Price list 10; Laws of United States	4
Price list 11; Food and diet	20
Price list 12; Water pollution; Water purification	8
Schedule of volumes of documents and reports of Fifty-ninth Congress, first session	10

AN ITEMIZED REPORT.

In connection with these statistics allow me to call your attention to the absurdity of the requirement of the law that the Superintendent of Documents "shall report annually the number of copies of each and every document sold by him, and the price of the same."

The preparation of this itemized report is seen to be a difficult task, when it is considered that 116,009 books were sold during the past fiscal year, in variety of titles numbering some 6,000; and this great expenditure of time and effort in tabulating these statistics is without any beneficial returns, either from the accounting standpoint or that of official records.

It is not found necessary in large publishing houses to keep the inventory minutely to the single book, nor do they attempt to balance cash returns and stock to the penny. But this is what the law rightly compels the Superintendent of Documents to do, and this can and always should be done.

To itemize a report thereof is, however, a useless task, since an itemized annual report is not even auxiliary to any part of the actual records of the office from which the audit is made.

To avoid the enormous expense annually incurred heretofore in successfully arriving at anything like a correct result in compiling such an itemized statement of cash and books, I found it necessary to install a new inventory system as the basis for the operation of any sort of proper business methods; and even though the law is amended as to the requirement of an itemized report—and this I would urge upon your consideration and that of the Joint Committee on Printing—this system of inventory will still prove invaluable as providing a means for the daily checking between the stockkeeper and the cashier of books and cash and give a daily balance.

PUBLIC DOCUMENTS—OUR SPECIALTY.

Were I asked to write a motto for this office it would consist of the words "Public documents—Our specialty;" and were I to define our interests the definition would embrace the subject of public documents from the inception of each publication as a publication to its final delivery after completion. In other words, we are interested in public documents as to their uniform make-up and mechanical perfection, comprehensive cataloguing, logical distribution, and proper appreciation by the public at large. To these ends we are endeavoring systematically to arrange them and editorially supervise their production, in the hope of eliminating many of the unexplainable eccentricities heretofore complained of; to expend our best efforts in consistently cataloguing them, as a sure means of promoting their use; to quickly distribute them, that they may be available contemporaneously with the interest in their contents, and to advertise them so extensively that their existence and value will be known to all who contribute the means for their production.

AN HISTORICAL RÉSUMÉ.

When this office was organized in May, 1895, it was with few assistants, much lack of information or practical experience, and absolutely no convenient facilities. The offices and storage space supplied were combined in a large barn-like storeroom, conveniently located on the top floor of a rented building. A few desks and chairs were obtained from the Government Printing Office, likewise several inexperienced persons to aid those in charge in their great work of organizing. Only one of the force had had any previous extended knowledge of public documents, and it became this person's duty not only to outline the policy, but instruct the others in carrying it out.

Fortunately some of the others, while not experts in public documents, were specialists as administrators or cataloguers, and the combined efforts brought out, in remarkably short order, an organization which has served as a substantial basis for the improvements which growth of business and development in comprehension of the necessities of the office have demanded.

To attack an entirely new problem, with the only directions available contained in a law the provisions of which presented the most illogical and impossible demands, and to undertake this work months after it was required by law to begin, was to say the least an embarrassing situation. But notwithstanding all these difficulties, a library was started, work on the catalogues and indexes demanded by law was proceeded with, and the sale and distribution of public documents was begun. Along all lines the work rapidly developed, so rapidly in fact that many features of it were neglected, and it was found necessary

to reorganize the office in November, 1897, when the personnel of the office, including the Superintendent, was changed.

At this time closer organization along business lines was attempted and 6 distinct sections formed, each in charge of an experienced clerk; the functions of the sections being indicated by their names, i. e., bookkeeping and correspondence, sales, catalogue, library, mail, and stock.

FUNCTIONS OF THE OFFICE.

It was early found impossible to confine the work of the office to the duties assigned to it, which are here stated in the order in which they are set down in the law, in section 61 (act of January 12, 1895, 2 Supp. R. S., p. 350) and the sections immediately following:

1. To sell at cost any public document in its charge, the distribution of which is not specifically directed in the law.
2. To receive from any Government office any document published for sale, which sale must be made under the provisions of section 61.
3. To have general supervision of the distribution of all public documents (with exceptions as enumerated).
4. To prepare at the close of each regular session of Congress a Comprehensive index (Document catalogue) of public documents.
5. To prepare and print in one volume a Consolidated index (Document index) of Congressional documents.
6. To index such single volumes of documents as the Joint Committee on Printing shall direct.
7. To receive all accumulations of documents from the several Executive Departments, bureaus, and offices of the Government, and annually to take over their surplus for distribution or sale.
8. To prepare and publish a Monthly catalogue of Government publications, which shall show the documents printed during a month, where obtainable, and the price thereof.
9. To thoroughly investigate the condition of the designated depositories.
10. To distribute the documents as issued to the designated depositories.

Several other duties were assumed, or rather were forced upon the office, as a natural result of its establishment, the most important of which was that of operating as—

A BUREAU OF INFORMATION.

Through the natural desire for enlightenment as to public documents and what they contain, this office has become a regular bureau of information on subjects dealt with in governmental literature, and much time is now devoted by our document experts to instructing people, by correspondence, how to procure books of interest to

them, or informing them where they may find them for consultation. Thousands of letters have been answered this year relative to these matters, and our research mail is constantly growing. No other feature of the office presents more promise of fruitful future development than this, and as it is meeting a long-felt want, its scope of usefulness is constantly increasing.

The idea is to develop a central information agency, where all inquiries relative to public documents or what they contain can be forwarded for reply. We are gradually training persons who are specially adapted to research work, and are digging out from the mass of useless material the really important titles and information.

Not only does this research benefit individual cases, but it is developing in this office a fund of information which will always prove a valuable asset. More prominence will be given to this feature of our work, and we feel sure that the results will justify the expenditure of time and effort.

THE CLEARING-HOUSE IDEA.

Another important function, which has evolved naturally through demand, is that of operating as a clearing-house of Government publications for the libraries.

We are in constant correspondence with hundreds of libraries and educational institutions, and are ever ready to receive from them surplus public documents for which they have no need and to supply in their stead those books for which there is a demand.

This work would be to a great degree unnecessary if the distribution were accomplished from a central agency, but until this can be accomplished this clearing-house idea provides a partial remedy and places public documents where they can be used.

What is needed in this work is a simple means of keeping track of library wants in such a manner that when the publications drift in they may be shipped at once to libraries wishing them and not put in stock or condemned. Very soon a scheme will be presented for trial.

If we are kept posted as to the library wants and our records are made in such a manner that the receipt of a book will insure its delivery to fill a need, the problem of storage of useless books will be solved, for we can then gauge the supply retained by the demand.

It is somewhat disconcerting, however, to correspond almost weekly with certain libraries, furnish them instructions relative to the supply of books, and do all in our power to convince them that the proper place to apply for public documents or for information concerning them is this office, and then have them write to a Member of Congress or their Senator requesting him to intercede with this office in order to secure the receipt of something desired, or, worse still, address their communications to the Public Printer or the Librarian

of Congress, causing extra clerical labor to those already overburdened officials.

One startling instance of unpardonable ignorance was revealed by the return of a question circular from a library which had been a depository since 1858, and had been receiving the usual shipments and invoices ever since that date, with the statement, that so far as they knew they were not a depository and that if they were "when and by whom were they designated?" In such an instance words are useless, but this case is cited as an extreme of which there are many alike in kind, if not in degree.

If the clearing-house idea is to succeed it must be by hearty cooperation on the part of all the librarians of the country. They must come forward with information when requested, and put their shoulders to the wheel in securing legislation to authorize the fulfilling of their desires. And in return for what we are able to do for them, we desire that the fact of the existence of this office and some idea of the functions assigned to it be revealed by them to the public which they serve.

As soon as the vast accumulation now being sorted is listed, printed copies of the list will be sent broadcast, and those desiring any of the books registered therein as in stock will be supplied so long as the supply lasts. After this thorough circularizing of the libraries of the country has been accomplished, a sufficient time will be allowed for selection, and then all of the accumulation, except a limited supply reserved for official use, will be sent to the warehouse to await Congressional action in condemning them for sale as waste paper.

At the same time the libraries will be given the opportunity to return their accumulations of documents, which lack of space has heretofore caused us to refuse to handle.

It is hoped that in the future such close relations can be established with the libraries that their duplicates or unused documents can be returned as soon as they discover they are not desired, that they may be redistributed while they are of current interest.

The plans of this office embrace the development of this clearing-house feature to the fullest capacity.

CONGRESSIONAL EXCHANGE.

Following out the clearing-house idea fully, we have developed another form of distribution, which has proved of mutual advantage to both this office and the Senators and Members who have availed themselves of the opportunities which it offers of securing publications they desire in exchange for those which are of little use to them or to their constituents.

As a means of procuring publications for which we may receive orders and at the same time of supplying those books which Senators

and Members desire, and which under the law this office can not give them, we have instituted a method of exchange on the basis of value for value. This has become very popular and productive of good results to all concerned.

To the city Senator or Member an exchange of a portion of his useless quota of horse books for some valuable law or historical volumes is truly a great benefit, and this office thereby obtains a fresh supply of those works most sought after by purchasers.

But the difficulty lies in getting in touch with those Senators and Members who desire such service. If we had access to their quotas it would be very easy to determine what class of literature was most desired by individuals, and we could then arrange exchanges, so as to put into circulation many hundreds of thousands of dollars worth of material which has lain for years in storage because the Senator or Member, who alone could dispose of them under the law, had no use for them, whereas those desiring copies of these very documents to supply the repeated demands of their constituents are compelled to obtain legislation for new editions, such legislation operating, of course, to increase the already unappreciated quotas. At present these quotas are distributed from the folding rooms of the Senate and House, and the statistics thereof are held there as confidential.

On many occasions the distribution of special publications for Congress has been accomplished by this office, and in the case of the "Messages and Papers of the Presidents" and the "Flags of Maritime Nations" hundreds of duplications were avoided, to the gratification of Senators and Members.

If all the distribution were accomplished from this office, much could be done not only in detecting duplications but also in securing the best distribution of publications.

If nothing more radical can be accomplished, legislation should certainly be enacted turning over to the Superintendent of Documents for distribution all books which remain undistributed two years after their issue.

EDITORIAL WORK.

The editorial work which this office is performing has been undertaken in self-defense, in an effort to prevent the errors and omissions which tend greatly to involve cataloguing or listing of Government publications.

Employing as we do expert cataloguers and persons trained in all branches of bibliographical science, it is natural that we should be called upon to direct the editorial matters connected with the printing of Government literature, in so far as these matters relate to the actual manufacture of the book, the proper construction and placing of the "apparatus," or the consistent titling and uniform lettering of the volumes.

In order to accomplish this work an editorial section has been established, and already good results are apparent in many ways. It is difficult to make changes in long-established customs, no matter how antiquated and obnoxious they may have become, but it must be admitted that, with but few exceptions, our efforts to benefit the publications bibliographically and typographically have been met with hearty approval and cooperation.

This work is only in its trial stage, but it is hoped that it will prove so fruitful of good results that its scope may be enlarged to cover matters in the issue of public documents which have long needed that careful scrutiny which the rush of a great print shop makes practically impossible.

It is not the intention of this office to attempt copy preparing beyond the title-pages, caption headings, contents, indexes, and lists of illustrations. The preparing of the main body of the work will be left to the experts in the proof room of the Government Printing Office as formerly.

Many complaints drift into this office relative to the inconsistent make-up of volumes of public documents, and much confusion arises on account of lack of uniformity in titles and general appearance in annual and serial issues. It is to avoid these complications and aid the Government Printing Office in putting forth the highest class of printing that this work has been undertaken. Then, too, the saving of time in the cataloguing department in handling properly prepared books will nearly offset the increased cost which the editorial section entails.

REORGANIZATION.

What has been thus far said regarding the lawful and the necessarily assumed functions of the office, presents but a skeleton outline of the many perplexing features connected with the now popular subject of public documents.

It was prophetically suggested during the debate incident to the adoption of the act of January 12, 1895, which contained the authority for the establishment of this office, that there was being brought into existence by the legislation under consideration a bureau which would some day employ a large corps of clerks at a great expense to the Government.

This is now a reality, but the accruments of the office more than offset the expenditure. While the great expense of preparing, editing, and publishing the extensive Government catalogues and the gratuitous distribution of documents to designated depository libraries will always prevent this office from assuming the rôle of a self-supporting institution, still the increase in sales from $16,000 to $32,000 in one year indicates that that portion of our duties at least will be a paying proposition in time.

Although the nine years under the organization accomplished in 1897 were years of neglected opportunities the tendency toward growth was apparent, even under the most obstructive odds.

As indicated in my last report, which covered a period of but a little over four months of my incumbency, a temporary readjustment of the affairs of the office was absolutely necessary from the moment I assumed charge. It was many months before anything like a consistent organization was developed, even with the most tireless labor—day and night—and it is still a matter of months of unceasing toil before its affairs will be adjusted to the high standard set for it.

Before proceeding with the reorganization of the office along up-to-date business lines, and as a necessary preparation for the work, I visited, under your instructions, many of the largest business organizations in the East and the Middle West, and thoroughly investigated their methods for handling routine office business.

My primary desire was to discover the simplest form for inventorying the enormous accumulation of public documents at that time lying inaccessible in heaps and serving only to occupy valuable space.

I had in mind a plan for a self-posting perpetual inventory, and in order to prove its merit I installed it in connection with certain branches of the work soon after I took charge of the office. The success which this trial developed encouraged me in the hope that, with modifications which might be suggested by other inventory schemes, it would prove ideal for our particular work.

The information obtained from the large publishers was a disappointment so far as the inventory was concerned, but many ideas were obtained as to other matters of routine work.

After diligent investigations, however, I adopted my original plan as most advantageous for our needs, and it will soon be installed in all branches of the work.

My search was not confined to publishing houses nor my inquiries to inventories. The scope of investigation gradually broadened, and was finally made to cover all routine methods of business and the labor-saving machines incident thereto, and over 75 different institutions were visited, representing printing, mercantile, insurance, railway, and financial interests.

In nearly all of these great industrial concerns the spirit of reorganization and a growing interest in new methods was very noticeable. In many their incomes had been greatly depleted by inability to install new methods fast enough to meet the growing demands, and in one instance—a large shoe house in the North—development was so rapid that it became necessary to close down for two weeks in order to readjust the business to the new conditions.

Realizing fully the important place this office is gradually assuming in the Government's dealings with the people, I was convinced that

any system which was installed must be susceptible of expansion without change, and simple enough to be handled by persons untaught in the intricacies of public documents.

I am desirous of organizing, as any large commercial concern with our advantages and possibilities would organize, of so systematizing the work that the rapid growth which is now in evidence will be no embarrassment when it develops larger problems and more serious complications in the future.

That the Government will continue to publish, and that public documents will be more generally used and more persistently sought, are conclusions which even a slight knowledge of conditions make positive. To let the public know what the Government prints, and to instruct them where they can consult the books or how they may obtain them for themselves, are some of the beneficial duties which this office is endeavoring to fulfill. And we are now striving to give the librarians prompt service, that they in turn may be able to supply their patrons with Government publications of current interest.

With a thorough knowledge of the internal conditions and needs of the office, and an enlarged sense of business practices gathered from these profitable researches, which your foresight and good judgment made possible, I took up the actual work of reorganization, confident of success.

It has been uphill work, owing to our inability to procure the proper equipment until accumulation had multiplied the difficulties involved in the change. With this condition and handling a business which has doubled in the period covered by this report, we were brought to a point where it seemed we could do no better than follow the lead of the shoe firm and close down until adequate facilities for proceeding properly could be installed.

Early and late the employees have labored, first to learn and then to put into operation the various methods decided upon after the most careful deliberation, and to them is due the lion's share of praise for the success which has been obtained.

From a condition of absolute chaos, devoid of any semblance of business method, with a force of employees disheartened by neglect and repulsed by unappreciative superiors, and even the lawful functions of the office fast losing the high standard upon which they were originally placed, the present well-regulated, contented division has been organized, with a business scheme being installed which it is believed will be found adequate for all contingencies.

THE THREE DIVISIONS.

The work of the office, though diverse in character, naturally divides itself into three distinct parts, and under the new scheme of reorganization, each is assigned to a division, namely, the Administra-

tive Division, which handles all the work of selling and distributing, as well as of diffusing information relative to public documents; the Bibliographical Division, which includes the library and all the cataloguing, indexing, and compiling sections, and the Editorial Section, which is held distinct on account of its general functions.

At present, with no chief cataloguer to assume the entire control of the Bibliographical Division and with the Editorial Section still in a formative stage, the organization is not complete, but three divisions will ultimately result.

These three divisions are composed of sections in charge of competent chiefs, and include the following:

Administrative Division—
- Bookkeeping Section.
- Correspondence and Filing Section.
- Stock Section.
- Shipping Section.

Bibliographical Division—
- Catalogue Section.
- Checklist and Index Section.
- Library Section.

Editorial Section (to become a division).

ADMINISTRATIVE DIVISION.

More growth has been manifested in this division in the past year than in any other portion of the office, and this of course is natural, as its functions develop with the influx of business.

Briefly stated, the duties of the Administrative Division, other than those of a general administrative character, are to sell and distribute Government publications and keep accurate records of such transactions.

BOOKKEEPING SECTION.

For years the records of this office had been so neglected that it was found impossible to verify accounts or compile statistics therefrom. Even the cash receipts and the register of sales were recorded on loose sheets, which were found tucked away in unused cabinets or, in some instances, were not to be located at all. These records were made by numerous persons and in various places, thus duplicating work and preventing uniformity in the accounts.

The establishment of the Bookkeeping Section brought together under one supervision all the cash and book records of the office, and by an unique scheme of receipt and an elaboration of the "Daily sales sheet" a perfect check upon the cashier has been obtained.

The inventory, which is now in course of preparation and which will be explained in my next report, will supply the necessary check

of stock against cash, while a simple yet effective form of ordering publications out of stock has been adopted which provides a sure protection against the withdrawal of any but those books which are sold or authorized by the head of the office for distribution under the law.

The problem of keeping accurate account of over a million and a half of books, and accessioning them so as to make them immediately available, has been solved. And not only that, it has been solved in such a manner as to condense the mass of printed matter into the smallest amount of available space.

Many thousands of cards have been prepared as records for this vast accumulation, and these records are being daily brought nearer completion and will finally present an invaluable self-posting perpetual inventory. When this work is accomplished the office will be ready to handle any amount of business and give quick and accurate service at all times.

With this inventory and the accession register accounting for our book stock, and the carefully prepared daily sales sheets and cash-books, the present records are as simple and complete as any expert accountant could desire. In fact, after repeated investigations, which have been heartily aided by this office, the Treasury officials have approved our new methods.

CORRESPONDENCE AND FILING SECTION.

As previously stated, the correspondence, and necessarily the filing, have assumed large proportions for a small office, so large and important in fact as to fully warrant a separate section to handle it.

In this section all the stenographers of the office are brought together under the direct supervision of a chief, who is not only responsible for the expedition with which the work is performed, but also for its general appearance. Much time has been expended in establishing rules and instructing the stenographers so that their work is consistent, neat, and accurate.

The output averages 120 dictated letters a day besides from 75 to 100 form letters. Then there are hundreds of price lists and leaflets for which envelopes must be addressed.

The incoming mail averages over 300 letters a day, besides postal cards and letters of acknowledgment, which are not figured in our statistics as they are never filed.

To this section will fall the bulk of the work in the new mail scheme now being installed, but its operation is calculated to reduce labor and insure accuracy. It means double work, however, until it is installed.

The lack of proper filing facilities has caused much overtime work for the clerks in this section, but it is hoped soon to have all back

work on the files brought up to date, and the current work can then be handled without any difficulty.

The numerical-vertical filing is being installed and the change to it from the numerous systems heretofore in vogue has caused all the difficulties, but it was imperative that a change be made, and the new system will meet all future requirements without change.

STOCK SECTION.

For years the books had been allowed to accumulate without any attempt being made to classify or record them. In the early days of the office the stock bins and an index thereto provided accurate information for quick reference, though the entire scheme was cumbersome and expensive, involved considerable clerical labor of an experienced character, and demanded much more space for its proper operation than the office could command. Perhaps these considerations had something to do with the adoption of the policy of keeping no records whatever.

The books were dumped out of the sacks and piled in heaps upon heaps, regardless of their character. Libraries returned all sorts of books other than Government publications; in fact, it seemed they used the privilege of document returns by free frank as a means of disposing of all their useless, discarded, worn out, or dilapidated books.

During that time only a limited amount of current material had been made accessible as stock, and this was added to spasmodically by withdrawing from the unassorted piles volumes which were discovered to be of value.

Early in the past year we were called upon to estimate upon the amount of such material we had on hand, and we did this by weight—by measuring the piles with a tape measure and averaging the number of pounds to a cubic foot. There was no other way whereby we could give any idea of what we had on hand.

For six months a large force of temporary clerks and laborers has been employed in assorting, wrapping, numbering, accessioning, and listing for stock such publications as are considered to be of value for future distribution or sale.

The discarded surplus is being deposited in the warehouse to await legislative action in condemnation and sale as waste paper, the only logical distribution for such useless books.

SHIPPING SECTION.

One of the most important functions in connection with a mail-order business is that of shipping, and in the section which handles this part of the business must be placed persons who are careful to observe details.

It took some time to secure for this work just those people who were best suited to it, but by gradual development the handling of the extensive business of the office in this respect has developed to a very satisfactory point.

Besides the quantities of cash orders filled by shipment daily, this section has handled all the large book shipments to libraries and numerous special wrapping orders, with a minimum number of errors.

As in every other section of this office, the "system" is bringing quicker and more satisfactory action, and when more conveniences can be secured the work will progress with even more harmony and speed.

BIBLIOGRAPHICAL DIVISION.

In touching upon the work of the various sections embraced in this division, it is but justice to the employees who serve therein to give some explanation as to the delay in the issue of the publications with the compilation of which they are charged.

The explanation is a simple one. The work of reorganization of this office demanded the attention of every employee therein, especially those trained in the knowledge of public documents. The cataloguers, therefore, were assigned to various duties in aid of the scheme for classification and listing of the stock, and were engaged for months in directing the work of the temporary clerks drawn from the lists of the Civil Service Commission to whom public documents were a mystery and the matter of listing them an entirely new proposition.

As soon, however, as enough people had been instructed to carry on the work alone, the cataloguers were returned to their accustomed tasks, but not until the work on the catalogues and indexes had fallen behind to such an extent as to require many months to bring it as nearly up to date as it was when the stock taking was begun.

The sections of this division are still subject to rearrangement, and considerable readjustment of the work will be necessary before the proper organization can be accomplished in this branch of the office. As yet the matters of this division have not received my attention, with the exception of making a few changes which it was not possible to postpone, but I hope in the coming year, with the aid of a competent chief cataloguer, greatly to improve the organization and simplify the output of this division.

CATALOGUE SECTION.

The catalogue work is constantly increasing, so much so that it has been found necessary to remove from the Catalogue Section all work of indexing and listing and form a special section for that work.

Although the sizes of the editions of public documents have been reduced by law or by a desire to economize on the part of the pub-

lishing offices, and although the bulk of many of these reports has been reduced considerably for the same reasons, still the *number* of reports submitted for printing increases year after year. The steps taken toward economy, therefore, do not prevent an increase in the amount of work for the cataloguers, since the reduction of the size of an edition or of the contents of the volumes affects their work but slightly.

Rational editing and careful preparation of public documents would simplify the cataloguing, and this is greatly to be desired, as this class of work at its best is not easy.

Our catalogue force has been augmented through civil service examination, but those obtained must all be taught, and it will be some time before they are of any appreciable assistance. The cataloguing of public documents is a new art even to trained library assistants.

The catalogue section received 18,644 documents, 27,010 pieces of Congressional mail, wrote 188,022 cards, not including stock inventory cards, prepared, edited, and supervised the publication of Bulletin 7, the Monthly catalogues, and the Schedule of volumes entered in the list of office publications on page 322, and supplied indexes for several volumes of documents called for by the Joint Committee on Printing.

Document Catalogues.

It was our expectation to complete the Document catalogue for the Fifty-eighth Congress this year, but other contingencies which arose made it impossible to do this or even to keep up with the current work.

Document catalogue no. 7, for the Fifty-eighth Congress, has not as yet been sent to the printer, and it will be six or eight months before it can be issued.

In the meantime work will be pushed rapidly on the catalogue for the Fifty-ninth Congress, and while no promises can be made, it now seems possible to send it to press before the convening of the second session of the Sixtieth Congress, in December, 1908.

The issuance of the Document catalogue in one volume for a Congress is in violation of the law, but was begun with the issue for the Fifty-fifth Congress by my predecessor after he had become convinced that the issue by sessions was not only much more trouble and expense but that it interfered materially with the record itself.

He said in his annual report for 1898:

> * * * Very many objections may be urged against its publication each regular session. Some of the more serious I will point out briefly. As an illustration: The catalogue for the second session of the Fifty-fourth Congress will contain entries of documents not bearing a Congressional number from July 1, 1896, to June 30, 1897, but of Congressional documents from the first Monday in

December, 1896, to March 4, 1897. Then followed a special session of the Fifty-fifth Congress, beginning March 15 and ending July 24, 1897. No provision is made in terms for cataloguing documents of special sessions. The documents of this special session can not be entered in the catalogue for the second session of the Fifty-fourth Congress, but must necessarily be entered in the catalogue for the first regular session of the Fifty-fifth Congress, which assembled the first Monday in December, 1897, and terminated July 8, 1898. It will thus be seen that the latter catalogue will lap at both ends with catalogue preceding and following, which will probably be perplexing to those not familiar with the subject.

Again, thousands of bills were introduced and reports made at the first regular session of a Congress that are not disposed of, if at all until the last session. Full entries must necessarily be made in the catalogues for each session, and the searcher for information must examine both in order to ascertain what was done, with the chance of being misled by only examining one. The work is thus duplicated and reference is made more difficult. Many more objections might be urged, but these are deemed sufficient for the purpose.

I therefore recommend that Congress be asked to amend the law of January 12, 1895, so as to authorize the Superintendent of Documents to prepare and publish a catalogue of public documents biennially, which shall show all documents printed not bearing a Congressional number during the two years ending June 30 in each odd-numbered year, and all Congressional documents for each Congress, beginning with the Fifty-fifth.

I heartily indorse the above recommendation. The Document catalogues form the permanent record of Government publications, and everything should be done to make their issue as convenient of reference and as complete and accurate as possible. As no objection has been raised to our violation of this law in the issue of the catalogues covering the period of a Congress instead of a session, I have directed that the Fifty-ninth Congress catalogue be completed in one volume, and hope legislation can be had before the issuance of another catalogue to authorize this very necessary change.

Document Indexes.

Like the catalogues, the Document indexes are far behind in their issue. All the available assistance has been assigned to the preparation of the catalogues in order to bring them quickly up to date. They are more generally used than the indexes, and should therefore be given the preference in issue, and in fact I am convinced, after personal investigation, that the use of the Document index is not sufficient to warrant the expense of $1,500 for 2,000 copies at each session (which is the estimated cost), especially as the work is done in duplicate, and much more fully, in the Document catalogue.

This office has always been justly proud of its Document index, considering it a model for "title-a-liners," but in the interest of economy, and to avoid useless duplication, the discontinuance of the issue is recommended. As no legislation has as yet been obtained authorizing the abandonment of the Document index its compilation is being proceeded with, and copy for the Fifty-ninth Congress,

first session, index will be sent to the printer some time this fall. Although work has been started on the issue for the Fifty-ninth Congress, second session, it will not be published until a year hence.

Monthly Catalogues.

So much interest has been aroused through the radical changes made in this catalogue that an explanation, embodying a sketch of its development to the present form, seems necessary.

The general printing act, approved January 12, 1895, defined as one of the duties of the Superintendent of Documents the preparation of a monthly catalogue in the following language:

> Section 69. A catalogue of Government publications shall be prepared by the Superintendent of Documents on the first day of each month, which shall show the documents printed during the preceding month, where obtainable, and the price thereof.

The first issue under this provision was made for the month of January, 1895, being numbered one (1) of the series, and the issue was continued in practically the same form (that of governmental author by Department) up to January 1, 1906 (no. 133), when the form was changed to governmental author by issuing office.

In December, 1897 (no. 36), a new and very useful feature, an index, was introduced, and beginning in February, 1900 (no. 62), the catalogue was further improved by making the index cumulative from January to June and July to November. with a yearly index in the December number.

With these additions, and as a result of the careful work which was put upon it by the catalogue force, the Monthly catalogue assumed an important place on the reference shelves of the libraries and became a handy manual for all persons interested in United States Government publications. In fact, from the returns received from the libraries in answer to questions relative to the usefulness of the publications of this office, it is evident that the Monthly catalogue has been more widely used and more highly prized than either the Document catalogue or the Document index.

It was not the intention of Congress, however, to have the work of cataloguing done in duplicate. Its purpose in legislating was to provide for a "Comprehensive index," or catalogue, which should be the permanent official record of all Government publications, both Congressional and departmental; a "Consolidated index" to the numbered Congressional documents and reports, instead of numerous indexes distributed through the volumes composing the four series—that is, Senate documents, Senate reports, House documents, and House reports, and a Monthly catalogue to be issued "on the first day of each month," and which should show "the documents printed during the preceding month, where obtainable, and the price thereof."

This legislation for a Monthly catalogue really contemplated a list of available publications, to be issued promptly, and to tell where they could be obtained and whether free or at what cost.

Obviously the catalogue as issued up to the present time has not strictly complied with this law, as it has been composed mainly of entries for documents and reports which were not "available" at any price.

In order to comply more strictly with the law and make it possible with a limited force of trained people to issue the Document catalogue and Document index more promptly, and in view of the fact that these same experts must be used in the reorganization of the Superintendent of Documents' office, it became necessary to eliminate from the Monthly catalogue those valuable features which were not specifically directed by law, and which only a law and an additional force of experts would warrant.

The sacrifice of the cumulative index was one which economy and the avoidance of duplication demanded. No doubt it was valuable; but since it delayed the issue of the more important bibliographical publications, its elimination was considered wise.

The dropping of this feature necessitated a less involved form of entry, and, as an experiment, the issuing office was chosen. There is a diversity of opinion as to the advisability of this experiment, even with those who are unanimous in their condemnation of the removal of the index.

After eighteen months of experiment with this form of entry we have decided to make a still more radical change, beginning with the July issue, and are of the opinion that the compilation in future, in dictionary form by subject, will be more usable and meet with general approval.

The main feature in this contemplated change is this subject arrangement, rather than that by governmental author, which without an index has been voted to be too cumbersome, although it possesses many advantages. The form of subject headings used in the Document catalogue of this office will be adopted, so as to secure uniformity in the subject treatment in all our publications. References will be made to the subject so that the publications will be fully covered. The typography will be slightly changed in order to use typesetting machines in the composition, which is necessary for promptness of issue. Furthermore, on account of the limitations imposed by the law, no publications will be entered which are not obtainable. In the past entries made for certain publications which had been printed, but which were not obtainable, have caused the various publishing offices endless annoyance, and it is to avoid this difficulty that the titles of such publications will be omitted. These titles will, of course, appear in the document catalogues.

In other words, it is hoped to make the Monthly catalogue as useful to both the public and this office as the limitations of the law will permit. The cover pages will be used for advertising public documents for sale, and some space in each catalogue will be devoted to book talks and notes of general interest, in the hope that much available valuable information relative to both old and current publications may be circulated. This move will benefit, but will by no means completely adjust, the matters which provoke discussion relative to this catalogue. In this new form the publication will be too meager in entry for a catalogue and much too elaborate for a price list. Very little advertising or cash business will be obtained from its circulation, as the limited edition allowed by law confines its distribution to libraries, which obtain their publications free. It will only partially serve the purposes of the libraries, as many valuable publications are issued which are not generally available and which will not hereafter be entered in the Monthly catalogue. But according to our present plans it will be issued in strict compliance with the law, in a form convenient for reference, and consistent in entry and style with our other catalogues.

We deplore the necessity for frequent changes in series of this kind, but experience is often the best teacher. After all, we are convinced that the most desirable form for a Monthly catalogue is that of a classed catalogue similar to the one issued up to January, 1906, with a cumulative index constructed along even more liberal lines than the one which lack of authority caused us to abandon.

If the passage of a law can be secured authorizing the change to this more usable form the price feature will be done away with, and instead of a publishers' list, which the law now contemplates, we will issue a "Monthly catalogue" in which will be found a complete register of the publications of a single month, brought together by a cumulative index as formerly.

Before the 1st of July, 1908, steps will be taken to procure such legislation, and if it is obtained a reference catalogue, instead of a publishers' list, will be issued beginning with the July, 1908, issue.

The consideration of this subject brings me to the point of discussion of what to me seems the most important matter with which this office has to deal at present.

Printed cards.

In the ninth annual report of this office, that for 1903, it is announced:

> It has finally been decided by this office to furnish printed catalogue cards of Government publications to the depositories of public documents.

In conformity with this announcement a limited issue of printed catalogue cards was commenced, on a plan of entry selected by vote of the Catalogue Section of the American Library Association.

The cards were at first furnished in sufficient numbers to provide for fully cataloguing the publications they represented, but did not include any "series entries, annual reports, reports on private bills. references, or analyticals, except analyticals from the Congressional reserve."

The distribution of more than one card lasted only a little over eight months, as it was found impracticable to continue on account of the great increase of labor involved, and thereafter only a single card was supplied.

In order successfully to undertake such a work, even with the restrictions and limitations which were adopted, a thoroughly organized card section would be necessary. Lacking such organization, it was not possible long to maintain the issue. The interest which was at first manifested in the subject gradually waned, and when only one card was supplied the libraries became discouraged and so expressed themselves. The sending of a single card was of but little aid to them.

As late, however, as September, 1905, the distribution is spoken of as having proven "a great success," although it is admitted that "Librarians have been disappointed because the distribution has been limited to one card for each document." The fact that in the February following I discontinued the distribution until the matter could be satisfactorily adjusted and that but few complaints at that action were received is proof that the needs of the libraries were not being met in this respect.

But these needs are still as great as when the matter of the Government furnishing catalogue cards for the books distributed to designated depositories was first agitated many years ago. No substitute can be found for the cards in library records; and the problem of actual use of the books in the libraries will never be solved until cards are supplied in sufficient numbers to provide for the proper entries in the various library catalogues fully covering every publication issued to them.

At the Asheville conference of the American Library Association, held the latter part of May, 1907, during the discussion relative to public documents, Mr. Richard R. Bowker, editor of the Library Journal, and at one time chairman of the Committee on Public Documents, in the course of his remarks had this to say regarding the issue of cards:

> I wish to add one more suggestion, that sooner or later there should be brought about a closer correlation between the card system of the Library of Congress and the office of the Superintendent of Documents, so that simultaneously with the volume, and perhaps in the volume itself, there may be sent to the libraries the proper analytic cards for the volume. I don't think there could be a greater saving to the libraries than a system of that sort.

Not only do I desire "closer correlation" with the Library of Congress, but with every other office which undertakes to catalogue its publications. In fact, I intend to take up this matter in such a way as to bring about as much consolidation of this work in this office as possible.

Mr. Henry M. Gill, of the New Orleans Public Library, in his interesting paper on the "Obstacles to a proper use of documents by depository libraries," which was read at the Asheville conference, has this to say relative to the discontinuance of the card issue by this office:

> A few nights ago I noticed a paragraph by Mr. Roden. It was a psalm of rejoicing after a period of long suffering: "Only within the last few months have we been vouchsafed a glimpse of the promised land in the printed cards for the current documents henceforth to be issued by the document office in Washington, after a full forty years wandering in the wilderness which, unaided, we found ourselves so sadly unable to subdue." These words of triumph seem now to be surrounded by an atmosphere of mingled pathos and humor, for hardly had they been uttered when the document office, more cruel than the Amorites and the Caananites, rudely thrust the singer back into his wilderness of despair. The cards that the superintendent began to issue in full sets were found to be too expensive and the office could not sell them without the authorization of Congress. The Government owes it to the depositories to furnish them with an ample supply of catalogue cards. The money that is being spent by libraries in caring for public documents is a very considerable sum.
>
> * * * * * * *
>
> The great work, however, that the depositories should take hold of as a united body is the securing from the Government the means of cataloguing their collections.
>
> * * * A card section should be created in the document office to supply catalogue cards in sufficient numbers to every depository library. At the very least cards should be supplied by the Superintendent for all current documents. We should assist him in securing authority from Congress to issue cards in sufficient numbers, and, if necessary, charge for them. I believe that most depository libraries would realize that it would be cheaper to buy the cards than to try to do their own cataloguing unaided.

Since the temporary abandonment of the issue of printed cards by this office the Library of Congress has taken up the matter in its well-organized Card Section and issues cards for a selected few of the most important current public documents.

The Library of Congress also prints and distributes cards for the Agriculture Department publications, these cards being prepared by the Department. The Geological Survey publications are also being thoroughly catalogued.

At present we distribute with our shipments carefully prepared invoices, which are compiled in the simplest form for checking purposes. As soon as we have caught up with our back work in cataloguing, or possibly with the commencement of the Sixtieth Congress, I hope to resume the issue of printed cards for all books sent to

designated depository libraries and furnish them in lieu of the present invoices in sufficient numbers to meet all their needs in cataloguing. If this attempt succeeds and experience warrants it we may then increase our scope to analytical work, which of course could not at present be undertaken.

The ideal plan.

After years of practical experience in the listing and uses of Government publications, I am of the opinion that the ideal plan for furnishing library aids for Government publications embraces these four important features:

1. Printed cards in sufficient numbers to catalogue completely, and as nearly as possible in conformity with the monthly catalogue entries, every publication distributed to designated depository libraries; the cards to be sent with, or as soon as possible after, the books.

2. A Monthly catalogue which shall completely cover the publications of a month, the entries to be made consistent with the Document catalogue as far as possible and set down in a classed form with a cumulative index.

3. A Document catalogue issued biennially, which shall present as the permanent record and elaborate cumulation of the Monthly catalogue for two fiscal years, thus covering the period of an entire Congress instead of a single session.

4. A monthly price list of public documents, giving the titles of important publications printed during the month, stating where they are obtainable, and the price thereof, and including such notes of general interest as it may seem desirable to make public.

This can all be accomplished with but slight duplication of work except in the matter of printing, and, as outlined, presents the simplest form we can at present devise to meet all the needs.

CHECKLIST AND INDEX SECTION.

The duties of this section have been varied. Numerous special lists and indexes have been called for in addition to the work on the Checklist.

It takes a great deal of work of this character to make any showing at all, and while progress is being made slowly, so far as the new edition of the Checklist is concerned, work on it is being accomplished.

Ever since the issue, in 1904, of the "List of publications of the Agriculture Department, 1862–1902," there has been a constant demand for the other Department lists, of which series the Agriculture list was no. 1. Had it not been for the necessary reorganization of the office of the Superintendent of Documents some of the other lists would have been issued before now, but as it is they are in comparatively the same incomplete state as they were a year and a half ago.

The work as outlined for these Department lists involves the careful listing and indexing of all the publications of each of the Executive Departments and independent publishing offices, and the compilation and issuance of this information, arranged by Departments, and uniform in every respect with the Agriculture issue.

This plan will some day be carried out, and by degrees the necessary statistics are being gathered, but it is work of such magnitude that considerable time will be spent in the mere collection of material before it can be edited or published.

To satisfy the repeated demands of those interested in public documents for some sort of a list which will indicate what completes a certain set or what constitutes a collection of a given publishing office, it has been decided to issue a "Checklist" which shall contain entries in the simplest form for all the publications of the United States Government, arranged by (1) Departments, (2) bureaus, (3) series.

The old Checklist, issued in 1895, proved one of the most popular works ever published by this office and the edition was soon exhausted. A reprint would have been made but for the fact that a revised and elaborate edition was in contemplation.

It has been further determined to issue the Checklist in advance sheets, and their publication will begin in the near future. Each publishing office will be separately treated, and space will be left on the sheets to allow for corrections or additions. These sheets will be sent out to the libraries and publishing offices with the request that they give this office the benefit of their criticism and supply it with any additional information which they may possess.

In this way a list should be evolved which, when finally issued, will be an authentic and complete bibliography of the United States Government publications.

LIBRARY SECTION.

From its inception this library, now comprising the largest collection of United States public documents in the world, has proved an indispensable adjunct to the proper conduct of the business of this office. It was instituted primarily as a key to the stock. This it accomplishes now, but it also supplies the material for the great amount of reference work we are called upon to perform. It forms a working basis for the compilation of our many catalogues, lists, and indexes, and is used continually by the editors in the Editorial Section in their endeavors to procure uniformity of issue in the output of publications of the various offices.

The systematic stock taking in which we have been engaged during the greater part of this year has been the means of adding to the library many valuable old works of which we had previously no

knowledge, and we anticipate still further accessions as we advance in this work.

The tabulated statistics of the library are as follows:

Additions and totals for the fiscal year 1907.

Government authors and publishing offices.	In library June 30, 1907.		Increase from June 30, 1906.	
	Documents.	Maps.	Documents.	Maps.
Agriculture Department	7,201	5,394	1,009	406
Civil Service Commission	405	.....	139	.....

Total	81,675	10,450	8,988	668
Grand total	92,125		9,676	

It is our desire to make this collection as complete as possible. Up to the present time the books have been gathered from the duplicates returned by the libraries, or received by shipment from the Government Printing Office, or from the publishing offices for cataloguing. In a few instances we have begged a volume or a set from an office which we knew possessed the books desired, but as yet no special effort has been made to fill up our gaps and reduce our list of wants.

We are indebted to various publishing offices for donations to fill gaps in our collection of their early reports. The Library of Congress has also been very generous in supplying us with missing volumes and even entire sets.

Some time in the future it is our purpose to issue a list of our wants, and we feel sure from past experiences that whenever a library can supply our needs it will do so gladly. It should be, and doubtless will be, a pleasure for the libraries to contribute to this laudable purpose of completing the already magnificent collection in this office.

A general catalogue.

That the mass of publications already collected in this library will ever be catalogued is a question for future consideration. It is a task which demands not only the most experienced people to perform, but is so gigantic that those at present available could not complete it in twenty years. Public documents even in their current issues are sometimes enigmas to the trained cataloguers of this office, and usually make necessary in cataloguing great variety in treatment, on account of their lack of bibliographical and even typographical clearness. And of earlier issues nothing need be said, as all who consult them or attempt to trace them by accessible library aids know that their intricacies are appalling.

In 1874 (Forty-third Congress, first session, Senate Miscellaneous Document 125, serial no. 1584), a memorandum was submitted by the Librarian of Congress concerning a complete index to the documents and debates of Congress. The scheme proposed contemplated the indexing of some 1,600 volumes containing the documents and reports, and records of the proceedings of Congress from colonial times down to that date, and while it was admitted that it would be a stupendous task, it is denominated "an enterprise worthy of Congress, and one which no considerations of difficulty or of expense should be permitted to defeat."

After some years of experience in the practical work with the material he proposed to make available by means of a "topical" index, I am led to believe that such an index is not at all what is desired to unseal the veritable treasures which are buried in public documents. A complete dictionary catalogue is what is needed, and such a catalogue is not at present possible of production at any price, on account of the lack of trained people available for the work.

The pioneer efforts to furnish catalogues of Government publications prove the fallacy of endeavoring to compile accurate or usable library aids with untrained assistants; so that "Poore's descriptive catalogue" and "Ames's comprehensive indexes" should be allowed to fill the needs as best they may until a well-organized force of trained assistants can be procured for the compilation of a consistent and reliable catalogue embracing entries for all United States public documents.

In the 1905 report of this office my predecessor proposed to undertake the compilation, with the facilities then at his command, of an

"Analytical dictionary catalogue of all Government publications, 1789–1893," and a "Topical index to the proceedings and debates in Congress, 1789–1905," and to complete these publications in six years at $27,400 per year, or a total cost of $166,400.

Both publications are desirable, and will in time be compiled, but I would not undertake the work at present; and when I did I would require considerably more than $27,400 a year to cover the expense of compilation and demand many more than six years for the completion of either one, certainly not both, of the works suggested.

When a well-established and perfectly satisfactory plan for cataloguing current issues has been devised and is being successfully operated, then will be time enough to figure on the problem of this already long delayed though very necessary cataloguing and indexing of former issues.

Government indexing.

A thoroughly interesting, and perhaps amusing, volume could be written regarding the preparation of indexes in general and those found in public documents in particular.

As a key to a volume or collection of volumes an index figures as an important factor in the use of the material comprised. It should therefore be carefully constructed along lines as strictly drawn and established as those so tenaciously adhered to by the cataloguers in the work of recording the location of the volumes or collections. It is generally supposed that it requires a special sort of intelligence and an unusual amount of careful training to evolve a cataloguer, but that anyone who can read and write can compile an index. This supposition is entirely erroneous. You can educate persons of ordinary intelligence to catalogue, but it is my opinion that indexers are born, not made. There is a certain intuitive quality which the successful indexer must possess, which is found so seldom as to place really competent indexers in the class of geniuses.

Had not the mistaken idea as to anyone's capabilities for constructing an index been so prevalent, usable books would have been the rule rather than the exception.

The indexing of volumes or series of public documents, unlike their cataloguing, presents no extraordinary difficulties, and yet, with but few notable exceptions, the work has been done in an amateurish fashion, indicative of lack of appreciation of the value of careful indexing and unfamiliarity with the subject-matter treated of.

While we have no experts in this line of work in this office, we have some promising workers, and have the advantage of being in a position to devise ways and means at least for providing uniformity in this respect.

This office should, therefore, possessing, as it does, the official cataloguing forces for Government publications, be the center from

which all Government catalogues and indexes emanate. I do not advocate the preparation of all indexes here, as I am convinced that a thorough knowledge of the subject-matter is the only surety against a poor index, but they should all be edited and published by this office, that uniformity in their form at least might be established. No more exasperating feature presents itself to the searcher in public documents than the variety of indexes which he is called upon to consult.

One unique specimen which has been discovered has not only a name, but is furnished with a motto as well. It is to be found in Senate Miscellaneous Documents 48, Fifty-second Congress, first session, and is entitled "Bird's-eye index of the Torrey bankrupt bill," with the truly good indexing motto, "A place for everything and everything in its place." It is, however, nothing more nor less than a one-page table of contents, as complete and consistent as hundreds of other so-called indexes, but more notable on account of the pretensions expressed in its caption.

From the antiquated "chopped" index, where the title is cut in two at the word under which the entry is to be made and the first part of the sentence is transferred to the end, to the expensive and ragged "cleared" index, which is still used to some extent, and on down through various modifications of these forms to the simple "indention index," which is now used by this office, the confused inquirer is forced to wander through a perfect maze of bibliographic absurdities.

Besides this, the enormous and useless outlay which is incurred by the adoption of systems such as the one used in the index to the Congressional Record, where the lavishness with which space is consumed adds expense to the work without any particular benefit, could be avoided.

The same arguments offered in favor of the centralization of the distribution of public documents can be offered in support of the centralization of the work of cataloguing and indexing them, and it is hoped that in acting upon these matters their merits only may be considered and all personal considerations may be set aside in the interest of the public good and in an endeavor to remove the just opprobrium which much of the present governmental business organization engenders.

EDITORIAL SECTION.

This section, which is destined to become an important division of this office, has been fully dealt with in another portion of this report, so it but remains for me to say here that if it in any degree approximates in results what is anticipated for it in my thought regarding it, its value to the future issue of Government publications will need no defense, for its work will fully justify its existence.

SALES.

No sooner had the office begun to operate in 1895 than applications were received for the purchase of publications. The first year's sales were very small in comparison with those of the present report, but the increase has been gradual year after year, until this fiscal year, 1907, when, through judicious advertising and voluminous correspondence, the sales have been increased 100 per cent.

The following table is interesting as indicating the growth in popularity of this sales feature:

Sales statement.

Fiscal year.	Sales.	Returned to remitters.	Fiscal year.	Sales.	Returned to remitters.
1896	$889.09	.....	1902	$10,946.21	$736.94
1897	4,016.15	$380.75	1903	11,437.94	1,231.35
1898	4,184.22	731.70	1904	12,490.98	986.29
1899	7,328.46	654.29	1905	16,275.09	1,095.31
1900	8,644.34	953.65	1906	16,485.88	1,729.58
1901	9,062.09	1,186.25	1907	32,172.88	2,282.61

The amounts shown as "returned to remitters" indicate a lack of stock for demanded publications, caused to a great extent by the poor economy of the publishing offices in printing limited editions of valuable works, or more often by our inability to foresee a demand when a book is put to press and we have only its title to go by in ordering for stock.

Another annoying feature which prevents many sales being consummated is the necessity for refusing postage stamps when remitted in payment for books, as we have no means of disposing of them or converting them into cash. Our sales are largely in amounts of 5, 10, or 15 cents and other small amounts, and the farmers especially find it convenient to remit postage stamps. In many instances the return of these stamps loses us the sale, deprives the man of the book desired, and costs more clerical labor to record the return than it would to make the sale.

A legal tender of small amounts is greatly needed, and its advent would be welcomed by thousands who patronize a mail-order business such as this office conducts.

By the use of up-to-date business methods we expect to put Government documents before the public as prominently as their importance demands. We hope to continue to increase the sales year after year by educating the people to apply to this office for books or information, and to endeavor to have on hand in accessible form for immediate delivery what they desire. In the interest of this develop-

ment as much red tape as possible must be eliminated and our intercourse with our customers be as systematic and prompt as that of large commercial enterprises.

ADVERTISING.

The $4,000 appropriated by the act of March 4, 1907 (34 Stat. L., p. 1398), for the purpose of advertising for sale the surplus of certain valuable publications was very fruitful in the desired results, and our records show that approximately $1,800 of sales are already directly traceable to this advertising, the results of which will of course extend into the future; a splendid showing, when it is considered that this is the first time such advertising has been done in relation to public documents. It is hoped that the appropriation for the fiscal year 1908 will prove as productive.

Besides this expenditure, the issue of pamphlets on simplified spelling gained wide notoriety and proved for us another means of materially increasing our sales, but the chief factor in this increase (100 per cent during the past fiscal year) has been the intelligent handling of prospective customers by the clerks of this office, who are engaged in making quotations and filling orders. No effort has been spared in giving customers all the information procurable on the subject in which they signified an interest.

In lieu of a general price list, various small lists on subjects of special interest have been completed and distributed in large numbers.

Of price list No. 10, "Laws of the United States," two editions have been printed; large numbers of no. 11, on "Food and diet," and of no. 12, on "Water pollution and water purification," are being distributed.

Numerous other special price lists are in course of preparation, and leaflets will be issued when the material is not sufficient to warrant the compilation of a price list; in fact, this work is growing so rapidly, and is found so effectual in popularizing Government publications, that a detail of trained people is contemplated and the eventual establishment of a section devoted entirely to the work of preparing such lists and leaflets.

We are also designing a poster to be displayed in the libraries, giving direction as to how to obtain Government publications or information concerning them. It is also intended to request permission of the Post-Office Department to display these notices in the post-offices throughout the country as a means of informing the people that a large bureau is maintained in Washington for the purpose of supplying Government publications free to libraries, or at cost to individuals.

Elaborate preparations are made for the development of trade by proper "following-up" methods; and extensive classified lists are

being gradually compiled accessible for circularizing when that class of literature is received which will warrant it. In short, everything is being done within the limits of the law to inform the American people what is available in the form of public documents; and the information is put before them by as attractive and business-like methods as those employed by first-class publishers in the commercial field.

It should here be said that this work is not done in the hope of exploiting any business scheme nor to develop, primarily, a self-supporting office, although these considerations would be justifiable; but it is to fill a long-felt need—to centralize the distributing point for Government documents and information concerning them.

THREE CLASSES OF LIBRARIES.

This office is at work adding to its list the names, addresses, and statistics of all organized libraries of which it receives notice. This list is under constant revision, and the libraries thereon are supplied from time to time with literature of interest relating to United States public documents.

There are three classes of libraries with which we deal—namely, the designated depository libraries, the geological depository libraries, and the miscellaneous libraries.

DESIGNATED DEPOSITORY LIBRARIES.

Before the establishment of designated depositories, or any systematic methods for the distribution of public documents, special acts were passed at various times providing for the printing of a sufficient number of copies of the public journals of the Senate and House of Representatives for distribution to the executives of the several States and each branch of the State and Territorial legislatures. Provision was also made at times for supplying these journals, the acts, and sometimes the documents and reports, to each university and college incorporated in each State, as well as to the incorporated historical societies throughout the country.

During the Thirteenth Congress, second session, December 27, 1813, a resolution was adopted embodying these provisions which had heretofore been covered by special legislation, and not only directing for a Congress, but stating "for every future Congress." Two hundred copies in addition to the usual number was the limit named for documents, and this of course was more than sufficient for the needs at that early day.

At the third session of the same Congress, under date of December 1, 1814, the provisions of the above-mentioned resolution were extended to embrace the American Antiquarian Society at Worcester, Mass.

Again, at the Eighteenth Congress, second session, March 3, 1825, the Gardiner Lyceum was added to the list.

By joint resolutions approved July 20, 1840, and April 30, 1844, the number of copies of journals and documents printed was increased to 300.

A resolution of January 28, 1857, as amended by resolution of March 20, 1858, was the real basis of the institution of depositories. By these provisions the journals and documents which up to that time were deposited in the Library of Congress for distribution by the librarian, and 250 copies of those delivered to the Department of State for distribution by that Department to colleges and other literary institutions, were transferred to the jurisdiction of the Secretary of the Interior "for distribution to such colleges, public libraries, atheneums, literary and scientific institutions, and boards of trade or public associations as may be designated to him by the Representative in Congress from each Congressional district, and by the Delegate from each Territory in the United States."

The following February, at the second session, Thirty-fifth Congress (February 5, 1859), an act was passed providing for "keeping and distributing all public documents" (11 Stat. L., p. 379). This act charged the Secretary of the Interior "with receiving, arranging, safe-keeping, and distribution" of public documents "of every nature," already or hereafter directed by law to be printed or purchased for the use of the Government, "except such as are for the special use of Congress or the Executive Departments." It also empowered him to remove from the Congressional Library and other places all accumulations of books, journals, etc., and appropriated $22,000 for the purpose. He was directed by the act to keep accurate statistics of the receipt and distribution of all books.

Section 5 of this act further amended the resolution of January 28, 1857, by providing for the Senators, and directing that the distribution should be made first to such States as had not yet been covered by distribution, and that in the future the distribution should be kept equal in each Congressional district and territory.

All the books, maps, charts, etc., heretofore deposited in the Department of State were also turned over to the Secretary of the Interior.

The act of February 5, 1859, was in force without amendment until March 2, 1861, at the Thirty-sixth Congress, second session, when a long act to amend was passed (12 Stat. L., p. 244), the most important feature of which as affecting general distribution was contained in the first section, which gave the Secretary of the Interior the right to designate libraries to receive publications of which the edition was not sufficient to supply the regular depositories to be named by the Senators and Members. His power of selection was

limited, however, by a proviso in section 2, which stated that in future the public documents to be distributed by the Secretary of the Interior should be sent to the institutions already designated, unless he should be satisfied that any such institution was no longer a suitable depository for the same. This act also contained a clause repealing all acts or parts of acts inconsistent with its provisions.

Upon the basis of these acts the Revised Statutes were compiled, and chapter 7, sections 497 to 511, pages 82–85, contains all operative provisions reenacted at that time.

No legislation can be found prior to that contained in the general printing act of January 12, 1895, affecting the State and Territorial libraries, and it is thought that it became customary to send documents regularly to these libraries, under the discretionary powers vested in the Secretary of the Interior, and that that accounts for their appearance on the depository list many years prior to 1895.

The designated depository list comprises at present by law the following-described libraries:

All State libraries	46
All Territorial libraries	4
One library for each Congressional district, to be designated by the Member from that district	391
One library to be designated in any part of the State by each Senator	92
One library to be designated by each Delegate in Congress in any part of a Territory	4

The following libraries have been added to the above list by special legislation:

The libraries of each of eight of the Executive Departments in Washington	8
The libraries of the United States Military and Naval academies	2
The library of the Philippine government	1
The libraries of the land-grant colleges	67
Total	615

At present only 474 of these libraries have been designated and many districts are without representatives. At the commencement of the Sixtieth Congress an endeavor will be made to fill up the list.

The idea of "designated depository libraries," that is, libraries scattered throughout the country in which are deposited, under the provisions of law, complete collections of all public documents which are printed "and made for distribution," is an excellent one, but as actually applied it is anything but satisfactory.

In the first place the only restrictions of the present law are that the library placed upon this list must be a public or school library, and in the case of the former must contain at least 1,000 volumes other than Government publications.

Designations may be changed at the will of the Senator, Member, or Delegate at the commencement of any Congress, and as the desig-

nators change often, the life of a library as a depository is apt to be short. This causes broken sets in numerous libraries, instead of fine collections at convenient points for reference use by the public.

The libraries now designated are in many instances unable to afford either the shelf room to accommodate the books or the clerical labor involved in properly handling them. The consequence is that volumes with pretty bindings or attractive titles are taken out from the shipments and placed upon the shelves, and the remainder are dumped in attics or cellars to await an opportunity to return them to this office; and this sort of thing will continue so long as the Government insists upon forcing upon libraries quantities of books for which they have no need.

The proper method of operating designated depositories for United States Government publications would be to create a fund for the payment of library assistants in the most important libraries in certain localities in each State, who, as agents of the Government, would look after and make available the public documents consigned to these depository libraries. Then to insist that such depositories must receive and make available for public consultation everything printed by the Government. Some such plan as this appeals to me as better adapted to the purpose of popularizing public documents and making them available than the oft-suggested method of library selection.

Under the scheme of library selections those publications only would be supplied which a librarian requested. This method involves too much of the personal equation. No one knows what contingency may arise to make interesting in a locality or section of the country certain public documents which at the time of issue are of no interest or value, seemingly. Besides, public documents as reference works should be easily available, all of them, and this desideratum will never be reached so long as the distribution is free and no provision is made for the care and preservation after being sent out.

Let me here insert, as a matter of historic record, several paragraphs from the able report of Miss Adelaide R. Hasse, made by her to the 1907 conference of the American Library Association, as chairman of its Committee on Public Documents:

> While librarians are of course interested in the way in which public documents are printed, I do not think we would know enough about that to worry us, if the present system of distribution had not been devised. That system has had the effect of making the document collection an appreciable asset in 500 different libraries throughout the Union. Instead of being a convertible asset, it is in a great many cases a white elephant. These two facts, viz, the indiscriminate distribution of a public grant and failure of the grantee to convert the asset into a negotiable factor, have brought about what may without exaggeration be termed the present crisis.

A survey of the records has led to the assumption that the original motive of this depository distribution was an amiable desire legitimately to benefit struggling and worthy institutions. There was at the time of its inception no organized labor interest to cause an inflated demand for these books. It may even be doubted whether the perpetuity of the scheme entered into the consideration of the benevolent gentlemen who promoted it. Certain it is that the project was not stamped with permanence until, by the resolutions of 1858 and 1859, it was based on Congressional designation. So soon as this change took place the basis became one of population.

Public documents are used almost solely by specialists in some one of the natural, technical, or historical sciences. Yet according to the basis referred to it is the natural and artificial increment of the whole population, which determines both the number and the location of depositories. The natural increment is not sufficiently diverse in the several States to affect our particular case; that is, the birth rate of the whole population is not sufficiently fluctuating to affect it. The artificial increment is due to the influx of foreigners. This influx proceeds along a direct route, namely, through the States of New York, Pennsylvania, Ohio, and Indiana to Illinois, where it disperses. Now as depository designation is determined by representation, and representation by density of population, it follows that the location as well as the number of depositories is practically fixed by the introduced American. In Greater New York alone there are now 15 depositories.

The change in the law which brought about this condition has had the effect of increasing the depositories from 12 in 1859 to 500 in 1904. At the same time the number of volumes subject to depository distribution has increased from 105 volumes per Congress in 1859 to 341 volumes per Congress in 1904. That is, the housing burden on the individual depository is more than three times greater to-day than it was in 1859, and there are a trifle less than 500 depositories to bear this burden as against 12 in 1859. That this increase in supplying a commodity is out of all proportion to the demand for it, is shown by the huge accumulation of not wanted documents in Washington.

The fault lies in simple economic miscalculation. On the one hand we have a producer supplying a commodity on the basis of the growth of the whole population. On the other hand we have the consumer, in this case a specialized group—the American student body. This consumer is numerically far in the minority, the ratio being about 1 to 750. In trying to get away with the supply there has been incurred on his part what amounts in many cases to chronic document indigestion.

The result of this oversupply is the astounding spectacle of a producer forced to provide storage for his own unsalable goods at the same time that he is hiring an army of 3,000, more or less, to turn out more of the same kind of goods. What adds to the astonishing feature is the fact that not private but public funds are being usurped.

* * * * * * *

The only effective cut can be made in retrenchment in the Congressional quota and in depository distribution. The former has already been suggested by the Printing Commission. The latter has not been broached by it. I do not think that the intention has been to overlook us, but I have a feeling that it has been because the public man is perhaps the keenest of all men to follow the maxim that it is well to let sleeping dogs lie. For until to-day in all the fifty years that the depository system has been in operation Government and the depositories have never taken a single step to bring about a mutual hearing. I think legislators have all along felt that it was expedient to let us alone, and that in some way they perhaps didn't see exactly how they were accomplish-

ing a great public good in maintaining this depository system. We have allowed them to remain entirely in the dark as to our perplexities. As these have become multiplied we have been inclined to take it out on the officials appointed to carry out the law. We have seemed not to realize that the more strenuously these officials carried out the law the greater the disaster they were creating for us. For a more loosely drawn law than the printing law of 1895 is probably not written upon the statute books. The only solution which suggests itself at present is that of placing a file of Government publications in carefully selected libraries able to care for such a file, and which represent various parts of the country, and after that the withdrawal of all other documents from free distribution and their sale at a minimum cost price. You may not all agree with this suggestion, and it is by no means put out as an ultimatum. But if a change is expedient, if it is hoped for, if it is to be worked for, some one had to make the opening move.

Miss Hasse has struck the keynote which will eventually operate to attune the present inharmonious conditions she so graphically describes.

The only remedy for the "chronic document indigestion" from which this office is the greatest sufferer is to so regulate the output of Government publications that no great surplus will remain after a logical distribution has been made to selected libraries, and to dispose of what volumes do remain by sale at a minimum cost price and not further encourage any gratuitous distribution.

The statistics of this report show that 503,564 books were sent to depositories during the year, over 1,000 books and pamphlets to each library, and it is estimated that it requires nearly 50 feet of shelf room to accommodate them. For many of the libraries in the list, this contribution is the largest they receive, and doubtless with all it is the most difficult to handle.

Itemized invoices are sent out with each shipment, and everything is done to assist the libraries and interest them in making the publications available. But these books, presenting as they do problems in classification which no other books ever suggest, are often shunned by the too often overworked library assistant and allowed to accumulate in unaccessioned heaps.

Much of the material contained in public documents is of historic and scientific value and should be distributed in such a manner as to insure its being made immediately available.

To constitute permanent depositories in important centers in the various States, subject only to change at their request or upon it being discovered that they are not complying with the law, and to place therein all Government publications printed for distribution, under the control of a person trained in library methods and versed in public documents, would be a saving of money to the Government and practically accomplish that which is now only theoretically brought about.

GEOLOGICAL DEPOSITORY LIBRARIES.

By the provisions of a joint resolution approved March 3, 1887, two libraries in each Congressional district were authorized to be named by the Representatives for the several Congressional districts, respectively, and two by each Senator or Delegate, to receive the publications of the Geological Survey.

Section 79 of the act of January 12, 1895, doubled this allotment, as fully stated in Joint Resolution no. 19, approved February 26, 1896. The result of all this legislation is a list of over 1,400 libraries, which may, by law, be extended to 1,948 libraries. I am fully convinced that many of these libraries do not care to receive the material sent them, but am unable to take any action in the matter, as the law does not permit these libraries to be removed from the list once they are put on, except at their own request.

In the compiling of this list not even the few restrictions which govern the selection of designated depository libraries was adhered to, but any library which was suggested by a Senator or Member was constituted a geological depository.

Why four libraries in a Congressional district should be named to receive publications dealing with the abstruse subjects found in the publications of the Geological Survey and only one library be named by a Senator or Member to receive the much more sought after papers of the scientists of the Department of Agriculture, is a question to which I have long sought an answer.

Another questionable distribution which if made at all should be made by this office, is that of the weekly issues of the Official Gazette, which is made by the Patent Office to eight public libraries in each Congressional district. But why should patent publications be subject to wider distribution than agricultural literature?

The establishment of depository libraries under Government patronage and control as herein suggested would obviate the necessity of such widespread distribution of special classes of governmental literature, and better serve the public at an enormous saving of public funds. Even with the present depository list, and the absurd laws governing it, I do not hesitate to recommend legislation to repeal the provisions relative to geological and Gazette depositories.

MISCELLANEOUS LIBRARIES.

Hundreds of small public and school libraries apply to us for information along certain lines, and we devote much time in endeavoring to supply their needs from our vast stock of books or by reference to the volumes in their own or nearby library. We also encourage them to return to us all useless public documents, and for that purpose furnish frank labels for their free transportation. By this means our

own library has been added to and other libraries receive through this office publications which they greatly needed.

All requests from libraries for books will some day be made in stereotyped form, and we will then endeavor to keep track of their wants, so as to fill them whenever the publications desired drift in from other libraries.

DOCUMENT RETURNS.

During the year just closed this office distributed 642,599 books to libraries; 64,379 were sent out to miscellaneous libraries upon request, the balance being furnished under the law to designated and geological depositories. The returns from these libraries of useless or duplicate documents numbered 407,716 books, and this represents only a small part of the accumulation which the libraries are desirous of turning over, but which up to this time we have been unable from lack of sufficient competent help or storage space to receive.

The matter of document returns will be taken up in earnest the early part of this year, and the L street warehouse will be used to hold the useless publications which are being sorted from among the valuable books. Of the 3,065,002 books and pamphlets now on hand, two-thirds at least are fit only for condemnation and sale for waste paper, having been superseded by later editions and possessing no value to libraries.

GRATUITOUS DISTRIBUTION.

Public documents should not be given away. A nominal charge should be made, covering cost of printing and distribution. This slight charge will prevent waste and reimburse the Government, without hardship to anyone. Those who do the most talking about free distribution are usually ignorant of the disastrous consequences which such a distribution entails. I would make the price as reasonable as possible or distribute gratuitously to properly constituted depository libraries for the benefit of the public, but under no circumstances would I make a general distribution free to individuals.

The collaborators on various works, scientists engaged in research by which the Government profits, and all other contributors to knowledge should of course receive the books free in recognition of the services they may have performed.

DISTRIBUTING METHODS—PRESENT AND PROPOSED.

The entire scheme of distribution at present is erroneous. Take for instance the enormous output of bookwork of the Government Printing Office, which is, as a rule, carefully wrapped in strawboard and manila paper and tied with expensive twine for delivery to the publishing office. The bundles, so prepared at a great cost against possible injury to the books, are hauled in wagons to the various

Departments and there carried laboriously up winding stairways or by means of incapacitated elevators to already overcrowded offices. Here the wrappers are removed and each book separately encased in fresh strawboard, paper, and twine, to be labeled and again hauled down, or up, as the case may be, to other wagons for delivery to the Post-Office Department for shipment. Consider the useless expenditure of time and strength.

Why not establish a wrapping division in connection with the pamphlet bindery and deliver the volumes to the mailing section in this office for distribution? Franks or labels could be sent to the Superintendent of Documents to be placed on the volumes and they would then suffer from but one hauling. And even this hauling might be done away with by the establishment of a branch post-office in connection with this office.

A BRANCH POST-OFFICE.

During the past year this office sent to the city post-office for delivery over 175,000 packages, weighing approximately 500 tons, which does not include the shipments of the Congressional Record, of which over 28,000 pieces are sent out each night during the sessions of Congress. The greater part of this was forwarded as registered mail, which demands additional checking after it arrives at the post-office before a receipt can be given. The business of this office is constantly increasing, and it is almost a necessity now to have a branch post-office for the quick dispatch of our important cash mail. Like all large mail-order establishments, a necessary adjunct to the proper transaction of our business is a branch post-office, and its establishment should be obtained just as soon as we are settled in quarters which will accommodate it.

Inspired by the improved facilities which our mailing machines and a branch post-office would offer, the publishing offices would come to realize the advantage of having their books shipped from the Government Printing Office rather than hauled to the Department and then hauled out again. The saving in time and labor, to say nothing of that to the life of the books themselves, will more than offset the expenditure, and distribution from a central agency will be accomplished.

Our mailing room is operated in such a manner that only additional help is necessary to expand the system to meet any demands, and this assistance may be the purely undefinable quality which is usually drawn from a temporary list of civil service eligibles. We expect to handle the Congressional Record under our new method if the patentees can guarantee a supply of necessary machines and materials. So far our experiments have led us to the conclusion that the mailing devices selected are the best on the market for our particular kind of work.

MAILING MACHINES.

Many weary days have been expended in watching the operation of mailing devices in large establishments where mailing problems are of great importance. I also visited the manufacturers of the more important systems, thoroughly investigated their factories, and talked with them of our needs and of improvements to their systems or of how they might be made to apply in solving our intricate problem. The search along these lines was truly depressing. To see large editions of great magazines come from the presses in an incredibly short time, covered and stitched ready to be trimmed and mailed, and then to witness the slow, laborious process of wrapping and addressing, was a contrast so startling that it seemed hardly possible it could exist. No inventor has as yet solved the problem of a practical mailing machine—that is, a machine which prepares for mailing by wrapping and addressing the publication.

Many attempts have been made and some success has been achieved in both branches of this important operation, but no practical machine has as yet been placed upon the market which accomplishes the entire result. Even with the rapid machines which we are now using for the actual addressing, we are forced to reduce our output to the speed of human hands for the wrapping. It has always been our aim to send out cash orders within twenty-four hours of their receipt, and this is made extremely easy by the use of our stencil system.

CENTRALIZING DISTRIBUTION.

The project of centralizing the distribution of Government publications has long been discussed and is generally conceded to be most desirable. As far back as 1882, when the publication and distribution were not nearly as extensive nor involved as at present, the subject received serious consideration by a committee appointed in compliance with a resolution of the House of Representatives adopted August 8, 1882. This committee was composed of Dr. John G. Ames, the superintendent of documents of the Department of the Interior, and the foremost document expert of that period; Mr. A. R. Spofford, the veteran Librarian of Congress, and Mr. Spencer F. Baird, Secretary of the Smithsonian Institution. This eminent trio not only furnished the information requested by the resolution, but also volunteered some sound suggestions relative to more systematic issuance and distribution of public documents.

The following quotations are made as clearly stating the necessities for which this office continues to advocate remedial legislation.

As to centralizing distribution they report:

> The committee are deeply impressed with the number of documents printed by authority of Congress.
>
> * * * * * * *

They are no less deeply impressed with the lack of system and economy in the distribution of these documents. The one reform most essential to secure the object for which it is supposed that public documents are issued is the decrease of the number of agencies by which they are distributed. Under the practice now prevailing, nearly all documents, whatever may be their cost and value, are distributed by from two to four agencies, each in ignorance of what the other is doing, so that it is impossible but that to no small extent documents are sent in duplicate and triplicate to the same parties.

In the judgment of the committee, no distribution of public documents entirely satisfactory will be accomplished until all excepting those required for official use are distributed by a single agency, which can and should be required to detect and prevent duplications, which should be held to a strict accountability for all documents intrusted to its care and upon which all orders should be given by those entitled by law to direct their specific distribution.

It is not believed that any special inconvenience would attend such a system, or that the rights and privileges of any party would be infringed by its adoption.

The establishment of a single agency for this work would very greatly subserve the public convenience, as it would soon come to be recognized as the source from which information in regard to any and all documents could be readily secured and the party with whom most of the correspondence relating to the subject should be conducted.

Very serious inconvenience is now experienced by many, especially scientists and other students and librarians, in obtaining definite information as to particular documents desired, and often not until protracted correspondence has transpired, if at all, is such information gained.

As to centralizing the sales they have this to say:

The existing provisions for the sale of documents are very unsatisfactory; so impracticable, indeed, that very few avail themselves of them.

* * * * * * *

The committee are convinced that some more practical method for supplying such parties with public documents should be adopted, and that opportunity should be afforded for the purchase of any publication of the Government so long as the edition of the same printed remains unexhausted.

This can readily be accomplished by giving the officer in charge of the general distribution of documents authority to make requisition upon those offices of the Government by which or for which documents are printed for such as are not required for strictly official use. It will not be necessary for an edition of any document to be ordered for sale, but simply that some one officer of the Government shall have authority to sell any document printed, and whenever he has an order for any document to make requisition for same upon the office for which it is printed, if not already in his charge. To the care of this same officer, in the judgment of the committee, should be committed all documents which have been or may be ordered for sale, instead of as now scattering them through several Departments and offices of the Government.

In this matter, as in others, greater unity and system are much to be desired.

Although the report and the resolution submitted therewith failed to secure action on the part of Congress, they supplied an interesting chapter in public document history, and through this effort, and the

persistency of Doctor Ames perhaps more than any other person, the law of January 12, 1895, was enacted, which embodied many of the original suggestions in an elaborated form.

I have many times gone on record in protest against the illogical provisions of the printing act of 1895, but no more glaring inconsistency exists therein than that which comes about by providing, in section 61, that the Superintendent of Documents shall have general supervision of the distribution of all public documents, and then naming exceptions which remove from his jurisdiction nearly all the publications ordinarily authorized for distribution. To further complicate matters, it provides in section 92 for a competent person to be appointed in each Executive Department to oversee and keep track of the distribution for such Department.

That this garbled legislation was not enacted in the form in which it was originally prepared is a matter of record, but the concessions were necessary in order to get the printing act passed at all, and "half a loaf is better than none."

As enacted, it was intended to provide for a more complete consolidation of all Government distributing agencies, with the exception of those for Congress, but never in all the years of the existence of that law has anything been done to this end until this office made the first move in the early part of the fiscal year. We have now obtained control of nearly all of the general distribution, and at the present time the only offices of any consequence selling their own publications are the Hydrographic Office (the law governing which makes it impossible to turn them over for sale by this office), and some of the bureaus of the Interior Department, which are still considering the advisability of abandoning their distribution and sales work and turning it over to this office as the law permits.

Even when we have succeeded in securing nearly all the departmental sales, we have not begun to eliminate the cause of so much useless confusion and expensive duplication in distribution, for the Congressional distribution is by far the most illogical and can never be improved until it is accomplished from the same center as that of the other publishing branches of the Government.

This promiscuous distribution by Congress, which is to be deplored, results in sending publications such as the horse or cattle books throughout districts in which automobiles and electric cars hold sway and where cattle are represented only in butcher shops and dairies, while the rural districts are flooded with "Flags of maritime nations," or single volumes of the series of "Messages and papers of the Presidents," instead of being supplied with the books published especially for their use. This statement is not exaggerated, and the condition arises from the present unsupervised methods of distribution.

The consolidation of the two folding rooms of Congress with this office would make the Superintendent of Documents an officer of great value to the entire Government; prevent the indiscriminate distribution of valuable documents in duplicate or triplicate to individuals or institutions not desiring them; preserve the statistics of printing at one place, thus making access to the records much easier to the Members and Senators; and provide a means by which the accumulations could be disposed of under the direction of an officer with all the statistics of past distributions to guide him. Perhaps it will be a matter of years before legislation to accomplish this end can be enacted, but it must ultimately come as a part of the general movement toward reform in business methods throughout the entire governmental establishment.

That public documents should be available for the use of the general public, and not accumulated in useless masses in the storerooms of this office, or of the various publishing offices, or of Congress, is indisputable. That thousands of valuable documents are stored away in many of these places, either from lack of energy or of knowledge as to how to distribute them, or because they are tied up by the operation of restrictive legislation, is also beyond doubt.

As rapidly as possible this office has been investigating these conditions and doing everything it consistently could to relieve the situations discovered. Tons of documents have been transferred to the jurisdiction of the Superintendent of Documents, cleaned up, and distributed or sold. Entries have become possible in our price lists of valuable publications which were considered obsolete until investigation revealed quantities stored away because of lack of knowledge as to how and where to place them. Many instances of this kind could be cited.

Being in touch with the libraries and the public, this office is in a condition to advise and place by distribution the books where they are desired.

RECENT LEGISLATION.

During the past fiscal year some of the most important legislation ever enacted in relation to public documents has become effective.

Continuing its good work in the line of stopping useless printing, at the same time in no wise interfering with the supply for legitimate demands, the Printing Investigation Commission has labored to make effective the two public resolutions (nos. 13 and 14), approved March 30, 1906, and the successful operation of the provisions of these resolutions has not only reduced the expense of public printing but has relieved this office of the receipt of a mass of undesirable publications. In the first year of their operation their feasibility has been thoroughly demonstrated, even to the most skeptical.

Early in the year the Commission called upon this office for various statistics and requested suggestions looking to legislation to provide necessary authority for accomplishing certain ends which the course of events had made almost mandatory, and to insure more systematic distribution in the future to libraries. For many weeks we cooperated with the Commission in formulating into a bill such provisions as would remedy existing evils, provide against duplication in distribution, and procure a more logical arrangement for binding.

The bill evolved became a law on March 1, 1907, and much good is expected to result therefrom. Besides providing for the printing of "extra copies" of bills or documents or reports, it reiterates the provisions of public resolution no. 13, of the Fifty-ninth Congress, first session, approved March 30, 1906, relating to the payment from allotments for departmental printing, and then takes up the matters directly connected with this office. In paragraph 1, of section 81, it provides for the numbering of documents and reports in four series—namely, Senate documents, Senate reports, House documents, and House reports—and further provides that those publications which are annual or serial in character and which originate in or are prepared by an Executive Department, bureau, office, commission, or board, shall not hereafter be numbered in either of these series, but be designated by title, and that the "usual number" of the Congressional edition of Department reports shall be printed concurrently with the Department edition.

Ever since the beginning of the Fifteenth Congress the Congressional documents and reports have been numbered as a matter of convenience, and this legislation simply authorizes a valuable and long-established custom, at the same time removing the only objection to the numbering by providing that the annual and serial publications of the Departments be distributed in their Department edition instead of as Congressional documents.

The former method of numbering everything serially was objectionable, in that it compelled this office to hold up valuable publications for a year at least and sometimes longer, until they could be arranged by document numbers in suitable volumes for binding. This delay caused the libraries to apply to the publishing offices for Department editions, as the documents are most sought for when newly issued, and if withheld are practically useless when distributed. In this way the libraries obtain two copies, and eventually discard one and return it to this office to be added to our vast accumulation.

Under the new law also these publications will be issued in but one edition, rather than as both departmental and Congressional documents. This will mean a saving of at least 20 per cent in the labor and cost of cataloguing, besides removing another source of perplexing duplication for the libraries to worry over.

There should be permitted but one print of any public document, and every reprint thereof should be identical with the original print, and new revised editions should be so indicated. The practice of substituting changed title-pages and issuing the same material thereunder is the poorest kind of bookmaking, and it is time it was abolished by practice if not by law.

NEEDED LEGISLATION.

While much has been accomplished in the way of simplifying the issue of Government publications and obtaining a more logical distribution, there are still many matters which require legislative attention before the affairs of this office can be adjusted harmoniously in accord with the fine business methods for which the system installed will prove a basis.

First and foremost in the library interests is the matter of quick delivery of all publications. In furtherance of good service in this respect, a law should be passed directing the Superintendent of Documents to furnish to depository libraries in unbound form as soon as issued all Congressional documents and reports other than annual and serial publications, for the immediate delivery of which in bound form the law of March 1, 1907, provides.

It would be desirable to send the serials out unbound and also furnish them in their final volume form. All these documents and reports should of course be provided to be distributed also in bound form when properly arranged under the present statutes.

Next in importance from the library standpoint is the question of legislation which will authorize the issue of a full Monthly catalogue with a cumulative index, and for which the price feature is removed to a regular price list. This enactment should also authorize the issue of the Document catalogues in their present biennial form instead of annually as the law now being violated demands, and give directions for the preparation of all necessary cards to catalogue the books sent to designated depositories, the distribution of enough of these cards free to depositories to meet all their requirements, and their sale to other libraries at a nominal sum to cover cost of printing and distribution.

I am of the opinion that the last feature would develop enough to cover the expenses incurred.

The repeal of a portion of section 61 is also very desirable. The clause referred to, and which should be stricken from the law, reads as follows:

> * * * But only one copy of any document shall be sold to the same person, excepting libraries or schools, by which additional copies are desired for separate departments thereof, and Members of Congress.

This provision was originally inserted to prevent booksellers from cornering the market on desirable publications, a practice which had become common, and which worked hardship to those who were interested in public documents. Since the law now permits the Superintendent of Documents, with the approval of the publishing office, to reprint any public document for which there may be a demand, it is now impossible for such a condition to exist, and the restrictions of the law operate only as a hindrance to our sales.

A law should also be at once enacted permitting the Superintendent of Documents to appoint a board for the condemnation of surplus public documents which have been superseded by later editions, or are useless because of their age or condition. Now he is forced to store these useless books and keep an accurate account thereof, and it costs $10,000 a year to do this—money absolutely wasted. With permission to condemn and sell as waste paper such public documents as are useless, he could keep his stock down to a working basis and convert worthless material into cash. Nearly 2,000,000 books and pamphlets are now on hand awaiting such condemnation proceedings, occupying valuable space, and serving but to accumulate dust and vermin.

Then, too, the provision relative to an itemized annual report should be repealed, as it is of no practical value.

THE ASHEVILLE CONFERENCE.

The fourth general session of the twenty-ninth annual meeting of the American Library Association, held at the Battery Park Hotel, Asheville, N. C., on the morning of May 28, 1907, marked an epoch in the history of public documents, for at that session for the first time the Government's representative, in the person of the Superintendent of Documents, formally met with the representatives of the libraries and discussed matters pro and con relative to the present methods of distribution of public documents, the needs of the libraries; and the duties and limitations which the laws relative to the subject impose.

Two hours were allowed for papers and discussion, and with a large attendance of delegates present the time was most profitably spent.

Following the report of the committee on public documents, it was my privilege to open the discussion with a few general remarks. Not a moment was lost of the entire time and every one went away feeling that a closer bond had been established between the libraries and this office.

Such a successful meeting should argue favorably for the allotment of some time at each annual conference for the consideration of the subject of public documents, so that the representative from this office may come in touch with those who are working with us in our endeavors to make public documents better known and more available.

CONCLUSION.

Looking back upon the work of the year, I am impressed with what has been accomplished, even though still faced by many unsolved problems. We have at least founded a substantial basis for development, and are no longer compelled, through pressing difficulties, to count the struggles and failures of the past, but are looking forward to great growth in the future.

The suggestions herein made are the result of careful deliberation and due to the present stress of circumstances. Being put forward in the right spirit they demand a hearing. Those which are of value will eventually be acted upon, as the logic of events compels such action, while any and all which exhibit errors of judgment will, I hope, be frowned down to make way for the favorable consideration of matters of more importance.

Respectfully submitted.

WILLIAM L. POST,
Superintendent of Documents.
